Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects 24 CFR Part 58

Project Information

Project Name: Altrudy II Senior Apartments

Responsible Entity: Orange County Housing and Community Development

Grant Recipient (if different than Responsible Entity): C&C Development

State/Local Identifier: California

Preparer: Suzanne Harder
Community Development Compliance and Environmental Coordinator

Certifying Officer Name and Title: Julia Bidwell
Director
Orange County Housing and Community Development

Consultant (if applicable): Dudek
725 Front Street, Suite 400
Santa Cruz, CA 95060

Direct Comments to: Suzanne Harder
Community Development Compliance and Environmental Coordinator
Orange County Housing and Community Development
(714) 480-2876
suzanne.harder@occr.ocgov.com

Project Location:

The Altrudy II Senior Apartments Project (project or proposed project) is located on an approximately 2-acre site at 18597 and 18602 Altrudy Lane in the City of Yorba Linda, California, 92886 (see **Figure 1, Project Location**). The proposed project site consists of two parcels (Assessor's Parcel Numbers [APNs] 323-231-18 [18597 Altrudy Lane] and 323-231-19 [18602 Altrudy Lane]).

Description of the Proposed Project [24 CFR 50.12 & 58.32; 40 CFR 1508.25]:

The proposed project would consist of demolition of two existing single-family residences on the project site, and construction and operation of a 64-unit affordable housing community for seniors. The units would be provided in one 62,171-square-foot, one- to three-story, U-shaped building (see **Figure 2, Site Plan**), with 50 one-bedroom and 14 two-bedroom units, as well as one unit reserved for an on-site property manager. Affordable housing would serve very low to low-income seniors (age 62 and over) with household income between 30% to 70% of the area median income (AMI). The proposed project would include eight Permanent Supportive Housing (PSH)/Mental Health Services Act (MHSA) units designed to support individuals who meet the MHSA eligibility criteria and are experiencing or at risk of homelessness. A total of 13 units would be reserved for seniors earning 30% AMI, 7 units would be reserved for seniors earning 50% AMI and 43 units would be reserved for seniors earning 70% AMI. In accordance with Section 504 of the Rehabilitation Act of 1973, for the new construction of federally assisted multifamily rental properties, 5% of the units would be accessible to individuals with mobility impairments and 2% of the units would be accessible to individuals with sensory impairments.

The building would have elevator access. Each floor would have a lobby, laundry room, trash room, storage rooms, and equipment and mechanical rooms. The first floor would also include a leasing office, community room, and utility rooms. Common open space amenities would include an entry plaza semi-enclosed by the building with landscaping, seating, and pedestrian hardscaping; a barbeque pavilion and a dog park located in the northwestern corner of the site; and pedestrian pathways throughout the site. Common open space areas would comprise approximately 14% of the site (17,791 square feet). The project would be all electric and would not use natural gas.

Altrudy Lane would be extended from the existing southwest corner of the site along the southern boundary of the project site. Site ingress and egress would be provided from a single driveway from Altrudy Lane. The driveway would lead to an L-shaped surface parking lot that would border the eastern and northern project site boundaries. The parking lot would contain a total of 72 parking spaces, comprised of 29 standard spaces, 12 spaces accessible to individuals with disabilities in compliance with the Americans with Disabilities Act, and 31 total proposed electric vehicle (EV) spaces including 8 EV-capable spaces, 19 EV-ready spaces, and 4 EV charging station spaces.

Project implementation required the rezoning of the project site from R-S (Residential Suburban) to R-M-20 (Residential Multiple-Family 20) and amendment of the General Plan land use designation from Residential Medium (R-Medium) to Residential High (R-High) which was approved by the Yorba Linda City Council and effectuated with the successful vote of Measure JJ (Yorba Linda Local Control, Residential Neighborhood, Open Space Protection Measure) on the November 2024 ballot. The R-M-20 zone district is intended to promote the development of multi-family rental as well as ownership dwelling units up to 20 dwelling units per acre (Yorba Linda Municipal Code Chapter 18). Therefore, the allowable density on the project site is 40 units; however, the project would utilize the State Density Bonus pursuant to California Government Code Sections 65915-65918 to allow a residential density of 32 dwelling units per acre on the project site to accommodate 64 units. The State Density Bonus Law allows 100% affordable housing projects to utilize an up to 80% Density Bonus increase and up to four concessions/incentives from the City's development standards. The Density Bonus for the project is 60%.

ALTRUDY II SENIOR
APARTMENTS
2 & 3-STORY

Statement of Purpose and Need for the Proposal [40 CFR 1508.9(b)]:

The purpose of the project is to develop 64 units of affordable housing for seniors earning 30% to 70% of AMI in an area with high housing costs and limited affordable housing.

High housing costs, limited affordable housing supply, and scarcity of land pose challenges in the project area. HUD’s most recent comprehensive housing market analysis for Anaheim-Santa Ana-Irvine Housing Market Area, which includes the entirety of Orange County including the City of Yorba Linda, dated January 1, 2022, found the rental market to be “tight” with a vacancy rate of 4.0% and a demand for 14,200 new rental units over a 3-year forecast period and only 6,000 units under construction (HUD 2022). The City of Yorba Linda’s Housing Element highlights the need for affordable housing for seniors as a significant priority, identifies the proposed project site as a housing opportunity site proposed to be rezoned in its inventory of residential sites, and identifies the proposed project (City of Yorba Linda 2024a). According to the SCAG Regional Housing Needs Allocation (RHNA) Plan for 2021-2029, the City of Yorba Linda needs to add 2,415 new housing units over the planning cycle, including 765 units for the very-low income (<50% of AMI) and 451 units for the low income (50-80% of AMI) demographic groups to meet housing needs from 2021 to 2029 (SCAG 2021). The project would help address the City’s housing needs in compliance with state requirements.

Existing Conditions and Trends [24 CFR 58.40(a)]:

The project site is owned by the City of Yorba Linda (City) and consists of two parcels located at 18597 and 18602 Altrudy Lane, Yorba Linda, California 92886 (APNs 323-231-18 and -19) and totals approximately 2 acres. The site is developed with two vacant single-family residences and associated improvements, including garages, storage buildings, a tennis court, and a swimming pool. The project site is also developed with asphalt-paved driveways and parking areas, as well as concrete-paved garages. Historically, the project site was developed with orchards starting in 1938 until 1953. The orchards were then removed in the mid-1960s and the existing residential buildings were constructed by 1966.

The project site is located at the end of Altrudy Lane in a commercial and residential area. The site is bordered by single family residential land uses to the north and east, multi-family housing and commercial land uses to the south, and multi-family housing (the recently completed Altrudy Lane I Senior Apartments) to the west. As mentioned above, the project site was in the R-S zone district (City of Yorba Linda 2019) and R-Medium General Plan land use designation (City of Yorba Linda 2016a), but was rezoned to R-M-20 and the General Plan land use designation was changed to R-High in November 2024.

Funding Information

Grant Number	HUD Program	Funding Amount
N/A	8 Housing Choice Project-Based Vouchers	\$3,244,800

Estimated Total HUD Funded Amount: \$3,244,800

Estimated Total Project Cost (HUD and non-HUD funds) [24 CFR 58.32(d)]: \$36,101.782

Compliance with 24 CFR 50.4, 58.5, and 58.6 Laws and Authorities

Record below the compliance or conformance determinations for each statute, executive order, or regulation. Provide credible, traceable, and supportive source documentation for each authority. Where applicable, complete the necessary reviews or consultations and obtain or note applicable permits of approvals. Clearly note citations, dates/names/titles of contacts, and page references. Attach additional documentation as appropriate.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
<p>STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 and 58.6</p>		
<p>Airport Hazards 24 CFR Part 51 Subpart D</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>HUD’s policy is to apply standards to prevent incompatible development around civil airports or military airfields, consistent with Title 24 of the Code of Federal Regulations (CFR), Part 51, Subpart D. According to the U.S. Environmental Protection Agency’s (EPA’s) NEPAAssist tool (EPA 2024c), the project site is not located within 2,500 feet of a civilian airport or 15,000 feet of a military airport. The nearest civilian airport, Fullerton Municipal Airport, is located approximately 9.5 miles west of the project site and the nearest military airport, Los Alamitos Army Airfield, is located approximately 14.3 miles southwest of the project site. Therefore, the project is in compliance with airport hazards requirements (see Attachment 1; see Environmental Review Record [ERR] 1).</p>
<p>Coastal Barrier Resources Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>The Coastal Barrier Resources Act (CBRA) of 1982 designated relatively undeveloped coastal barriers along the Atlantic and Gulf coasts as part of the John H. Chafee Coastal Barrier Resources System (CBRS) and made these areas ineligible for most new federal expenditures and financial assistance. The Coastal Barrier Improvement Act (CBIA) of 1990 reauthorized the CBRA; expanded the CBRS to include undeveloped coastal barriers along the Florida Keys, Great Lakes, Puerto Rico, and U.S. Virgin Islands; and added a new category of coastal barriers to the CBRS called “otherwise protected areas” (OPAs). OPAs are undeveloped coastal barriers that are within the boundaries of an area established under federal, state, or local law, or held by a qualified organization, primarily for wildlife refuge, sanctuary, recreational, or natural resource conservation purposes.</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>The project is located in California. There are no units of the CBRS in California and the project site is not located within a CBRS Unit (USFWS 2023). Therefore, the project is in compliance with the CBRA and CBIA (see Attachment 2).</p>
<p>Flood Insurance</p> <p>Flood Disaster Protection Act of 1973 and National Flood Insurance Reform Act of 1994 [42 USC 4001-4128 and 42 USC 5154a]</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>The Flood Disaster Protection Act of 1973 (42 USC 4012a) requires that projects receiving federal assistance and located in an area identified by FEMA as being within a Special Flood Hazard Area (SFHA) be covered by flood insurance under the National Flood Insurance Program (NFIP). SFHAs are hazard areas that are subject to inundation by the base flood (1%-annual-chance flood). On flood maps, SFHAs are labeled as zones starting with the letters A or V. Flood insurance is required by federally regulated lenders for properties within SFHAs to protect federal financial investments. Non-Special Flood Hazard Areas are either areas between the limits of the base flood and the 0.2%-annual-chance flood (flood zones labeled Zone X [shaded] or B) or areas which are higher than the elevation of the 0.2%-annual-chance flood (flood zones labeled Zone X [unshaded] or Zone C). Flood insurance is available in participating communities but is not required by regulation in these zones.</p> <p>Communities are given the opportunity to review the preliminary flood zone maps and provide comments and appeals on the engineering and mapping that went into the process. Once maps are finalized, communities must adopt the final map to stay in good standing with the NFIP.</p> <p>According to the Federal Emergency Management Agency’s (FEMA) Flood Insurance Rate Map No. 06059C0068J, effective December 3, 2009 (FEMA 2009), the project site is located within unshaded Zone X, an area of minimal flood hazard. Therefore, the project site is not located within a SFHA.</p> <p>According to the NFIP Community Status Book (FEMA 2024), the project site City (Yorba Linda) participates in the NFIP (Community Identification Number 060238#). Therefore, the project is in compliance with flood insurance requirements (see Attachment 3; see ERR 2).</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
<p>STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 & 58.5</p>		
<p>Clean Air</p> <p>Clean Air Act, as amended, particularly section 176(c) & (d); 40 CFR Parts 6, 51, 93</p>	<p>Yes No</p> <p><input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>The Clean Air Act was implemented to remedy the damaging effects that bad air quality can have on human health and the environment and was most recently revised in 1990, when major changes were enacted. The Clean Air Act is administered by the U.S. Environmental Protection Agency (EPA), which sets National Ambient Air Quality Standards (NAAQS). NAAQS are limits on certain “criteria” air pollutants, including limits on how much of the pollutants can be in the air anywhere in the U.S. Geographic areas that are in compliance with the NAAQS are called “attainment areas,” while areas that do not meet the standards are called “nonattainment” areas. Federal de minimis thresholds refer to the minimum emission rates of criteria pollutants below which a conformity determination is not required for a project. These thresholds vary depending on the pollutant and the area’s attainment status and are provided at 40 CFR § 93.153(b)(1) and (b)(2).</p> <p>The project site is located in the South Coast Air Basin (SoCAB), which includes all of Orange County and the urbanized portions of Los Angeles, Riverside, and San Bernardino counties, under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is classified as an “extreme” nonattainment area for the federal 2015 ozone standard and a “serious” nonattainment area for the federal 2006 24-hour PM_{2.5} standard, and a maintenance area for the federal coarse particulate matter (PM₁₀) standard. The SoCAB is designated as in extreme nonattainment with the NAAQS for ozone (O₃), serious nonattainment for fine particulate matter (PM_{2.5}), and partial nonattainment for lead (Pb) (i.e., Orange County is in attainment but Los Angeles County within the SoCAB is in nonattainment) (EPA 2024a). The SoCAB is designated as a maintenance area for coarse particulate matter (PM₁₀), carbon monoxide (CO), nitrogen dioxide (NO₂), and sulfur dioxide (SO₂).</p> <p>Project construction and operation would generate criteria air pollutant emissions. Construction equipment and associated heavy-duty truck traffic generate diesel exhaust,</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>																																			
		<p>which in turn generates air pollutant emissions. Site preparation activities produce fugitive dust emissions (PM₁₀ and PM_{2.5}). The project would be required to comply with SCAQMD regulations for controlling fugitive dust pursuant to SCAQMD Rule 403, which requires the implementation of best available dust control measures during active operations capable of generating fugitive dust. Air pollutant emissions from construction activities on-site would vary daily as construction activity levels change. Long-term criteria air pollutant emissions would result from the operation of the proposed project. Emissions generated during operation of this proposed project would involve the use of on-road mobile vehicles, electricity, water, and landscape equipment, as well as generation of solid waste and wastewater.</p> <p>Emissions from the construction and operational phases of the project were estimated using the California Emissions Estimator Model (CalEEMod) Version 2022.1.1.28. Table 1 summarizes the CalEEMod results. As shown in Table 1, annual construction and operational criteria pollutant emissions would be below federal <i>de minimis</i> thresholds.</p> <p>Table 1. Estimated Annual Construction and Operational Criteria Air Pollutant Emissions</p> <table border="1" data-bbox="768 1318 1455 1761"> <thead> <tr> <th>Criteria Pollutant</th> <th>Annual Construction Emissions (tpy)</th> <th>Annual Operational Emissions (tpy)</th> <th>De Minimis Threshold (tpy)</th> <th>Thresholds Exceeded?</th> </tr> </thead> <tbody> <tr> <td>VOC</td> <td>0.31</td> <td>0.72</td> <td>10</td> <td>No</td> </tr> <tr> <td>NO_x</td> <td>1.41</td> <td>0.10</td> <td>10</td> <td>No</td> </tr> <tr> <td>CO</td> <td>1.96</td> <td>1.74</td> <td>100</td> <td>No</td> </tr> <tr> <td>SO_x</td> <td><0.01</td> <td><0.01</td> <td>N/A</td> <td>No</td> </tr> <tr> <td>PM₁₀</td> <td>0.16</td> <td>0.28</td> <td>100</td> <td>No</td> </tr> <tr> <td>PM_{2.5}</td> <td>0.07</td> <td>0.12</td> <td>70</td> <td>No</td> </tr> </tbody> </table> <p>In addition, the SCAQMD has established significance thresholds to determine whether a project would have a</p>	Criteria Pollutant	Annual Construction Emissions (tpy)	Annual Operational Emissions (tpy)	De Minimis Threshold (tpy)	Thresholds Exceeded? <p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>In summary, project emissions would be below <i>de minimis</i> levels and SCAQMD significance thresholds, in accordance with HUD guidance. Therefore, the proposed project is in compliance with the Clean Air Act (see Attachment 4; see ERR 3).</p>
<p>Coastal Zone Management Coastal Zone Management Act, sections 307(c) & (d)</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>The Coastal Zone Management Act (CZMA) of 1972 (16 USC 1451 et seq.) is administered at the federal level by the Coastal Programs Division within the National Oceanic and Atmospheric Administration’s Office of Ocean and Coastal Resource Management (NOAA-OCRM). Projects that can affect the coastal zone must be carried out in a manner consistent with the state coastal zone management program under Section 307(c) and (d) of the CZMA. Under California’s federally approved Coastal Management Program, the California Coastal Commission (CCC) manages development along the California coast (except for San Francisco Bay). The California Coastal Act is the foundation of the California Coastal Management Program, and defines the State’s coastal management goals and policies, establishes the boundaries of the State’s coastal zone, and creates governmental mechanisms for carrying out the management program. The California Coastal Act requires that individual jurisdictions adopt a Local Coastal Program (LCP) to implement the California Coastal Act at the local level. Generally, any “development” activity in the Coastal Zone requires a Coastal Development Permit from the CCC or local government with a certified LCP.</p> <p>The project site is located approximately 20 miles inland in the City of Yorba Linda. Neither the project site nor any portion of the City is located within the coastal zone (CCC 2019). As such, the project would not occur within or affect a coastal zone. Therefore, the project is in compliance with the CZMA (see Attachment 5; see ERR 4).</p>
<p>Contamination and Toxic Substances 24 CFR Part 50.3(i) & 58.5(i)(2)</p>	<p>Yes No <input checked="" type="checkbox"/> <input type="checkbox"/></p>	<p>HUD policy, as described in Section 50.3(i) and Section 58.5(i)(2), states the following:</p> <p>(1)... all property proposed for use in HUD programs be free of hazardous materials, contamination, toxic chemicals and gasses, and radioactive substances,</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>where a hazard could affect the health and safety of occupants or conflict with the intended utilization of the property.</p> <p>(2) HUD environmental review of multifamily and non-residential properties shall include evaluation of previous uses of the site and other evidence of contamination on or near the site, to assure that occupants of proposed sites are not adversely affected by the hazards.</p> <p>(3) Particular attention should be given to any proposed site on or in the general proximity of such areas as dumps, landfills, industrial sites, or other locations that contain, or may have contained, hazardous wastes.</p> <p>(4) The responsible entity shall use current techniques by qualified professionals to undertake investigations determined necessary.</p> <p>Sites known or suspected to be contaminated by toxic chemicals or radioactive materials include, but are not limited to, sites: (i) listed on an EPA Superfund National Priorities or the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) List, or equivalent State list; (ii) located within 3,000 feet of a toxic or solid waste landfill site; or (iii) with an underground storage tank (UST) (which is not a residential fuel tank).</p> <p>A Phase I Environmental Site Assessment (ESA) was completed for the project site by Integrated Property Analysis, Inc. (IPA) in December 2019 (Attachment 6). While the Phase I ESA did not identify any recognized environmental conditions (RECs) in connection with the property, numerous cars and car parts, including gasoline tanks, were observed to be stored on the paved and unpaved areas throughout the project site. Due to the large number of automotive materials and parts observed at 18597 Altrudy Lane, evidence of spills, leaks, or releases could not be identified. As a result, a Phase II ESA was required for a portion of the proposed project site (18597 Altrudy Lane) to assess the potential impacts from automotive uses at the project site. Phase II activities were not performed on the 18602 Altrudy Lane portion of the project site since</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>automotive repairs were not known to be routinely performed on that property.</p> <p>The Phase II ESA was completed by Conservation Consulting International (CCI) in January 2020 (Attachment 7). The report evaluated soil conditions on site through the collection and analysis of select soil samples. Soil borings were collected throughout the project site from five different locations. At each location, a soil boring was collected at a maximum depth of 5 feet and soil samples were taken from the boring at depths of 1 foot, 3 feet, and 5 feet. Select soil samples were analyzed for VOCs using U.S. EPA method 8260B and total petroleum hydrocarbons carbon chain identification (TPH CC ID) using US EPA method 8015M. The results of the analysis did not detect concentrations of VOCs or TPH CC ID above their respective practical quantitation limits (PQLs). Therefore, the Phase II ESA concluded that current and historical use of 18597 Altrudy Lane for automotive repairs has not adversely impacted the subsurface environment beneath the property no further assessment was recommended.</p> <p>IPA prepared an updated Phase I ESA for the project site in August 2024 (Attachment 8), which found no evidence of any RECs, historical RECs, or controlled RECs in connection with the project site. No aboveground storage tanks (ASTs) or underground storage tanks (USTs) were observed on site during the site reconnaissance. In addition, no significant amounts of petroleum products were observed to be in use on site. Routine janitorial and maintenance supplies were identified on site and appeared to be properly stored. No evidence of spills or staining was observed in the areas of product storage.</p> <p>Toxic polychlorinated biphenyls (PCBs) have been historically used in electric equipment, though their use outside of totally enclosed equipment was prohibited in 1977. Transformers and other potential PCB-containing equipment, such as indoor transformers, were not observed on the project site during the site visit. In addition, no</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>evidence of pooling liquid, stained soils, pits, ponds, or lagoons were identified on site.</p> <p>Inspections for asbestos (Attachment 9) and lead-based paint (LBP) (Attachment 10) were conducted for each parcel comprising the project site by Barr & Clark in December 2019.</p> <p>The purpose of the asbestos assessment was to identify whether asbestos-containing construction materials (ACCMs) were present so that they may be properly managed prior to demolition of the structures. The assessment included the collection of physical bulk samples of suspect materials from representative locations throughout the property for submission to an independent laboratory for analysis. If asbestos was detected at any concentration within a sample of a construction material, it was concluded that the material contained asbestos. Suspect materials were also inspected visually to assess their condition. Sampling was patterned after the Asbestos School Hazard Emergency Response Act (40 CFR 763 Subpart E) as mandated by Cal/OSHA (Title 8 Section 1529) and South Coast Air Quality Management District (Rule 1403). ACCMs were identified in multiple areas throughout the existing building at 18597 Altrudy Lane, including in the building’s exterior stucco, roofing mastic, duct insulation material, and asbestos cement pipes. All ACCMs were found to be in damaged condition at the time of the assessment, except for the asbestos cement pipes, which were in good condition. ACCMs were also identified in multiple areas throughout the existing building at 18602 Altrudy Lane, including in the building’s exterior stucco, roofing mastic, flooring, flooring mastic, duct insulation material, and asbestos cement pipes, all of which were in good condition.</p> <p>Materials found to contain asbestos and/or presumed to contain asbestos that could be impacted during demolition activities, by law, must first be abated and properly disposed of by a licensed asbestos abatement contractor prior to such work. ACCMs in damaged or significantly damaged condition pose the greatest risk for asbestos exposure and should be removed in accordance with</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>SCAQMD Rule 1403 Procedure 5 (MM-TOX-1). No action is recommended for ACCMs in good condition as they present minimal risk for asbestos exposure.</p> <p>LBP testing at the proposed project site was conducted in accordance with Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing. To comply with EPA and HUD guidelines, painted and varnished surfaces in every accessible “room equivalent” were sampled for the presence of LBPs. X-ray fluorescence (XRF) readings were collected to test painted and coated surfaces on site for LBP. Materials were considered as containing LBP if they exceeded the HUD/EPA threshold of 0.7 mg/cm² (24 CFR 35.86 and 40 CFR 745.103). Several painted components throughout the project site indicated the presence of LBP at concentrations at or above the action level. At 18597 Altrudy Lane, these locations included in the tiled surfaces in bathroom 2 inside the property, and in the eaves, rafters, and fascia on the exterior of the property. At 18602 Altrudy Lane, these included the interior passageway door at the garage, tiled surfaces in the living room and kitchen, and exterior passageway door at the garage. Sampling for LBPs on site is considered representative and any components that were not tested but are similar to components that tested positive for LBP during the assessment should be considered and treated as lead laden.</p> <p>The results from the LBP inspection should be provided to any individuals that may disturb the painted surfaces containing LBP on site. All lead-laden components identified would be demolished or abated by certified lead trained personnel in accordance with all applicable federal, state, and local regulations. Implementation of MM-TOX-2 would further minimize exposures to lead hazards.</p> <p>HUD guidance issued on January 11, 2024, requires that radon be considered in the contamination analysis for 24 CFR Parts 50 or 58. Radon is a naturally occurring, odorless, and invisible gas. Radon is a decay product of the unstable element uranium, a common constituent of soil and rock. Under certain natural conditions, the radon gas can enter surface soils and become part of the soil gas</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>environment, which then can enter the air, including air inside of buildings. When soil gas that contains radon enters a building, radon and its decay products are either directly inhaled, or attached to dust on walls, floors and in the air, which then can be inhaled. These decay products then undergo further decay, resulting in the release of subatomic alpha particles. This alpha particle radiation can cause mutations in lung tissue which can lead to lung cancer. The risk of contracting lung cancer from radon increases with an increase in the concentration of radon in the air that is breathed by building occupants. EPA recommends mitigation for residences with radon concentrations at or above 4.0 picocuries per liter (pCi/L) of air (HUD 2021).</p> <p>HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases. HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021).</p> <p>In addition, per Section 9.6.3.2 of HUD’s Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), radon testing is required for new construction of multifamily housing at completion of construction and prior to final endorsement. If indoor radon levels are found to exceed the EPA action level of 4.0 pCi/L, then mitigation is required. Implementation of MM-TOX-3 would ensure compliance with HUD’s radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA’s threshold of 4.0 pCi/L. This ERR will be updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy.</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>Therefore, the proposed project is in compliance with HUD’s requirements related to contamination and toxic substances (see Attachments 6-10; see ERR 5).</p>
<p>Endangered Species Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>The Endangered Species Act of 1973, as amended, and its implementing regulations are designed to protect and recover species in danger of extinction and the ecosystems that they depend upon. When passed, the Endangered Species Act spoke specifically to the value—tangible and intangible—of conserving species for future generations. In passing the Endangered Species Act, Congress recognized a key fact that subsequent scientific understanding has only confirmed: the best way to protect species is to conserve their habitat.</p> <p>According to HUD guidance, the environmental review of a proposed project must consider potential impacts to endangered and threatened species and critical habitats. A No Effect determination can be made if none of the activities involved in the project have potential to affect species or habitats.</p> <p>Due to the developed setting surrounding the project site, no federally listed special-status plant or wildlife species are expected to be present on site. The USFWS offers consultation on threatened and endangered wildlife and plant species, as well as critical habitats, on a project-by-project basis. According to the USFWS Environmental Conservation Online System (ECOS) Information for Planning and Consultation (IPaC) service (USFWS 2024), six threatened or endangered species have the potential to occur on the project site, listed as follows (USFWS 2020a):</p> <ul style="list-style-type: none"> • Birds: Coastal California gnatcatcher (<i>Polioptila californica californica</i>), least Bell’s vireo (<i>Vireo bellii pusillus</i>) • Amphibians: western spadefoot (<i>Spea hammondi</i>) • Insects: monarch butterfly (<i>Danaus plexippus</i>) • Reptiles: southwestern pond turtle (<i>Actinemys pallida</i>) • Flowering Plants: Nevin’s barberry (<i>Berberis nevinii</i>)

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>As stated in the IPaC report and confirmed through NEPAssist mapping of the project site, although the general habitat ranges of these six species overlap with the project location, their critical habitat areas do not intersect with the project site (USFWS 2020a). Given the urbanized nature of the project site and scarcity of on-site native vegetation, it is unlikely that any special-status species would occur on site due to a lack of suitable habitat. As such, the project would not result in potential substantial adverse effects to plant and wildlife species or their habitats protected under the Endangered Species Act. Trees on the project site provide potential nesting habitat for bird species protected by the Migratory Bird Treaty Act (MBTA). Compliance with the MBTA would require that the Applicant either conduct pre-construction nesting surveys to confirm that no nesting birds protected under the MBTA are present, or conduct tree removal outside of the nesting season. Nesting birds would be protected with compliance with required regulations. Therefore, the project is in compliance with the Endangered Species Act (see Attachment 11; see ERR 6).</p>
<p>Explosive and Flammable Hazards 24 CFR Part 51 Subpart C</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>Regulations set forth in 24 CFR Part 51 Subpart C require HUD-assisted projects to be separated from hazardous facilities that store, handle, or process hazardous substances by a distance based on the contents and volume of the facilities' aboveground storage tank (AST), or to implement mitigation measures. The requisite distances are necessary, because project sites that are too close to facilities handling, storing, or processing conventional fuels, hazardous gases, or chemicals of an explosive or flammable nature may expose occupants or end-users of a project to the risk of injury in the event of a fire or an explosion. The regulations apply only to ASTs with a storage capacity of at least 100 gallons.</p> <p>A search of the California Environmental Protection Agency's (CalEPA) website for aboveground petroleum storage and chemical storage sites was conducted to identify aboveground flammable materials storage within a 1-mile radius of the project site (CalEPA 2024). A review of the database search results identified a total of 20 facilities within 1 mile of the project site that reported storing</p>

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		<p>flammable chemicals on site, of which 7 sites contained hazardous chemicals listed in Appendix I of 24 CFR Part 51 Subpart C. HUD's Acceptable Separation Distance (ASD) Assessment Tool was used to calculate the minimum separation distance between the project site and these eight CalEPA sites. When calculating the ASD, all ASTs were assumed to be unpressurized and not diked, and the maximum quantity stored was used to calculate the ASD. All sites exceeded HUD's required minimum ASD for the quantities of chemicals present. As a result, the proposed project would not expose future residents to the risk of injury in the event of a fire or an explosion. Therefore, the project is in compliance with explosive and flammable hazards requirements (see Attachment 12; see ERR 7).</p>
Farmlands Protection Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The importance of farmlands to the national and local economy requires the consideration of the impact of activities on land adjacent to prime or unique farmlands. The purpose of the Farmland Protection Policy Act (7 USC Section 4201 et seq., implementing regulations 7 CFR Part 658, of the Agriculture and Food Act of 1981, as amended) is to minimize the effect of federal programs on the unnecessary and irreversible conversion of farmland to nonagricultural uses.</p> <p>According to the California Department of Conservation (DOC) California Important Farmland Finder (DOC 2022), the project site and surrounding areas are designated as "Urban and Built-up Land." The DOC defines Urban and Built-up Land as land that is "used for residential, industrial, commercial, construction, institutional, public administration, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes." As such, the project site does not contain farmland, and the project would not result in the conversion of farmland to a non-agricultural use. Therefore, the project is in compliance with the Farmland Protection Policy Act (see Attachment 13; see ERR 8).</p>
Floodplain Management	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The provisions of Executive Order 11988, Floodplain Management, require federal activities to avoid impacts to floodplains and to avoid direct and indirect support of</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
<p>Executive Order 11988, particularly section 2(a); 24 CFR Part 55</p>		<p>floodplain development to the extent practicable. Executive Order 13690, Establishing a Federal Flood Risk Management Standard (FFRMS) and a Process for Further Soliciting and Considering Stakeholder Input, revised Executive Order 11988 and established a new FFRMS to address current and future flood risk, improve resiliency, and ensure that projects funded with taxpayer dollars last as long as intended. Executive Order 14030, Climate-Related Financial Risk, subsequently furthered measures to address climate-related financial risk. HUD’s regulations in 24 CFR Part 55 outline HUD’s procedures for complying with Executive Orders 11988, 13690, and 14030. The regulations define a new floodplain of concern, the FFRMS floodplain, which extends beyond the traditional 100-year floodplain to account for increased flood risk over time.</p> <p>The extent of the FFRMS floodplain can be determined using one of three approaches depending on available data and information: the Climate-Informed Science Approach (CISA), the 0.2-Percent-Annual-Chance Floodplain Approach (0.2PFA), and the Freeboard Value Approach (FVA). For non-critical actions, where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.</p> <p>Critical actions are activities where even a slight risk of flooding would be too great, because of the potential loss of life, injury to persons, or damage to properties. This applies to hospitals, nursing homes, fire and police stations, and roads providing sole egress from flood-prone areas. Non-critical actions consist of housing, community centers, independent living for the elderly, and commercial activities. Therefore, the project is a non-critical action.</p> <p>No HUD-approved CISA maps are available for the project site; however, FEMA has mapped the 0.2% annual chance of flood (i.e., 500-year floodplain). Therefore, this analysis uses the 0.2PFA approach. As indicated above, the project site is not located within the FEMA-designated 500-year floodplain. As such, based on the project location and designation as a non-critical action, the proposed action is</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>not in the coastal or riverine FFRMS floodplain. Therefore, the project is in compliance with 24 CFR Part 55 (see Attachment 3; see ERR 9).</p>
<p>Historic Preservation National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800</p>	<p>Yes No <input checked="" type="checkbox"/> <input type="checkbox"/></p>	<p>The National Historic Preservation Act (NHPA) (16 USC 470 et seq.) directs each federal agency, and those tribal, State, and local governments that assume federal agency responsibilities, to protect historic properties and to avoid, minimize, or mitigate possible harm that may result from agency actions. The review process, known as Section 106 review, is detailed in 36 CFR Part 800. Early consideration of historic places in project planning and full consultation with interested parties are key to effective compliance with Section 106. The State Historic Preservation Officer (SHPO) and/or Tribal Historic Preservation Officer (THPO) are primary consulting parties in the process.</p> <p>Dudek prepared a Cultural Resources Inventory and Evaluation Report for the project in November 2024 to determine if the project would impact any historic properties pursuant to Section 106 of the NHPA (Attachment 14). The preparation of the report included the development of an area of potential effects (APE), a records search of the California Historical Resources Information System (CHRIS), outreach to local historical societies requesting information about historic properties in the vicinity of the APE, an intensive-level survey of the APE for built resources of historic age (45 years of age or older), building development and archival research, and the development of appropriate historic contexts, and recordation and evaluation of these two historic-era properties located within the APE under National Register of Historic Places (NRHP) and California Register of Historical Resources (CRHR) listing criteria. The findings of the report are summarized as follows.</p> <p><u>Area of Potential Effects</u> The APE includes two residential properties, 18597 Altrudy Lane (APN 323-231-18), constructed in 1965; and 18602 Altrudy Lane (APN 323-231-19), constructed in 1959. The APE encompasses approximately 2 acres.</p>

		<p><u>Records Search</u> A confidential records search of the APE and a 1-mile buffer was conducted at the South Central Coastal Information Center at California State University, Fullerton to identify historic properties located within the APE that might be affected by the proposed undertaking. The records search indicated that 32 previous cultural resources technical investigations were conducted within 1 mile of the APE and 13 previously identified cultural resources have been recorded within 1 mile of the APE. None of the previously identified cultural resources are located within or adjacent to the APE.</p> <p><u>Site Survey</u> On October 24, 2024, Dudek architectural historian Katie Ahmanson, MHC, conducted an intensive-level survey of the entire APE for built resources 45 years of age or older. Due to the developed nature of the project site, Dudek did not conduct an intensive-level archaeological resources pedestrian survey of the APE. The built environment survey included an evaluation of two historic-era resources within the APE under NRHP and CRHR listing criteria. The survey concluded that neither of the subject properties is eligible for listing in the NRHP or CRHR due to a lack of significant associations and architectural merit.</p> <p><u>Determination</u> No historic properties were identified within or adjacent to the APE. Dudek’s report recommends a finding of No Historic Properties Affected for the project under Section 106 of the NHPA. Mitigation Measures MM-CUL-1 and MM-CUL-2 would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations.</p> <p><u>Consultation</u> Based on a search of HUD’s Tribal Directory Assessment Tool (TDAT), no federally recognized tribes that may have an interest in the area where the project is located were identified. The County sent a letter to the SHPO on December 9, 2024, requesting concurrence on the finding of No Historic Properties Affected (Attachment 15). The SHPO did not respond within 30 days of receiving the County’s request for a finding or determination. As a result, the County’s consultation requirements with the SHPO are complete (see Attachments 14-15; see ERR 10).</p>
<p>Noise Abatement and Control</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>According to HUD’s noise standards set forth in 24 CFR Part 51, Subpart B, all sites who’s environmental or community noise exposure exceeds the day night average</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
<p>Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B</p>		<p>sound level (DNL) of 65 decibels (dB) are considered noise-impacted areas. HUD guidance includes screening criteria to assist in evaluating a project’s consistency with the foregoing standard. Pursuant to HUD guidance, potentially significant noise generators within the vicinity of a project include major roadways, if within 1,000 feet of a project site, railroads, if within 3,000 feet, and military or Federal Aviation Administration-regulated (FAA) airfields, if within 15 miles. Documentation that a project is not within the applicable distances to the foregoing noise generators demonstrates compliance with HUD’s noise standard. If within the aforementioned distance, a project may show the noise level is at or below 65 dB to demonstrate consistency with the Noise Control Act of 1972.</p> <p>Dudek prepared a Noise Technical Memorandum for the proposed project in November 2024 to evaluate the project’s consistency with HUD’s noise standards. The primary noise source in the project vicinity is motor vehicle traffic. The western façade of the proposed residential units would face Lakeview Avenue, the northern façade would face Oriente Drive, and the eastern façade would face Avocado Avenue. State Route 90 is approximately 1,670 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 9.5 miles away and would have a negligible contribution to the on-site noise environment at the project site.</p> <p>A noise analysis of traffic from Lakeview Avenue, Oriente Drive, and Avocado Avenue was carried out using HUD’s DNL Calculator, which indicated that worst-case exterior building façade noise levels would not exceed the “acceptable” HUD standard of 65 A-weighted decibels (dBA) DNL. Average Daily Traffic (ADT) volumes for Lakeview Avenue, Oriente Drive, and Avocado Avenue were retrieved from the City of Yorba Linda. The results of the traffic noise analysis determined that exposure from traffic noise at all building facades would range from 52 to 54 dBA, thus noise levels at the project site would not exceed the HUD exterior noise standard of 65 dBA DNL and would be within the “acceptable” noise range. Therefore, the project is in compliance with 24 CFR Part 51, Subpart B and</p>

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		no enhanced building designs are needed to reduce ambient noise levels on site (see Attachment 16 ; see ERR 11).
Sole Source Aquifers Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>Aquifers and surface water are drinking water systems that may be impacted by development. The Safe Drinking Water Act of 1974 requires protection of drinking water systems that are the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health. The EPA's Map of Sole Source Aquifer Locations (EPA 2024d) was used to identify sole-source aquifers in the vicinity of the project site.</p> <p>The project site is not located within an area designated by the EPA as being supported by a sole source aquifer. The project site is located approximately 102 miles to the north of the nearest sole source aquifer, which is the Campo/ Cottonwood Creek Aquifer located in San Diego County at the border of California and Mexico. As such, the project site is not located in a region that depends solely on an aquifer for access to water or located within a sole source aquifer recharge area. Thus, no impact on sole source aquifers would occur. Therefore, the proposed project is in compliance with the Safe Drinking Water Act of 1974 (see Attachment 17; see ERR 12).</p>
Wetlands Protection Executive Order 11990, particularly sections 2 and 5	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>According to the EPA, wetlands are characterized by hydrology, soils, and vegetation. The NEPAassist Tool (EPA 2024c), which utilizes wetlands data published on the U.S. Fish and Wildlife Service's National Wetland Inventory mapper, was used to identify wetlands on or near the project site. No wetlands are located on or near the project site. The nearest wetland feature is a drainage ditch, which is classified as a riverine feature by USFWS, that runs approximately 0.52 miles southwest of the proposed project site. As such, no impact to wetlands would occur. Therefore, the project is in compliance with Executive Order 11990 (see Attachment 18; see ERR 13).</p>
Wild and Scenic Rivers Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The Wild and Scenic Rivers Act (16 USC 1271-1287) provides federal protection for certain free-flowing, wild, scenic, and recreational rivers designated as components or potential components of the National Wild and Scenic Rivers System (NWSRS). The NWSRS was created by</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>Congress in 1968 to preserve certain rivers with outstanding natural, cultural, and recreational values in a free-flowing condition for the enjoyment of present and future generations. The EPA’s NEPAassist tool (EPA 2024c) was used to determine the proximity of the project site to designated Wild and Scenic Rivers. The project site is not located near any NWSRS river, including designated Wild and Scenic Rivers, study rivers, and Nationwide Rivers Inventory river segments. The closest designated Wild and Scenic River is Deep Creek, approximately 55 miles northeast of the project site. Therefore, the proposed project is in compliance with the Wild and Scenic Rivers Act (see Attachment 19; see ERR 14).</p>

ENVIRONMENTAL JUSTICE

<p>ENVIRONMENTAL JUSTICE</p>		
<p>Environmental Justice Executive Order 12898</p>	<p>Yes No <input type="checkbox"/> <input checked="" type="checkbox"/></p>	<p>Environmental justice means ensuring that the environment and human health are protected fairly for all people regardless of race, color, national origin, or income. EO 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, requires certain federal agencies, including HUD, to consider how federally assisted projects may have disproportionately high and adverse human health or environmental effects on minority and low-income populations.</p> <p>The EPA’s EJScreen mapping and screening tool (EPA 2024b) was used to evaluate environmental and demographic data for the project site and determine whether the project would have disproportionate adverse environmental impacts on future residents and/or the surrounding community. Environmental factors are measured using 11 environmental indicators, and demographic factors are measured using seven demographic indicators. An EJScreen report for the subject property was run using a 0.125-mile-radius centered around the project site (study area). According to the demographic data obtained from EJScreen, which reflects American Community Survey statistics collected by the U.S. Census Bureau from 2018 through 2022, the total population within this study area is 362. Approximately 34% of the study area’s population belongs to a minority,</p>

<p>Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>with 15% Asian and 17% Hispanic, and 1% of the population identifying as two or more races. The remaining 66% of the population is White. Results of the EJScreen assessment further indicate that 12% of the study area population is low-income. The proposed project would not have any aggregate environmental justice issues based on the factors evaluated by the EJScreen tool.</p> <p>As discussed throughout this EA, substantial adverse effects related to various environmental topic areas would not occur. Thus, the proposed project, which is an infill site surrounded by multi-family and commercial uses, would not introduce new uses that could result in disproportionately high and adverse human health or environmental effects on existing minority and low-income populations in the project vicinity, nor would the project induce population growth in an area subject to health risks due to poor environmental conditions. Furthermore, the affordable housing project would have a beneficial impact of increasing the supply of affordable housing units in the study area. Therefore, the project is in compliance with EO 12898 (see Attachment 20; see ERR 15).</p>

Environmental Assessment Factors [24 CFR 58.40; Ref. 40 CFR 1508.8 & 1508.27]

Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

Impact Codes: Use an impact code from the following list to make the determination of impact for each factor.

- (1) Minor beneficial impact
- (2) No impact anticipated
- (3) Minor Adverse Impact – May require mitigation
- (4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
LAND DEVELOPMENT		
Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design	2	<p>The project site is zoned R-M-20 and designated R-High in the City's General Plan, which was approved by the Yorba Linda City Council and effectuated with the successful vote of Measure JJ (Yorba Linda Local Control, Residential Neighborhood, Open Space Protection Measure) on the November 2024 ballot. The proposed project also includes a Density Bonus request pursuant to California Government Code Sections 65915-65918. The R-M-20 zone district is intended to promote the development of multi-family rental as well as ownership dwelling units up to 20 dwelling units per acre (Yorba Linda Municipal Code Chapter 18). The Density Bonus would allow the project to exceed the R-M-20 density of 20 dwelling units per acre. The project would be consistent with zoning regulations pursuant to provisions under the State Density Bonus Law, which allow for waivers and concessions to the City's zoning regulations, the approval of which would not render the project inconsistent with City zoning requirements. The court decision in <i>Wollmer v. City of Berkeley</i> expressly held that the waivers and concessions a city was required to grant for a density-bonus-eligible project did not result in planning and zoning inconsistencies, because the mandatory nature of the waivers meant that those standards were inapplicable to the project. Therefore, with the recent rezoning of the project site and General Plan amendment, and pursuant to State Density Bonus Law, the project would be consistent with the applicable General Plan land use designation and all applicable General Plan policies as well as with the applicable zoning designation and regulations.</p>
Soil Suitability/ Slope/ Erosion/ Drainage/ Storm Water Runoff	2	<p><u>Soil Suitability and Slope</u></p> <p>According to the Phase I ESA, which obtained soils data from the EDR report for the project, the project site consists of Myford sandy loam. The soil is described as sandy loam, sandy clay, sandy clay loam, and sandy loam to a depth of approximately 79 inches. The soil is moderately well drained and occurs on terraces. Slope measurements for the project site were obtained through analysis of the USGS 7.5 Minute Topographic Map for Yorba Linda, CA in the Phase I ESA. According to this review, the proposed project site generally slopes towards the southwest.</p> <p>As required by local and state regulations and policies, a geotechnical report would be prepared for the project prior to issuance of a building permit to determine soil suitability and provide recommendations for the project, including recommendations for site grading, foundation construction, and other geotechnical considerations, which the project would be required to adhere to. Therefore, no impacts related to soil suitability or slope are anticipated.</p>

	<p><u>Erosion, Drainage, and Stormwater Runoff</u></p> <p>Project construction would include ground disturbance, which could result in increased potential for erosion. The State Water Resources Control Board (SWRCB) has implemented a National Pollutant Discharge Elimination System (NPDES) Construction General Permit for the State of California for projects disturbing 1 acre or more of soil, requiring dischargers to obtain coverage under the General Permit, file a Notice of Intent (NOI), and prepare a stormwater pollution prevention plan (SWPPP) prior to commencement of construction. Because the project footprint is greater than 1 acre, it would be subject to the NPDES permit requirements for construction site stormwater discharges and would comply with those requirements. A SWPPP is required to be prepared and implemented under these requirements, which includes appropriate erosion-control and water-quality-control best management practices (BMPs) during site preparation, grading, construction, and post-construction. Implementation of the SWPPP for the project would minimize short-term impacts related to erosion and stormwater runoff.</p> <p>Implementation of the project would result in a net increase in impervious surface area on the project site. The project site is located within the jurisdiction of the Santa Ana Regional Water Quality Control Board (RWQCB). The project would be subject to compliance with the current Orange County Drainage Area Management Plan (DAMP), and the Stormwater Program Local Implementation Plan (LIP) implemented by the Orange County Flood Control District (OCFCD). The LIP describes the activities that the County is undertaking in order to meet the requirements of the Santa Ana RWQCB Order No. R8-2009-0030 and NPDES Permit No. CAS618030 (also known as the “Fourth Term MS4 Permit”). The LIPs outlined in the DAMP serve as the primary policy and implementation documents for compliance with the NPDES Stormwater permits. MS4 permits are issued by local RWQCBs to provide the means to address stormwater quality issues specific to the local watershed or region. MS4 permits require permittees to develop and implement a stormwater management program with the goal of reducing the discharge of pollutants to the maximum extent practicable (MEP). The project would be in accordance with the County’s Standard Conditions of Approval, as well as all in compliance with applicable LIP requirements. The proposed project and its facilities would discharge into the MS4 within the jurisdiction of Yorba Linda. Pursuant to the Orange County MS4 Permit, the City is responsible for controlling or limiting urban pollutants generated by postconstruction activities from reaching their MS4s. The proposed project is, therefore, subject to the requirements of the Orange County MS4 Permit (Santa Ana Region) as it is applied by the permittee and its co-permittees.</p>
--	--

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>As indicated above, prior to construction, a SWRCB General Permit for Discharges of Stormwater Associated with Construction Activity Construction General Permit Order 2009-0009-DWQ (General Construction Permit) would be obtained. As part of the General Construction Permit, a Stormwater Pollution Prevention Plan (SWPPP) and associated construction-related best management practices would be prepared and implemented to minimize or avoid water pollution. Additionally, the project must comply with OCFCD’s Local Implementation Plan (LIP), including LIP Section A-8, Construction Component, which includes a detailed set of erosion and sediment controls and waste and a list of best management practices (BMPs) that must be employed during construction phases to prevent or minimize the impacts of urban runoff generated by construction activities within the City of Yorba Linda on receiving water bodies. By following these prevention practices and compliance with these state and local standards, project construction would not have adverse impacts related to erosion, drainage, and stormwater runoff.</p>
<p>Hazards and Nuisances including Site Safety and Noise</p>	<p>2</p>	<p><u>Hazards and Site Safety</u> Hazards related to contamination and toxic substances and explosives or flammable hazardous materials are discussed above. As discussed above, explosive or flammable hazardous materials would not be present at the project site, and the project would not expose occupants or end-users of a project to the risk of injury in the event of a fire or an explosion from nearby facilities handling, storing, or processing hazardous materials of an explosive or flammable nature. The Phase I ESA conducted by IPA in August 2024 did not identify any RECs, CRECs, or HRECs on the project site. Hazards related to ACCMs and LBP during demolition of the existing structures on site would be addressed by MM-TOX-1 and MM-TOX-2, respectively. As indicated above, the project site is not within a flood zone and is not subject to flood hazards.</p> <p>The City, including the project site, is located within a seismically active margin between the North American and Pacific tectonic plates. The project site is not located within an Alquist-Priolo Earthquake Fault Zone, Liquefaction Zone, or Landslide Zone as designated by the California Geological Survey (CGS 2024) (see Attachment 21). The nearest fault to the project site is the Whittier Fault, located approximately 1.3 miles to the northeast. The project site could experience strong seismic ground shaking during an earthquake. Seismic hazards would be addressed through compliance with California building codes which are focused on prioritizing protection of life and property from seismic-related impacts and require adherence to recommendations of a project geotechnical report, including factors for seismic design.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>According to mapping of fire hazard severity zones by the California Department of Forestry and Fire Protection, the project site is in an urbanized area within the local responsibility area. The project site is not located in an area classified as a high or very high fire hazard severity zone (CAL FIRE 2024) (see Attachment 22).</p> <p><u>Nuisances</u> The project would not be affected by nuisances atypical of an urban environment. There are no industrial uses nearby that would generate substantial odors, fumes, smoke, or other nuisances affecting the project site. It is possible that during construction of the project, construction traffic, noise, dust, and vapor encroachment could be considered a nuisance to the construction crew or immediate neighbors; however, any such nuisances would be temporary. As discussed in the Air Quality section above, The project would be required to comply with SCAQMD regulations for controlling fugitive dust pursuant to SCAQMD Rule 403, which requires the implementation of best available dust control measures during active operations capable of generating fugitive dust, to control fugitive dust emissions from project construction.</p> <p><u>Noise</u> The proposed project is not a noise-generating facility. Noise generated by project operations would be similar to existing conditions and would be typical of other multi-family residential uses in the City. Although the project would involve construction noise near sensitive receptors such as residential uses, construction noise would be temporary, resulting in intermittent increases in ambient noise levels which would fluctuate depending on the particular construction phase. Pursuant to Chapter 8.32, Noise Control, of the City’s Municipal Code, noise associated with construction is exempt from the provisions of the noise ordinance, provided that activities take place between the hours of 7:00 a.m. and 8:00 p.m. on any day except for Sunday or a federal holiday. The project would not require nighttime construction or construction on weekends or holidays, and therefore construction noise would not be subject to the City’s noise standards identified in Municipal Code Section 8.32.060.</p> <p>As indicated above in the Noise Abatement and Control analysis, the noise level at the project site would be less than the HUD exterior noise standard of 65 dBA DNL and falls into the “acceptable” category.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
SOCIOECONOMIC		
Employment and Income Patterns	1	<p>Project construction would generate a limited number of temporary construction jobs, and operation would generate a nominal number of permanent jobs (e.g., management, clerical, and janitorial jobs), which could result in a minor increase in per-capita income. Construction activities could result in direct economic effects related to increased spending on construction materials, equipment, and services. The magnitude of the economic benefits of construction spending to the City’s economy would depend on the proportion of employment, goods, and services procured from local residents and businesses, and would likely have a relatively minor benefit on the City’s economy.</p>
Demographic Character Changes, Displacement	1	<p>The proposed project would not have an adverse impact on demographic character or result in the displacement of existing businesses or individuals because the project would occur on land with two vacant residences.</p> <p>Since the immediate neighborhood bordering the site is a mixture of residential and commercial uses including an adjacent multi-family senior residential facility, the proposed project would be consistent with the demographic character of the community. Residents of the project would likely be transplants from within the City or from neighboring areas within Orange County. Demographics for the study area analyzed in the EJSscreen report (EPA 2024b) for the proposed project would change as seniors (aged 62+) moved into the completed affordable housing community. Currently, seniors account for 35% (approximately 127 people) of the study area population of 362 people. Since the proposed development would only allow seniors aged 62 years and older as residents, the percentage of seniors within the study area would increase following completion of the project.</p>
Environmental Justice	1	<p>According to the City’s Housing Element, seniors are one of Yorba Linda’s most vulnerable populations and approximately 21% have some type of disability related to self-care or mobility, which may limit their ability to live independently. Furthermore, the elderly have a number of special needs, including housing, transportation, healthcare, and other services. Rising rents are of a particular concern due to the fact that most seniors are on fixed incomes. Seniors are the only age group in Yorba Linda to experience an increase between 2000 and 2020, as this age group grew by almost 10,000 persons and now comprises approximately 21% of the City’s residents. Seniors also comprise 58% of all extremely low-income households (earning <30% AMI) in the City. Of Yorba Linda’s 794 senior renter households, 81% are lower income, with over one-third (35%) extremely low income (City of Yorba Linda 2021). The project would benefit the City’s senior community by providing</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		64 units of affordable senior housing. Furthermore, as discussed above, based on the EJSscreen assessment for the project site, regardless of the population group served by the project, the local population would not be affected disproportionately by environmental issues.

Environmental Assessment Factor	Impact Code	Impact Evaluation
COMMUNITY FACILITIES AND SERVICES		
Educational and Cultural Facilities	2	<p>Because the project would serve seniors, school-aged children would not likely be housed by the project. Therefore, no adverse impacts to schools would be anticipated. Furthermore, the project site is near multiple educational facilities, as follows:</p> <ul style="list-style-type: none"> • Mabel M. Paine Elementary School, approximately 0.6 miles to the southeast • Buena Vista Virtual Academy, approximately 1.1 miles to the west • Yorba Linda High School, approximately 1.8 miles to the northeast • Lakeview Elementary School, approximately 1.9 miles to the northwest • Heritage Oak Private School, approximately 1.9 miles to the northwest <p>Cultural facilities include publicly accessible buildings, structures, and establishments that are used primarily for the performance, exhibition, or benefit of arts and heritage activities, including, but not limited to, performing arts, visual arts, heritage and cultural endeavors. Numerous cultural facilities would be accessible to project occupants in the immediate project area and beyond within the City of Yorba Linda, including cinemas, galleries, libraries, museums, theaters, and stadiums.</p> <p>Cultural facilities near the project site include the Yorba Linda Cultural Arts Center approximately 0.2 miles to the south and the Richard Nixon Presidential Library and Museum approximately 0.8 miles to the west. The Orangerie Art Center located at 20511 Yorba Linda Boulevard is about 2.6 miles east of the project site. The project would result in an incremental increase in demand for cultural facilities. However, as an affordable housing project, the project would be expected to serve existing area residents by addressing existing unmet needs for rental assistance in the project area, rather than result in an influx of new residents. Furthermore, due to the relatively small project size, any incremental increase in demand would not exceed the capacity of existing facilities. There</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		are adequate cultural facilities in the City and surrounding areas of the County to accommodate any potential increased usage generated by the project. Therefore, no adverse impacts to cultural facilities would occur.
Commercial Facilities	1	No adverse impacts to adjacent commercial facilities are anticipated. The project site is located in a residential and commercial area that contains retail services, including grocery stores, pharmacies, restaurants, and other stores. The project would be potentially beneficial to nearby businesses as a result of increased business. Additionally, placing residents in more affordable housing provides more disposable income for spending on non-housing-related goods and services.
Health Care and Social Services	2	<p>Because the proposed project is relatively small in size and would likely serve existing area residents, it would not be expected to significantly impact demand for health care in the area. Sufficient health care is available in the surrounding community to handle any potential increase in demand. Healthcare facilities near the project site include the following:</p> <ul style="list-style-type: none"> • UCI Health- Yorba Linda, approximately 0.6 miles to the south at 18601-18659 Yorba Linda Blvd, Yorba Linda, CA 92886 • Caduceus Medical Group, approximately 0.7 miles to the southwest at 18200 Yorba Linda Blvd #250, Yorba Linda, CA 92886 • PDQ Urgent Care, approximately 0.7 miles to the southwest at 18200 Yorba Linda Blvd #250, Yorba Linda, CA 92886 • UCI Health- Yorba Linda Outpatient Center, approximately 1.8 miles to the west at 18200 Yorba Linda Blvd #250, Yorba Linda, CA 92886 • Yorba Linda Primary Care, approximately 2.2 miles to the west at 16671 E Yorba Linda Blvd Suite 100, Yorba Linda, CA 92886 <p>Social services in the City include a range of programs and resources aimed at supporting the well-being of individuals and families, such as health and human services, low-income assistance, and community outreach initiatives, among others. The project would result in an incremental increase in demand for social services but would not be expected to have adverse impacts on such services given that the project would likely serve existing area residents would be relatively small in size. The Orange County Social Services Agency provides wide range of services such as In-Home Supportive Services, General Relief, Cash Assistance Program for Immigrants, CalFresh Program, Medi-Cal, and Medical Safety Net. County-provided health care and veterans services are the Healthcare Center</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>of Orange County, Orange County Health Care Agency, and the Orange County Veterans Service Office. The City and the Yorba Linda Senior Citizens Club coordinate a number of senior activities at various community facilities throughout the community, including the Senior Citizens Center. Programs offered include recreational and social activities, a senior lunch, food distribution, preventative health care, and transportation services.</p> <p>The City offers numerous programs geared towards older adults (aged 50+), including opportunities to meet new people, master new skills, and stay mentally and physically fit (City of Yorba Linda 2024b). The City also implements a Senior Grocery Program, in partnership with Second Harvest Food Bank-Grocery Distribution, to provide groceries to those in need (City of Yorba Linda 2024c). In addition, the City, in partnership with Meals on Wheels Orange County, offers a daily older adult lunch program (City of Yorba Linda 2024d).</p> <p>The proposed project would not adversely affect health care and social services. The proposed project would result in a beneficial effect since it would be providing affordable housing to low to very low-income households, including individual experiencing homelessness. Therefore, no adverse impacts are anticipated as a result of the proposed project.</p>
Solid Waste Disposal / Recycling	2	<p>Majority of the solid waste generated in the City is disposed of at the Olinda Alpha Landfill in the City of Brea, located northwest of the project site. Two other landfills in Orange County are the Frank R. Bowerman Landfill near the City of Irvine and the Prima Deshecha Landfill in San Juan Capistrano. These three landfills are owned and operated by Orange County Waste and Recycling. The Olinda Alpha Landfill has a permitted maximum throughput of 8,000 tons per day (TPD) (OC Waste & Recycling, 2024a), the Frank R. Bowerman Landfill has a permitted maximum throughput of 11,500 TPD (OC Waste & Recycling, 2024b), and the Prima Deshecha Landfill has a permitted maximum throughput of 4,000 TPD (OC Waste & Recycling, 2024c). The Olinda Alpha Landfill currently accepts approximately 7,000 TPD, although it is permitted to accept up to 8,000 TPD and has enough projected capacity to serve residents and businesses until 2030 (OC Waste & Recycling 2024a).</p> <p>According to the CalRecycle, multi-family residential uses generate solid waste at a rate of approximately 3.6 pounds per unit per day (CalRecycle 2019). Based on these generation rates, the proposed project’s residential units could generate solid waste at a rate of approximately 230.4 pounds per day (or 0.115 tons per day). This increase could be accommodated by all three landfills. As required by CalRecycle, Orange County has an approved Countywide Integrated Waste Management Plan (CIWMP) that demonstrates</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>sufficient solid waste disposal capacity of a minimum of 15 years based on Orange County population projections. Furthermore, the proposed project would be required to submit plans for the proposed project to the City to ensure that the plans comply with Assembly Bill (AB) 939, as well as the CIWMP as administered by the City. In addition, as part of AB 939 compliance, state law (Senate Bill [SB] 1374) requires all cities to implement ordinances or other measures that specifically require the diversion of 75% of all construction and demolition waste from landfills. As such, the proposed project would comply with Yorba Linda Municipal Code Chapter 8.20.500 (Waste Management Plans for Construction and Demolition Projects), which establishes diversion requirements for construction and demolition activities and requires applicant to submit a Waste Reduction and Recycling Plan for approval. Adverse impacts from solid waste disposal associated with the proposed project are not anticipated.</p>
Waste Water / Sanitary Sewers	2	<p>Wastewater (sewer) collection and treatment within the City is provided by the Yorba Linda Water District (YLWD) and the Orange County Sanitation District (OCSD). Within its political boundary, the YLWD owns and maintains nearly 268 miles of various diameter sewer pipes and one sewer lift station. This area serves about 11,786 single-family, commercial, industrial, and public-school accounts, and 1,240 multiple dwelling units (condominiums, mobile homes, and apartments) for over 24,000 services (YLWD 2024). The wastewater collected within the YLWD is delivered to the OCSD trunk sewer line for treatment and disposal. Within the vicinity of the project site, wastewater flows by gravity to OCSD's Reclamation Plant No. 1 located in the City of Fountain Valley. The plant provides advanced primary and secondary treatment and supplies secondary-treated water to the Orange County Water District, which further treats and distributes the water for various uses (City of Yorba Linda 2016b). The project would connect to existing wastewater and sanitary sewer facilities. The project would be required to pay YLWD standard wastewater connection fees and ongoing user fees, which would ensure the project's impacts on existing sewer facilities are adequately offset. Payment of these fees would fund the collection, treatment, and disposal of generated wastewater, and would offset the project's increase in demand for wastewater collection services. Adverse impacts to wastewater systems and sanitary sewers servicing the project site are not anticipated.</p>
Water Supply	2	<p>The project site is within the service area of the YLWD, which serves residents in most of Yorba Linda and portions of Placentia, Brea, Anaheim, and in areas of unincorporated Orange County. Approximately 70% of the supply is purchased from the Lower Santa Ana River Groundwater Basin and the remaining water supply is purchased from the Metropolitan Water District of Southern</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>California through the Municipal Water District of Orange County. Groundwater is pumped from nine active wells located throughout the YLWD and imported water is treated at the Diemer Filtration Plant and delivered to the YLWD system through four imported water connections (City of Yorba Linda 2016b).</p> <p>The project would result in an increase in water demand. Payment of standard YLWD water connection fees and ongoing user fees would ensure the project's impacts on existing water facilities are adequately offset. The residential population growth due to the proposed project and associated increase in water demand would not represent any development beyond that anticipated in the General Plan Update that would involve water supply. Furthermore, YLWD's project 2035 demand has decreased by more than 22 percent in the past several years due to lower population projections and conservation efforts. According to the final draft 2015 Urban Water Master Plan, the YLWD is capable of meeting the water demands of its customers in normal, single dry, and multiple dry years between 2020 and 2040 due to diversified supply and conservation measures. Therefore, no adverse effect on water supply is expected from the proposed project.</p>
Public Safety - Police, Fire and Emergency Medical	2	<p>The City of Yorba Linda's police protection services are provided by the Orange County Sheriff's Department. The Yorba Linda Police Services Facility is located at 20994 Yorba Linda Boulevard in the City of Yorba Linda.</p> <p>The Orange County Fire Authority (OCFA) provides fire protection services to the City, including the project site. The nearest fire station to the project site is OCFA Station #10 located at 18422 E Lemon Drive in the City of Yorba Linda, located approximately 0.14 miles to the southwest. In addition to the emergency medical services provided by the OCFA, the City has contracted exclusively with Emergency Ambulance Service, Inc., to provide emergency medical response in the City. The nearest hospital with emergency room services is the Placentia-Linda Hospital at 1301 N Rose Drive, approximately 1.9 miles to the southwest. Another nearby hospital with emergency room services is Kaiser Permanente Hospital at 3440 E La Palma Avenue, approximately 3.4 miles to the southwest. Due to the small number of occupants that would be permitted at the project site at any given time as well as the close proximity of police, fire, and medical services, no adverse effects on police, fire, and emergency medical services are expected from the proposed project.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
Parks, Open Space and Recreation	2	<p>Public recreational spaces in proximity to the project site include the following:</p> <ul style="list-style-type: none"> • Jessamyn West Park, approximately 1.2 miles to the southeast at 19115 Yorba Linda Blvd, Yorba Linda, CA 92886 • Veterans Sports Park, approximately 1.5 miles to the west at 19115 Yorba Linda Blvd, Yorba Linda, CA 92886 • Yorba Linda Adventure Park, approximately 1.3 miles to the west at 4601 Casa Loma Ave, Yorba Linda, CA 92886 • Hurless Barton Park, approximately 1.1 miles to the northwest at 4601 Casa Loma Ave, Yorba Linda, CA 92886 • Fairmont Knolls, approximately 2.4 miles to the east at Fairmont Blvd, Yorba Linda, CA 92886 <p>The project would result in an incremental increase in demand for public parks that could be absorbed by existing open spaces near the project site. The proposed project would include on-site common open space areas consisting of outdoor courtyards with seating, barbeque, and dog park areas where residents could enjoy the outdoors without visiting surrounding parks. Therefore, the project would not have adverse impacts on parks, open space, and recreation.</p>
Transportation and Accessibility	2	<p>The project site has multi-modal access through bus transit, rail transit, as well as the local and regional street network. The Orange County Transportation Authority operates local public transit routes that extend into and through the City. The closest bus stop to the project site is located along Lakeview Avenue (Bus Stop ID 8610), near the intersection of Lakeview Avenue and Yorba Linda Boulevard, approximately 0.3 miles southwest of the project site. The stop is serviced by bus route 26. Residents would need to transfer to other bus routes, such as route 71 and 129, to travel to adjacent areas of Orange County (OCTA 2024).</p> <p>In addition, the local Dial-a-Ride service (at 714-528-RIDE) provides transportation services everywhere within the City limits. The Taking Retired Adults into Local Services (TRAILS) provides a low-cost, door-to-door, wheelchair-accessible transportation program for senior citizens ages 60 and older who reside in the City (City of Yorba Linda 2024e). The residents at Altrudy II Apartments would have access to this transportation service to move around the City. The project site is conveniently located within a 10-minute walking distance from a wide range of restaurants and shopping (including the new Town Center development), a grocery store, library, local bank, a public park, and public transportation.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		The proposed project would be accessible via Altrudy Lane, which would terminate in an L-shaped surface parking lot. Pedestrian walkways are strategically located throughout the site to increase connectivity between the buildings and to the parking lot. Thus, the project site is walkable and located within short walking distance to a wide array of site/service amenities including, local public library, a park, and retail and shopping, including a supermarket. Therefore, no adverse effect on transportation and accessibility would result from the proposed project.

Environmental Assessment Factor	Impact Code	Impact Evaluation
NATURAL FEATURES		
Unique Natural Features, Water Resources	2	The project site, which is located within a developed residential and commercial area and is currently occupied by two single-family homes and associated improvements. The project site does not contain any unique natural features or water resources. There are no watercourses, wetlands, or other aquatic resources present on or near the project site. Therefore, the project would have no impact on unique natural features or water resources.
Vegetation, Wildlife	2	The project site was historically used for agricultural purposes and was developed with orchards prior to construction of the existing single-family residences on site. Current landscaping on site consists of grass lawns, shrubs, and mature trees including California pepper, cypress, palm, and pine. The project site does not contain native vegetation or critical habitat for any special-status plant or wildlife species. Although the proposed project is within the ranges of six endangered or threatened species, none are likely to occur on site due to a lack of suitable habitat. (USFWS 2020a) (see Attachment 11). Therefore, the project would have no impact on vegetation or wildlife.
Other Factors	1	The project would provide affordable housing and provide on-site services for seniors. The project would provide a safe, clean, and sanitary place for residents in a location convenient to public transportation and other amenities. Therefore, the proposed project would be beneficial to both residents and the community.

Environmental Assessment Factor	Impact Code	Impact Evaluation
CLIMATE AND ENERGY		
Climate Change Impacts	2	<p>Although climate change is driven by global atmospheric conditions, climate change impacts are felt locally. An expanding body of scientific research supports the theory that global climate change is currently causing changes in weather patterns, average sea level, ocean acidification, chemical reaction rates, and precipitation rates, and that it will increasingly do so in the future. Potential effects of global climate change that could adversely affect human health include more extreme heat waves and heat-related stress; an increase in climate-sensitive diseases; more frequent and intense natural disasters such as flooding, hurricanes, and drought; and increased levels of air pollution.</p> <p>As discussed above, the project site is not within a flood zone (see Attachment 3). The project site is located approximately 20 miles inland and is not within a coastal community or low-lying area and would not be impacted by sea level rise (see Figure 1). The project site is in an urbanized area that is not subject to wildfire hazards (CAL FIRE 2024) (see Attachment 22). As previously discussed, the project site is not in an area that relies on a sole-source aquifer. No substantial issues related to air quality, soil suitability, stormwater, wastewater systems, or water supply have been identified in the preceding analyses. Thus, the project would not lead to potential climate-change-related impacts that would substantially adversely affect residents.</p> <p>The Climate Mapping for Resilience and Adaptation (CMRA) tool (CMRA 2024) provided by the U.S. Climate Resilience Toolkit was used to assess the impact of five common climate-related hazards at the project site: extreme heat, drought, wildfires, flooding, and coastal inundation from sea level rise. Analysis was conducted for the census tract encompassing the project site. Based on the results of the CMRA tool analysis, the project site is most susceptible to climate change impacts related to extreme heat and drought. Currently, this area of the County only receives approximately 14 inches of precipitation annually and experiences approximately 23 days annually where temperatures are greater than 90 degrees Fahrenheit. Though this area currently experiences temperatures greater than 100 degrees Fahrenheit less than five days per year, this number is expected to increase to up to 30 days by the end of this century. The project site is located within a census tract that is not designated as a Disadvantaged Community according to the Climate and Economic Justice Screening Tool (CMRA 2024) (see Attachment 23).</p> <p>The project would comply with the California Green Building Standards (CALGreen) Code, which would ensure the project incorporates various measures to reduce greenhouse gas (GHG) emissions. The project is located adjacent to three bus lines, which</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>would serve to reduce the GHG emissions associated with motor vehicle travel. As previously discussed, criteria air pollutant emissions from project construction and operation would be below <i>de minimis</i> thresholds, and daily emissions from the proposed project would not exceed the SCAQMD's regional construction or operational emissions thresholds (see Attachment 4). In addition, the SCAQMD has established a screening threshold of 3,000 metric tons of carbon dioxide equivalent per year (MT CO₂e/yr) that is used to determine if a project would have significant GHG emissions impacts. This approach is a widely accepted screening threshold used by numerous cities within the SoCAB and is based on the SCAQMD staff's proposed GHG screening threshold for stationary source emissions for non-industrial projects, as described in the SCAQMD's Interim CEQA GHG Significance Threshold for Stationary Sources, Rules and Plans (AQMD 2008). Based on modeling conducted for the project in CalEEMod, estimated annual construction emissions for the proposed project, assuming construction would occur for approximately 18 months between 2025 and 2027, would be approximately 565.22 MT CO₂e/yr (30-year amortized emissions would reduce this to 18.84 MT CO₂e per year). Estimated annual emissions during the operational phase would be approximately 340.34 MTCO₂e/yr. As such, the project's GHG emissions would be below the SCAQMD's screening threshold. Therefore, the proposed project would not contribute substantially to climate change impacts.</p>
Energy Efficiency	2	<p>The project would be required to comply with applicable building energy efficiency standards pursuant to Title 24, Part 6 of the California Code of Regulations. At the building permit stage, the project would comply with the CALGreen Code that establishes mandatory green building standards for all buildings in California. The project would be 100% electric and would not utilize any natural gas. The proposed project would include EV charging stations. The project site is also located in close proximity to public transportation, with bus stops adjacent to the project site. Therefore, the project would not have an adverse effect related to energy efficiency.</p>

Additional Studies Performed:

- *Cultural Resources Inventory and Evaluation Report*, prepared by Dudek, November 2024

List of Permits Obtained: None

Public Outreach [24 CFR 50.23 & 58.43]:

The Draft Environmental Assessment will be made available for public review and comment beginning on February 3, 2025, and concluding on February 18, 2025. The combined Notice of Finding of No Significant Impact (FONSI)/Notice of Intent to Request Release of Funds (NOI-RROF) will be published on the Orange County Housing and Community Development website and will contain information about where the public may find the Environmental Review Record pertinent to the project.

Cumulative Impact Analysis [24 CFR 58.32]:

The proposed project would not contribute to a significant cumulative impact because it would consist of an urban infill development project and would be near existing transit services and commercial amenities. State

and local planning guidelines encourage the development of urban multi-family housing in areas served by transit and near commercial amenities because this type of development contributes less to cumulative effects on the environment in comparison to development of previously undisturbed sites in more remote locations with fewer transit connections, many of which contain native vegetation and wildlife species.

Alternatives [24 CFR 58.40(e); 40 CFR 1508.9]:

Site identification has proven to be a major obstacle in providing affordable housing units. Residential sites available at reasonable cost are extremely limited, and sites that do not meet cost and land use criteria are generally eliminated as alternatives. The developer identifies potential properties for affordable housing based on feasibility, location, affordability, and ownership/site control of a potential project site. In addition to the developer's site selection criteria, physical and social constraints are also considered in identifying and rejecting alternatives. Based on the developer's site selection criteria and constraints that limit identification of alternative affordable housing project sites, no other build alternatives are analyzed or included in this environmental document.

No Action Alternative [24 CFR 58.40(e)]:

Under the No Action Alternative, the project would not be constructed, and no new affordable housing would be provided at the project site. The beneficial impacts identified in this EA would not occur related to providing much-needed affordable housing and associated amenities to the community.

The existing vacant residential buildings on site would remain for the foreseeable future. The project site may remain as is, or potentially sold for other development purposes. It is unknown at this time if or when another proposed development would be forthcoming. However, as the site is identified as a housing opportunity site in the City's 2021-2029 Housing Element (City of Yorba Linda 2024a), it is likely that the project site would be developed with another multi-family residential use in the future. Physical impacts to the environment would occur in if and when the project site was developed with another use, whether subsidized with federal funds or built at market rates.

Summary of Findings and Conclusions:

The project consists of demolition of two vacant single-family residences and construction and operation of a 64-unit affordable housing development on two parcels at 18597 and 18602 Altrudy Lane in Yorba Linda, CA. The project would serve seniors and earning between 30-70% AMI. The project would have no significant effect on the quality of the human environment with incorporation of the mitigation measures identified in this EA. The project would benefit the City of Yorba Linda and low-income seniors needing affordable housing by providing high-quality affordable housing in a desirable area with access to transit services, commercial amenities, employment opportunities, and all standard community services. Residents of the affordable housing project would benefit from being in proximity to transportation corridors and activity centers which would provide opportunity for employment, social engagement, and commerce. The project would also help the City further its affordable housing goals and meet its RHNA target, as the project site is identified as a housing opportunity site in the City's Housing Element. The proximity of existing transit options to the project site would reduce long-term air pollutant emissions and energy use associated with motor vehicle travel.

Because the project site is within a developed urban area, the project would be adequately served by utilities and public services. The project would conform to all applicable federal, state, and regional regulations associated with land use compatibility, air pollutant emissions, water quality, geologic hazards, and related environmental resources addressed herein. Based on the analyses of environmental issues contained in this document, the proposed project is not expected to have significant environmental impacts.

Mitigation Measures and Conditions [40 CFR 1505.2(c)]

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Contamination and Toxic Substances	<p>MM-TOX-1: Asbestos. The analysis and recommendations provided in the Asbestos Inspection Report are based in part on the data obtained from specific and discrete sampling locations. If potential variations (i.e. different building materials) are identified during renovation or demolition activities, it will be necessary to conduct additional asbestos testing. ACCMs in “Damaged” or “Significantly Damaged” condition present the greatest risk for asbestos exposure. It is recommended that all “damaged” and/or “significantly damaged” asbestos containing construction materials be removed following SCAQMD Rule 1403 Procedure 5. An asbestos abatement contractor registered with the Division of Occupational Safety and Health must perform any work that disturbs these materials. No action is recommended for ACCMs in “Good” condition as they present minimal risk for asbestos exposure.</p> <p>Note: If renovation or demolition activities are to affect these materials, an asbestos abatement contractor registered with the Division of Occupational Safety and Health should be contracted to perform all portions of the work affecting these materials.</p> <p>MM-TOX-2: Lead-Based Paint. The greatest potential for lead exposure from lead painted architectural components occurs when the paint has become defective; or when the paint is applied to a friction/impact component where the paint is continually disturbed; or when the paint is disturbed through routine maintenance or renovation activities. The following are the LBP recommendations for the project site:</p> <ul style="list-style-type: none"> • The results from this inspection should be provided to any individuals that may disturb the painted surfaces. It is encouraged to utilize professionals that have experience working with LBP. • If renovation is scheduled in the near future (less than three months), all lead painted components that have been previously targeted for replacement should be replaced utilizing “lead safe” containment and work practices. • ALL components that have been identified with defective lead paint should have the paint repaired as soon as possible. Any paint repair should be done utilizing “lead safe” containment, work practices, and clean-up techniques. • All components with lead painted friction / impact surfaces should be treated to minimize the friction or impact as necessary.

Law, Authority, or Factor	Mitigation Measure
	<ul style="list-style-type: none"> • Lead painted components that have not been targeted for replacement should either be considered for abatement (replacement, enclosure, encapsulation, etc.) or included in an Operations & Management (O & M) Plan that will help to minimize exposures to lead hazards. • All lead painted surfaces that are not expected to be impacted in the near future (less than three months) should also be included the O&M plan. • In addition, the tenants or occupants of the dwelling should be notified of the test results and instructed in actions that they may perform to keep the living areas “lead safe.” • The tile surfaces are not a likely source of lead dust contamination as long as they remain intact. If future renovation or repair activities require that the tile be removed, or the surfaces disturbed, it should be done in a manner that does not break the tiles. If this is not feasible, this task should be assigned to a lead certified contractor. <p>MM-TOX-3: Post-Construction Radon Evaluation. In accordance with Section 9.6.3.2 of HUD’s Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), after completion of construction and issuance of the occupancy certificate for the project and before residents move in, indoor radon testing shall be conducted for 100% of ground-contact units and 10% of units on each floor above ground level in all buildings included in the project. Testing shall be performed by, or under the direct supervision of, a licensed Radon Professional certified by the American Association of Radon Scientists and Technologists (AARST), National Radon Proficiency Program (NRPP) or the National Radon Safety Board (NRSB). Radon testing shall follow the AARST Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings (ANSI-AARST MAMF-2017).</p> <p>If testing determines that indoor radon levels are or may be above the U.S. EPA’s threshold for unacceptability of 4.0 pCi/L, then the project applicant must implement a radon mitigation plan. The mitigation plan must identify the radon level on site, describe the radon reduction system that will be installed, establish an ongoing maintenance plan, establish a reasonable timeframe for system implementation, and require post-installation testing by a licensed radon professional.</p> <p>A radon report shall be prepared and submitted at final completion inspection, and shall document the results of testing performed, the sampling strategy, the details of any mitigation deemed necessary, and the timing of any such mitigation. Indoor radon levels must be demonstrated to be below the EPA action level of 4.0 pCi/L prior to project occupancy. Incoming project occupants shall be informed of radon mitigation activities.</p>

Law, Authority, or Factor	Mitigation Measure
Historic Preservation	<p>MM-CUL-1: Unanticipated Discovery of Archaeological Resources. All construction crews should be alerted to the potential to encounter archaeological resources. In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed project, all construction work occurring within a 50-foot buffer of the find shall immediately stop until a qualified specialist meeting the Secretary of the Interior's Professional Qualification Standards can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be typical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appear to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or nonfunctional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or features such as old concrete foundations or privies. Significance of the find will be assessed based on processes outlined by CEQA (14 CCR 15064.5[f]; PRC Section 21082) and Section 106 of the NHPA. Feasible options for avoidance must also be considered. If the discovery proves significant under CEQA and/or the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted.</p> <p>MM-CUL-2: Unanticipated Discovery of Human Remains. In accordance with Section 7050.5 of the California Health and Safety Code, if human remains are found, the Orange County Coroner shall be immediately notified of the discovery. No further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur until the Orange County Coroner has determined, within 2 working days of notification of the discovery, the appropriate treatment and disposition of the human remains. If the Orange County Coroner determines that the remains are, or are believed to be, Native American, the coroner shall notify the NAHC in Sacramento within 24 hours. In accordance with California Public Resources Code Section 5097.98, the NAHC must immediately notify those persons it believes to be the MLD from the deceased Native American. The MLD shall complete inspection within 48 hours of being granted access to the site. The designated Native American representative would then determine, in consultation with the property owner, the disposition of the human remains and associated grave goods.</p>

Determination:

Finding of No Significant Impact [24 CFR 58.40(g)(1); 40 CFR 1508.27]
The project will not result in a significant impact on the quality of the human environment.

Finding of Significant Impact [24 CFR 58.40(g)(2); 40 CFR 1508.27]
The project may significantly affect the quality of the human environment.

8. User Changes to Default Data

1. Basic Project Information

1.1. Basic Project Information

Data Field	Value
Project Name	Altrudy II Project
Construction Start Date	11/4/2025
Operational Year	2027
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	1.80
Precipitation (days)	21.2
Location	18597 Altrudy Ln, Yorba Linda, CA 92886, USA
County	Orange
City	Yorba Linda
Air District	South Coast AQMD
Air Basin	South Coast
TAZ	5786
EDFZ	7
Electric Utility	Southern California Edison
Gas Utility	Southern California Gas
App Version	2022.1.1.28

1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
Retirement Community	71.0	Dwelling Unit	1.12	82,931	17,791	—	212	—

Parking Lot	72.0	Space	0.71	0.00	0.00	—	—	—
Other Non-Asphalt Surfaces	7.34	1000sqft	0.17	0.00	0.00	—	—	—

1.3. User-Selected Emission Reduction Measures by Emissions Sector

Sector	#	Measure Title
Energy	E-15	Require All-Electric Development
Water	W-4	Require Low-Flow Water Fixtures

2. Emissions Summary

2.1. Construction Emissions Compared Against Thresholds

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	13.1	annual days of extreme heat
Extreme Precipitation	5.70	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	23.0	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about $\frac{3}{4}$ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters

Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A

Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	55.4
AQ-PM	84.0
AQ-DPM	62.6
Drinking Water	37.6
Lead Risk Housing	53.5
Pesticides	0.00
Toxic Releases	91.9
Traffic	47.5
Effect Indicators	—
CleanUp Sites	19.3
Groundwater	22.1
Haz Waste Facilities/Generators	51.7
Impaired Water Bodies	0.00
Solid Waste	55.7
Sensitive Population	—
Asthma	14.1
Cardio-vascular	45.8
Low Birth Weights	49.9
Socioeconomic Factor Indicators	—
Education	35.2
Housing	40.3
Linguistic	22.9
Poverty	36.8
Unemployment	29.4

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	70.13986911
Employed	55.33170794
Median HI	57.30784037
Education	—
Bachelor's or higher	73.48902862
High school enrollment	13.78159887

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	38.0
Healthy Places Index Score for Project Location (b)	53.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

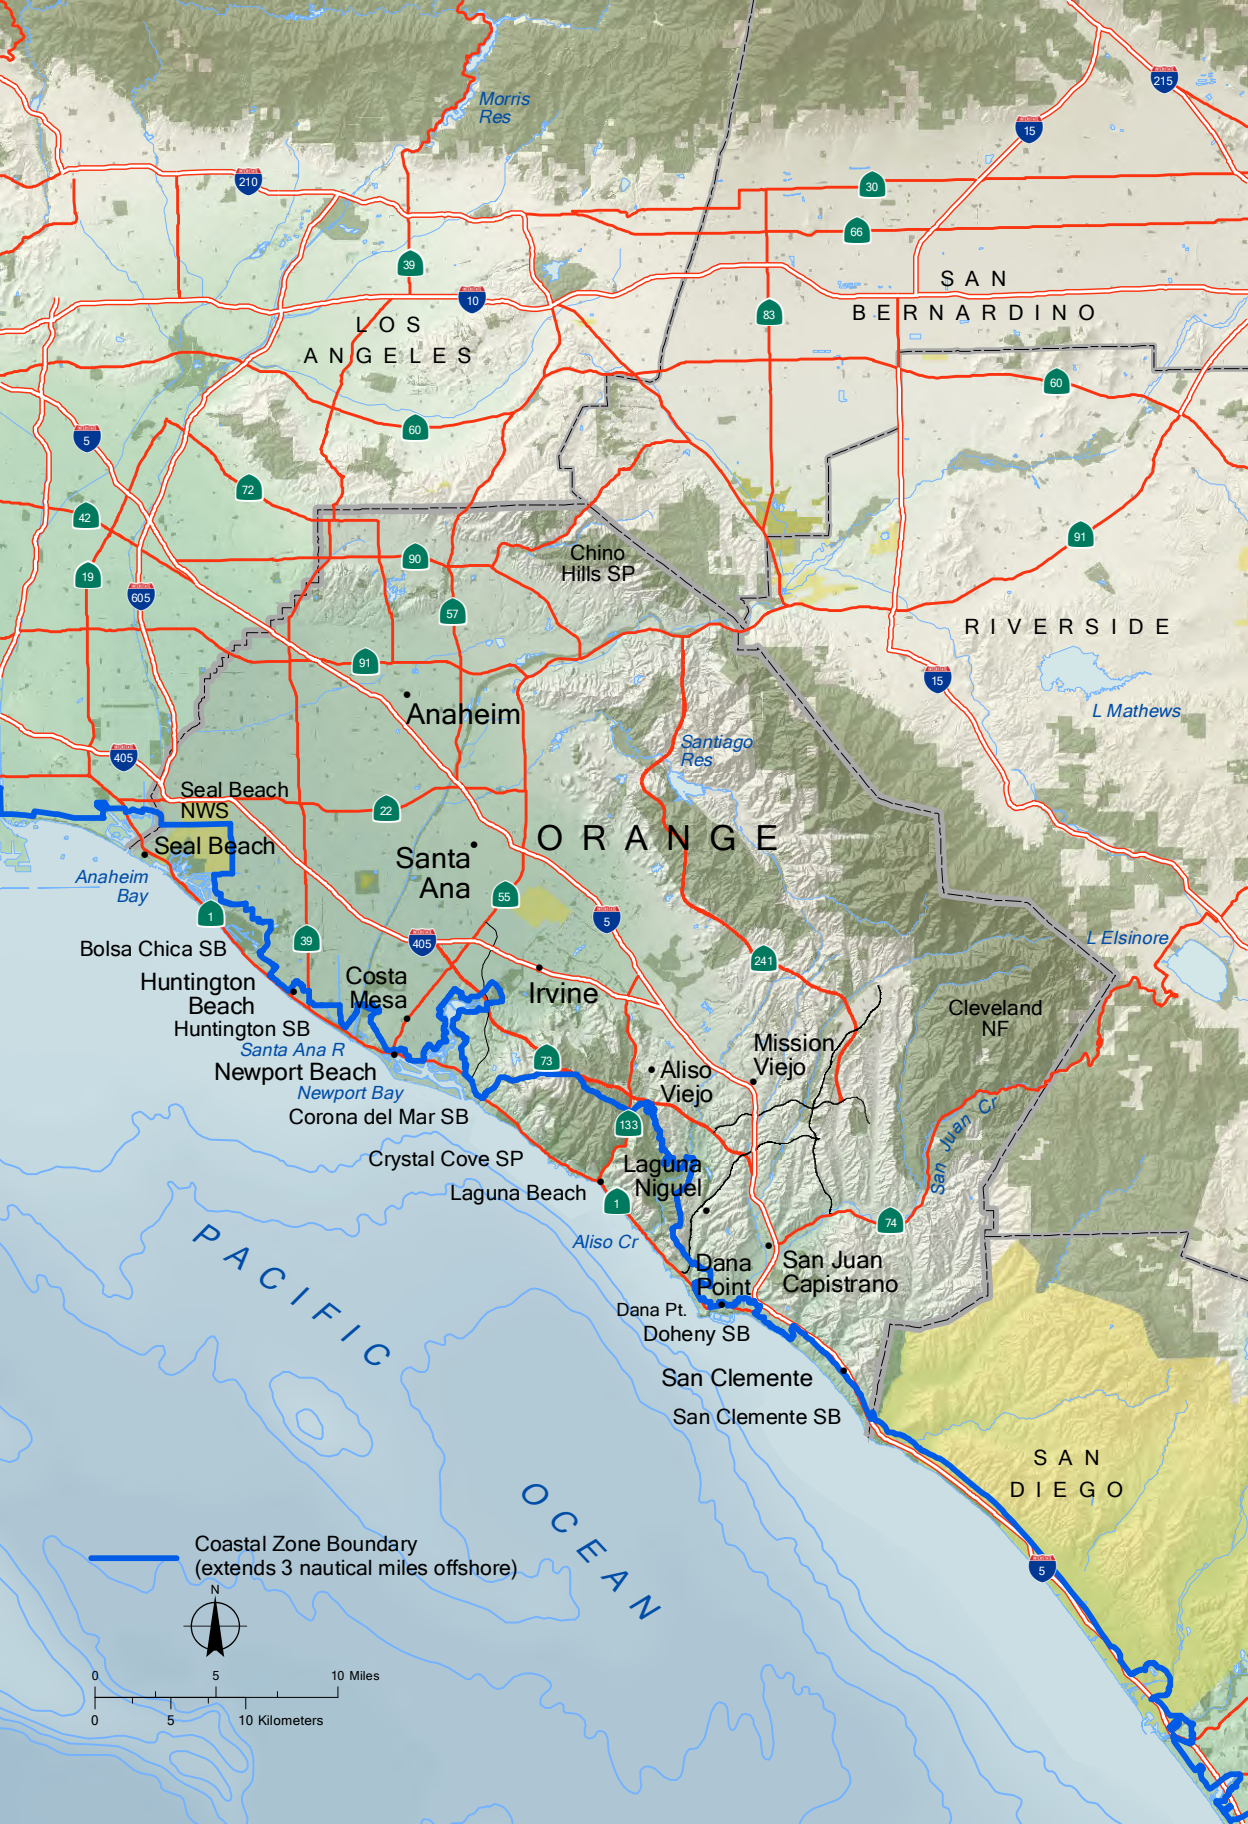

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Proposed project: 71-unit affordable senior housing, 72-space parking lot, and associated landscaping and pedestrian hardscape on a 2-acre site
Construction: Construction Phases	Per applicant input, construction would start in November 2025 and would occur for approximately 18 months
Construction: Trips and VMT	Rounded one-way trips/day up to nearest even number and added vendor trucks to Site Preparation and Grading phases to account for water trucks.

1. Certification

Integrated Property Analysis, Inc. (IPA) has completed a Phase I Environmental Site Assessment (ESA) of the Altrudy II (the Subject), located at the 18597 and 18602 Altrudy Lane in Yorba Linda, California 92886. IPA performed the Phase I ESA utilizing generally accepted Phase I industry standards in accordance with ASTM Standard E 1527-13.

This report is considered confidential and privileged information which was prepared for the sole and exclusive use and information of C&C Development and The City of Yorba Linda (the Client). IPA understands that this report will be used to assist in evaluating environmental issues and site conditions. This report is for the exclusive use of the Client or its legal counsel.

Surveyed by: Michael Atallah, Vice President/IPA
Written by: Jeremy Russell, Project Manager/IPA
Reviewed by: Michael Atallah, Vice President/IPA

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Michael Atallah/Jeremy Russell
Vice President/Project Manager

2. Executive Summary

IPA performed a Phase I Environmental Site Assessment that included on-site observations of the accessible areas of the Altrudy II (the "Subject"), on December 5, 2019. The Subject is located at the 18597 and 18602 Altrudy Lane in Yorba Linda, California 92886.

The Subject is currently developed with two single-family residences and associated improvements, including garages, storage buildings and a swimming pool. The properties operate underground septic tanks for domestic waste disposal. Prior to the current conditions, the Subject was developed with orchards from at least 1938 until 1953; the orchards were periodically removed circa mid-1960s and replaced with dwellings by 1966. Properties in the vicinity of the Subject include vacant land and single- and multi-family residential buildings.

The following summarizes the independent conclusions representing IPA's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative have been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the Altrudy II at 18597 and 18602 Altrudy Lane in Yorba Linda, California 92886. Any exceptions to, or deletions from, this practice are described in Section 3 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) in connection with the Subject. No further action or investigation is recommended at the subject property in relation to RECs.

A Recognized Environmental Condition is defined by ASTM as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with the laws. "The term REC does not include de minimis conditions. De minimis conditions are defined by ASTM as environmental conditions that "generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

A summary of the findings for this assessment are described below.

2.1. Findings/Conclusions

Historical Review (Section 6)

- The review of the historical data available for the Subject and surrounding area revealed no evidence that may have lead to an environmental impact to the Subject. No further action or investigation is recommended regarding historical uses.

Operational Activities (Section 7.1)

The Subject is developed for residential uses. Based on visual observations, and information provided by the property representative, automotive repairs are routinely performed at the subject property at 18597 Altrudy Lane. Numerous cars and car parts, including gasoline tanks, were observed to be stored at the paved and unpaved areas throughout the subject property.

- Due to the large amount of automotive materials and parts, automobiles, etc., observed, IPA could not identify evidence of spills, leaks, or releases.

Hazardous Materials/Petroleum Products (Section 7.2)

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. Based on visual observations, and information provided by the property representative, automotive repairs are routinely performed at the subject property at 18597 Altrudy Lane. Numerous cars and car parts, including gasoline tanks, were observed to be stored at the paved and unpaved areas throughout the subject property.

- Due to the large amount of automotive materials and parts, automobiles, etc., observed, IPA could not identify evidence of spills, leaks, or releases.

Wastes (Section 7.3)

- Visual observation for the generation, treatment, storage, and disposal of wastes was performed. Based on visual observations, and information provided by the property representative, automotive repairs are routinely performed at the subject property at 18597 Altrudy Lane. Numerous cars and car parts, including gasoline tanks, were observed to be stored at the paved and unpaved areas throughout the subject property.
- Due to the large amount of automotive materials and parts, automobiles, etc., observed, IPA could not identify evidence of spills, leaks, or releases.

Polychlorinated Biphenyls (PCBs) (Section 7.4)

- IPA did not identify and utility-owned transformers at the Subject. No further action or investigation is recommended regarding the transformer at the Subject.

Asbestos-Containing Materials (ACM) (Section 7.5)

- Asbestos-containing materials are being evaluated at the Subject under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

Radon Gas (Section 7.6)

- Review of the USEPA's Radon Map for Orange County, California indicated that the Subject is located in Zone 3, areas with a predicted average indoor radon screening level less than or equal to 2 pCi/L (picoCuries per liter of air). Based on the propensity, radon sampling was not performed as a part of this assessment. No further action or investigation is recommended with regard to radon gas levels at the Subject.

Lead-Based Paint (LBP) (Section 7.7)

- Lead-based paint is being evaluated at the Subject under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

Lead in Drinking Water (Section 7.8)

- Based on published utility department information, the water at the Subject is not expected to contain elevated levels of lead. No further action or investigation is recommended regarding lead in drinking water at the Subject.

Storage Tanks/Pipelines (Section 7.9)

- No evidence of storage tanks or pipelines (above or below ground) was identified. No further action or investigation is recommended regarding storage tanks or pipelines at the Subject.

Surface Areas (Section 7.10)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Subject.
- Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Subject.

Mold (Section 7.11)

- IPA performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject. IPA did not note obvious or significant visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Subject. No further action or investigation is recommended regarding mold at the Subject.

Regulatory Review (Section 9)

- Based on review of the regulatory database report, the Subject is not located on any of the databases evaluated, and none of the off-site listed facilities are anticipated to have negatively impacted the environmental integrity of the Subject. In addition, the review does not suggest that the Subject is involved in the generation, treatment, storage, or disposal of hazardous waste. No further action or investigation is recommended regarding the regulatory review.

Vapor Encroachment Screen (Section 10)

- Based on review of environmental records searched by EDR for the Tier 1 Vapor Encroachment Screen, IPA concludes that the Subject is not listed as a site where the potential for a vapor encroachment condition exists. In addition, the Area of Concern (AOC) did not identify any contaminated sites. No further action or investigation is recommended regarding the Vapor Encroachment Screen.

Adjacent Properties (Section 11)

- IPA identified no current adjacent property uses that are anticipated to have a negative impact on the environmental integrity of the Subject. No further action or investigation is recommended regarding the adjacent properties.

2.2. Recommendations

IPA recommends A Phase II Subsurface Investigation is recommended to assess potential impacts from automotive uses at the subject property.

Associated cost estimate	\$8,500.00
--------------------------	------------

3. Survey Approach/Purpose/Limitations

IPA conducted an on-site Environmental Site Assessment of the Subject that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On-site activities and/or interviews were conducted by Mr. Michael Atallah, Vice President with IPA, with:

- Mr. Scott Bering, C&C Development
- Mr. Brian Rawley, The Wendy Rawley Team
- Ms. Toni Ries, Owner

Areas accessed included accessible ground areas and the Subject boundaries.

Weather conditions at the time of the Subject assessment were clear and cool.

IPA reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Subject which could have an adverse impact on the Subject. In an attempt to determine whether historical uses of the Subject and surrounding area have had an environmental impact on the Subject, IPA interviewed individuals knowledgeable about the Subject and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed at the Subject. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-13. The scope of work included an evaluation of:

- The Subject history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Subject as identified through review of reasonably ascertainable standard historical sources.
- Physical characteristics of the Subject as identified through review of reasonably ascertainable topographic maps.
- Current Subject conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:
 - Facility storage tanks, drums, containers (above or below ground), etc.
 - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs
 - The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes

- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Subject. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Subject.

The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Subject and neighboring sites that may impact the Subject. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard E 1527-13. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Subject.
- A Tier 1 Vapor Encroachment Screen in accordance with ASTM Standard E 2600-10.

In addition, at the Client's request, the assessment included the following:

- A review of the physical characteristics of the Subject as identified through review of reasonably ascertainable wetlands, flood plain, soils, geology, and groundwater data.
- A screening approach for the potential existence of:
 - Asbestos, including the identification of all suspect materials in visible/readily accessible areas (interior and exterior). The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication Managing Asbestos in Place (the "Green Book"). Therefore, all materials listed in the Green Book which were installed prior to 1981 are considered suspect with the exception of resilient floor tile, asbestos-cement board (transite), and roofing felt, which are considered suspect regardless of installation date (these materials continue to be manufactured and installed in the United States). No materials were sampled as part of the assessment. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work. Visual observation of pipe chases and behind walls was not performed as a part of this assessment.
 - Radon gas propensity, through the review of the USEPA's Map of Radon Zones.
 - Lead-based paint for all residential properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.
 - Lead in water, based on information provided by the municipal water provider.
 - Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Subject. In addition, IPA interviewed Subject personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as a part of this assessment. IPA notes that this assessment does not constitute a comprehensive mold survey of the Subject, and the conclusions made are based solely on observable conditions in readily accessible interior areas of the Subject on the assessment date.

Limitations

The information presented in this report is based on the agreed upon scope of work as outlined. IPA makes no warranties or guarantees as to the accuracy or completeness of information obtained from information provided or compiled by others. It is possible that information exists beyond the scope of this investigation. Also, changes in site use may have occurred sometime in the past due to variations in rainfall, temperature, water usage, economic, agricultural or other factors. Limited site specific information was made available to IPA about the site. Additional information that was not found or available to IPA at the time of writing the report, may result in a modification of the conclusions and recommendations presented. This report is not a legal opinion. The services performed by IPA have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions. No other warranty, expressed or implied, is made.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties.

It must be noted that no investigation can absolutely rule out the existence of any hazardous materials at a given site. This assessment has been based upon prior site history and observable conditions and activities. Existing hazardous materials and contaminants can escape detection using these methods.

The work performed in conjunction with this assessment and the data developed are intended as a description of available information at the dates and location given. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. In addition, this report is not intended as a regulatory agency compliance/safety audit or for the purpose of ensuring that all applicable permits and/or operating procedures are current and/or appropriate.

IPA recommends that any periodic review of any property should include an update of information on environmental conditions in the area. Note that no soils, groundwater, or potable water testing for the presence of hazardous substances was performed for this assessment.

This report is considered confidential and privileged information. It was prepared for the sole and exclusive use and information of the Client and its affiliates, rating agencies, and certain limited investors involved in the Securitization of the property.

3.1. Data Gaps

Data gaps in information exist. However, because the data gaps were not determined to be material in identifying a Recognized Environmental Conditions (RECs) they are not considered by ASTM standards to be *significant* and are therefore not individually addressed in this report.

4. User Provided Information

This Section documents whether the user reported to IPA information pursuant to the responsibilities described in Section 6 of the ASTM Standard E 1527-13.

4.1. User Engaged Environmental Cleanup Liens and Activity And Use Limitation (AUL) Review

The user did not engage IPA to review title and judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Subject. Furthermore, these documents were not provided to IPA for review. The lack of or inability to obtain this information represents a data gap. Based on the findings of this report, the absence of this information is not considered a *significant* data gap.

4.2. User Questionnaire

A User Questionnaire was provided to the user (Client) to assist the user and IPA in gathering information from the user that may be material to identifying RECs. A copy of the User Questionnaire is provided in the Appendices (Section 12).

4.3. Reason for Assessment

The user informed IPA that the reason for the assessment is for a purchase.

5. Subject Location/Description

The Subject is located at the 18597 and 18602 Altrudy Lane, Yorba Linda, California 92886.

5.1. Subject Description

- Age of Subject:** Initially developed for agricultural (orchards) and residential uses circa 1930s; orchards removed circa mid-1960s with construction of additional residential structures.
- Building area:** The subject is currently developed for residential use with single family dwellings. The subject consists of two parcels, identified as Orange County Assessor's Parcel Numbers (APNs) 323-231-18 (18597 Altrudy Lane) and 323-231-19 (18602 Altrudy Lane), containing a total of 2.38 acres.
- Site drainage:** Surface drainage is provided at the site to on-site drainage inlets to the municipal storm water drainage system. Storm water flows to inlets connected to the municipal storm system.
- Utilities:** The property is reportedly serviced by Southern California Edison (SCE) for electricity, the City of Yorba Linda for water and sewer services, and Southern California Gas Company for natural gas services.
- Built Improvements:** Two single-story dwellings with garages, single-story storage sheds, tennis court and swimming pool.
- Parking:** Asphalt-paved driveways and parking areas and concrete-paved garages.
- Amenities/Common Areas:** Typical residential landscaping.

5.2. Environmental Setting

5.2.1. Topography

Review of the Yorba Linda, California Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 1981, indicated the following:

- The Subject has an average elevation of approximately 429 feet above mean sea level. Elevations vary slightly across the Subject. Slope in the general area of the Subject is to the south or southwest
- The Subject area is depicted with three small structures.
- No surface water features are located in the immediate vicinity of the Subject.

5.2.2. Wetlands

Review of wetlands information provided by EDR indicated the following:

- No wetland areas are indicated at the Subject or adjacent properties.

5.2.3. Floodplain

The property is located in Flood Zone X – Areas of minimal flooding. Community panel #06059C0068J, effective date December 3, 2009.

5.2.4. Soils/Geology

Review of soils information for the Subject area provided by EDR indicated the following:

- The Subject is located in an area comprised of soil known as the Myford sandy loam. The soil is described as sandy loam, sandy clay, sandy clay loam, and sandy loam to a depth of approximately 79 inches. The soil is moderately well drained and occurs on terraces.

Review of geologic information for the Subject area provided by EDR indicated the following:

Rock Stratigraphic Unit

- Era: Cenozoic
- System: Quaternary
- Series: Quaternary

Geologic Age Identification

- Category: Stratified Sequence

5.2.5. Groundwater Hydrology

Review of the Ground Water Atlas of the United States, Segment 1, California/ Nevada, published by the U.S. Geological Survey and dated 1995, indicated the following:

- The Subject is located within the Coastal Basins aquifer system. The aquifer system of the Los-Angeles-Orange County Coastal Plain in which the Subject is located is contained in a coastal plain basin that extends over an area of approximately 860 square miles. The major drainages in the basin are the Los Angeles, the San Gabriel, and the Santa Ana Rivers, all of which have headwaters outside the basin.

Shallow ground water levels in the area of the Subject are estimated to be more than five feet below ground surface.

Shallow groundwater flow is expected to follow the ground level slope of surface elevations. The direction of this flow at the Subject is anticipated to be toward the southwest.

Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

6. Historical Review

6.1. Chain of Title

A Chain of Title review was not performed for this assessment.

6.2. Prior Use Interviews

According to the Subject Point of Contact, the Subject has historically been in residential use or was historically unimproved or agricultural land.

6.3. Local and/or State Government Agency Record Review/Interviews

IPA contacted the Yorba Linda Fire Department (YLFD) regarding file information for the Subject. As of this writing, the YLFD has not responded to IPA's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

IPA contacted the Orange County Health Care Agency (OCHCA) regarding file information for the Subject. As of this writing, the OCHCA has not responded to IPA's request. In addition, IPA accessed the OCHCA online reports maintained by the OCHCA at the website: <http://ochealthinfo.com/eh/home/reports>. The Subject was not identified on any of the reports.

Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

IPA reviewed building permits for the Subject at the Yorba Linda Department of Development Services, Building & Safety Division. According to City of Yorba Linda records, the addresses of the Subject are 18597 and 18602 Altrudy Lane. No records pertaining to the original development of the Subject were reasonably ascertainable from the City of Yorba Linda.

General building permits for subject were on file but did not reveal any information or condition that could impact the environmental integrity of the Subject. No environmentally significant information was identified during this review.

Review of available zoning records at the Yorba Linda Development Services, Planning Division indicates that the subject is zoned TCSP.

IPA researched the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), DOGGR Online Mapping System <https://www.conservation.ca.gov/dog/Pages/Wellfinder.aspx> for information regarding oil and gas development. According to the DOGGR Online Mapping System, no oil or gas wells are located on or adjacent to the Subject.

6.4. Historical Maps

IPA contacted EDR in an attempt to determine if there were any historic maps in the EDR Historic Map Collection for the Subject area.

Review of historical topographic maps back to 1896 did not identify any environmental concerns in the Subject area.

6.5. Historical City Directories

Historical city directories as provided by EDR were reviewed for the Subject. City directories have tenant listings by address. This review revealed the following information for the current Subject property address (18597 and 18602 Altrudy Lane).

1965

18602 Altrudy Lane – V.H. Abbot

1973

18597 Altrudy Lane – Muriel Scott, G. Wyvell

18602 Altrudy Lane – Allen Henry

1976

18597 Altrudy Lane – Ronald Rauch

18602 Altrudy Lane – No listing

1982, 1987, 1992

18597 Altrudy Lane – Alan Reis

18602 Altrudy Lane – No listing

1995

18597 Altrudy Lane – A. Siaton

2000, 2005

18597 Altrudy Lane – Ken Reese Ready Mix

2010, 2014

18597 Altrudy Lane – Ken Reis Ready Mix

18602 Altrudy Lane – Andrew Wilson

Subject property listings prior to 1965 were not provided in the city directory abstract.

No information of environmental significance was identified in the historical city directory review.

6.6. Aerial Photography

Historical aerial photographs were provided by EDR. Review of the photographs identified the following:

1938

Subject: The subject is developed with what appears to be orchards.

Adjacent: The surrounding adjacent properties are developed with what appear to be orchards and associated residential buildings.

1953

Subject: No significant changes visible.

Adjacent: The surrounding adjacent properties are developed with fewer orchards and with additional residential developments. The property adjacent south app

1963

Subject: The east side of the Subject is developed with what appears to be residential structures; the west side appears relatively unchanged.

Adjacent: The adjacent property to the north appears to be developed with additional residential buildings. The adjacent property to the east appears undeveloped. The adjacent property to the west appears developed with residential structures. The adjacent property to the south appears to be replanted with orchards and developed with a structure.

1966

Subject: The subject appears to be developed with an additional residential structure on the southwest corner.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1972

Subject: The subject is developed with what appears to be three structures and an improvement on the northwest portion.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1977

Subject: The subject is developed with what appear to be additional improvements on the northwest and southwest portions.

Adjacent: The adjacent property to the east is redeveloped with what appear to be residential tract houses. No other significant changes visible.

1985

Subject: No significant changes visible.

Adjacent: The adjacent property to the south is redeveloped with what appears to be a residential apartment complex. No other significant changes visible.

1989, 1994

Subject: No significant changes visible.

Adjacent: No significant changes visible.

2005

Subject: The northeast corner is developed with what appears to be a tennis court. No other significant changes visible.

Adjacent: The property adjacent west appears undeveloped. No other significant changes visible.

2009, 2012, 2016

Subject: No significant changes visible

Adjacent: No significant changes visible.

6.7. Previous Investigations/Assessments

IPA was not provided with any previously conducted Phase I Environmental Site Assessment reports for the Subject.

6.8. Plans and Specifications

As-built/renovation-site plans, drawings, or specifications were not available for review at the Subject or local agency offices visited for this assessment.

6.9. Historical Summary

Based upon a review of local agency records, historical maps, historical aerial photographs, historical city directories, and interviews with knowledgeable personnel, the Subject was undeveloped as early as 1896; developed for residential and agricultural use (orchards) in circa 1938; and the orchards were periodically removed in the 1960s and replaced with residential developments. No evidence was uncovered through IPA's research to indicate that home and/or farm heating fuel tanks, or structures such as sumps, separators, evaporation ponds, or well cellars were previously located on the subject; however, no subsurface investigations were performed for this assessment.

The Subject is developed for residential uses. Based on visual observations, and information provided by the property representative, automotive repairs are routinely performed at the subject property at 18597 Altrudy Lane. Numerous cars and car parts, including gasoline tanks, were observed to be stored at the paved and unpaved areas throughout the subject property.

Due to the large amount of automotive materials and parts, automobiles, etc., observed, IPA could not identify evidence of spills, leaks, or releases.

7. Subject Reconnaissance

7.1. Operational Activities/Noteworthy Tenants

The Subject is developed for residential uses. Environmental concerns that would warrant further investigation were identified during the course of this assessment regarding the apparent automotive repair activities observed on the subject property.

Considering the operations assessed at the Subject, no environmental permits, registrations or notifications appear to be required.

7.2. Hazardous Materials/Petroleum Products Storage and Handling

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. Based on visual observations, and information provided by the property representative, automotive repairs are routinely performed at the subject property at 18597 Altrudy Lane. Numerous cars and car parts, including gasoline tanks, were observed to be stored at the paved and unpaved areas throughout the subject property.

Due to the large amount of automotive materials and parts, automobiles, etc., observed, IPA could not identify evidence of spills, leaks, or releases.

7.3. Waste Generation, Treatment, Storage, and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. Based on visual observations, and information provided by the property representative, automotive repairs are routinely performed at the subject property at 18597 Altrudy Lane. Numerous cars and car parts, including gasoline tanks, were observed to be stored at the paved and unpaved areas throughout the subject property.

Due to the large amount of automotive materials and parts, automobiles, etc., observed, IPA could not identify evidence of spills, leaks, or releases.

7.4. Polychlorinated Biphenyls (PCBs)

IPA identified no utility-owned transformers at the Subject. No further action or investigation is recommended regarding the transformer at the Subject.

No additional equipment with the potential to utilize dielectric or hydraulic fluid was observed during the site assessment.

7.5. Asbestos-Containing Materials (ACM)

Asbestos-containing materials are being evaluated at the Subject under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

7.6. Radon Gas

Review of the USEPA's Radon Map for Orange County, California indicated that the Subject is located in Zone 3, areas with a predicted average indoor radon screening level less than or equal to 2 pCi/L (picoCuries per liter of air). Based on the propensity, radon sampling was not performed as a part of this assessment. No further action or investigation is recommended with regard to radon gas levels at the Subject.

7.7. Lead-Based Paint (LBP)

Lead-based paint is being evaluated at the Subject under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

7.8. Lead in Drinking Water

According to published utility department information for the City of Yorba Linda, the water supplied to the Subject is within federal, state, and local drinking water quality standards.

7.9. Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Subject.

No aboveground storage tanks (ASTs) were observed at the Subject.

Based on the review of the state list of registered USTs, no USTs are registered for the Subject.

Interviews with persons knowledgeable of the Subject did not identify any evidence of current or historic storage tanks (above or below ground) at the Subject.

Visual observations did not identify any surface markings indicating the existence of subsurface product pipelines at the Subject.

7.10. Surface Areas

Observations during IPA's assessment identified that the Subject lands are developed with structures, unpaved, bare soil, or covered with vegetation. The land surface of the Subject is slightly undulated, with slight changes in elevation. Surface water flow is in a southern direction.

Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed.

Visual observation of the Subject and adjacent properties did not identify any evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Subject.

Visual observations did not identify any evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Subject.

Visual observations did not identify any surface water features including lagoons, ponds or other bodies of water at the Subject.

7.11. Mold

IPA performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject. IPA did not note obvious or significant visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Subject. No further action or investigation is recommended regarding mold at the Subject.

This assessment does not constitute a comprehensive mold survey of the Subject. The reported observations and conclusions are based solely on interviews with Subject personnel and conditions as observed in readily accessible interior areas of the Subject on the assessment date.

8. Interviews

8.1. Key Site Manager

Property-related personnel were present at the Subject on the day of the site assessment and answered questions to the best of their knowledge regarding Subject site systems and conditions.

A Pre-Survey Questionnaire was completed as a part of this assessment. The Questionnaire was completed by Mr. Michael Atallah through an interview with Mr. Brian Rawley, the Subject Point of Contact. Information obtained from the Questionnaire has been used in the preparation of this report. Mr. Rawley indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.2. Owner

IPA submitted an Owner Questionnaire to the user in an effort to identify the owner of the Subject that could be interviewed to provide information regarding proceedings involving the Subject. The Questionnaire was completed by Mr. Michael Atallah through an interview with Ms. Toni Ries, the Owner. Information obtained from the Questionnaire has been used in the preparation of this report. Ms. Ries indicated that she was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.3. User

IPA submitted a User Questionnaire in an effort to obtain information regarding proceedings involving the Subject. The User Questionnaire was completed by Mr. Scott Bering, designated representative of the user. Mr. Bering indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.4. Occupants

The Subject is a single-family residential property and contains no non-residential tenants. Therefore, based on the ASTM Standard guidance, residential occupants were not interviewed.

8.5. Past Owners, Operators, and Occupants

No past owners, operators, or occupants of the Subject who would likely have material information regarding the potential for contamination at the Subject were identified.

8.6. Owners Or Occupants of Adjacent or Nearby Property

The Subject was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

8.7. Interviews with Others

No other individuals were interviewed as part of this assessment.

9. Regulatory Database Review

Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, IPA concludes that the Subject is not a listed site. The area search of the Subject for listed sites identified various sites outlined in the regulatory database report included in the Appendices, Section 11. Information about the listed sites is included below.

IPA also reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. Any identified unmappable site within the specified search radii is included below.

The following are some of the databases which were reviewed for this assessment. See the appended regulatory database report for a complete listing of databases reviewed for this assessment:

- **NPL Listing:** The National Priorities (Superfund) List (NPL) is United States Environmental Protection Agency (USEPA's) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.
- **Delisted NPL Listing:** The Delisted NPL database is a listing of sites which have been deleted from the NPL list by the USEPA.
- **RCRA-TSD Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD database is a compilation by the USEPA of reporting facilities that transport, treat, store or dispose of hazardous waste.
- **RCRA-Corrective Action Sites Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Corrective Action Sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.
- **CERCLIS Listing:** This database is a compilation of sites which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances.
- **NFRAP Listing:** This database contains information regarding sites which have been removed from the USEPA CERCLIS database.

- **RCRIS-Generator Listing:** The USEPA identifies and tracks hazardous waste from the point of generation to the point of disposal through the Resource Conservation and Recovery Information System (RCRIS). The RCRIS-Generators database is a compilation by the USEPA of facilities that report hazardous waste generation.
- **Emergency Response Notification System (ERNS):** The ERNS is a national database used to collect information on reported releases of oil or hazardous substances.
- **Federal institutional control registry:** This database contains information on sites with federal institutional controls.
- **Federal engineering control registry:** This database contains information on sites with federal engineering controls.
- **SHWS Listing:** This database is a comprehensive listing of sites which are considered to be a threat to the public health and welfare by the California Department of Toxic Substances Control. Further, this is the ASTM equivalent of a State Hazardous Waste Sites List.
- **SWF Listing:** This database is a comprehensive listing of all State Permitted Solid Waste Landfills.
- **Leaking Underground Storage Tanks:** This database contains a summary of information pertaining to leaking underground storage tank (LUST) sites identified by the state.
- **Underground Storage Tanks:** This database contains a summary of information pertaining to registered underground storage tanks (USTs) identified by the state.
- **State Voluntary Cleanup Sites:** This database contains a listing of sites which are in the State voluntary cleanup program
- **Tribal LUST:** This database contains information on Tribal LUST sites.
- **Tribal UST:** This database contains information on Tribal UST sites.

The following is a discussion of listed sites:

City of Yorba Linda

4601 Lakeview Avenue

Distance: 0.13 mile

Direction: North

Database listed on: UST

Information in the UST database indicates the site was identified as Orange County UST Facility ID 18826. No information pertaining to the capacity, contents, installation or removal was provided by EDR. The site was not identified as a leaking UST case. Based on the current regulatory status, this site is not expected to have adversely impacted the environmental integrity of the Subject.

ORANGE COUNTY FIRE STATION #10

18402/18422 Lemon Drive

Distance: 0.125 mile

Direction: Southwest

Database listed on: UST, LUST SWEEPS UST, CA FID UST, HIST CORTESE

Information in the UST database indicates the site was identified as Orange County UST Facility ID 10473 for operation of a 5,000-gallon diesel UST. The site was identified as LUST case 85UT122 for a release of gasoline. A 550-gallon gasoline UST was removed in 1984, and a 5,000-gallon diesel UST was removed in 1994. The LUST case reported that onsite treatment of impacted subsurface soils were remediated using soil vapor extraction from December 2000 to June 2001. Groundwater was reported to occur at depths from 75 to 80 feet bgs. The case was issued regulatory closure on November 6, 2002. Based on the current regulatory status, this site is not expected to have adversely impacted the environmental integrity of the Subject.

Remaining Listed Sites

Review of the regulatory agency database report identified that all of the remaining sites are plotted 0.25-mile or farther from the Subject. Based on various factors such as distance, gradient relationship, estimated direction of groundwater flow, media impacted, and/or current regulatory status, these sites are not anticipated to have negatively impacted the environmental integrity of the Subject.

10. Tier 1 Vapor Encroachment Screen

IPA has completed a Tier 1 Vapor Encroachment Screen of the Subject in accordance with ASTM Standard E 2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

10.1. Purpose

The purpose of this Tier 1 Vapor Encroachment Screen (VES) is to identify, to the extent feasible pursuant to the procedures presented in the ASTM E 2600-10 standard guide, the potential for a Vapor Encroachment Condition (VEC) to exist at the Subject property.

10.2. Methodology

IPA utilized for this assessment EDR's VEC App to accurately identify and document potential VEC sites within the Subject's Area of Concern (AOC). By using integrated data applications and state-of-the-art analytical tools, EDR's VEC App has been specifically designed to adhere to ASTM E 2600-10. EDR's VEC App performs an initial search of all ASTM E 2600-10 standard government record databases and EDR proprietary historical records related to former dry cleaners, gas stations, and manufactured gas plants within the 1/3 mile maximum distance defined in ASTM E 2600-10 for COC-contaminated sites.

10.3. Results

Subject: Based on review of environmental records searched by EDR for this Tier 1 VES, IPA concludes that the Subject is not listed as a site where the potential for a vapor encroachment condition exists.

Area of Concern (AOC): The AOC search did not identify any up gradient, down gradient or cross gradient listed contaminated sites. Several sites identified in the records search were determined to be outside of the AOC or were not identified as contaminated sites; therefore, a Vapor Encroachment Condition (VEC) regarding these sites could be ruled out.

11. Adjacent Properties

Properties in the vicinity of the Subject include commercial and residential development. The following properties adjacent to the Subject were observed:

North — The Subject is bordered to the north by single-family residential dwellings.

East — The Subject is bordered to the east by single-family residential dwellings.

South — The Subject is bordered to the south by multi-family residential dwellings across Altrudy Lane.

West — The Subject is bordered to the west by undeveloped land.

Based on observations and available regulatory information, the adjacent property uses are not anticipated to adversely impact the environmental integrity of the Subject.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Integrated Property Analysis were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX C: Questionnaires

KEY SITE MANAGER PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Mr. Brian Rawley

Association with property: Designated Representative

Length of association with property: 1 Year

Date: December 5, 2019

Property Name: Altrudy II

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.

Note: *U/NR* indicates "Unknown" or "No Response".

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1A.	Is the Subject used for an industrial use?		X		
1B.	Are any adjoining properties used for an industrial use?		X		
2A.	To the best of your knowledge, has the Subject been used for an industrial use in the past?		X		
2B.	To the best of your knowledge, has any adjoining properties been used for an industrial use in the past?		X		
3A.	Is the Subject used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
3B.	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4A.	To the best of your knowledge, has the Subject been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4B.	To the best of your knowledge, has any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
5A.	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Subject?		X		
5B.	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Subject?		X		
6A.	Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject?		X		
6B.	To the best of your knowledge, have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject?		X		
7A.	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Subject?		X		
7B.	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Subject?		X		
8A.	Has fill dirt been brought onto the Subject which originated from a contaminated site?		X		
8B.	Has fill dirt been brought onto the Subject which is of an unknown origin?		X		
9A.	Are there currently any pits, ponds or lagoons located on the Subject in connection with waste treatment or waste disposal?		X		
9B.	To the best of your knowledge, have there been previously any pits, ponds or lagoons located on the Subject in connection with waste treatment or waste disposal?		X		
10A.	Is there currently, any stained soil on the Subject?		X		
10B.	To the best of your knowledge, has there been previously any stained soil on the Subject?		X		
11A.	Are there currently any registered or unregistered storage tanks (above or underground) located on the Subject?		X		
11B.	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Subject?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
12A.	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Subject or adjacent to any structure located on the Subject?		X		
12B.	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Subject or adjacent to any structure located on the Subject?		X		
13A.	Are there currently any flooring, drains, or walls located at the Subject that are stained by substances other than water or are emitting foul odors?		X		
13B.	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Subject that are stained by substances other than water or are emitting foul odors?		X		
14A.	If the Subject is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?		X		
14B.	If the Subject is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?		X		
15A.	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Subject or any facility located on the Subject?		X		
15B.	Have you been informed of the current existence of hazardous substances or petroleum products with respect to the Subject or any facility located on the Subject?		X		
16A.	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Subject or any facility located on the Subject?		X		
16B.	Have you been informed of the past existence of environmental violations with respect to the Subject or any facility located on the Subject?		X		
16C.	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances of petroleum products in, on or from the property?		X		
16D.	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
16E.	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
17.	Have there been any environmental site assessments of the Subject that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Subject or recommended further assessment of the Subject?		X		
18.	Does the Subject discharge waste water on or adjacent to the Subject, other than storm water, into a storm water sewer system?		X		
19.	Does the Subject discharge waste water on or adjacent to the Subject, other than storm water, or into a sanitary system?		X		
20.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Subject?		X		
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		X		
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Subject?		X		
23.	Has there ever been any ACM testing conducted on the Subject?		X		
24.	Is there an asbestos Operations and Maintenance (O&M) program in place at the Subject?		X		
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Subject?		X		
26.	Has there ever been LBP testing conducted on the Subject?		X		
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Subject?		X		
28.	Has the water at the Subject ever been tested for lead?		X		
29.	Has Radon testing ever been conducted at the Subject?		X		
30.	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
31.	Is the Subject or any portion of the Subject located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?		X		
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.			X	
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?			X	
34.	Is there a mold Operations and Maintenance (O&M) program in place at the Subject?			X	
35.	Is the HVAC system inspected at least annually?			X	
36.	Have identified HVAC problems been corrected in a timely manner?			X	
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?			X	
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?			X	
39.	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?			X	
Summarize historical Subject use (when was the Subject developed with the current improvements, what modifications have taken place, what was the Subject used for prior to its current use)		Please refer to report			

USER QUESTIONNAIRE

IPA has been retained to conduct a Phase I Environmental Site Assessment (ESA) of the following property. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 05 Scope of Work for this assessment, which documents certain User responsibilities, we are submitting this questionnaire to help you meet those responsibilities. Please complete this questionnaire and return via email or by fax to 949-756-8280 (within one business day of receipt).

Date: December 5, 2019

Name of person completing questionnaire: **Mr. Scott Bering**

Company: **C&C Development**

Length of association with property: **1 Year**

Phone Number: **(714) 288-7600**

Property Name/Address: **Altrudy II, 18597 and 18602 Altrudy Lane , Yorba Linda, California 92886**

IPA Subject Number: **0196-0067**

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.

Note: *U/NR* indicates "Unknown" or "No Response", and "N/A" indicates not applicable.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?		X		
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?		X		
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?		X		
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	X			
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			X	

QUESTION		RESPONSE			COMMENTS
		Y	N	U/ NR	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user		X		
	8 (a) Do you know the past uses of the property?		X		
	8 (b) Do you know of specific chemicals that are present or once were present at the property?		X		
	8 (c) Do you know of spills or other chemical releases that have taken place at the property?		X		
	8 (d) Do you know of any environmental cleanups that have taken place at the property?		X		
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?		X		

In addition, are you aware of any of the following documents, and if so, please forward copies of the document(s) to IPA at 550 West Vista Way, Suite 212, Vista, California 92083 (along with a copy of this form):

<input checked="" type="checkbox"/>	Helpful Documents to be forwarded to IPA:
<input type="checkbox"/>	Environmental site assessment reports (i.e., Phase I, Phase II, tank testing results, radon, lead paint, or asbestos testing, etc.)
<input type="checkbox"/>	Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)
<input type="checkbox"/>	Environmental permits (i.e., solid waste disposal, hazardous waste disposal, wastewater, NPDES, underground injection, etc.)
<input type="checkbox"/>	Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)
<input type="checkbox"/>	Registrations for underground injection systems
<input type="checkbox"/>	Material safety data sheets
<input type="checkbox"/>	Community right-to-know plan
<input type="checkbox"/>	Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans, etc
<input type="checkbox"/>	Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area
<input type="checkbox"/>	Notices/correspondence from any agency relating to past/current violations of environmental laws, or liens encumbering the property
<input type="checkbox"/>	Hazardous waste generator notices or reports
<input type="checkbox"/>	Other:

OWNER QUESTIONNAIRE

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 10 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 08/14/2019 has revealed that there

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 8 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

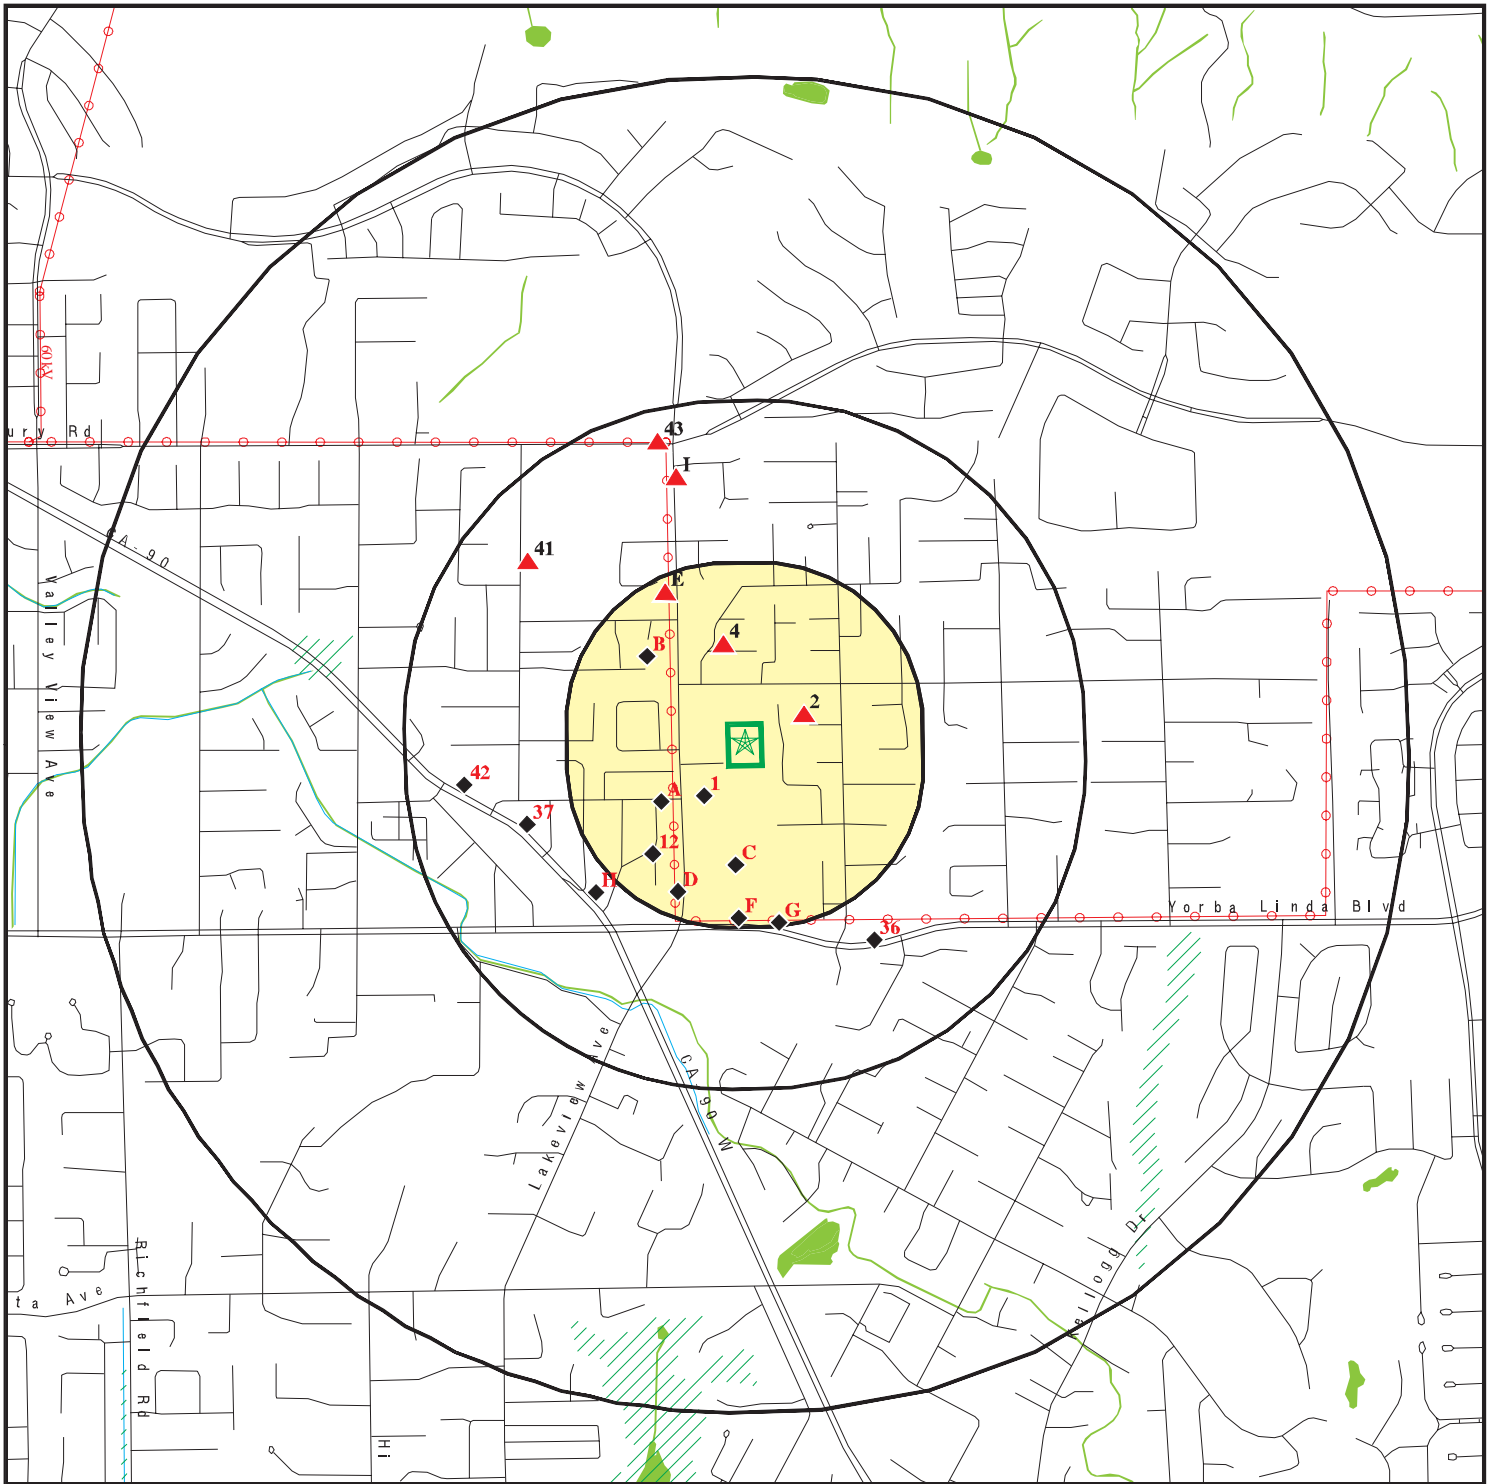

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 05-21-2014
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 08/28/2014. Three containers of hazardous waste were observed to be stored beyond allowed accumulation time limits. Waste oxidizers with an accumulation start date of 6/30/12, waste corrosive with an accumulation start date of 4/26/13, and flammable waste with an accumulation start date of 4/3/12 were

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 01-27-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed HMBEP submission package on CERS, DENIED. Request for re-submittal this date. The following corrections are needed: CHEMICAL INVENTORY Chemical inventory submitted on 1/26/2015 has been reduced to 2 chemicals. The R404-A, Genetron 22 R-22, and Genetron 134 A R-134a have been removed. Nonflammable refrigerant gases are exempted up to a quantity of 1,000 cubic feet. The R404-A meets the exemption. The amount of R-22 previously reported was listed at 393 pounds which translates to 1,674.8 cubic feet. This material does not meet the exemption and will need to be included in your disclosure. The amount of R-134a previously reported translates to 1,879.8 cubic feet and will also need to be included in your disclosure. The Emergency Response plan lists CO2 in the deli section. Please be sure to include this material in your disclosure if it exceeds the minimum threshold quantity of 1,000 cubic feet. EMERGENCY RESPONSE Plan ? the NOTIFICATION section does not [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Amount of waste stored on site is still below 100 kg. Waste was observed to be properly stored.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-21-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials chemical inventory and business emergency plan inspection. Consent to enter, inspect, and take photographs was given by Jim Batista, store director. Observed the facility and inspected hazardous materials storage. This agency has conducted a review of documents submitted on the CERS reporting system. Hazardous material and Business Emergency Plan submittal were declined on 11/21/13. Please log back into the system and make required changes to your submittal within 30 days.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-21-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Observed facility and inspected hazardous waste storage areas. Permission to enter and inspect was granted by Jim Batista, store director. Facility generates pharmacy waste and various wastes from consumer product returns. Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Three containers of hazardous waste were observed to be stored beyond allowed accumulation time limits. Waste oxidizers with an accumulation start date of 6/30/12, waste corrosive with an accumulation start date of 4/26/13, and flammable waste with an accumulation start date of 4/3/12 were observed in the hazardous waste storage area (see violation). This facility is a small quantity generator of hazardous waste and may not accumulate waste on site for longer than 180 days. Have these wastes hauled using a registered hazardous waste hauler and send a copy of the manifest to this agency [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-23-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Steven Walters, Store Manager consented to this inspection. Observed facility and inspected hazardous waste storage area. Facility generates the following wastes: consumer product returns and breakage. Facility appears to be a conditionally exempt small quantity generator at this time. There have been no manifests generated within the past three years. Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Emergency information is posted. Inspected perimeter of facility and found no evidence of hazardous waste runoff.

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 01-30-2014

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Young Choi who gave consent to enter and inspect the facility. Hazardous waste observed on site include: - One 30-gallon drum of spent Perchloroethylene. Container was properly labeled and sealed upon inspection. The accumulation date (7/19/11) matched the date of the last hazardous waste pick up. - One 55-gallon drum of spent dry cleaning filters. Container was maintained closed upon inspection. Container was not labeled. A label for the drum was provided to the owner. Owner stated the full drum of filters has been on site for approximately one year. - Two additional spent dry cleaning filters were found in the facility. The filters were not contained in a hazardous waste container. Reviewed consolidated manifests for all hazardous waste streams. Only two manifests were maintained in the facility and were dated July 19, 2011 and August 7, 2008. Perimeter of the facility and the municipal [Truncated]

City,State,Zip: YORBA LINDA, CA 92886
Site ID: 366919
CERS ID: 10667449
CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-21-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Cosmoprof On site for a routine hazardous waste inspection. Lindsey Floria consented to this inspection. Observed facility and inspected hazardous waste storage areas. Facility generates the following hazardous wastes: consumer returns and broken inventory. Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Manifests were available for review. Facility is currently assigned and using active EPA ID # CAL000412100. Emergency information is posted. Personnel responsible for hazardous waste management receive hazardous waste training. Inspected perimeter of facility and found no evidence of hazardous waste run-off.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: N/A
Date Made Active in Reports: 11/20/2019	Last EDR Contact: 11/07/2019
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2019

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/25/2019	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 10/17/2019	Last EDR Contact: 10/28/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895

Number of Days to Update: 113	Next Scheduled EDR Contact: 01/06/2020
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/26/2019	Telephone: (415) 495-8895

Number of Days to Update: 6	Next Scheduled EDR Contact: 03/09/2020
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/19/2019	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

INDIAN ODI: Report on the Status of Open Dumps on Indian Lands

Location of open dumps on Indian land.

Date of Government Version: 12/31/1998
Date Data Arrived at EDR: 12/03/2007
Date Made Active in Reports: 01/24/2008
Number of Days to Update: 52

Source: Environmental Protection Agency
Telephone: 703-308-8245
Last EDR Contact: 10/28/2019
Next Scheduled EDR Contact: 02/10/2020
Data Release Frequency: Varies

DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations

A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 01/12/2009
Date Data Arrived at EDR: 05/07/2009
Date Made Active in Reports: 09/21/2009
Number of Days to Update: 137

Source: EPA, Region 9
Telephone: 415-947-4219
Last EDR Contact: 10/17/2019
Next Scheduled EDR Contact: 02/03/2020
Data Release Frequency: No Update Planned

ODI: Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985
Date Data Arrived at EDR: 08/09/2004
Date Made Active in Reports: 09/17/2004
Number of Days to Update: 39

Source: Environmental Protection Agency

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 06/11/2019	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 06/13/2019	Telephone: 202-307-1000
Date Made Active in Reports: 09/03/2019	Last EDR Contact: 11/20/2019
Number of Days to Update: 82	Next Scheduled EDR Contact: 03/09/2020
	Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/29/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 07/31/2019	Telephone: 916-323-3400
Date Made Active in Reports: 10/08/2019	Last EDR Contact: 10/29/2019
Number of Days to Update: 69	Next Scheduled EDR Contact: 02/10/2020
	Data Release Frequency: Quarterly

CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 06/30/2018	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 07/16/2019	Telephone: 916-255-6504
Date Made Active in Reports: 09/24/2019	Last EDR Contact: 09/24/2019
Number of Days to Update: 70	Next Scheduled EDR Contact: 01/20/2020
	Data Release Frequency: Varies

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 08/14/2019	Source: CalEPA
Date Data Arrived at EDR: 08/14/2019	Telephone: 916-323-2514
Date Made Active in Reports: 08/21/2019	Last EDR Contact: 10/22/2019
Number of Days to Update: 7	Next Scheduled EDR Contact: 02/03/2020
	Data Release Frequency: Quarterly

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 07/01/1995
Date Data Arrived at EDR: 08/30/1995
Date Made Active in Reports: 09/26/1995
Number of Days to Update: 27

Source: State Water Resources Control Board
Telephone: 916-227-4364
Last EDR Contact: 01/26/2009
Next Scheduled EDR Contact: 04/27/2009
Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019
Date Data Arrived at EDR: 06/13/2019
Date Made Active in Reports: 09/03/2019
Number of Days to Update: 82

Next Scheduled EDR Contact: 12/23/2019
Data Release Frequency: Varies

Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994
Date Data Arrived at EDR: 07/07/2005
Date Made Active in Reports: 08/11/2005
Number of Days to Update: 35

Source: State Water Resources Control Board
Telephone: N/A
Last EDR Contact: 06/03/2005
Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

UST MENDOCINO: Mendocino County UST Database

A listing of underground storage tank locations in Mendocino County.

Date of Government Version: 08/20/2019
Date Data Arrived at EDR: 09/09/2019
Date Made Active in Reports: 10/31/2019
Number of Days to Update: 52

Source: Department of Public Health
Telephone: 707-463-4466
Last EDR Contact: 11/20/2019
Next Scheduled EDR Contact: 03/09/2020
Data Release Frequency: Annually

HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990
Date Data Arrived at EDR: 01/25/1991
Date Made Active in Reports: 02/12/1991
Number of Days to Update: 18

Source: State Water Resources Control Board
Telephone: 916-341-5851
Last EDR Contact: 07/26/2001
Next Scheduled EDR Contact: N/A
Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SAN FRANCISCO AST: Aboveground Storage Tank Site Listing Aboveground storage tank sites

Date of Government Version: 08/01/2019	Source: San Francisco County Department of Public Health
Date Data Arrived at EDR: 08/02/2019	Telephone: 415-252-3896
Date Made Active in Reports: 10/11/2019	Last EDR Contact: 10/31/2019
Number of Days to Update: 70	Next Scheduled EDR Contact: 02/17/2020
	Data Release Frequency: Varies

CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 09/05/1995	Telephone: 916-341-5851
Date Made Active in Reports: 09/29/1995	Last EDR Contact: 12/28/1998
Number of Days to Update: 24	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

CERS TANKS: California Environmental Reporting System (CERS) Tanks

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

Date of Government Version: 08/14/2019	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 08/14/2019	Telephone: 916-323-2514
Date Made Active in Reports: 08/21/2019	Last EDR Contact: 10/22/2019
Number of Days to Update: 7	Next Scheduled EDR Contact: 02/03/2020
	Data Release Frequency: Quarterly

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 08/29/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/30/2019	Telephone: 916-323-3400
Date Made Active in Reports: 10/29/2019	Last EDR Contact: 08/28/2019
Number of Days to Update: 60	Next Scheduled EDR Contact: 12/16/2019
	Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 10/25/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/07/2019	Telephone: 202-564-6023
Date Made Active in Reports: 11/20/2019	Last EDR Contact: 11/07/2019
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/03/2019	Source: DTSC and SWRCB
Date Data Arrived at EDR: 09/04/2019	Telephone: 916-323-3400

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 06/24/2019	Source: Environmental Protection Agency

Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 10/25/2019	Source: EPA
Date Data Arrived at EDR: 11/07/2019	Telephone: 202-564-6023
Date Made Active in Reports: 11/21/2019	Last EDR Contact: 11/07/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 02/17/2020
	Data Release Frequency: Quarterly

PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 03/20/2019	Source: EPA
Date Data Arrived at EDR: 04/10/2019	Telephone: 202-566-0500
Date Made Active in Reports: 05/14/2019	Last EDR Contact: 10/11/2019
Number of Days to Update: 34	Next Scheduled EDR Contact: 01/20/2020
	Data Release Frequency: Annually

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 11/18/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/23/2016	Telephone: 202-564-2501
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 10/07/2019
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/20/2020
	Data Release Frequency: Quarterly

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/18/2017
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/04/2017
	Data Release Frequency: No Update Planned

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/20/2019	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 06/20/2019	Telephone: 301-415-7169

PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 05/24/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/30/2017	Telephone: 202-566-0517
Date Made Active in Reports: 12/15/2017	Last EDR Contact: 11/06/2019
Number of Days to Update: 15	Next Scheduled EDR Contact: 02/17/2020
	Data Release Frequency: Varies

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 11/12/2019
Number of Days to Update: 84	Next Scheduled EDR Contact: 01/13/2020
	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation:	429 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640946 YORBA LINDA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
YORBA LINDA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

4G	1/2 - 1 Mile WSW	S
5G	1/2 - 1 Mile WSW	SW
6G	1/2 - 1 Mile WSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

Soil Map ID: 2

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Vista, CA 92083
Contact: Michael Atallah

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Integrated Property Analysis were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 0778-4E4F-9874

Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0778-4E4F-9874

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Integrated Property Analysis (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

APPENDIX F: Resumes

MIKE ATALLAH

President

Mike Atallah has substantial experience in construction consulting services specializing in due diligence analysis for real estate and construction projects including such areas as:

- Property Condition Assessment
- Construction Monitoring
- Budgeting
- Construction Cost Analysis
- Construction Cost Estimating
- Construction Management and Administration
- ADA Compliance Review

He was Vice President and Manager of Construction Services at Bank of America for over five years, preceded by nearly two decades of comparable responsibilities with two of the largest real estate lending institutions, Wells Fargo Bank and Union Bank. He successfully established and managed three of the most credible and respected construction consulting groups in the banking industry. He has a proven record of success in provision of technical support to lenders, developers and contractors.

Mr. Atallah has a Bachelor of Science Degree in Engineering supplemented by graduate business studies. He has provided professional and technical training presentations to Lenders, Real Estate Appraisers and Construction Consultants.

MICHAEL A. ATALLAH

Vice President

Mr. Atallah has hands on experience in the real estate due diligence fields and has maintained excellence in his knowledge of construction, environmental and real estate properties in general.

Qualifications:

- Over 14 years experience in preparing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.

Professional Experience:

Integrated Property Analysis, Inc.

2000 - Current

Vice President

- Providing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.
- Coordinate field services and perform site assessments in accordance with, but not limited to, ASTM, HUD, USDA, TCAC, Fannie Mae, Freddie Mac, CALHFA and client guidelines.
- Quality control, including reviewing and editing of outgoing reports and draft contracts.
- Business Development to establish and maintain cooperative working relationships with clients.

Education & Licenses:

- California State University in Fullerton – Bachelor of Arts Degree in Business Administration with Concentrations in Real Estate and Finance
- LEED Accredited Professional
- Registered Environmental Property Assessor No. REPA 266318
- Certified Professional Radon Measurement Provider by the National Environmental Health Association No. NRPP ID#105517RT

APPENDIX D - ANALYTICAL LABORATORY DATA SHEETS

1.0 PROPERTY DESCRIPTION

1.1 PROPERTY LOCATION

CCI conducted a Phase II Environmental Site Assessment (ESA) at 18597 Altrudy Lane, Yorba Linda, Orange County, California (Property). The Property is located adjacent to the north side of Altrudy Lane and 400-feet to the east of Lakeview Avenue (refer to Figure 1 in Appendix A).

1.2 PROPERTY HISTORY

A Phase I ESA was completed for the Property on December 23, 2019, by Integrated Property Analysis, Inc. (IPA). According to the report, the Property consisted of two contiguous parcels of land located along the north side of Altrudy Lane. The Property is currently developed with two single family homes and associated improvements including garages, storage buildings, and a swimming pool. Prior to the current condition, the Property was developed as an orchard. The Property located at 18597 Altrudy Lane was used for the storage and repair of automobiles. Numerous cars and car parts, including gasoline tanks, were observed on this portion of the Property. Therefore, IPA recommended that a Phase II ESA be conducted on the 18597 Altrudy Lane portion of the Property. The Phase II ESA activities documented in this report were therefore conducted on the 18597 Altrudy Lane portion of the Property. Phase II ESA activities were not performed on the 18602 Altrudy Lane portion of the Property.

1.3 SCOPE OF WORK COMPLETED

The scope of work conducted as part of this Phase II ESA included the evaluation of soil conditions through the collection and analysis of select soil samples. The following provides a summary of the tasks performed:

1. On December 30, 2019, CCI notified Dig Alert of the proposed soil sampling activities at the Property (Ticket No. B193640584).
2. Prepared a Health and Safety Plan (H&SP) for use by CCI, as well as subcontractors, for the field activities conducted during this Phase II ESA.
3. Conducted the soil boring activities on January 6, 2020, using a hand auger to facilitate sample collection. The soil boring activities were conducted by Strongarm Environmental Services (Strongarm), of Fullerton, California.
4. Five (5) soil borings (SB1 - SB5) were advanced on the Property during this Phase II ESA. The soil borings were advanced to total depths of 5-feet below ground surface (bgs). Soil samples were collected from these soil borings at depths of 1-foot, 3-feet, and 5-feet bgs.

5. The soil samples were delivered to Advanced Technology Laboratories. (ATL), a State of California certified environmental laboratory located in Signal Hill, California, for analysis. Select soil samples were analyzed for volatile organic compounds (VOCs) using United States Environmental Protection Agency (US EPA) method 8260B and total petroleum hydrocarbons carbon chain identification (TPH CC ID) using US EPA method 8015M.
6. Backfilled the soil borings and completed the ground surface to best match the existing ground surface.
7. Prepared this report documenting the completed fieldwork activities and the analytical laboratory results.

2.0 ASSESSMENT ACTIVITIES

2.1 PRE-FIELDWORK ACTIVITIES

Prior to initiating the assessment activities, the underground utility notifications were performed in accordance with underground utility notification requirements (Dig Alert ticket confirmation number: B193640584).

A Property specific H&SP was prepared for the project. Prior to initiating the fieldwork activities, the H&SP was reviewed by all field personnel and maintained on the Property during the field activities.

2.2 SOIL SAMPLING ACTIVITIES

On January 6, 2020, five (5) soil borings (SB1 - SB5) were advanced on the Property. Please refer to Figure 2 in Appendix A for a map showing the soil boring locations. The soil borings were advanced using a hand auger. Upon reaching the desired sample depth using the hand auger, soil samples were collected using a core sampler attached to a slide hammer. A 2-inch diameter stainless steel sample tube was placed inside the core sampler. Using the slide hammer, the core sampler was then pounded into the bottom of the soil boring to collect a relatively undisturbed soil sample inside the sample tube. The slide hammer was then removed from the soil boring and the sample tube was removed from the core sampler. Each end of the sample tube was covered with Teflon® tape then sealed with a plastic end cap. The sample tubes were then labeled with unique identification, sealed inside a Ziplock® bag, and placed in a chest cooled with ice for delivery to the analytical laboratory. A portion of each soil sample was also transferred into 40-milliliter (ml) VOAs in accordance with US EPA sampling method 5035 protocols for VOC analysis. The samples were then labeled with unique identification, sealed inside a Ziplock® bag, and placed in a chest cooled with ice for delivery to the analytical laboratory. CCI recorded the unique sample identification information on a chain-of-custody form.

2.3 SOIL ANALYTICAL LABORATORY RESULTS

The soil samples were delivered to ATL. Select soil samples were analyzed for VOCs using US EPA method 8260B and TPH CC ID using US EPA method 8015M. The VOCs analytical results were compared with their respective US EPA Regional Screening Levels (RSLs) for residential soil and their respective San Francisco Regional Water Quality Control Board (SF-RWQCB) Environmental Screening Levels (ESLs) for residential soil. The TPH CC ID analytical results were compared with their respective Los Angeles Regional Water Quality Control Board (LA-RWQCB) Maximum Soil Screening Levels (MSSLs). A table summarizing the analytical results can be found in Appendix B of this report. A copy of the analytical data report can be found in Appendix D of this report. The results of the analysis detected the following:

Soil Boring SB1

Soil boring SB1 was advanced on the northern area of the Property adjacent to a parts storage shed. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 3-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective practical quantitation limits (PQLs) in soil samples SB1-1 and SB1-3.

Soil Boring SB2

Soil boring SB2 was advanced on the northern area of the Property adjacent to a parts storage shed and to the east of soil boring SB1. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 3-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB2-1 and SB2-3.

Soil Boring SB3

Soil boring SB3 was advanced to the east of SB2 in the area where Bar and Clark observed an aboveground storage tank (AST). This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 5-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB3-1 and SB3-3.

Soil Boring SB4

Soil boring SB4 was advanced adjacent to the door of the garage/storage shed located to the north of the residence. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 5-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB4-1 and SB4-3.

Soil Boring SB5

Soil boring SB5 was advanced adjacent to the concrete pad located to the north of the parking canopy associated with the residence. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 3-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB5-1 and SB5-3.

3.0 CONCLUSIONS & RECOMMENDATIONS

3.1 CONCLUSIONS

The purpose of this Phase II ESA was to assess whether the current and historical Property operations had adversely impacted the subsurface environment (soil) beneath the Property. The assessment included the collection of soil samples from five (5) locations on the Property. Select soil samples were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs.

Based on the results of this assessment, it does not appear that the current and historical Property operations have adversely impacted the subsurface environment beneath the Property.

3.2 RECOMMENDATIONS

Based on the results of this assessment, CCI does not recommend additional assessment at this time.

5.0 LIMITATIONS

This assessment was conducted according to accepted industry standards and guidelines for similar assessments conducted in this geographic region at this time.

The conclusions and recommendations of this assessment are based, in part, from information and data provided by others. CCI is not responsible for the accuracy or completeness of this information. Inaccurate data, or information that was not found or made available to CCI, may result in a modification of our conclusions and recommendations.

In today's technology, no amount of assessment can ascertain that the Property is completely free of environmental concern. This assessment is not intended to be all inclusive, identify all potential concerns, or wholly eliminate the possibility of the Property having environmental risks. It is possible that variations in unpermitted, undocumented, or concealed improvements or alterations to the Property could exist beyond what was found during this assessment. Future changes in observed conditions on the Property could occur due to variations in environmental and physical conditions.

USER RELIANCE

This report may be distributed and relied upon by C & C Development, its successors and assigns. Reliance on the information and conclusions of this report by any other person or entity is not authorized without the written consent of CCI. This report is not legal opinion and does not offer warranties or guarantees.

Re: ATL Work Order Number : 2000025
Client Reference : Altrudy II / 2297-1

Enclosed are the results for sample(s) received on January 06, 2020 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Edgar Caballero", with a small initial "E" below the first letter.

Edgar Caballero
President & Laboratory Director

The cover letter and the case narrative are an integral part of this analytical report and its absence renders the report invalid. Test results contained within this data package meet the requirements of applicable state-specific certification programs. The report cannot be reproduced without written permission from the client and Advanced Technology Laboratories.

Notes and Definitions

R	RPD value outside acceptance criteria. Calculation is based on raw values.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday; Saturday 8:00 AM to 12:00 PM.
 2. Samples submitted AFTER 5:00 PM are considered received the following business day at 8:00 AM.
 3. The following turnaround time conditions apply:
 TAT = 0: Same Business Day (received by 9:00 AM)
 TAT = 1: 1 Business Day (COB)
 TAT = 2: 2 Business Days (COB)
 TAT = 3: 3 Business Days (COB)
 TAT = 4: 4 Business Days (COB)
 TAT = 5: 5 Business Days (COB)
 TAT = 6: 5 to 7 Business Days (COB)
 4. Weekend, holiday, after-hours work --- ask for quote.

5. Subcontract TAT is 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontract lab - ask for quote.
 6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air samples will be disposed of after 14 calendar days after receipt of samples.
 7. Electronic records maintained for five (5) years from report date.
 8. Hard copy reports will be disposed of after 45 calendar days from report date.
 9. Storage and Report Fees:
 - Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if extended storage or hold is requested.
 - Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20 sample/week if extended storage is requested.

10. Rush TCLP/STLC samples; add 2 days to analysis TAT for extraction procedure.
 11. Unanalyzed samples will incur a disposal fee of \$7 per sample.
 12. The laboratory will randomly select from all OC samples, received the sample to spike for Matrix Spike/Matrix Spike Duplicate (MS/MSD) at no cost. However, if you want the laboratory to additionally perform MS/MSD on your sample, a charge will be assessed for the specific sample used.

Hard copy and regenerated reports/EDDs: \$17.50 per hard copy report requested; \$50.00 per regenerate/reformat report; \$35 per reprocessed EDD.

APPENDIX D - ANALYTICAL LABORATORY DATA SHEETS

1.0 PROPERTY DESCRIPTION

1.1 PROPERTY LOCATION

CCI conducted a Phase II Environmental Site Assessment (ESA) at 18597 Altrudy Lane, Yorba Linda, Orange County, California (Property). The Property is located adjacent to the north side of Altrudy Lane and 400-feet to the east of Lakeview Avenue (refer to Figure 1 in Appendix A).

1.2 PROPERTY HISTORY

A Phase I ESA was completed for the Property on December 23, 2019, by Integrated Property Analysis, Inc. (IPA). According to the report, the Property consisted of two contiguous parcels of land located along the north side of Altrudy Lane. The Property is currently developed with two single family homes and associated improvements including garages, storage buildings, and a swimming pool. Prior to the current condition, the Property was developed as an orchard. The Property located at 18597 Altrudy Lane was used for the storage and repair of automobiles. Numerous cars and car parts, including gasoline tanks, were observed on this portion of the Property. Therefore, IPA recommended that a Phase II ESA be conducted on the 18597 Altrudy Lane portion of the Property. The Phase II ESA activities documented in this report were therefore conducted on the 18597 Altrudy Lane portion of the Property. Phase II ESA activities were not performed on the 18602 Altrudy Lane portion of the Property.

1.3 SCOPE OF WORK COMPLETED

The scope of work conducted as part of this Phase II ESA included the evaluation of soil conditions through the collection and analysis of select soil samples. The following provides a summary of the tasks performed:

1. On December 30, 2019, CCI notified Dig Alert of the proposed soil sampling activities at the Property (Ticket No. B193640584).
2. Prepared a Health and Safety Plan (H&SP) for use by CCI, as well as subcontractors, for the field activities conducted during this Phase II ESA.
3. Conducted the soil boring activities on January 6, 2020, using a hand auger to facilitate sample collection. The soil boring activities were conducted by Strongarm Environmental Services (Strongarm), of Fullerton, California.
4. Five (5) soil borings (SB1 - SB5) were advanced on the Property during this Phase II ESA. The soil borings were advanced to total depths of 5-feet below ground surface (bgs). Soil samples were collected from these soil borings at depths of 1-foot, 3-feet, and 5-feet bgs.

5. The soil samples were delivered to Advanced Technology Laboratories. (ATL), a State of California certified environmental laboratory located in Signal Hill, California, for analysis. Select soil samples were analyzed for volatile organic compounds (VOCs) using United States Environmental Protection Agency (US EPA) method 8260B and total petroleum hydrocarbons carbon chain identification (TPH CC ID) using US EPA method 8015M.
6. Backfilled the soil borings and completed the ground surface to best match the existing ground surface.
7. Prepared this report documenting the completed fieldwork activities and the analytical laboratory results.

2.0 ASSESSMENT ACTIVITIES

2.1 PRE-FIELDWORK ACTIVITIES

Prior to initiating the assessment activities, the underground utility notifications were performed in accordance with underground utility notification requirements (Dig Alert ticket confirmation number: B193640584).

A Property specific H&SP was prepared for the project. Prior to initiating the fieldwork activities, the H&SP was reviewed by all field personnel and maintained on the Property during the field activities.

2.2 SOIL SAMPLING ACTIVITIES

On January 6, 2020, five (5) soil borings (SB1 - SB5) were advanced on the Property. Please refer to Figure 2 in Appendix A for a map showing the soil boring locations. The soil borings were advanced using a hand auger. Upon reaching the desired sample depth using the hand auger, soil samples were collected using a core sampler attached to a slide hammer. A 2-inch diameter stainless steel sample tube was placed inside the core sampler. Using the slide hammer, the core sampler was then pounded into the bottom of the soil boring to collect a relatively undisturbed soil sample inside the sample tube. The slide hammer was then removed from the soil boring and the sample tube was removed from the core sampler. Each end of the sample tube was covered with Teflon® tape then sealed with a plastic end cap. The sample tubes were then labeled with unique identification, sealed inside a Ziplock® bag, and placed in a chest cooled with ice for delivery to the analytical laboratory. A portion of each soil sample was also transferred into 40-milliliter (ml) VOAs in accordance with US EPA sampling method 5035 protocols for VOC analysis. The samples were then labeled with unique identification, sealed inside a Ziplock® bag, and placed in a chest cooled with ice for delivery to the analytical laboratory. CCI recorded the unique sample identification information on a chain-of-custody form.

2.3 SOIL ANALYTICAL LABORATORY RESULTS

The soil samples were delivered to ATL. Select soil samples were analyzed for VOCs using US EPA method 8260B and TPH CC ID using US EPA method 8015M. The VOCs analytical results were compared with their respective US EPA Regional Screening Levels (RSLs) for residential soil and their respective San Francisco Regional Water Quality Control Board (SF-RWQCB) Environmental Screening Levels (ESLs) for residential soil. The TPH CC ID analytical results were compared with their respective Los Angeles Regional Water Quality Control Board (LA-RWQCB) Maximum Soil Screening Levels (MSSLs). A table summarizing the analytical results can be found in Appendix B of this report. A copy of the analytical data report can be found in Appendix D of this report. The results of the analysis detected the following:

Soil Boring SB1

Soil boring SB1 was advanced on the northern area of the Property adjacent to a parts storage shed. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 3-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective practical quantitation limits (PQLs) in soil samples SB1-1 and SB1-3.

Soil Boring SB2

Soil boring SB2 was advanced on the northern area of the Property adjacent to a parts storage shed and to the east of soil boring SB1. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 3-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB2-1 and SB2-3.

Soil Boring SB3

Soil boring SB3 was advanced to the east of SB2 in the area where Bar and Clark observed an aboveground storage tank (AST). This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 5-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB3-1 and SB3-3.

Soil Boring SB4

Soil boring SB4 was advanced adjacent to the door of the garage/storage shed located to the north of the residence. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 5-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB4-1 and SB4-3.

Soil Boring SB5

Soil boring SB5 was advanced adjacent to the concrete pad located to the north of the parking canopy associated with the residence. This soil boring was advanced to a total depth of 5-feet bgs. Soil samples were collected from this soil boring at depths of 1-foot, 3-foot, and 5-foot bgs. The soil samples collected from 1-foot and 3-foot bgs were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs in soil samples SB5-1 and SB5-3.

3.0 CONCLUSIONS & RECOMMENDATIONS

3.1 CONCLUSIONS

The purpose of this Phase II ESA was to assess whether the current and historical Property operations had adversely impacted the subsurface environment (soil) beneath the Property. The assessment included the collection of soil samples from five (5) locations on the Property. Select soil samples were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs.

Based on the results of this assessment, it does not appear that the current and historical Property operations have adversely impacted the subsurface environment beneath the Property.

3.2 RECOMMENDATIONS

Based on the results of this assessment, CCI does not recommend additional assessment at this time.

5.0 LIMITATIONS

This assessment was conducted according to accepted industry standards and guidelines for similar assessments conducted in this geographic region at this time.

The conclusions and recommendations of this assessment are based, in part, from information and data provided by others. CCI is not responsible for the accuracy or completeness of this information. Inaccurate data, or information that was not found or made available to CCI, may result in a modification of our conclusions and recommendations.

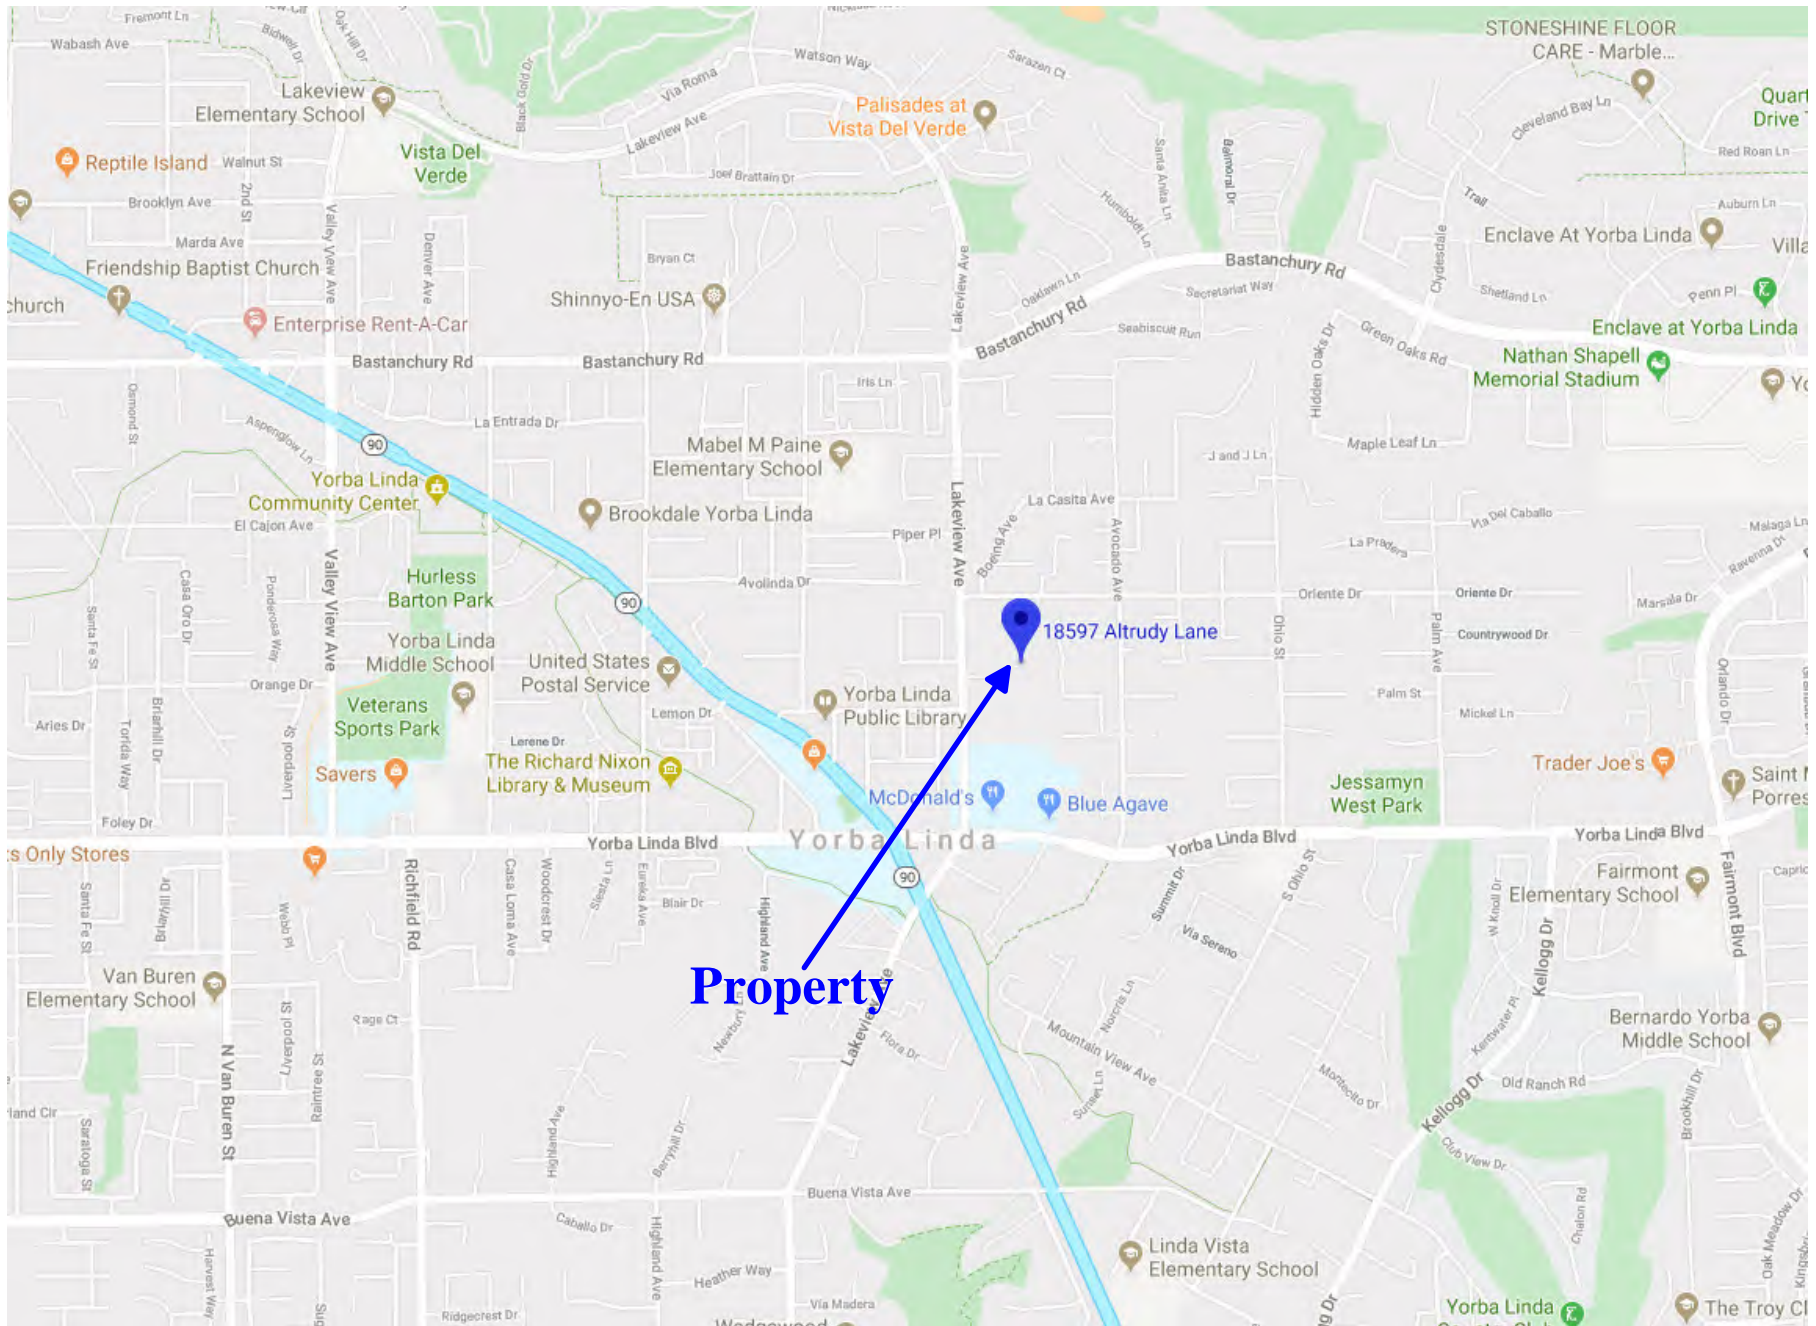

In today's technology, no amount of assessment can ascertain that the Property is completely free of environmental concern. This assessment is not intended to be all inclusive, identify all potential concerns, or wholly eliminate the possibility of the Property having environmental risks. It is possible that variations in unpermitted, undocumented, or concealed improvements or alterations to the Property could exist beyond what was found during this assessment. Future changes in observed conditions on the Property could occur due to variations in environmental and physical conditions.

USER RELIANCE

This report may be distributed and relied upon by C & C Development, its successors and assigns. Reliance on the information and conclusions of this report by any other person or entity is not authorized without the written consent of CCI. This report is not legal opinion and does not offer warranties or guarantees.

Enclosed are the results for sample(s) received on January 06, 2020 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

Notes and Definitions

R RPD value outside acceptance criteria. Calculation is based on raw values.

ND Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)

PQL Practical Quantitation Limit

MDL Method Detection Limit

NR Not Reported

RPD Relative Percent Difference

CA2 CA-ELAP (CDPH)

OR1 OR-NELAP (OSPHL)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

- Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday; Saturday 8:00 AM to 12:00 PM.
- Samples submitted AFTER 5:00 PM are considered received the following business day at 8:00 AM.
- The following turnaround time conditions apply:
 TAT = 0 - Same Business Day if received by 9:00 AM
 TAT = 1 - 1 Business Day (COB)
 TAT = 2 - 2 Business Days (COB)
 TAT = 3 - 3 Business Days (COB)
 TAT = 4 - 4 Business Days (COB)
 TAT = 5 - 5 Business Days (COB)
 TAT = 6 - 5 to 7 Business Days (COB)
 4. Weekend, holiday, after-hours work - ask for quote.
- Storage and report fees:
 - Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if extended storage or hold is requested.
 - Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20 sample/week if extended storage is requested.
- Subcontract TAT is 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontract lab - ask for quote.
- Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air samples will be disposed of after 14 calendar days after receipt of samples.
- Electronic records maintained for five (5) years from report date.
- Hard copy reports will be disposed of after 45 calendar days from report date.
- Hard copy and regenerated reports/EDDs: \$17.50 per hard copy report requested; \$50.00 per regenerated/reformat report; \$35 per reprocessed EDD.
- Rush TAT/STIC samples: add 2 days to analysis TAT for extraction procedure.
- Unanalyzed samples will incur a disposal fee of \$7 per sample.
- The laboratory will randomly select from all QC samples received the sample to spike for Matrix Spike/Matrix Spike Duplicate (MS/MSD) at no cost. However, if you want the laboratory to additionally perform MS/MSD on your sample, a charge will be assessed for the specific sample used.

1. Certification

Integrated Property Analysis, Inc. (IPA) has completed a Phase I Environmental Site Assessment (ESA) of the Altrudy II (the Subject Property), located at 18597 and 18602 Altrudy Lane in Yorba Linda, California 92886. IPA performed the Phase I ESA utilizing generally accepted Phase I industry standards in accordance with ASTM Standard E 1527-21.

This report is considered confidential and privileged information which was prepared for the sole and exclusive use and information of C&C Development (the Client). IPA understands that this report will be used to assist in evaluating environmental issues and site conditions. This report is for the exclusive use of the Client or its legal counsel.

Surveyed by: Michael Atallah, President/IPA

Written by: Michael Atallah, President/IPA

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

Michael Atallah
President

2. Executive Summary

IPA performed a Phase I Environmental Site Assessment that included on-site observations of the accessible areas of the Altrudy II (the "Subject Property"), on August 7, 2024. The Subject Property is located at 18597 and 18602 Altrudy Lane in Yorba Linda, California 92886.

The Subject Property is currently developed with two single-family residences and associated improvements, including garages, storage buildings and a swimming pool. The properties operate underground septic tanks for domestic waste disposal. Prior to the current conditions, the Subject Property was developed with orchards from at least 1938 until 1953; the orchards were periodically removed circa mid-1960s and replaced with dwellings by 1966. Properties in the vicinity of the Subject Property include senior, single- and multi-family residential buildings.

The following summarizes the independent conclusions representing IPA's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative have been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the Altrudy II at 18597 and 18602 Altrudy Lane in Yorba Linda, California 92886. Any exceptions to, or deletions from, this practice are described in Section 3 of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Site. No further action or investigation is recommended at the Subject Property in relation to RECs, HRECs or CRECs, however, the following environmental issues were identified that warrants mention:

- IPA reviewed a Phase II Environmental Site Assessment prepared by Conservation Consulting Internation (CCI) and dated January 15, 2020. A summary of the findings for this assessment are described below. The Phase II Environmental Site Assessment revealed the following:

- The Property located at 18597 Altrudy Lane was used for the storage and repair of automobiles. Numerous cars and car parts, including gasoline tanks, were observed on this portion of the Property.
- Conducted the soil boring activities on January 6, 2020, using a hand auger to facilitate sample collection. The soil boring activities were conducted by Strongarm Environmental Services (Strongarm), of Fullerton, California.
- Five (5) soil borings (SB1 - SB5) were advanced on the Property during this Phase II ESA. The soil borings were advanced to total depths of 5-feet below ground surface (bgs). Soil samples were collected from these soil borings at depths of 1-foot, 3-feet, and 5-feet bgs.
- The purpose of this Phase II ESA was to assess whether the current and historical Property operations had adversely impacted the subsurface environment (soil) beneath the Property. The assessment included the collection of soil samples from five (5) locations on the Property. Select soil samples were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs.
- Based on the results of this assessment, it does not appear that the current and historical Property operations have adversely impacted the subsurface environment beneath the Property.
- Based on the results of this assessment, CCI does not recommend additional assessment at this time.

2.1. Findings/Conclusions

Historical Review (Section 6)

- The review of the historical data available for the Subject Property and surrounding area revealed no evidence that may have lead to an environmental impact to the Subject Property. No further action or investigation is recommended regarding historical uses.

Operational Activities (Section 7.1)

- IPA observed no circumstances of environmental concern associated with the operational activities at the Subject Property. No further action or investigation is recommended regarding operational activities at the Subject Property.

Hazardous Materials/Petroleum Products (Section 7.2)

- Routine janitorial and maintenance supplies are used at the Subject Property. No significant amounts of petroleum products were observed to be in use at the site. The identified materials appear to be properly stored. The materials observed do not appear to pose a hazard to the Subject Property, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the Subject Property.

Wastes (Section 7.3)

- The Subject Property does not generate, treat, store, or dispose of hazardous, medical, or regulated wastes. Furthermore, the non-hazardous solid and liquid wastes generated at the Subject Property appear to be stored and disposed of properly. No further action or investigation is recommended regarding wastes at the Subject Property.

Polychlorinated Biphenyls (PCBs) (Section 7.4)

- IPA did not identify any utility-owned transformers at the Subject Property. No further action or investigation is recommended regarding the transformer at the Subject Property.

Asbestos-Containing Materials (ACM) (Section 7.5)

- Asbestos-containing materials are being evaluated at the Subject Property under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

Radon Gas (Section 7.6)

- Review of the USEPA's Radon Map for Orange County, California indicated that the Subject Property is located in Zone 3, areas with a predicted average indoor radon screening level less than or equal to 2 pCi/L (picoCuries per liter of air). Based on the propensity, radon sampling was not performed as a part of this assessment. No further action or investigation is recommended with regard to radon gas levels at the Subject Property.

Lead-Based Paint (LBP) (Section 7.7)

- Lead-based paint is being evaluated at the Subject Property under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

Lead in Drinking Water (Section 7.8)

- Based on published utility department information, the water at the Subject Property is not expected to contain elevated levels of lead. No further action or investigation is recommended regarding lead in drinking water at the Subject Property.

PFAS (Section 7.9)

- Based on the current and previous uses of the Subject Property, PFAS chemicals are unlikely to have been used at the Subject Property. No further action or investigation is recommended regarding PFAS chemicals at the Subject Property.

Storage Tanks/Pipelines (Section 7.10)

- No evidence of storage tanks or pipelines (above or below ground) was identified. No further action or investigation is recommended regarding storage tanks or pipelines at the Subject Property.

Surface Areas (Section 7.11)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Subject Property.
- Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Subject Property.

Mold (Section 7.12)

- IPA performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject Property. IPA did not note obvious or significant visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Subject Property. No further action or investigation is recommended regarding mold at the Subject Property.

Regulatory Review (Section 9)

- Based on review of the regulatory database report, the Subject Property is not located on any of the databases evaluated, and none of the off-site listed facilities are anticipated to have negatively impacted the environmental integrity of the Subject Property. In addition, the review does not suggest that the Subject Property is involved in the generation, treatment, storage, or disposal of hazardous waste. No further action or investigation is recommended regarding the regulatory review.

Vapor Encroachment Screen (Section 10)

- Based on review of environmental records searched by EDR for the Tier 1 Vapor Encroachment Screen, IPA concludes that the Subject Property is not listed as a site where the potential for a vapor encroachment condition exists. In addition, the Area of Concern (AOC) did not identify any contaminated sites. No further action or investigation is recommended regarding the Vapor Encroachment Screen.

Adjacent Properties (Section 11)

- IPA identified no current adjacent property uses that are anticipated to have a negative impact on the environmental integrity of the Subject Property. No further action or investigation is recommended regarding the adjacent properties.

2.2. Recommendations

This assessment has revealed no evidence of recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Site. No further action or investigation is recommended at the Subject Property in relation to RECs, HRECs or CRECs.

3. Survey Approach/Purpose/Limitations

IPA conducted an on-site Environmental Site Assessment of the Subject Property that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On-site activities and/or interviews were conducted by Mr. Michael Atallah, President with IPA, with:

- Mr. Todd Cottle, C&C Development
- Mr. Steven Hehn, C&C Development

Areas accessed included accessible ground areas and the Subject Property boundaries.

Weather conditions at the time of the Subject Property assessment were clear and warm.

IPA reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Subject Property which could have an adverse impact on the Subject Property. In an attempt to determine whether historical uses of the Subject Property and surrounding area have had an environmental impact on the Subject Property, IPA interviewed individuals knowledgeable about the Subject Property and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed at the Subject Property. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-21. The scope of work included an evaluation of:

- The Subject Property history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Subject Property as identified through review of reasonably ascertainable standard historical sources.
- Physical characteristics of the Subject Property as identified through review of reasonably ascertainable topographic maps.

- Current Subject Property conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:
 - Facility storage tanks, drums, containers (above or below ground), etc.
 - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs
 - The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes

- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Subject Property. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Subject Property.

The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Subject Property and neighboring sites that may impact the Subject Property. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard E 1527-21. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Subject Property.

- A Tier 1 Vapor Encroachment Screen in accordance with ASTM Standard E 2600-10.

In addition, at the Client's request, the assessment included the following:

- A review of the physical characteristics of the Subject Property as identified through review of reasonably ascertainable wetlands, flood plain, soils, geology, and groundwater data.

- A screening approach for the potential existence of:
 - Asbestos, including the identification of all suspect materials in visible/readily accessible areas (interior and exterior). The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication Managing Asbestos in Place (the "Green Book"). Therefore, all materials listed in the Green Book which were installed prior to 1981 are considered suspect with the exception of resilient floor tile, asbestos-cement board (transite), and roofing felt, which are considered suspect regardless of installation date (these materials continue to be manufactured and installed in the United States). No materials were sampled as part of the assessment. This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work. Visual observation of pipe chases and behind walls was not performed as a part of this assessment.

 - Radon gas propensity, through the review of the USEPA's Map of Radon Zones.

 - Lead-based paint for all residential properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.

 - Lead in water, based on information provided by the municipal water provider.

 - Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Subject Property. In addition, IPA interviewed Subject Property personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as a part of this assessment. IPA notes that this assessment does not constitute a comprehensive mold survey of the Subject Property, and the conclusions made are based solely on observable conditions in readily accessible interior areas of the Subject Property on the assessment date.

Limitations

The information presented in this report is based on the agreed upon scope of work as outlined. IPA makes no warranties or guarantees as to the accuracy or completeness of information obtained from information provided or compiled by others. It is possible that information exists beyond the scope of this investigation. Also, changes in site use may have occurred sometime in the past due to variations in rainfall, temperature, water usage, economic, agricultural or other factors. Limited site specific information was made available to IPA about the site. Additional information that was not found or available to IPA at the time of writing the report, may result in a modification of the conclusions and recommendations presented. This report is not a legal opinion. The services performed by IPA have been conducted in a manner consistent with the level of care ordinarily exercised by members of our profession currently practicing under similar conditions. No other warranty, expressed or implied, is made.

It should be noted that all surficial environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this site and surrounding properties.

It must be noted that no investigation can absolutely rule out the existence of any hazardous materials at a given site. This assessment has been based upon prior site history and observable conditions and activities. Existing hazardous materials and contaminants can escape detection using these methods.

The work performed in conjunction with this assessment and the data developed are intended as a description of available information at the dates and location given. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. In addition, this report is not intended as a regulatory agency compliance/safety audit or for the purpose of ensuring that all applicable permits and/or operating procedures are current and/or appropriate.

IPA recommends that any periodic review of any property should include an update of information on environmental conditions in the area. Note that no soils, groundwater, or potable water testing for the presence of hazardous substances was performed for this assessment.

This report is considered confidential and privileged information. It was prepared for the sole and exclusive use and information of the Client and its affiliates, rating agencies, and certain limited investors involved in the Securitization of the property.

3.1. Data Gaps

Data gaps in information exist. However, because the data gaps were not determined to be material in identifying a Recognized Environmental Conditions (RECs) they are not considered by ASTM standards to be *significant* and are therefore not individually addressed in this report.

4. User Provided Information

This Section documents whether the user reported to IPA information pursuant to the responsibilities described in Section 6 of the ASTM Standard E 1527-21.

4.1. User Engaged Environmental Cleanup Liens and Activity And Use Limitation (AUL) Review

The user did not engage IPA to review title and judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Subject Property. Furthermore, these documents were not provided to IPA for review. The lack of or inability to obtain this information represents a data gap. Based on the findings of this report, the absence of this information is not considered a *significant* data gap.

4.2. User Questionnaire

A User Questionnaire was provided to the user (Client) to assist the user and IPA in gathering information from the user that may be material to identifying RECs. A copy of the User Questionnaire is provided in the Appendices (Section 12).

4.3. Reason for Assessment

The reason of the assessment was not provided by the user, therefore, it is assumed that the purpose is to qualify for an LLP to CERCLS liability.

5. Subject Location/Description

The Subject Property is located at 18597 and 18602 Altrudy Lane, Yorba Linda, California 92886.

5.1. Subject Description

- Age of Subject Property:** Initially developed for agricultural (orchards) and residential uses circa 1930s; orchards removed circa mid-1960s with construction of additional residential structures.
- Building area:** The Subject Property is currently developed for residential use with single family dwellings. The Subject Property consists of two parcels, identified as Orange County Assessor's Parcel Numbers (APNs) 323-231-18 (18597 Altrudy Lane) and 323-231-19 (18602 Altrudy Lane), containing a total of 2.38 acres.
- Site drainage:** Surface drainage is provided at the site to on-site drainage inlets to the municipal storm water drainage system. Storm water flows to inlets connected to the municipal storm system.
- Utilities:** The property is reportedly serviced by Southern California Edison (SCE) for electricity, the City of Yorba Linda for water and sewer services, and Southern California Gas Company for natural gas services.
- Built Improvements:** Two single-story dwellings with garages, single-story storage sheds, tennis court and swimming pool.
- Parking:** Asphalt-paved driveways and parking areas and concrete-paved garages.
- Amenities/Common Areas:** Typical residential landscaping.

5.2. Environmental Setting

5.2.1. Topography

Review of the Yorba Linda, California Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 1981, indicated the following:

- The Subject Property has an average elevation of approximately 429 feet above mean sea level. Elevations vary slightly across the Subject Property. Slope in the general area of the Subject Property is to the south or southwest
- The Subject Property area is depicted with three small structures.
- No surface water features are located in the immediate vicinity of the Subject Property.

5.2.2. Wetlands

Review of wetlands information provided by EDR indicated the following:

- No wetland areas are indicated at the Subject Property or adjacent properties.

5.2.3. Floodplain

The property is located in Flood Zone X – Areas of minimal flooding. Community panel #06059C0068J, effective date December 3, 2009.

5.2.4. Soils/Geology

Review of soils information for the Subject Property area provided by EDR indicated the following:

- The Subject Property is located in an area comprised of soil known as the Myford sandy loam. The soil is described as sandy loam, sandy clay, sandy clay loam, and sandy loam to a depth of approximately 79 inches. The soil is moderately well drained and occurs on terraces.

Review of geologic information for the Subject Property area provided by EDR indicated the following:

Rock Stratigraphic Unit

- Era: Cenozoic
- System: Quaternary
- Series: Quaternary

Geologic Age Identification

- Category: Stratified Sequence

5.2.5. Groundwater Hydrology

Review of the Ground Water Atlas of the United States, Segment 1, California/ Nevada, published by the U.S. Geological Survey and dated 1995, indicated the following:

- The Subject Property is located within the Coastal Basins aquifer system. The aquifer system of the Los-Angeles-Orange County Coastal Plain in which the Subject Property is located is contained in a coastal plain basin that extends over an area of approximately 860 square miles. The major drainages in the basin are the Los Angeles, the San Gabriel, and the Santa Ana Rivers, all of which have headwaters outside the basin.

Shallow ground water levels in the area of the Subject Property are estimated to be more than five feet below ground surface.

Shallow groundwater flow is expected to follow the ground level slope of surface elevations. The direction of this flow at the Subject Property is anticipated to be toward the southwest.

Estimated groundwater levels may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or dewatering operations.

6. Historical Review

6.1. Chain of Title

A Chain of Title review was not performed for this assessment.

6.2. Prior Use Interviews

According to the Subject Property Point of Contact, the Subject Property has historically been in residential use or was historically unimproved or agricultural land.

6.3. Local and/or State Government Agency Record Review/Interviews

IPA contacted the Yorba Linda Fire Department (YLFD) regarding file information for the Subject Property. As of this writing, the YLFD has not responded to IPA's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

IPA contacted the Orange County Health Care Agency (OCHCA) regarding file information for the Subject Property. As of this writing, the OCHCA has not responded to IPA's request. In addition, IPA accessed the OCHCA online reports maintained by the OCHCA at the website: <http://ochealthinfo.com/eh/home/reports>: The Subject Property was not identified on any of the reports.

Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

IPA reviewed building permits for the Subject Property at the Yorba Linda Department of Development Services, Building & Safety Division. According to City of Yorba Linda records, the addresses of the Subject Property are 18597 and 18602 Altrudy Lane. No records pertaining to the original development of the Subject Property were reasonably ascertainable from the City of Yorba Linda.

General building permits for Subject Property were on file but did not reveal any information or condition that could impact the environmental integrity of the Subject Property. No environmentally significant information was identified during this review.

Review of available zoning records at the Yorba Linda Development Services, Planning Division indicates that the Subject Property is zoned TCSP.

IPA researched the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), DOGGR Online Mapping System <https://www.conservation.ca.gov/dog/Pages/Wellfinder.aspx> for information regarding oil and gas development. According to the DOGGR Online Mapping System, no oil or gas wells are located on or adjacent to the Subject Property.

6.4. Historical Maps

IPA contacted EDR in an attempt to determine if there were any historic maps in the EDR Historic Map Collection for the Subject Property area.

Review of historical topographic maps back to 1896 did not identify any environmental concerns in the Subject Property area.

6.5. Historical City Directories

Historical city directories as provided by EDR were reviewed for the Subject Property. City directories have tenant listings by address. This review revealed the following information for the current Subject Property address (18597 and 18602 Altrudy Lane).

1965

18602 Altrudy Lane – V.H. Abbot

1972

18597 Altrudy Lane – Muriel Scott, G. Wyvell

18602 Altrudy Lane – Allen Henry

1976

18597 Altrudy Lane – Ronald Rauch

18602 Altrudy Lane – No listing

1982, 1987, 1992

18597 Altrudy Lane – Alan Reis

18602 Altrudy Lane – No listing

1995

18597 Altrudy Lane – A. Siaton

2000

18597 Altrudy Lane – Ken Ries

2005

18597 Altrudy Lane – Ken Reese Ready Mix, Toni Ries

2010

18597 Altrudy Lane – Ken Reis Ready Mix, Antionette Ries

18602 Altrudy Lane – Andrew Wilson

2014

18597 Altrudy Lane – Kenley Ries

18602 Altrudy Lane – Andrew Wilson

2020

18597 Altrudy Lane – Kenley Ries, Tyler Ries

Subject Property listings prior to 1965 were not provided in the city directory abstract. No information of environmental significance was identified in the historical city directory review.

6.6. Aerial Photography

Historical aerial photographs were provided by EDR. Review of the photographs identified the following:

1938

Subject Property: The Subject Property is developed with what appears to be orchards.

Adjacent: The surrounding adjacent properties are developed with what appear to be orchards and associated residential buildings.

1938

Subject Property: No significant changes visible.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1953

Subject Property: No significant changes visible.

Adjacent: The surrounding adjacent properties are developed with fewer orchards and with additional residential developments. The property adjacent south app

1963

Subject Property: The east side of the Subject Property is developed with what appears to be residential structures; the west side appears relatively unchanged.

Adjacent: The adjacent property to the north appears to be developed with additional residential buildings. The adjacent property to the east appears undeveloped. The adjacent property to the west appears developed with residential structures. The adjacent property to the south appears to be replanted with orchards and developed with a structure.

1966

Subject Property: The Subject Property appears to be developed with an additional residential structure on the southwest corner.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1972

Subject Property: The Subject Property is developed with what appears to be three structures and an improvement on the northwest portion.

Adjacent: No significant changes visible on the surrounding adjacent properties.

1977

Subject Property: The Subject Property is developed with what appear to be additional improvements on the northwest and southwest portions.

Adjacent: The adjacent property to the east is redeveloped with what appear to be residential tract houses. No other significant changes visible.

1985

Subject Property: No significant changes visible.

Adjacent: The adjacent property to the south is redeveloped with what appears to be a residential apartment complex. No other significant changes visible.

1989, 1994, 1995, 2002

Subject Property: No significant changes visible.

Adjacent: No significant changes visible.

2002, 2012, 2016, 2020

Subject Property: The northeast corner is developed with what appears to be a tennis court. No other significant changes visible.

Adjacent: No significant changes visible.

6.7. Previous Investigations/Assessments

IPA reviewed a Phase II Environmental Site Assessment prepared by Conservation Consulting Internation (CCI) and dated January 15, 2020. A summary of the findings for this assessment are described below. The Phase II Environmental Site Assessment revealed the following:

- The Property located at 18597 Altrudy Lane was used for the storage and repair of automobiles. Numerous cars and car parts, including gasoline tanks, were observed on this portion of the Property.
- Conducted the soil boring activities on January 6, 2020, using a hand auger to facilitate sample collection. The soil boring activities were conducted by Strongarm Environmental Services (Strongarm), of Fullerton, California.
- Five (5) soil borings (SB1 - SB5) were advanced on the Property during this Phase II ESA. The soil borings were advanced to total depths of 5-feet below ground surface (bgs). Soil samples were collected from these soil borings at depths of 1-foot, 3-feet, and 5-feet bgs.
- The purpose of this Phase II ESA was to assess whether the current and historical Property operations had adversely impacted the subsurface environment (soil) beneath the Property. The assessment included the collection of soil samples from five (5) locations on the Property. Select soil samples were analyzed for VOCs and TPH CC ID. The results of the analysis did not detect concentrations of the targeted analytes above their respective PQLs.
- Based on the results of this assessment, it does not appear that the current and historical Property operations have adversely impacted the subsurface environment beneath the Property.
- Based on the results of this assessment, CCI does not recommend additional assessment at this time.

6.8. Plans and Specifications

As-built/renovation-site plans, drawings, or specifications were not available for review at the Subject Property or local agency offices visited for this assessment.

6.9. Historical Summary

Based upon a review of local agency records, historical maps, historical aerial photographs, historical city directories, and interviews with knowledgeable personnel, the Subject Property was undeveloped as early as 1896; developed for residential and agricultural use (orchards) in circa 1938; and the orchards were periodically removed in the 1960s and replaced with residential developments. No evidence was uncovered through IPA's research to indicate that home and/or farm heating fuel tanks, or structures such as sumps, separators, evaporation ponds, or well cellars were previously located on the Subject Property; however, no subsurface investigations were performed for this assessment. No significant environmental concerns that would warrant further investigation were identified during the course of this assessment regarding the prior uses of the Subject Property.

7. Subject Reconnaissance

7.1. Operational Activities/Noteworthy Tenants

The Subject Property is occupied by residential development. No environmentally noteworthy tenants occupy the Subject Property and no environmentally significant operations are conducted at the Subject Property.

Considering the operations assessed at the Subject Property, no environmental permits, registrations or notifications appear to be required.

7.2. Hazardous Materials/Petroleum Products Storage and Handling

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. The following products listed in the Observed Materials Table below were identified.

Observed Materials			
Type of Material	Quantity	Storage Location	Use
Routine janitorial and maintenance supplies	Limited quantities of commercially available products in retail size containers.	Maintenance Storage	Subject Property maintenance and upkeep

The identified chemicals, materials, and products were observed in their sealed, original containers and in designated storage areas. Materials appeared to be properly stored.

No evidence of spills or staining was observed in the areas of product storage/usage. In addition, the concrete floors and asphalt surfaces appeared intact and no cracks were observed in the areas of product storage/usage.

Urea formaldehyde insulation was used during the 1970's and early 1980's to reinsulate buildings with little or no existing insulation. Urea and formaldehyde were mixed with a foaming agent injected into the walls of buildings. A problem can ensue when excess formaldehyde is present in the mixture. The formaldehyde can slowly escape from the foam to permeate the building. Release of excess formaldehyde can take a year or more. Gaseous formaldehyde can cause eye, nose, and throat irritation, disturbed sleep, and allergic reactions. Some researchers have claimed that the substance can promote cancer, but this has not been proven conclusively. No evidence of UFFI was observed during the site survey.

7.3. Waste Generation, Treatment, Storage, and Disposal

Visual observation for the generation, treatment, storage, and disposal of wastes was performed.

No evidence of spills or staining was observed in the areas of waste generation or pre-disposal storage. In addition, the asphalt surfaces appeared intact and no cracks were observed in the areas of waste generation or pre-disposal storage.

No excessive odors or overflowing/excessive ground trash were noted in the vicinity of the trash areas. No hazardous, regulated, or medical wastes were noted in the trash areas.

7.4. Polychlorinated Biphenyls (PCBs)

IPA identified no utility-owned transformers at the Subject Property. No further action or investigation is recommended regarding the transformer at the Subject Property.

No additional equipment with the potential to utilize dielectric or hydraulic fluid was observed during the site assessment.

7.5. Asbestos-Containing Materials (ACM)

Asbestos-containing materials are being evaluated at the Subject Property under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

7.6. Radon Gas

Review of the USEPA's Radon Map for Orange County, California indicated that the Subject Property is located in Zone 3, areas with a predicted average indoor radon screening level less than or equal to 2 pCi/L (picoCuries per liter of air). Based on the propensity, radon sampling was not performed as a part of this assessment. No further action or investigation is recommended with regard to radon gas levels at the Subject Property.

7.7. Lead-Based Paint (LBP)

Lead-based paint is being evaluated at the Subject Property under a separate work contract. A standalone report regarding this environmental hazard will be issued under separate cover and is not incorporated into the Phase I Environmental Site Assessment.

7.8. Lead in Drinking Water

According to published utility department information for the City of Yorba Linda, the water supplied to the Subject Property is within federal, state, and local drinking water quality standards.

7.9. PFAS

PFOS and PFOA are part of a larger group of chemicals called per- and polyfluoroalkyl substances (PFASs). PFASs, which are highly fluorinated aliphatic molecules, have been released to the environment through industrial manufacturing and through use and disposal of PFAS-containing products. PFOS and PFOA are the most widely studied of the PFAS chemicals. PFOS and PFOA are persistent in the environment and resistant to typical environmental degradation processes. As a result, they are widely distributed across all trophic levels and are found in soil, air and groundwater at sites across the United States. The toxicity, mobility and bioaccumulation potential of PFOS and PFOA result in potential adverse effects on the environment and human health.

Based on the current and previous uses of the Subject Property, PFAS chemicals are unlikely to have been used at the Subject Property. No further action or investigation is recommended regarding PFAS chemicals at the Subject Property.

7.10. Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Subject Property.

No aboveground storage tanks (ASTs) were observed at the Subject Property.

Based on the review of the state list of registered USTs, no USTs are registered for the Subject Property.

Interviews with persons knowledgeable of the Subject Property did not identify any evidence of current or historic storage tanks (above or below ground) at the Subject Property.

Visual observations did not identify any surface markings indicating the existence of subsurface product pipelines at the Subject Property.

7.11. Surface Areas

Observations during IPA's assessment identified that the Subject Property lands are developed with structures, unpaved, bare soil, or covered with vegetation. The land surface of the Subject Property is slightly undulated, with slight changes in elevation. Surface water flow is in a southern direction.

Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed.

Visual observation of the Subject Property and adjacent properties did not identify any evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Subject Property.

Visual observations did not identify any evidence of on-site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Subject Property.

Visual observations did not identify any surface water features including lagoons, ponds or other bodies of water at the Subject Property.

7.12. Mold

IPA performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Subject Property. IPA did not note obvious or significant visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Subject Property. No further action or investigation is recommended regarding mold at the Subject Property.

This assessment does not constitute a comprehensive mold survey of the Subject Property. The reported observations and conclusions are based solely on interviews with Subject Property personnel and conditions as observed in readily accessible interior areas of the Subject Property on the assessment date.

8. Interviews

8.1. Key Site Manager

Property-related personnel were present at the Subject Property on the day of the site assessment and answered questions to the best of their knowledge regarding Subject Property site systems and conditions.

A Pre-Survey Questionnaire was completed as a part of this assessment. The Questionnaire was completed by Mr. Michael Atallah through an interview with Mr. Steven Hehn of C&C Development, the Subject Property Point of Contact. Information obtained from the Questionnaire has been used in the preparation of this report. Mr. Hehn indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.2. Owner

IPA submitted an Owner Questionnaire to the user in an effort to identify the owner of the Subject Property that could be interviewed to provide information regarding proceedings involving the Subject Property. The Questionnaire was completed by Mr. Michael Atallah through an interview with Mr. Todd Cottle of C&C Development, the Owner. Information obtained from the Questionnaire has been used in the preparation of this report. Mr. Cottle indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.3. User

IPA submitted a User Questionnaire in an effort to obtain information regarding proceedings involving the Subject Property. The User Questionnaire was completed by Mr. Todd Cottle, designated representative of the user. Mr. Cottle indicated that he was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products, or notices from any governmental entity regarding possible violation of environmental laws or possible liability related to hazardous substances or petroleum products.

8.4. Occupants

The Subject Property is a single-family residential property and contains no non-residential tenants. Therefore, based on the ASTM Standard guidance, residential occupants were not interviewed.

8.5. Past Owners, Operators, and Occupants

No past owners, operators, or occupants of the Subject Property who would likely have material information regarding the potential for contamination at the Subject Property were identified.

8.6. Owners Or Occupants of Adjacent or Nearby Property

The Subject Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews were not conducted with adjacent or nearby property owners or occupants.

8.7. Interviews with Others

No other individuals were interviewed as part of this assessment.

9. Regulatory Database Review

Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, IPA concludes that the Subject Property is not a listed site. The area search of the Subject Property for listed sites identified various sites outlined in the regulatory database report included in the Appendices, Section 11. Information about the listed sites is included below.

IPA also reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. Any identified unmappable site within the specified search radii is included below.

The following are some of the databases which were reviewed for this assessment. See the appended regulatory database report for a complete listing of databases reviewed for this assessment:

- **NPL Listing:** The National Priorities (Superfund) List (NPL) is United States Environmental Protection Agency (USEPA's) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.
- **Delisted NPL Listing:** The Delisted NPL database is a listing of sites which have been deleted from the NPL list by the USEPA.
- **RCRA-TSD Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD database is a compilation by the USEPA of reporting facilities that transport, treat, store or dispose of hazardous waste.
- **RCRA-Corrects Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Corrective Action Sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.

- **CERCLIS Listing:** This database is a compilation of sites which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances.
- **NFRAP Listing:** This database contains information regarding sites which have been removed from the USEPA CERCLIS database.
- **RCRIS-Generator Listing:** The USEPA identifies and tracks hazardous waste from the point of generation to the point of disposal through the Resource Conservation and Recovery Information System (RCRIS). The RCRIS-Generators database is a compilation by the USEPA of facilities that report hazardous waste generation.
- **Emergency Response Notification System (ERNS):** The ERNS is a national database used to collect information on reported releases of oil or hazardous substances.
- **Federal institutional control registry:** This database contains information on sites with federal institutional controls.
- **Federal engineering control registry:** This database contains information on sites with federal engineering controls.
- **SHWS Listing:** This database is a comprehensive listing of sites which are considered to be a threat to the public health and welfare by the California Department of Toxic Substances Control. Further, this is the ASTM equivalent of a State Hazardous Waste Sites List.
- **SWF Listing:** This database is a comprehensive listing of all State Permitted Solid Waste Landfills.
- **Leaking Underground Storage Tanks:** This database contains a summary of information pertaining to leaking underground storage tank (LUST) sites identified by the state.
- **Underground Storage Tanks:** This database contains a summary of information pertaining to registered underground storage tanks (USTs) identified by the state.

- **State Voluntary Cleanup Sites:** This database contains a listing of sites which are in the State voluntary cleanup program
- **Tribal LUST:** This database contains information on Tribal LUST sites.
- **Tribal UST:** This database contains information on Tribal UST sites.

The following is a discussion of listed sites:

City of Yorba Linda

4601 Lakeview Avenue

Distance: 0.13 mile

Direction: North

Database listed on: UST

Information in the UST database indicates the site was identified as Orange County UST Facility ID 18826. No information pertaining to the capacity, contents, installation or removal was provided by EDR. The site was not identified as a leaking UST case. Based on the current regulatory status, this site is not expected to have adversely impacted the environmental integrity of the Subject Property.

ORANGE COUNTY FIRE STATION #10

18402/18422 Lemon Drive

Distance: 0.125 mile

Direction: Southwest

Database listed on: UST, LUST SWEEPS UST, CA FID UST, HIST CORTESE

Information in the UST database indicates the site was identified as Orange County UST Facility ID 10473 for operation of a 5,000-gallon diesel UST. The site was identified as LUST case 85UT122 for a release of gasoline. A 550-gallon gasoline UST was removed in 1984, and a 5,000-gallon diesel UST was removed in 1994. The LUST case reported that onsite treatment of impacted subsurface soils were remediated using soil vapor extraction from December 2000 to June 2001. Groundwater was reported to occur at depths from 75 to 80 feet bgs. The case was issued regulatory closure on November 6, 2002. Based on the current regulatory status, this site is not expected to have adversely impacted the environmental integrity of the Subject Property.

Remaining Listed Sites

Review of the regulatory agency database report identified that all of the remaining sites are plotted 0.25-mile or farther from the Subject Property. Based on various factors such as distance, gradient relationship, estimated direction of groundwater flow, media impacted, and/or current regulatory status, these sites are not anticipated to have negatively impacted the environmental integrity of the Subject Property.

10. Tier 1 Vapor Encroachment Screen

IPA has completed a Tier 1 Vapor Encroachment Screen of the Subject Property in accordance with ASTM Standard E 2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

10.1. Purpose

The purpose of this Tier 1 Vapor Encroachment Screen (VES) is to identify, to the extent feasible pursuant to the procedures presented in the ASTM E 2600-10 standard guide, the potential for a Vapor Encroachment Condition (VEC) to exist at the Subject Property.

10.2. Methodology

IPA utilized for this assessment EDR's VEC App to accurately identify and document potential VEC sites within the Subject Property's Area of Concern (AOC). By using integrated data applications and state-of-the-art analytical tools, EDR's VEC App has been specifically designed to adhere to ASTM E 2600-10. EDR's VEC App performs an initial search of all ASTM E 2600-10 standard government record databases and EDR proprietary historical records related to former dry cleaners, gas stations, and manufactured gas plants within the 1/3 mile maximum distance defined in ASTM E 2600-10 for COC-contaminated sites.

10.3. Results

Subject Property: Based on review of environmental records searched by EDR for this Tier 1 VES, IPA concludes that the Subject Property is not listed as a site where the potential for a vapor encroachment condition exists.

Area of Concern (AOC): The AOC search did not identify any up gradient, down gradient or cross gradient listed contaminated sites. Several sites identified in the records search were determined to be outside of the AOC or were not identified as contaminated sites; therefore, a Vapor Encroachment Condition (VEC) regarding these sites could be ruled out.

11. Adjacent Properties

Properties in the vicinity of the Subject Property include commercial and residential development. The following properties adjacent to the Subject Property were observed:

North — The Subject Property is bordered to the north by single-family residential dwellings.

East — The Subject Property is bordered to the east by single-family residential dwellings.

South — The Subject Property is bordered to the south by multi-family residential dwellings across Altrudy Lane.

West — The Subject Property is bordered to the west by senior residential dwellings.

Based on observations and available regulatory information, the adjacent property uses are not anticipated to adversely impact the environmental integrity of the Subject Property.

12. Appendices

APPENDIX A: Photographic Documentation

APPENDIX B: Maps and Aerial Photographs

APPENDIX C: Questionnaires

APPENDIX D: Regulatory Database Report

APPENDIX E: Supporting Documentation

APPENDIX F: Resumes

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

APPENDIX C: Questionnaires

KEY SITE MANAGER PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Mr. Steven Hehn

Association with property: Designated Representative

Length of association with property: 5 Years

Date: August 7, 2024

Property Name: Altrudy II

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.

Note: *U/NR* indicates "Unknown" or "No Response".

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1A.	Is the Subject Property used for an industrial use?		X		
1B.	Are any adjoining properties used for an industrial use?		X		
2A.	To the best of your knowledge, has the Subject Property been used for an industrial use in the past?		X		
2B.	To the best of your knowledge, has any adjoining properties been used for an industrial use in the past?		X		
3A.	Is the Subject Property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
3B.	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4A.	To the best of your knowledge, has the Subject Property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4B.	To the best of your knowledge, has any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
5A.	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Subject Property?		X		
5B.	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Subject Property?		X		
6A.	Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject Property?		X		
6B.	To the best of your knowledge, have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Subject Property?		X		
7A.	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Subject Property?		X		
7B.	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Subject Property?		X		
8A.	Has fill dirt been brought onto the Subject Property which originated from a contaminated site?		X		
8B.	Has fill dirt been brought onto the Subject Property which is of an unknown origin?		X		
9A.	Are there currently any pits, ponds or lagoons located on the Subject Property in connection with waste treatment or waste disposal?		X		
9B.	To the best of your knowledge, have there been previously any pits, ponds or lagoons located on the Subject Property in connection with waste treatment or waste disposal?		X		
10A.	Is there currently, any stained soil on the Subject Property?		X		
10B.	To the best of your knowledge, has there been previously any stained soil on the Subject Property?		X		
11A.	Are there currently any registered or unregistered storage tanks (above or underground) located on the Subject Property?		X		
11B.	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Subject Property?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
12A.	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Subject Property or adjacent to any structure located on the Subject Property?		X		
12B.	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Subject Property or adjacent to any structure located on the Subject Property?		X		
13A.	Are there currently any flooring, drains, or walls located at the Subject Property that are stained by substances other than water or are emitting foul odors?		X		
13B.	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Subject Property that are stained by substances other than water or are emitting foul odors?		X		
14A.	If the Subject Property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?		X		
14B.	If the Subject Property is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?		X		
15A.	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Subject Property or any facility located on the Subject Property?		X		
15B.	Have you been informed of the current existence of hazardous substances or petroleum products with respect to the Subject Property or any facility located on the Subject Property?		X		
16A.	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Subject Property or any facility located on the Subject Property?		X		
16B.	Have you been informed of the past existence of environmental violations with respect to the Subject Property or any facility located on the Subject Property?		X		
16C.	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances of petroleum products in, on or from the property?		X		
16D.	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
16E.	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
17.	Have there been any environmental site assessments of the Subject Property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Subject Property or recommended further assessment of the Subject Property?		X		
18.	Does the Subject Property discharge waste water on or adjacent to the Subject Property, other than storm water, into a storm water sewer system?		X		
19.	Does the Subject Property discharge waste water on or adjacent to the Subject Property, other than storm water, or into a sanitary system?		X		
20.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Subject Property?		X		
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		X		
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Subject Property?		X		
23.	Has there ever been any ACM testing conducted on the Subject Property?		X		
24.	Is there an asbestos Operations and Maintenance (O&M) program in place at the Subject Property?		X		
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Subject Property?		X		
26.	Has there ever been LBP testing conducted on the Subject Property?		X		
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Subject Property?		X		
28.	Has the water at the Subject Property ever been tested for lead?		X		
29.	Has Radon testing ever been conducted at the Subject Property?		X		
30.	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
31.	Is the Subject Property or any portion of the Subject Property located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?		X		
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.			X	
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?			X	
34.	Is there a mold Operations and Maintenance (O&M) program in place at the Subject Property?			X	
35.	Is the HVAC system inspected at least annually?			X	
36.	Have identified HVAC problems been corrected in a timely manner?			X	
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?			X	
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?			X	
39.	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?			X	
Summarize historical Subject Property use (when was the Subject Property developed with the current improvements, what modifications have taken place, what was the Subject Property used for prior to its current use)		Please refer to report			

USER QUESTIONNAIRE

IPA has been retained to conduct a Phase I Environmental Site Assessment (ESA) of the following property. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 21 Scope of Work for this assessment, which documents certain User responsibilities, we are submitting this questionnaire to help you meet those responsibilities. Please complete this questionnaire and return via email or by fax to 949-756-8280 (within one business day of receipt).

Date: August 7, 2024

Name of person completing questionnaire: Mr. Todd Cottle

Company: C&C Development

Length of association with property: 5 Years

Phone Number: (714) 288-7600

Property Name/Address: Altrudy II, 18597 and 18602 Altrudy Lane , Yorba Linda, California 92886

IPA Subject Number: 0196-0080

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.

Note: *U/NR* indicates "Unknown" or "No Response", and "N/A" indicates not applicable.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?		X		
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?		X		
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?		X		
6	As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	X			
7	Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			X	

QUESTION		RESPONSE			COMMENTS
		Y	N	U/ NR	
8	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user		X		
8 (a)	Do you know the past uses of the property?		X		
8 (b)	Do you know of specific chemicals that are present or once were present at the property?		X		
8 (c)	Do you know of spills or other chemical releases that have taken place at the property?		X		
8 (d)	Do you know of any environmental cleanups that have taken place at the property?		X		
9	As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?		X		

In addition, are you aware of any of the following documents, and if so, please forward copies of the document(s) to IPA at 380 South Melrose Drive, Suite 387, Vista, California 92081 (along with a copy of this form):

<input checked="" type="checkbox"/>	Helpful Documents to be forwarded to IPA:
<input type="checkbox"/>	Environmental site assessment reports (i.e., Phase I, Phase II, tank testing results, radon, lead paint, or asbestos testing, etc.)
<input type="checkbox"/>	Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)
<input type="checkbox"/>	Environmental permits (i.e., solid waste disposal, hazardous waste disposal, wastewater, NPDES, underground injection, etc.)
<input type="checkbox"/>	Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)
<input type="checkbox"/>	Registrations for underground injection systems
<input type="checkbox"/>	Material safety data sheets
<input type="checkbox"/>	Community right-to-know plan
<input type="checkbox"/>	Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans, etc
<input type="checkbox"/>	Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area
<input type="checkbox"/>	Notices/correspondence from any agency relating to past/current violations of environmental laws, or liens encumbering the property
<input type="checkbox"/>	Hazardous waste generator notices or reports
<input type="checkbox"/>	Other:

OWNER QUESTIONNAIRE

IPA has been retained to conduct a Phase I Environmental Site Assessment (ESA) of the following property. The Phase I ESA will involve site observations, interviews, and a review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 21 Scope of Work for this assessment we are required to ask the following questions to the Owner or Owner representative. Please complete this questionnaire and return via email or by fax to (949)-756-8280 (within one business day of receipt).

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS..... Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System
US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

EXECUTIVE SUMMARY

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE..... State Response Sites

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing

AST..... Aboveground Petroleum Storage Tank Facilities

INDIAN UST..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP..... Voluntary Cleanup Priority Listing

VCP..... Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS..... Considered Brownfields Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT..... Waste Management Unit Database

SWRCY..... Recycler Database

HAULERS..... Registered Waste Tire Haulers Listing

INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands

ODI..... Open Dump Inventory

DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations

IHS OPEN DUMPS..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL..... Delisted National Clandestine Laboratory Register

HIST Cal-Sites..... Historical Calsites Database

SCH..... School Property Evaluation Program

CDL..... Clandestine Drug Labs

EXECUTIVE SUMMARY

Toxic Pits..... Toxic Pits Cleanup Act Sites
US CDL..... National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

CERS TANKS..... California Environmental Reporting System (CERS) Tanks

Local Land Records

LIENS..... Environmental Liens Listing
LIENS 2..... CERCLA Lien Information
DEED..... Deed Restriction Listing

Records of Emergency Release Reports

HMIRS..... Hazardous Materials Information Reporting System
CHMIRS..... California Hazardous Material Incident Report System
LDS..... Land Disposal Sites Listing
MCS..... Military Cleanup Sites Listing
Orange Co. Ind Site..... List of Industrial Site Cleanups
SPILLS 90..... SPILLS 90 data from FirstSearch

Other Ascertainable Records

FUDS..... Formerly Used Defense Sites
DOD..... Department of Defense Sites
SCRD DRYCLEANERS..... State Coalition for Remediation of Drycleaners Listing
US FIN ASSUR..... Financial Assurance Information
EPA WATCH LIST..... EPA WATCH LIST
2020 COR ACTION..... 2020 Corrective Action Program List
TSCA..... Toxic Substances Control Act
TRIS..... Toxic Chemical Release Inventory System
SSTS..... Section 7 Tracking Systems
ROD..... Records Of Decision
RMP..... Risk Management Plans
RAATS..... RCRA Administrative Action Tracking System
PRP..... Potentially Responsible Parties
PADS..... PCB Activity Database System
ICIS..... Integrated Compliance Information System
FTTS..... FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS..... Material Licensing Tracking System
COAL ASH DOE..... Steam-Electric Plant Operation Data
COAL ASH EPA..... Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER..... PCB Transformer Registration Database
RADINFO..... Radiation Information Database
HIST FTTS..... FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS..... Incident and Accident Data
CONSENT..... Superfund (CERCLA) Consent Decrees
INDIAN RESERV..... Indian Reservations
FUSRAP..... Formerly Utilized Sites Remedial Action Program
UMTRA..... Uranium Mill Tailings Sites
LEAD SMELTERS..... Lead Smelter Sites
US AIRS..... Aerometric Information Retrieval System Facility Subsystem
US MINES..... Mines Master Index File

EXECUTIVE SUMMARY

MINES MRDS.....	Mineral Resources Data System
ABANDONED MINES.....	Abandoned Mines
FINDS.....	Facility Index System/Facility Registry System
DOCKET HWC.....	Hazardous Waste Compliance Docket Listing
ECHO.....	Enforcement & Compliance History Information
UXO.....	Unexploded Ordnance Sites
FUELS PROGRAM.....	EPA Fuels Program Registered Listing
PFAS NPL.....	Superfund Sites with PFAS Detections Information
PFAS FEDERAL SITES.....	Federal Sites PFAS Information
PFAS TSCA.....	PFAS Manufacture and Imports Information
PFAS TRIS.....	List of PFAS Added to the TRI
PFAS RCRA MANIFEST.....	PFAS Transfers Identified In the RCRA Database Listing
PFAS ATSDR.....	PFAS Contamination Site Location Listing
PFAS WQP.....	Ambient Environmental Sampling for PFAS
PFAS NPDES.....	Clean Water Act Discharge Monitoring Information
PFAS PROJECT.....	NORTHEASTERN UNIVERSITY PFAS PROJECT
PFAS ECHO.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS ECHO FIRE TRAIN.....	Facilities in Industries that May Be Handling PFAS Listing
PFAS PT 139 AIRPORT.....	All Certified Part 139 Airports PFAS Information Listing
AQUEOUS FOAM NRC.....	Aqueous Foam Related Incidents Listing
BIOSOLIDS.....	ICIS-NPDES Biosolids Facility Data
UST FINDER.....	UST Finder Database
PFAS.....	PFAS Investigation Site Location Listing
AQUEOUS FOAM.....	Former Fire Training Facility Assessments Listing
CA BOND EXP. PLAN.....	Bond Expenditure Plan
CHROME PLATING.....	Chrome Plating Facilities Listing
CUPA Listings.....	CUPA Resources List
EMI.....	Emissions Inventory Data
ENF.....	Enforcement Action Listing
Financial Assurance.....	Financial Assurance Information Listing
ICE.....	Inspection, Compliance and Enforcement
HWP.....	EnviroStor Permitted Facilities Listing
HWT.....	Registered Hazardous Waste Transporter Database
HWTS.....	Hazardous Waste Tracking System
HAZNET.....	Facility and Manifest Data
MINES.....	Mines Site Location Listing
MWMP.....	Medical Waste Management Program Listing
NPDES.....	NPDES Permits Listing
PEST LIC.....	Pesticide Regulation Licenses Listing
PROC.....	Certified Processors Database
Notify 65.....	Proposition 65 Records
HAZMAT.....	Hazardous Material Facilities
UIC.....	UIC Listing
UIC GEO.....	UIC GEO (GEOTRACKER)
WASTEWATER PITS.....	Oil Wastewater Pits Listing
WDS.....	Waste Discharge System
WIP.....	Well Investigation Program Case List
MILITARY PRIV SITES.....	MILITARY PRIV SITES (GEOTRACKER)
PROJECT.....	PROJECT (GEOTRACKER)

Exclusive Recovered Govt. Archives

RGA LF..... Recovered Government Archive Solid Waste Facilities List
RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SHELL SERVICE STATIO EPA ID:: CAR000110130	18503 YORBA LINDA /	SSW 1/8 - 1/4 (0.232 mi.)	O49	163

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
LIDO CLEANERS EPA ID:: CAD981965098	18545 YORBA LINDA BL	S 1/8 - 1/4 (0.236 mi.)	Q56	182

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/22/2024 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 11 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 7 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 6 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 36 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators,

Violations:

Site ID: 71314
Site Name: Stater Bros. Markets 060
Violation Date: 05-21-2014
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 08/28/2014. Three containers of hazardous waste were observed to be stored beyond allowed accumulation time limits. Waste oxidizers with an accumulation start date of 6/30/12, waste corrosive with an accumulation start date of 4/26/13, and flammable waste with an accumulation start date of 4/3/12 were observed in the hazardous waste storage area. This facility is a small quantity generator of hazardous waste and may not accumulate waste on site for longer than 180 days. Have these wastes hauled using a registered hazardous waste hauler and send a copy of the manifest to this agency within 30 days.

Eval Notes: Reviewed HMBEP submission package on CERS, DENIED. Request for re-submittal this date. The following corrections are needed: CHEMICAL INVENTORY Chemical inventory submitted on 1/26/2015 has been reduced to 2 chemicals. The R404-A, Genetron 22 R-22, and Genetron 134 A R-134a have been removed. Nonflammable refrigerant gases are exempted up to a quantity of 1,000 cubic feet. The R404-A meets the exemption. The amount of R-22 previously reported was listed at 393 pounds which translates to 1,674.8 cubic feet. This material does not meet the exemption and will need to be included in your disclosure. The amount of R-134a previously reported translates to 1,879.8 cubic feet and will also need to be included in your disclosure. The Emergency Response plan lists CO2 in the deli section. Please be sure to include this material in your disclosure if it exceeds the minimum threshold quantity of 1,000 cubic feet. EMERGENCY RESPONSE Plan the NOTIFICATION section does not [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Steven Walters, Store Manager consented to this inspection. Observed facility and inspected hazardous waste storage area. Facility generates the following wastes: consumer product returns and breakage. Facility appears to be a conditionally exempt small quantity generator at this time. There have been no manifests generated within the past three years. Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Emergency information is posted. Inspected perimeter of facility and found no evidence of hazardous waste runoff.

Eval Notes: INSPECTOR COMMENTS This Agency has received notification from the business that they are exempt from hazardous waste accumulation time limits because they are a CESQG. The violation cited during the 5/21/14 inspection will be voided. Please be aware of your facility's accumulation amounts and timelines. When your facility has accumulated 220 pounds (100kg) on site, your facility will no longer meet the exemption standard and your facility will be classified as a small quantity generator of hazardous waste. At that point, you will have 180 days to remove the waste from the premises using a registered hazardous waste hauler. .

inspect was granted by Jim Batista, store director. Facility generates pharmacy waste and various wastes from consumer product returns. Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Three containers of hazardous waste were observed to be stored beyond allowed accumulation time limits. Waste oxidizers with an accumulation start date of 6/30/12, waste corrosive with an accumulation start date of 4/26/13, and flammable waste with an accumulation start date of 4/3/12 were observed in the hazardous waste storage area (see violation). This facility is a small quantity generator of hazardous waste and may not accumulate waste on site for longer than 180 days. Have these wastes hauled using a registered hazardous waste hauler and send a copy of the manifest to this agency [Truncated]

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 419421
Site Name: Panda Express #1106
Violation Date: 07-25-2022
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Business has not complied with the annual certification requirement. Business' hazardous materials business emergency plan (HMBP) was last submitted on 1/6/2020. Certification is required by March 1st of every year.

Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 03-31-2021
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: From: Wales, Lisa Sent: Wednesday, March 31, 2021 10:51 AM To: helen.yeh@pandarg.com; lauren.rios@pandarg.com; melissa.martinez.1@pandarg.com Subject: Hazardous Materials Submittal Past Due Good Morning, I was looking through the database, and I see that you have not submitted the electronic haz mat disclosure for your facility, Panda Express #1106 (Placentia), in CERS. Our Agency sent out reminder letters in January, but you may not have receive it. The haz mat disclosure was due on March 1st. I ve included a link with information from CERS on the steps to take to submit your information if there have been no changes in your chemical inventory since your last disclosure:
https://cers.calepa.ca.gov/wp-content/uploads/sites/11/2017/04/hmbp-no-change-submittals_submittals.pdf The CERS reporting system website address is on page 1 of the instructions. Please let me know if you are having difficulty or need assistance. Best, Lisa Lisa Wales, REHS Hazardous [Truncated]

Eval Notes: Reviewed HMBEP submission package on E-submit, DENIED. Request for re-submittal this date. The following corrections are needed: Chemical Description - You list the amount of new tetrachloroethylene as 40 gallons which would not meet the minimum threshold reporting quantity of 55 gallons. You will need to add together all of the new tetrachloroethylene on site both the amount that you store to be added to the machine, and the amount that is in the machine itself. If the combined amounts are less than 40 gallons, you would not disclose this chemical and it should be removed from your disclosure. If you do have 55 gallons or greater of new material on site, please make the

Eval Notes: Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities form - Owner/Operator Identification form - Hazardous Material Chemical Inventory forms - Facility Site Map - Business Emergency [Truncated]

Eval Notes:

On site to conduct a routine hazardous waste inspection. Met with Saleem Mirza who gave consent to enter and inspect the facility. Hazardous waste observed on site included: - One 55-gallon drum of spent Perchloroethylene. Container was properly labeled and sealed upon inspection. The accumulation date (11/25/13) matched the date of the last hazardous waste pick up. - Spent dry cleaning filters were not observed. Last manifested date for filters was on 11/25/13. Filters are generated approximately every 2.5 years based on historical manifests. Reviewed consolidated manifests for all hazardous waste streams. The last three years of manifests were present at the facility. Perimeter of the facility including the municipal dumpster was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The Hazardous Waste Emergency Response information was posted in a common area of the facility. [Truncated]

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: N/A
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 08/01/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/22/2024	Source: EPA
Date Data Arrived at EDR: 06/03/2024	Telephone: N/A
Date Made Active in Reports: 06/26/2024	Last EDR Contact: 08/01/2024
Number of Days to Update: 23	Next Scheduled EDR Contact: 10/07/2024
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/22/2024	Source: EPA
Date Data Arrived at EDR: 05/01/2024	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/07/2024	Telephone: (415) 495-8895
Date Made Active in Reports: 06/20/2024	Last EDR Contact: 06/07/2024
Number of Days to Update: 13	Next Scheduled EDR Contact: 09/30/2024

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/07/2024	Telephone: (415) 495-8895
Date Made Active in Reports: 06/20/2024	Last EDR Contact: 06/07/2024

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/03/2024	Source: Environmental Protection Agency

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL));

State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor

provides similar information to the information that was available in CalSites, and provides additional site information,

including, but not limited to, identification of formerly-contaminated properties that have been released for

reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses,

and risk characterization information that is used to assess potential impacts to public health and the environment

at contaminated sites.

Number of Days to Update: 83	Next Scheduled EDR Contact: 09/30/2024
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 02/26/2024	Source: DTSC and SWRCB

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

ALTRUDY II
18597 AND 18602 ALTRUDY LANE
YORBA LINDA, CA 92886

TARGET PROPERTY COORDINATES

Latitude (North):	33.892676 - 33° 53' 33.63"
Longitude (West):	117.809647 - 117° 48' 34.73"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	425134.3
UTM Y (Meters):	3750357.0
Elevation:	429 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005884 YORBA LINDA, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

Not Reported	

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
YORBA LINDA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

5G	1/2 - 1 Mile WSW	SW
6G	1/2 - 1 Mile WSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	22 inches	27 inches	sandy clay	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
3	27 inches	38 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
4	38 inches	70 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
5	70 inches	79 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1

Soil Map ID: 2

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	31 inches	61 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

WELL SEARCH DISTANCE INFORMATION

<u>DATABASE</u>	<u>SEARCH DISTANCE (miles)</u>
Federal USGS	1.000
Federal FRDS PWS	Nearest PWS within 1 mile
State Database	1.000

FEDERAL USGS WELL INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
No Wells Found		

FEDERAL FRDS PUBLIC WATER SUPPLY SYSTEM INFORMATION

<u>MAP ID</u>	<u>WELL ID</u>	<u>LOCATION FROM TP</u>
B34	CA3010037	1/4 - 1/2 Mile SSW

Note: PWS System location is not always the same as well location.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Integrated Property Analysis
550 West Vista Way Suite 212
Vista, CA 92083
Contact: Michael Atallah

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Integrated Property Analysis were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # CBA1-4422-89D2
PO # NA
Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: CBA1-4422-89D2

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Integrated Property Analysis (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

APPENDIX F: Resumes

MICHAEL ATALLAH

President

Mr. Atallah has hands on experience in the real estate due diligence fields and has maintained excellence in his knowledge of construction, environmental and real estate properties in general.

Qualifications:

Over 25 years experience in preparing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.

Professional Experience:

Integrated Property Analysis, Inc.

1999 - Current

President

- Providing Physical (Capital) Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.
- Coordinate field services and perform site assessments in accordance with, but not limited to, ASTM, HUD, USDA, TCAC, Fannie Mae, Freddie Mac, CALHFA and client guidelines.
- Quality control, including reviewing and editing of outgoing reports and draft contracts.
- Business Development to establish and maintain cooperative working relationships with clients.

Education & Licenses:

- California State University in Fullerton – Bachelor of Arts Degree in Business Administration with Concentrations in Real Estate and Finance
- LEED Accredited Professional
- Registered Environmental Property Assessor No. REPA 266318
- Certified Professional Radon Measurement Provider by the National Environmental Health Association No. NRPP ID#105517RT
- Certificate of Completion of EPA accredited AHERA Asbestos Abatement Contractors/Supervisors 40-hour course.

ASBESTOS INSPECTION REPORT

1.0 INTRODUCTION

This report presents the results of Barr & Clark's asbestos inspection of the Single Family Residence located at 18597 Altrudy Lane, Yorba Linda, California (Subject Property). This document is prepared for the sole use of C&C Development, the City of Yorba Linda and any regulatory agencies that are directly involved in this project. No other party should rely on the information contained herein without prior written consent of C&C Development. The scope of services, inspection methodology, and results are presented below.

2.0 SCOPE OF WORK

The purpose of this inspection is to identify and assess certain accessible Asbestos Containing Construction Materials (ACCM) at the subject property.

On 12/5/2019, Barr & Clark performed an inspection for asbestos at the subject property in Yorba Linda, California. Physical bulk samples were collected of suspect materials from representative locations and submitted to an independent laboratory for analysis. If asbestos was detected at any concentration within a sample of a construction material, it was concluded that the material contains asbestos. Suspect materials were also visually inspected to assess their condition.

3.0 PROPERTY DESCRIPTION

The subject property is a single family residence that was built circa 1950. It is a one story building that is constructed over a raised foundation. The exterior walls are covered with stucco/wood siding. The home consists of three bedrooms, two bathrooms, an attached garage, a detached shed and a chicken coop.

4.0 INSPECTOR'S QUALIFICATIONS

Matt Crochet of Barr & Clark performed the inspection at the site. Personnel certificate(s) have been provided in *Appendix B*.

5.0 SAMPLING PROTOCOL / SAMPLE ANALYSIS

Sampling Protocol: Sampling was patterned after the Asbestos School Hazard Emergency Response Act (40 CFR 763 Subpart E) as mandated by Cal/OSHA (Title 8 Section 1529) and South Coast Air Quality Management District (Rule 1403).

Sample Analysis: Physical bulk samples were collected from this property and analyzed for asbestos content by an independent environmental laboratory which is accredited by the National Voluntary Laboratory Accreditation Program (Lab Code 200358-0). The method of analysis was

Polarized Light Microscopy (EPA 600/M4-82-020). Additional laboratory information can be found on the last page of the laboratory results (*Appendix A*).

6.0 SUMMARY OF RESULTS

Asbestos Containing Construction Materials: Asbestos was detected in samples of several construction materials. The following summary identifies these materials, their location within the property, the condition in which they were observed at the time of inspection, approximate quantity of material and percentage of asbestos contained in the material as reported by laboratory analysis.

Material	Sample #	Location	Condition	Quantity*	% Asbestos
Exterior Stucco	1-5	Exterior Walls Throughout	Damaged	N/A	<0.1%** <i>See Note</i>
Roofing Mastic	9-11	Roof at Penetrations and All Like Roofing Mastic Throughout	Damaged	20 S.F.	3%
Duct Insulation Material (Aircell)	Visual	Heater Ducts and Registers Throughout	Damaged	500 S.F.	Assumed
Asbestos Cement Pipe(s)	Visual	Roof/Attic	Good	30 S.F.	Assumed

***NOTE:** All quantification estimates are approximate and based on information and materials that were accessible at the time of inspection. The chosen contractor is solely responsible for verifying all final ACCM quantities for bidding, abatement, and disposal purposes.

*****NOTE:** Stucco sample results initially indicated an asbestos content of <1%. In an effort to verify asbestos content, these samples were re-analyzed utilizing a 1000-point point count method and found to have an asbestos content of less than or equal to 0.1%. Because the results were less than or equal to 0.1% the material may be treated as non asbestos containing material as defined by AQMD and OSHA.

7.0 RECOMMENDATIONS

The analysis and recommendations submitted in this survey are based in part on the data obtained from specific and discrete sampling locations. However, the nature and extent of variations between the sampling locations may not become evident until renovation or demolition procedures commence. If potential variations (i.e. different building materials) are identified during renovation or demolition activities, it will be necessary to conduct additional bulk sampling.

ACCM in Damaged or Significantly Damaged Condition: These materials present the greatest risk for asbestos exposure. **It is recommended that all damaged and/or significantly**

damaged asbestos containing construction materials be removed following SCAQMD Rule 1403 Procedure 5. An asbestos abatement contractor registered with the Division of Occupational Safety and Health must perform any work that disturbs these materials.

ACCM in Good Condition: No action is recommended for these materials. Asbestos containing materials that are maintained in good condition present minimal risk for asbestos exposure.

Note: If renovation or demolition activities are to affect these materials, an asbestos abatement contractor registered with the Division of Occupational Safety and Health should be contracted to perform all portions of the work affecting these materials.

8.0 INSPECTION LIMITATIONS

This inspection was planned, developed, and implemented based on Barr & Clark's previous experience in performing asbestos inspections. Barr & Clark utilized state-of-the-art-practices and techniques in accordance with regulatory standards while performing this inspection. Barr & Clark's evaluation of the relative risk of exposure to asbestos identified during this inspection is based on conditions observed at the time of the inspection. Barr & Clark cannot be responsible for changing conditions that may alter the relative exposure risk or for future changes in accepted methodology.

This inspection did not evaluate hidden, buried or unseen building or other materials. When future renovation or demolition activities are undertaken, Barr & Clark should be contacted if such are encountered for further evaluation. Any materials that were not sampled during the inspection must be presumed to contain asbestos until proven otherwise. Access and inspection of attics or crawl spaces could be limited due to visibility, obstructions, health and safety hazards or structural issues. All undocumented materials should be presumed to contain asbestos until sampled and analyzed.

Enclosed are the actual test results and all relevant certifications and licenses.

EMSL maintains liability limited to cost of analysis. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method"), but augmented with procedures outlined in the 1993 ("final") version of the method. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. All samples received in acceptable condition unless otherwise noted. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. EMSL recommends gravimetric reduction for all non-friable organically bound materials prior to analysis. Estimation of uncertainty is available on request.

Some samples may contain asbestos fibers present in dimensions below PLM resolution limits. The limit of detection as stated in the method is 0.1%. EMSL Analytical Inc suggests that samples reported as <0.1% or none detected undergo additional analysis via TEM. The above test report relates only to the items tested. This report may not be reproduced, except in full, without written approval EMSL Analytical Inc. This test report must not be used by the client to claim product endorsement by NVLAP or any agency of the United States Government. EMSL Analytical Inc. bears no responsibility for sample collection activities, analytical method limitations, or the accuracy of results when requested to separate layered samples. EMSL Analytical Inc liability is limited to the cost of sample analysis. The test results contained within this report meet the requirements of NELAC unless otherwise noted. Samples received in good condition unless otherwise noted. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample.

ASBESTOS INSPECTION REPORT

1.0 INTRODUCTION

This report presents the results of Barr & Clark's asbestos inspection of the Single Family Residence located at 18602 Altrudy Lane, Yorba Linda, California (Subject Property). This document is prepared for the sole use of C&C Development, the City of Yorba Linda and any regulatory agencies that are directly involved in this project. No other party should rely on the information contained herein without prior written consent of C&C Development. The scope of services, inspection methodology, and results are presented below.

2.0 SCOPE OF WORK

The purpose of this inspection is to identify and assess certain accessible Asbestos Containing Construction Materials (ACCM) at the subject property.

On December 05, 2019, Barr & Clark performed an inspection for asbestos at the subject property in Yorba Linda, California. Physical bulk samples were collected of suspect materials from representative locations and submitted to an independent laboratory for analysis. If asbestos was detected at any concentration within a sample of a construction material, it was concluded that the material contains asbestos. Suspect materials were also visually inspected to assess their condition.

3.0 PROPERTY DESCRIPTION

The subject property is a single family residence that was built circa 1950. It is a one story building that is constructed over a slab foundation. The exterior walls are covered with stucco. The home consists of three bedrooms, two bathrooms and an attached garage.

4.0 INSPECTOR'S QUALIFICATIONS

Matt Crochet of Barr & Clark performed the inspection at the site. Personnel certificate(s) have been provided in *Appendix B*.

5.0 SAMPLING PROTOCOL / SAMPLE ANALYSIS

Sampling Protocol: Sampling was patterned after the Asbestos School Hazard Emergency Response Act (40 CFR 763 Subpart E) as mandated by Cal/OSHA (Title 8 Section 1529) and South Coast Air Quality Management District (Rule 1403).

Sample Analysis: Physical bulk samples were collected from this property and analyzed for asbestos content by an independent environmental laboratory which is accredited by the National Voluntary Laboratory Accreditation Program (Lab Code 200358-0). The method of analysis was

Polarized Light Microscopy (EPA 600/M4-82-020). Additional laboratory information can be found on the last page of the laboratory results (*Appendix A*).

6.0 SUMMARY OF RESULTS

Asbestos Containing Construction Materials: Asbestos was detected in samples of several construction materials. The following summary identifies these materials, their location within the property, the condition in which they were observed at the time of inspection, approximate quantity of material and percentage of asbestos contained in the material as reported by laboratory analysis.

Material	Sample #	Location	Condition	Quantity*	% Asbestos
Roofing Mastic	4-6	Roof at Penetrations and All Like Roofing Mastic Throughout	Good	10 S.F.	5%
Exterior Stucco	7-11	Exterior Walls Throughout	Good	N/A	<0.1%** <i>See Note</i>
Flooring	12-14	Kitchen, Laundry Room and All Like Flooring Throughout	Good	350 S.F.	3%-15%

Asbestos Cement Pipe(s)	Visual	Roof/Attic	Good	20 S.F.	Assumed

***NOTE: All quantification estimates are approximate and based on information and materials that were accessible at the time of inspection. The chosen contractor is solely responsible for verifying all final ACCM quantities for bidding, abatement, and disposal purposes.**

****NOTE:** *Stucco and joint compound sample results initially indicated an asbestos content of <1%. In an effort to verify asbestos content, these samples were re-analyzed utilizing a 1000-point point count method and found to have an asbestos content of less than or equal to 0.1%. Because the results were less than or equal to 0.1% the material may be treated as non asbestos containing material as defined by AQMD and OSHA.*

*****NOTE:** *Flooring materials may be present under ceramic tiles in the bathrooms. Any suspect flooring materials found under the ceramic tile must be assumed positive.*

7.0 RECOMMENDATIONS

The analysis and recommendations submitted in this survey are based in part on the data obtained from specific and discrete sampling locations. However, the nature and extent of variations between the sampling locations may not become evident until renovation or demolition procedures commence. If potential variations (i.e. different building materials) are identified during renovation or demolition activities, it will be necessary to conduct additional bulk sampling.

ACCM in Damaged or Significantly Damaged Condition: These materials present the greatest risk for asbestos exposure. **It is recommended that all *damaged and/or significantly damaged asbestos containing construction materials be removed following SCAQMD Rule 1403 Procedure 5.*** An asbestos abatement contractor registered with the Division of Occupational Safety and Health must perform any work that disturbs these materials.

ACCM in Good Condition: No action is recommended for these materials. Asbestos containing materials that are maintained in good condition present minimal risk for asbestos exposure.

Note: If renovation or demolition activities are to affect these materials, an asbestos abatement contractor registered with the Division of Occupational Safety and Health should be contracted to perform all portions of the work affecting these materials.

8.0 INSPECTION LIMITATIONS

This inspection was planned, developed, and implemented based on Barr & Clark's previous experience in performing asbestos inspections. Barr & Clark utilized state-of-the-art-practices and techniques in accordance with regulatory standards while performing this inspection. Barr & Clark's evaluation of the relative risk of exposure to asbestos identified during this inspection is based on conditions observed at the time of the inspection. Barr & Clark cannot be responsible for changing conditions that may alter the relative exposure risk or for future changes in accepted methodology.

This inspection did not evaluate hidden, buried or unseen building or other materials. When future renovation or demolition activities are undertaken, Barr & Clark should be contacted if such are encountered for further evaluation. Any materials that were not sampled during the inspection must be presumed to contain asbestos until proven otherwise. Access and inspection of attics or crawl spaces could be limited due to visibility, obstructions, health and safety hazards or structural issues. All undocumented materials should be presumed to contain asbestos until sampled and analyzed.

Enclosed are the actual test results and all relevant certifications and licenses.

EMSL maintains liability limited to cost of analysis. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method"), but augmented with procedures outlined in the 1993 ("final") version of the method. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. All samples received in acceptable condition unless otherwise noted. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. EMSL recommends gravimetric reduction for all non-friable organically bound materials prior to analysis. Estimation of uncertainty is available on request.

Some samples may contain asbestos fibers present in dimensions below PLM resolution limits. The limit of detection as stated in the method is 0.1%. EMSL Analytical Inc suggests that samples reported as <0.1% or none detected undergo additional analysis via TEM. The above test report relates only to the items tested. This report may not be reproduced, except in full, without written approval EMSL Analytical Inc. This test report must not be used by the client to claim product endorsement by NVLAP or any agency of the United States Government. EMSL Analytical Inc. bears no responsibility for sample collection activities, analytical method limitations, or the accuracy of results when requested to separate layered samples. EMSL Analytical Inc liability is limited to the cost of sample analysis. The test results contained within this report meet the requirements of NELAC unless otherwise noted. Samples received in good condition unless otherwise noted. Unless requested by the client, building materials manufactured with multiple layers (i.e. linoleum, wallboard, etc.) are reported as a single sample.

LEAD-BASED PAINT INSPECTION REPORT

1.0 INTRODUCTION

This report presents the results of Barr & Clark Environmental's lead-based paint (LBP) inspection of the Single Family Residence located at 18597 Altrudy Lane, Yorba Linda, California (Subject Property). This document is prepared for the sole use of the C&C Development, the City of Yorba Linda and any regulatory agencies that are directly involved in this project. No other party should rely on the information contained herein without prior written consent of the C&C Development. The scope of services, inspection methodology, and results are presented below.

2.0 SCOPE OF WORK

The purpose of this inspection is to identify and assess the Lead-Based Paint (LBP) present on painted components at the subject property.

On December 05, 2019, Barr & Clark performed an inspection for lead-based paint at the subject property in Yorba Linda, California. To comply with EPA and HUD guidelines, painted and varnished surfaces in every accessible "room equivalent" were sampled for the presence of LBP. The intent was to ascertain the presence of lead-based paint above the federal action level. If LBP was found, the inspection would identify individual architectural components and their respective concentrations of lead in such a manner that this report would be used to characterize the presence of LBP at this property.

3.0 PROPERTY DESCRIPTION

The subject property is a single family residence that was built circa 1950. It is a one-story building that is constructed over a raised foundation. The exterior walls are covered with stucco/wood siding and the windows are a combination of casement, fixed and aluminum-framed types. The home consists of three bedrooms, two bathrooms, an attached garage, detached shed and a chicken coop. At the time of this inspection, most of the painted surfaces were in good to fair condition.

4.0 INSPECTOR'S QUALIFICATIONS

Matthew Crochet and Dana Williams of Barr & Clark performed the inspection at the site using an RMD LPA-1 XRF spectrum analyzer instrument. They have attended the radiation safety course for handling the instrument, and completed an EPA approved curriculum in Lead in Construction Inspector / Risk Assessor Training.

At the time of this report, the California Department of Health Services, Childhood Lead Poisoning Branch, has implemented a State Certification Model Accreditation Plan adopted from the EPA. Matthew Crochet and Dana Williams have received certification. Personnel certificate(s) have been provided in **Appendix B**.

5.0 TESTING PROTOCOL

XRF Testing: Testing of the painted surfaces was patterned after the inspection protocol in Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing¹. In every “room equivalent” within the tested property, one representative surface of each “testing combination” was tested. Multiple readings were collected to resolve inconsistencies in the test results.

Regulatory Compliance: Several public (government) agencies have a published “regulatory action level” to classify LBP. To further complicate matters, some of the established “levels” are quantified in different units of measurement. Listed below are the current regulatory agencies that have defined LBP, along with the respective action level:

<u>Agency</u>	<u>Ordinance #</u>	<u>Action level (mg / cm²)</u>	<u>Action level (ppm²)</u>
HUD / EPA	24 CFR 35.86 & 40 CFR 745.103	1.0 mg / cm ²	5,000 ppm
OSHA / CAL OSHA	29 CFR 1926.62 & Title 8, 1532.1	<i>Not Specified</i>	600 ppm ³

HUD / EPA have recently issued the following guidance regarding units of measurement for paint samples:

“Report lead paint amounts in mg/cm² because this unit of measurement does not depend on the number of layers of non-lead-based paint and can usually be obtained without damaging the painted surface. All measurements of lead in paint should be in mg/cm², unless the surface area cannot be measured or if all paint cannot be removed from the measured surface area. In such cases, concentrations may be reported in weight percent (%) or parts per million by weight (ppm).”⁴

Furthermore, EPA has previously issued guidance on lead content classification as follows:

“... The rule, at 24 CFR 35.86 and 40 CFR 745.103 states that a lead-based paint free finding must demonstrate that the building is free of ‘paint or other surface coatings that contain lead in excess of 1.0 milligrams per square centimeter (1.0 mg / cm²) or 0.5 percent by weight (5000 ppm).’ The State standards are not applicable, whether more or less stringent, since a State cannot amend Federal requirements.”⁵

In recognition of the various action levels the testing results are classified as follows for this report:

- Painted surfaces with readings at or above 1.0 mg / cm² are considered - Positive
- Painted surfaces with readings at or below 0.9 mg / cm² are considered - Negative

The individual readings have been provided on all field data sheets. Any future change in action levels by one of the regulating agencies may affect the classification of results.

6.0 METHOD OF TESTING

Paint Testing: The method employed was X-ray fluorescence (XRF) using a Radiation Monitoring Device Lead Paint Analyzer (RMD LPA-1). The instrument was operated in “Quick Mode,” where the duration for each test result is determined by a combination of:

- the actual reading relative to the designated action level;
- the age of the radioactive source; and
- the substrate on which the test was taken.

¹ 2012 Revision

² Parts per million

³ Applies to construction related activities

⁴ Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (2012 Revision).

⁵ Office of Pollution Prevention and Toxics, (August 20, 1996)

The instrument's calibration was verified according to the manufacturer's specifications in compliance with the Performance Characteristic Sheet (PCS) developed for this instrument.

The readings from this instrument produce a 95% confidence level that the "lead" reading accurately reflects the actual level of lead in the tested surfaces, relative to the federal action level.

7.0 SUMMARY OF RESULTS

Paint Sampling: Throughout the subject property, several of the painted components indicated the presence of lead-based paint (LBP) at or above the action level. The following summary lists the specific components that tested above the action level and their respective locations:

Interior of House

- Some of the tiled surfaces in bathroom 2 tested positive for lead. These surfaces were not painted and the lead is most likely in the glazing or the matrix of the tile itself.

Exterior of House

- Eaves, rafters and fascia

Sampling for this inspection was representative and any components that were not tested but similar to those components that tested positive for LBP should be considered and treated as lead laden.

The field data and results for paint sampling may be found in *Appendix A*.

8.0 RECOMMENDATIONS

The greatest potential for lead exposure from lead painted architectural components occurs when:

- the paint has become defective; or
- when the paint is applied to a friction / impact component where the paint is continually disturbed; or
- when the paint is disturbed through routine maintenance or renovation activities.

With this in mind, the following are our recommendations for this property:

- The results from this inspection should be provided to any individuals that may disturb the painted surfaces. It is encouraged to utilize professionals that have experience working with LBP.
- If renovation is scheduled in the near future (less than three months), all lead painted components that have been previously targeted for replacement should be replaced utilizing "lead safe" containment and work practices.
- ALL components that have been identified with defective lead paint should have the paint repaired as soon as possible. Any paint repair should be done utilizing "lead safe" containment, work practices, and clean-up techniques.
- All components with lead painted friction / impact surfaces should be treated to minimize the friction or impact as necessary.

- Lead painted components that **have not** been targeted for replacement should either be considered for abatement (replacement, enclosure, encapsulation, etc.) or included in an Operations & Management (O & M) Plan that will help to minimize exposures to lead hazards.
- All lead painted surfaces that are not expected to be impacted in the near future (less than three months) should also be included the O & M plan.
- In addition, the tenants or occupants of the dwelling should be notified of the test results and instructed in actions that they may perform to keep the living areas “lead safe.”
- The tile surfaces are not a likely source of lead dust contamination as long as they remain intact. If future renovation or repair activities require that the tile be removed, or the surfaces disturbed, it should be done in a manner that does not break the tiles. If this is not feasible, this task should be assigned to a lead certified contractor.

9.0 TITLE X REQUIREMENTS

A copy (or summary) of this report must be provided to new lessees (tenants) and purchasers of this property under Federal law (24 CFR part 35 and 40 CFR part 745) before they become obligated under a lease or sales contract. The complete report must also be provided to new purchasers and it must be made available to new tenants. Landlords (lessors) and sellers are also required to distribute an educational pamphlet approved by the U.S. Environmental Protection Agency and include standard warning language in their leases or sales contracts to ensure that parents have the information they need to protect their children from lead-based paint hazards. This report should be maintained and updated as a permanent maintenance record for this property.

10.0 INSPECTION LIMITATIONS

This inspection was planned, developed, and implemented based on Barr & Clark’s previous experience in performing lead-based paint inspections. This inspection was patterned after Chapter 7 of the *HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (2012 Revision)*. Barr & Clark utilized state-of-the-art-practices and techniques in accordance with regulatory standards while performing this inspection. Barr & Clark’s evaluation of the relative risk of exposure to lead identified during this inspection is based on conditions observed at the time of the inspection. Barr & Clark cannot be responsible for changing conditions that may alter the relative exposure risk or for future changes in accepted methodology. Enclosed are the diagram(s), actual test results, and all relevant certifications and licenses.

CERTIFICATE OF INSURANCE

This certificate is issued for informational purposes only. It certifies that the policies listed in this document have been issued to the Named Insured. It does not grant any rights to any party nor can it be used, in any way, to modify coverage provided by such policies. Alteration of this certificate does not change the terms, exclusions or conditions of such policies. Coverage is subject to the provisions of the policies, including any exclusions or conditions, regardless of the provisions of any other contract, such as between the certificate holder and the Named Insured. The limits shown below are the limits provided at the policy inception. Subsequent paid claims may reduce these limits.

Certificate Holder: This is a copy of our general auto insurance. Your company or city's specific insurance is on file.	Named Insured: BARR & CLARK, INC. 16531 BOLSA CHICA ST STE 205 HUNTINGTON BEACH CA 92649-3595

CERTIFICATE OF WORKERS' COMPENSATION INSURANCE

GROUP:
POLICY NUMBER: 1917813
CERTIFICATE ID: 243

This is a copy of our general worker's compensation insurance. Your company or city's specific insurance is on file.

This is to certify that we have issued a valid Workers' Compensation insurance policy in a form approved by the California Insurance Commissioner to the employer named below for the policy period indicated.

This policy is not subject to cancellation by the Fund except upon 30 days advance written notice to the employer.

We will also give you 30 days advance notice should this policy be cancelled prior to its normal expiration.

This certificate of insurance is not an insurance policy and does not amend, extend or alter the coverage afforded by the policy listed herein. Notwithstanding any requirement, term or condition of any contract or other document with respect to which this certificate of insurance may be issued or to which it may pertain, the insurance afforded by the policy described herein is subject to all the terms, exclusions, and conditions, of such policy.

LEAD-BASED PAINT INSPECTION REPORT

1.0 INTRODUCTION

This report presents the results of Barr & Clark Environmental's lead-based paint (LBP) inspection of the Single Family Residence located at 18602 Altrudy Lane, Yorba Linda, California (Subject Property). This document is prepared for the sole use of the C&C Development, the City of Yorba Linda and any regulatory agencies that are directly involved in this project. No other party should rely on the information contained herein without prior written consent of the C&C Development. The scope of services, inspection methodology, and results are presented below.

2.0 SCOPE OF WORK

The purpose of this inspection is to identify and assess the Lead-Based Paint (LBP) present on painted components at the subject property.

On December 05, 2019, Barr & Clark performed an inspection for lead-based paint at the subject property in Yorba Linda, California. To comply with EPA and HUD guidelines, painted and varnished surfaces in every accessible "room equivalent" were sampled for the presence of LBP. The intent was to ascertain the presence of lead-based paint above the federal action level. If LBP was found, the inspection would identify individual architectural components and their respective concentrations of lead in such a manner that this report would be used to characterize the presence of LBP at this property.

3.0 PROPERTY DESCRIPTION

The subject property is a single family residence that was built circa 1950. It is a one-story building that is constructed over a slab foundation. The exterior walls are covered with stucco and the windows are a combination of vinyl, casement, fixed and aluminum-framed types. The home consists of three bedrooms, two bathrooms and an attached garage. At the time of this inspection, most of the painted surfaces were in good condition.

4.0 INSPECTOR'S QUALIFICATIONS

Matthew Crochet and Dana Williams of Barr & Clark performed the inspection at the site using an RMD LPA-1 XRF spectrum analyzer instrument. They have attended the radiation safety course for handling the instrument, and completed an EPA approved curriculum in Lead in Construction Inspector / Risk Assessor Training.

At the time of this report, the California Department of Health Services, Childhood Lead Poisoning Branch, has implemented a State Certification Model Accreditation Plan adopted from the EPA. Matthew Crochet and Dana Williams have received certification. Personnel certificate(s) have been provided in **Appendix B**.

5.0 TESTING PROTOCOL

XRF Testing: Testing of the painted surfaces was patterned after the inspection protocol in Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing¹. In every “room equivalent” within the tested property, one representative surface of each “testing combination” was tested. Multiple readings were collected to resolve inconsistencies in the test results.

Regulatory Compliance: Several public (government) agencies have a published “regulatory action level” to classify LBP. To further complicate matters, some of the established “levels” are quantified in different units of measurement. Listed below are the current regulatory agencies that have defined LBP, along with the respective action level:

<u>Agency</u>	<u>Ordinance #</u>	<u>Action level (mg / cm²)</u>	<u>Action level (ppm²)</u>
HUD / EPA	24 CFR 35.86 & 40 CFR 745.103	1.0 mg / cm ²	5,000 ppm
OSHA / CAL OSHA	29 CFR 1926.62 & Title 8, 1532.1	Not Specified	600 ppm ³

HUD / EPA have recently issued the following guidance regarding units of measurement for paint samples:

“Report lead paint amounts in mg/cm² because this unit of measurement does not depend on the number of layers of non-lead-based paint and can usually be obtained without damaging the painted surface. All measurements of lead in paint should be in mg/cm², unless the surface area cannot be measured or if all paint cannot be removed from the measured surface area. In such cases, concentrations may be reported in weight percent (%) or parts per million by weight (ppm).”⁴

Furthermore, EPA has previously issued guidance on lead content classification as follows:

“... The rule, at 24 CFR 35.86 and 40 CFR 745.103 states that a lead-based paint free finding must demonstrate that the building is free of ‘paint or other surface coatings that contain lead in excess of 1.0 milligrams per square centimeter (1.0 mg / cm²) or 0.5 percent by weight (5000 ppm).’ The State standards are not applicable, whether more or less stringent, since a State cannot amend Federal requirements.”⁵

In recognition of the various action levels the testing results are classified as follows for this report:

- Painted surfaces with readings at or above 1.0 mg / cm² are considered - Positive
- Painted surfaces with readings at or below 0.9 mg / cm² are considered - Negative

The individual readings have been provided on all field data sheets. Any future change in action levels by one of the regulating agencies may affect the classification of results.

6.0 METHOD OF TESTING

Paint Testing: The method employed was X-ray fluorescence (XRF) using a Radiation Monitoring Device Lead Paint Analyzer (RMD LPA-1). The instrument was operated in “Quick Mode,” where the duration for each test result is determined by a combination of:

- the actual reading relative to the designated action level;
- the age of the radioactive source; and
- the substrate on which the test was taken.

¹ 2012 Revision

² Parts per million

³ Applies to construction related activities

⁴ Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (2012 Revision).

⁵ Office of Pollution Prevention and Toxics, (August 20, 1996)

The instrument's calibration was verified according to the manufacturer's specifications in compliance with the Performance Characteristic Sheet (PCS) developed for this instrument.

The readings from this instrument produce a 95% confidence level that the "lead" reading accurately reflects the actual level of lead in the tested surfaces, relative to the federal action level.

7.0 SUMMARY OF RESULTS

Paint Sampling: Throughout the subject property, several of the painted components indicated the presence of lead-based paint (LBP) at or above the action level. The following summary lists the specific components that tested above the action level and their respective locations:

Interior

- Garage - door (smaller passageway)
- Some of the tiled surfaces in the living room and kitchen also tested positive for lead. These surfaces were not painted and the lead is most likely in the glazing or the matrix of the tile itself.

Exterior

- Door (smaller passageway) at garage

Sampling for this inspection was representative and any components that were not tested but similar to those components that tested positive for LBP should be considered and treated as lead laden.

The field data and results for paint sampling may be found in *Appendix A*.

8.0 RECOMMENDATIONS

The greatest potential for lead exposure from lead painted architectural components occurs when:

- the paint has become defective; or
- when the paint is applied to a friction / impact component where the paint is continually disturbed; or
- when the paint is disturbed through routine maintenance or renovation activities.

With this in mind, the following are our recommendations for this property:

- The results from this inspection should be provided to any individuals that may disturb the painted surfaces. It is encouraged to utilize professionals that have experience working with LBP.
- If renovation is scheduled in the near future (less than three months), all lead painted components that have been previously targeted for replacement should be replaced utilizing "lead safe" containment and work practices.
- ALL components that have been identified with defective lead paint should have the paint repaired as soon as possible. Any paint repair should be done utilizing "lead safe" containment, work practices, and clean-up techniques.

- All components with lead painted friction / impact surfaces should be treated to minimize the friction or impact as necessary.
- Lead painted components that **have not** been targeted for replacement should either be considered for abatement (replacement, enclosure, encapsulation, etc.) or included in an Operations & Management (O & M) Plan that will help to minimize exposures to lead hazards.
- All lead painted surfaces that are not expected to be impacted in the near future (less than three months) should also be included the O & M plan.
- In addition, the tenants or occupants of the dwelling should be notified of the test results and instructed in actions that they may perform to keep the living areas “lead safe.”
- The tile surfaces are not a likely source of lead dust contamination as long as they remain intact. If future renovation or repair activities require that the tile be removed, or the surfaces disturbed, it should be done in a manner that does not break the tiles. If this is not feasible, this task should be assigned to a lead certified contractor.

9.0 TITLE X REQUIREMENTS

A copy (or summary) of this report must be provided to new lessees (tenants) and purchasers of this property under Federal law (24 CFR part 35 and 40 CFR part 745) before they become obligated under a lease or sales contract. The complete report must also be provided to new purchasers and it must be made available to new tenants. Landlords (lessors) and sellers are also required to distribute an educational pamphlet approved by the U.S. Environmental Protection Agency and include standard warning language in their leases or sales contracts to ensure that parents have the information they need to protect their children from lead-based paint hazards. This report should be maintained and updated as a permanent maintenance record for this property.

10.0 INSPECTION LIMITATIONS

This inspection was planned, developed, and implemented based on Barr & Clark’s previous experience in performing lead-based paint inspections. This inspection was patterned after Chapter 7 of the *HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing (2012 Revision)*. Barr & Clark utilized state-of-the-art-practices and techniques in accordance with regulatory standards while performing this inspection. Barr & Clark’s evaluation of the relative risk of exposure to lead identified during this inspection is based on conditions observed at the time of the inspection. Barr & Clark cannot be responsible for changing conditions that may alter the relative exposure risk or for future changes in accepted methodology. Enclosed are the diagram(s), actual test results, and all relevant certifications and licenses.

CERTIFICATE OF INSURANCE

This certificate is issued for informational purposes only. It certifies that the policies listed in this document have been issued to the Named Insured. It does not grant any rights to any party nor can it be used, in any way, to modify coverage provided by such policies. Alteration of this certificate does not change the terms, exclusions or conditions of such policies. Coverage is subject to the provisions of the policies, including any exclusions or conditions, regardless of the provisions of any other contract, such as between the certificate holder and the Named Insured. The limits shown below are the limits provided at the policy inception. Subsequent paid claims may reduce these limits.

Certificate Holder: This is a copy of our general auto insurance. Your company or city's specific insurance is on file.	Named Insured: BARR & CLARK, INC. 16531 BOLSA CHICA ST STE 205 HUNTINGTON BEACH CA 92649-3595

CERTIFICATE OF WORKERS' COMPENSATION INSURANCE

GROUP:
POLICY NUMBER: 1917813
CERTIFICATE ID: 243

This is a copy of our general worker's compensation insurance. Your company or city's specific insurance is on file.

This is to certify that we have issued a valid Workers' Compensation insurance policy in a form approved by the California Insurance Commissioner to the employer named below for the policy period indicated.

This policy is not subject to cancellation by the Fund except upon 30 days advance written notice to the employer.

We will also give you 30 days advance notice should this policy be cancelled prior to its normal expiration.

This certificate of insurance is not an insurance policy and does not amend, extend or alter the coverage afforded by the policy listed herein. Notwithstanding any requirement, term or condition of any contract or other document with respect to which this certificate of insurance may be issued or to which it may pertain, the insurance afforded by the policy described herein is subject to all the terms, exclusions, and conditions, of such policy.

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

Orange County, California

Local office

Carlsbad Fish And Wildlife Office

☎ (760) 431-9440

📅 (760) 431-5901

2177 Salk Avenue - Suite 250
Carlsbad, CA 92008-7385

NOT FOR CONSULTATION

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

-
1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Birds

NAME	STATUS
Coastal California Gnatcatcher <i>Polioptila californica californica</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/8178	Threatened
Least Bell's Vireo <i>Vireo bellii pusillus</i> Wherever found There is final critical habitat for this species. Your location does not overlap the critical habitat. https://ecos.fws.gov/ecp/species/5945	Endangered

Reptiles

NAME	STATUS
Southwestern Pond Turtle <i>Actinemys pallida</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4768	Proposed Threatened

Amphibians

NAME	STATUS
Western Spadefoot <i>Spea hammondi</i> Wherever found No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/5425	Proposed Threatened

Insects

NAME	STATUS
------	--------

Monarch Butterfly *Danaus plexippus*

Candidate

Wherever found

No critical habitat has been designated for this species.

<https://ecos.fws.gov/ecp/species/9743>

Flowering Plants

NAME

STATUS

Nevin's Barberry *Berberis nevinii*

Endangered

Wherever found

There is **final** critical habitat for this species. Your location does not overlap the critical habitat.<https://ecos.fws.gov/ecp/species/8025>

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

You are still required to determine if your project(s) may have effects on all above listed species.

Bald & Golden Eagles

Bald and golden eagles are protected under the Bald and Golden Eagle Protection Act¹ and the Migratory Bird Treaty Act².

Any person or organization who plans or conducts activities that may result in impacts to bald or golden eagles, or their habitats³, should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the ["Supplemental Information on Migratory Birds and Eagles"](#).

Additional information can be found using the following links:

- Eagle Management <https://www.fws.gov/program/eagle-management>
- Measures for avoiding and minimizing impacts to birds
<https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take->

[migratory-birds](#)

- Nationwide conservation measures for birds
<https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>
- Supplemental Information for Migratory Birds and Eagles in IPaC
<https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action>

There are likely bald eagles present in your project area. For additional information on bald eagles, refer to [Bald Eagle Nesting and Sensitivity to Human Activity](#)

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
<p>Bald Eagle <i>Haliaeetus leucocephalus</i></p> <p>This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1626</p>	Breeds Jan 1 to Aug 31
<p>Golden Eagle <i>Aquila chrysaetos</i></p> <p>This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. https://ecos.fws.gov/ecp/species/1680</p>	Breeds Jan 1 to Aug 31

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read ["Supplemental Information on Migratory Birds and Eagles"](#), specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey

effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (-)

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

What does IPaC use to generate the potential presence of bald and golden eagles in my specified location?

The potential for eagle presence is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply). To see a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

What does IPaC use to generate the probability of presence graphs of bald and golden eagles in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the [Eagle Act](#) should such impacts occur. Please contact your local Fish and Wildlife Service Field Office if you have questions.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats³ should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the "[Supplemental Information on Migratory Birds and Eagles](#)".

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Eagle Management <https://www.fws.gov/program/eagle-management>
- Measures for avoiding and minimizing impacts to birds <https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take-migratory-birds>
- Nationwide conservation measures for birds <https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>
- Supplemental Information for Migratory Birds and Eagles in IPaC <https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
<p>Allen's Hummingbird <i>Selasphorus sasin</i></p> <p>This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p> <p>https://ecos.fws.gov/ecp/species/9637</p>	Breeds Feb 1 to Jul 15

<p>Northern Harrier <i>Circus hudsonius</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/8350</p>	Breeds Apr 1 to Sep 15
<p>Nuttall's Woodpecker <i>Dryobates nuttallii</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/9410</p>	Breeds Apr 1 to Jul 20
<p>Oak Titmouse <i>Baeolophus inornatus</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/9656</p>	Breeds Mar 15 to Jul 15
<p>Olive-sided Flycatcher <i>Contopus cooperi</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. https://ecos.fws.gov/ecp/species/3914</p>	Breeds May 20 to Aug 31
<p>Santa Barbara Song Sparrow <i>Melospiza melodia graminea</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA https://ecos.fws.gov/ecp/species/5513</p>	Breeds Mar 1 to Sep 5
<p>Western Gull <i>Larus occidentalis</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p>	Breeds Apr 21 to Aug 25
<p>Western Screech-owl <i>Megascops kennicottii cardonensis</i> This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA</p>	Breeds Mar 1 to Jun 30
<p>Wrentit <i>Chamaea fasciata</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p>	Breeds Mar 15 to Aug 10

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read

["Supplemental Information on Migratory Birds and Eagles"](#), specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

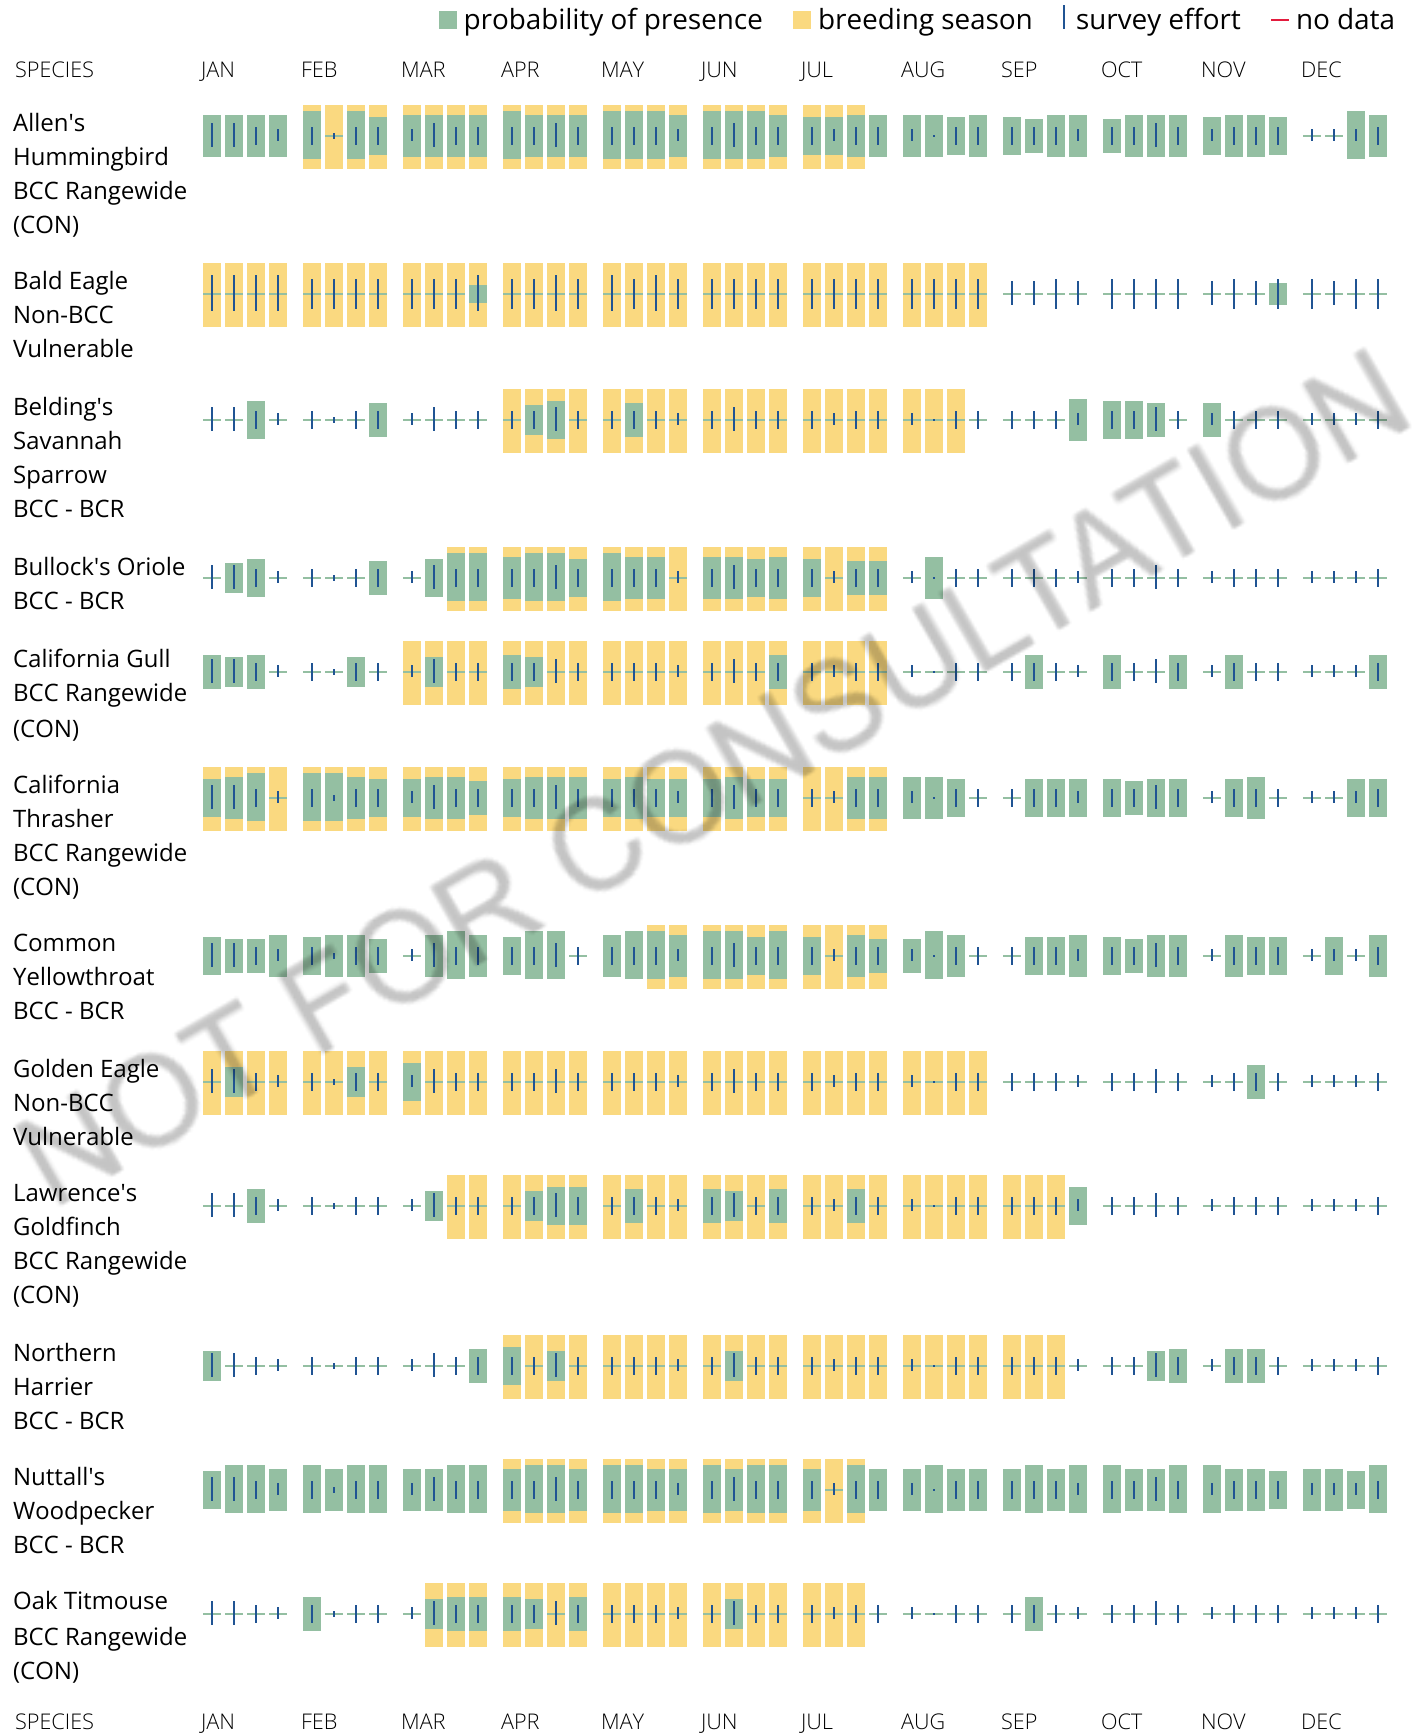

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

No Data (—)

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go to the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the [RAIL Tool](#) and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

Fish hatcheries

There are no fish hatcheries at this location.

Wetlands in the National Wetlands Inventory (NWI)

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

This location did not intersect any wetlands mapped by NWI.

NOTE: This initial screening does **not** replace an on-site delineation to determine whether wetlands occur. Additional information on the NWI data is provided below.

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

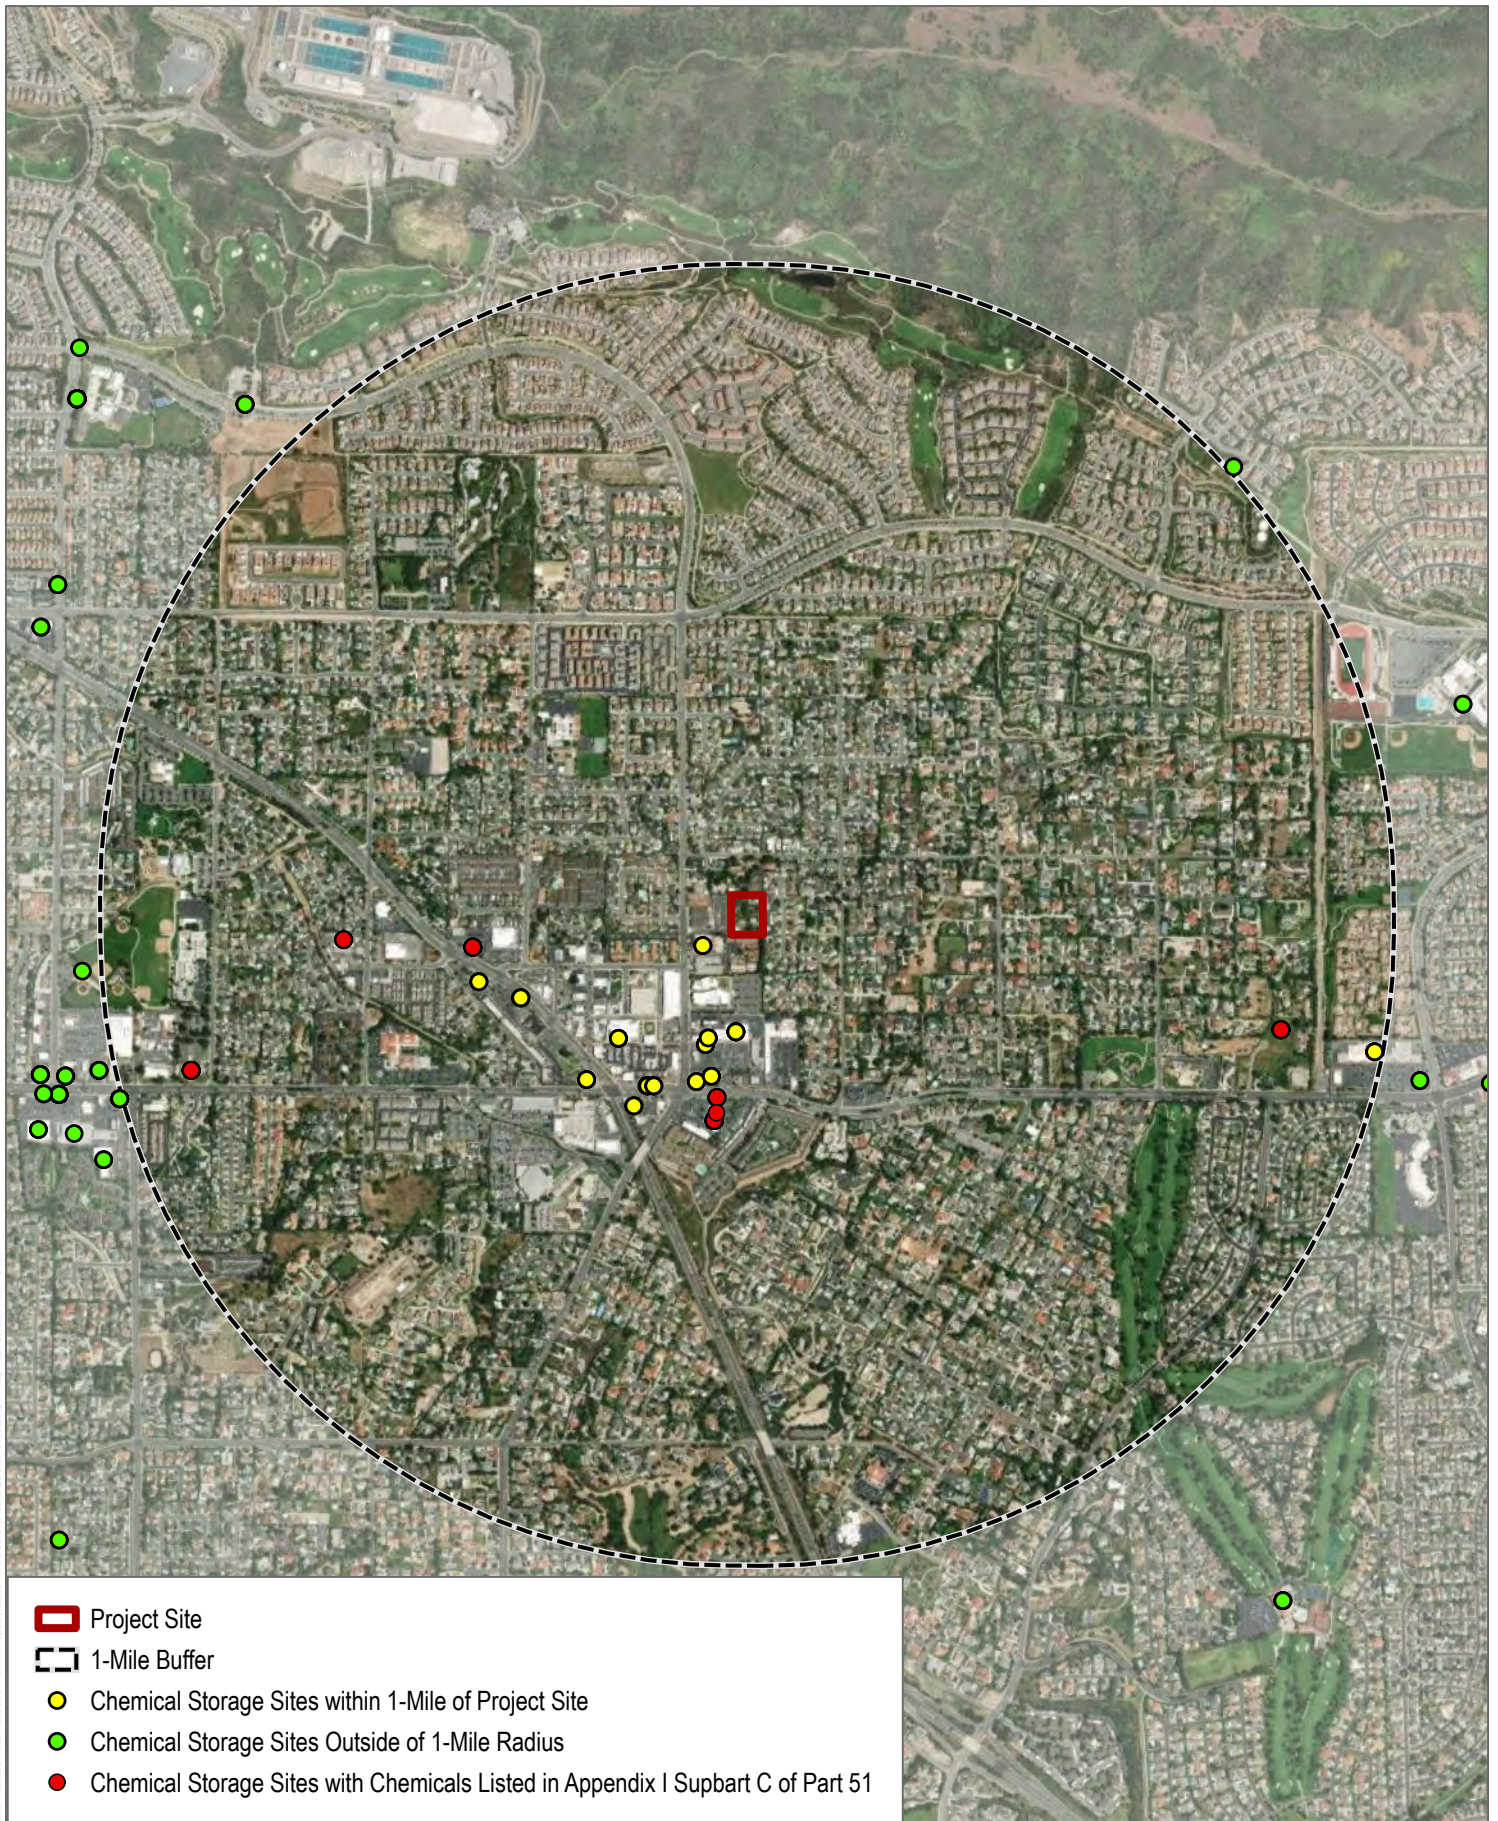

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies.

Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

Acknowledgments

Primary Report Authors: This report was primarily prepared by Secretary of the Interior-qualified Architectural Historians Katie Ahmanson, MHC and Nicole Frank, MSHP, and Secretary of the Interior-qualified archeologists Roshanne Bakhtiary, MA and Jennifer De Alba, BA.

Report Contributions: The report was prepared with contributions from Senior Architectural Historian Patricia Ambacher, MA, who also provided senior-level review of the report and meets Secretary of the Interior Professional Qualification Standards for architectural history and history.

Team Support: Kristin Arakawa and Nathan Reid, GIS analysts, managed the geographic information system data and created the figures in the report.

Intended Use: This report is intended for the client's and its representatives' exclusive use. Based on the results of Dudek's investigation, it contains professional conclusions and recommendations concerning the potential for project-related impacts to cultural resources. It should not be considered to constitute project clearance with regard to the treatment of cultural resources or permission to proceed with the project described in lieu of review by the appropriate reviewing or permitting agency. This report should be submitted to the appropriate federal, state, and local review agencies for their comments prior to the commencement of the project.

INTENTIONALLY LEFT BLANK

Executive Summary

Orange County Housing and Community Development retained Dudek to prepare a Cultural Resources Inventory and Evaluation Report for the proposed Altrudy II Senior Apartments Project (project). The project is in Yorba Linda, Orange County, California, on Assessor's Parcel Numbers 323-231-18 and 323-231-19 (project site) (Figure 1, Project Location). The project would involve demolition of the existing residences on the two parcels for the construction and operation of a 71-unit senior affordable housing community. The buildings on the development site are not currently listed under any national, state, or local landmark program.

The purpose of this report is to determine if the project would impact any historic properties pursuant to Section 106 of the National Historic Preservation Act (NHPA) of 1966 or historical resources pursuant to the California Environmental Quality Act (CEQA). The proposed project is being considered for federal funding through the U.S. Department of Housing and Urban Development. Federal agencies are required to comply with Section 106 of the NHPA of 1966 when their actions qualify as undertakings that would have the potential to affect historic properties, including funding of projects. In accordance with the NHPA's implementing regulations, 36 CFR 800.4, the U.S. Department of Housing and Urban Development requires an inventory of cultural resources within an undertaking's area of potential effects in order to determine the presence or absence of historic properties and potential effects the undertaking may have upon those properties.

The preparation of this report included a records search of the California Historical Resources Information System; the development of an area of potential effects (APE); outreach to local historical societies requesting information about historic properties or historical resources in the vicinity of the APE; an intensive-level survey of the APE for built resources of historic age (45 years of age or older); building development and archival research; the development of appropriate historic contexts; and recordation and evaluation of two historic-era properties located in the APE under National Register of Historic Places (NRHP) and California Register of Historical Resources (CRHR) listing criteria. Orange County does not have a historic preservation ordinance.

Dudek's archival research and field survey found two historic-era properties in the APE (Figure 2, Cultural Area of Potential Effects). Dudek concludes that neither of the subject properties is eligible for listing in the NRHP or CRHR due to a lack of significant associations and architectural merit. The recommended California Historical Resource Status Code for these properties is 6Z, meaning they were found ineligible for the NRHP and CRHR through survey evaluation. Dudek's archival research further indicates that the project has a moderate potential for encountering intact subsurface archaeological deposits within the APE during project implementation. In the event that archaeological resources are encountered during the exposure of subsurface soils within the APE, ground-disturbing work should be immediately halted in the area, and a qualified archaeologist should be retained to evaluate the resources. Management recommendations to reduce potential impacts to unanticipated archaeological resources and human remains during construction activities are provided in Chapter 5, Summary of Findings and Management Considerations, of this report.

The finding for the proposed project under Section 106 of the NHPA is No Historic Properties Affected. The finding under CEQA is No Impact.

1 Introduction

This Cultural Resources Inventory and Evaluation Report documents the identification and evaluation of cultural resources within the proposed Altrudy II Senior Apartments Project (project) area of potential effects (APE) for compliance under Section 106 of the National Historic Preservation Act (NHPA; Section 106) and the California Environmental Quality Act (CEQA). This report includes the following components: (1) an introductory section that discusses the project location and description, project personnel, regulatory setting, and the APE; (2) background research, which includes a records search review of previously recorded cultural resources within the APE that are included in the California Historical Resources Information System (CHRIS); archival research; and a review of historical maps and aerial photographs; (3) the development of appropriate historic contexts to evaluate the potential significance of the resources within the project APE; (4) field methodology for the intensive-level survey of the APE; and (5) subject property histories, descriptions, and evaluations under National Register of Historic Places (NRHP) and California Register of Historical Resources (CRHR) listing criteria; and (6) a summary of findings and conclusions.

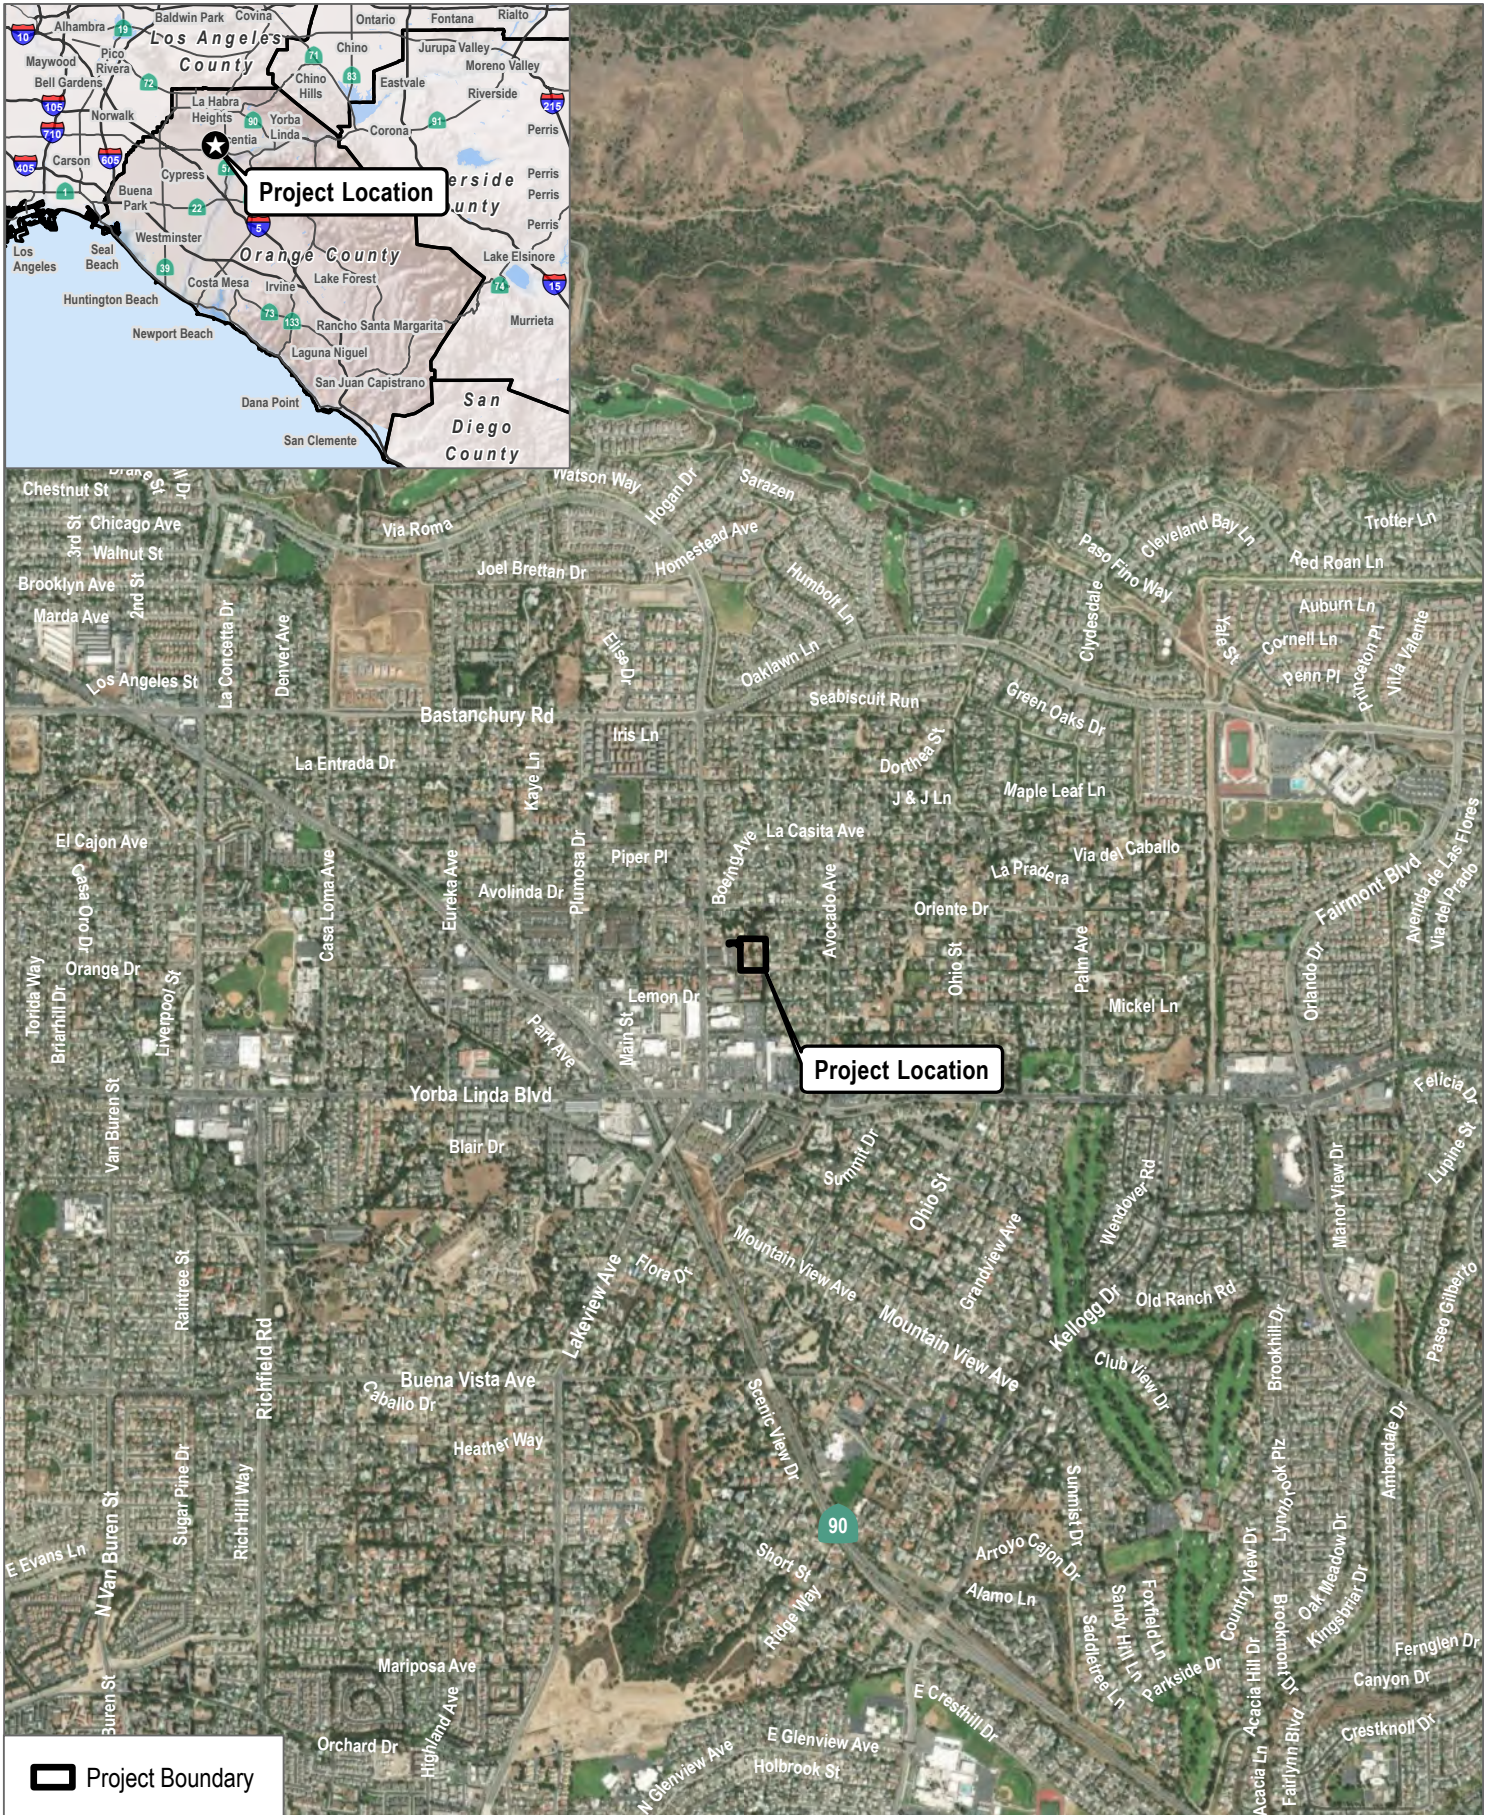

1.1 Project Location

The project site comprises approximately 2.0 acres and consists of two parcels located at 18597 Altrudy Lane and 18602 Altrudy Lane (Assessor's Parcel Numbers [APNs] 323-231-18 and 323-231-19) in Yorba Linda, Orange County, California (Figure 1, Project Location). The project site lies in a residential setting at the end of a short road, Altrudy Lane, off Lakeview Avenue between Oriente Drive to the north and Yorba Linda Boulevard to the south. The project site is developed with 2 one-story single-family residential buildings. The immediate area surrounding the project site is predominantly residential, with both single-family and multifamily properties and some commercial businesses.

1.2 Project Description

The project would involve demolition of the existing residences on the project site and construction and operation of a 71-unit senior affordable housing community. The Project is designed with 57 one-bedroom and 14 two-bedroom units within two buildings, which would be two and three stories high, with elevator access. On-site amenities would include an entry plaza, leasing office, community center, sitting areas, and barbecue pavilion for residents. The proposed project includes the planting of trees and the construction of a 25-foot-wide surface parking lot north and east of the multi-unit residential building. Active and passive green open space would also be provided. The project would include a total of 72 parking spaces. Access to the site would be from Altrudy Lane, with additional street improvements as part of the project.

INTENTIONALLY LEFT BLANK

1.3 Regulatory Setting

The project as currently planned is subject to federal regulatory conditions. The following sections provide a brief overview of the federal and state regulatory framework that historic properties and historical resources are identified and evaluated.

1.3.1 Federal

National Historic Preservation Act (54 USC 300101 et seq., including Section 106 of the NHPA, 54 USC 306108)

The NHPA established the NRHP and the Advisory Council on Historic Preservation. Under the NHPA, significant cultural resources are referred to as historic properties, which include any prehistoric or historic district, site, building, structure, or object included in, or determined eligible for inclusion in, the NRHP. Historic properties that are designated by the Secretary of the Interior to be National Historic Landmarks are nationally significant historic places that possess exceptional value or quality in illustrating or interpreting the heritage of the United States. A property is considered historically significant if it meets one of the NRHP criteria and retains sufficient integrity to convey its significance.

Implementing Regulations for Section 106 of the NHPA (36 CFR Part 800)

Section 106 requires federal agencies to take into account the effects of their undertakings on historic properties. The Section 106 process consists of four principal steps: (1) initiation of the Section 106 process, which includes identifying and initiating consultation with Native American tribes, local governments, and other interested parties; (2) identification of historic properties; (3) assessment of adverse effects; and (4) delineation of stipulations to resolve adverse effects in an agreement document.

Section 106 affords the Advisory Council on Historic Preservation, the State Historic Preservation Officers, and other consulting parties a reasonable opportunity to comment on any project that would adversely affect historic properties. The Advisory Council on Historic Preservation is an independent administering agency that develops procedures at the federal level to protect cultural resources included in, or eligible for inclusion in, the NRHP. The State Historic Preservation Officers administer the national historic preservation program at the state level, in addition to reviewing NRHP nominations, maintaining data on historic properties, and consulting with federal agencies during the Section 106 review.

The NRHP criteria for evaluation (36 CFR Section 60.4) considers the quality of significance in American history, architecture, archaeology, engineering, and culture to be present in districts, sites, buildings, structures, and objects that meet one of the following criteria:

- A. are associated with events that have made a significant contribution to the broad patterns of our history; or
- B. are associated with the lives of persons significant in our past; or
- C. embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. have yielded or may be likely to yield, information important in prehistory or history.

To be listed in the NRHP, a property must not only be shown to be significant under the NRHP criteria, but it also must have integrity. Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. In addition to meeting at least one of the significance criteria discussed above, the assessment of integrity requires consideration under the following seven aspects or qualities: location, design, materials, workmanship, setting, feeling, and association. To retain integrity, a property will always possess several, and generally most, of these aspects (NPS 1997 44).

Certain properties are not typically considered for listing in the NRHP: religious properties, moved properties, birthplaces and graves, cemeteries, reconstructed properties, commemorative properties, and properties achieving significance within the past 50 years. These properties may be eligible for listing in the NRHP if the property meets one of the four criteria listed above and if the property also meets the appropriate Criteria Consideration for the property.

National Environmental Policy Act (42 USC 4331 et seq.) and CEQ NEPA Regulations (40 CFR 1500 et seq.)

The National Environmental Policy Act (NEPA), as amended, establishes the federal government's policy for protecting important historic, cultural, and natural aspects of our national heritage during the planning for federal projects. All federal or federally assisted projects requiring action pursuant to Section 102 of NEPA must take into account the effects of those projects on cultural resources. In considering whether an action may "significantly affect the quality of the human environment," NEPA regulations require that an agency must consider, among other things, unique characteristics of the geographic area, such as proximity to historic or cultural resources (40 CFR 1508.27[b][3]) and the degree to which the action may affect districts, sites, highways, structures, or objects listed in or eligible for listing in the NRHP. NEPA regulations also require that, to the fullest extent possible, agencies prepare environmental impact statements concurrently and integrated with impact analyses and related surveys and studies required by the NHPA. When Section 106 and NEPA are integrated, project impacts that cause adverse effects under Section 106 are described in the environmental impact statement.

Native American Graves Protection and Repatriation Act of 1990

The Native American Graves Protection and Repatriation Act of 1990 sets provisions for the intentional removal and inadvertent discovery of human remains and other cultural items from federal and tribal lands. The act clarifies the ownership of human remains and sets forth a process for repatriation of human remains and associated funerary objects and sacred religious objects to the Native American groups claiming to be lineal descendants or culturally affiliated with the remains or objects. It requires any federally funded institution housing Native American remains or artifacts to compile an inventory of all cultural items within the institution or agency and to provide a summary to any Native American tribe claiming affiliation.

1.3.2 State

California Environmental Quality Act (PRC Section 21083.2) and CEQA Guidelines (14 CCR 15064.5)

The following CEQA statutes (PRC Section 21000 et seq.) and CEQA Guidelines (14 CCR 15000 et seq.) are of relevance to the analysis of archaeological, historic, and tribal cultural resources:

- PRC Section 21083.2(g) defines “unique archaeological resource.”
- PRC Section 21084.1 and CEQA Guidelines Section 15064.5(a) defines “historical resources.” In addition, CEQA Guidelines Section 15064.5(b) defines the phrase “substantial adverse change in the significance of an historical resource”; it also defines the circumstances when a project would materially impair the significance of a historical resource.
- PRC Section 21074(a) defines “tribal cultural resources.”
- PRC Section 5097.98 and CEQA Guidelines Section 15064.5(e) set forth standards and steps to be employed following the accidental discovery of human remains in any location other than a dedicated cemetery.
- PRC Sections 21083.2(b) and 21083.2(c) and CEQA Guidelines Section 15126.4 provide information regarding the mitigation framework for archaeological and historic resources, including examples of preservation-in-place mitigation measures. Preservation in place is the preferred manner of mitigating impacts to significant archaeological sites because it maintains the relationship between artifacts and the archaeological context and may help avoid conflict with religious or cultural values of groups associated with the archaeological site(s).

More specifically, under CEQA, a project may have a significant effect on the environment if it may cause “a substantial adverse change in the significance of an historical resource” (PRC Section 21084.1; 14 CCR 15064.5[b]).

A “substantial adverse change in the significance of an historical resource,” reflecting a significant effect under CEQA, means “physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired” (14 CCR 15064.5[b][1]; PRC Section 5020.1[q]). In turn, the significance of a historical resource is materially impaired when a project does any of the following (14 CCR 15064.5[b][2]):

1. Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register [CRHR]; or
2. Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to Section 5020.1(k) of the PRC or its identification in an historical resources survey meeting the requirements of Section 5024.1(g) of the PRC, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
3. Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a lead agency for purposes of CEQA.

Pursuant to these sections, the CEQA inquiry begins with evaluating whether a project site contains any historical resources, then evaluates whether that project will cause a substantial adverse change in the significance of a historical resource such that the resource's historical significance would be materially impaired.

If it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. To the extent that unique archaeological resources cannot be left undisturbed, mitigation measures are required (PRC Sections 21083.2[a]-[c]).

PRC Section 21083.2(g) defines a unique archaeological resource as an archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria (PRC Section 21083.2[g]):

1. Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.
2. Has a special and particular quality such as being the oldest of its type or the best available example of its type.
3. Is directly associated with a scientifically recognized important prehistoric or historic event or person.

Impacts on non-unique archaeological resources are generally not considered a significant environmental impact (PRC Section 21083.2[a]; 14 CCR 15064.5[c][4]). However, if a non-unique archaeological resource qualifies as a tribal cultural resource (PRC Sections 21074[c] and 21083.2[h]), further consideration of significant impacts is required.

CEQA Guidelines Section 15064.5 assigns special importance to human remains and specifies procedures to be used when Native American remains are discovered. These procedures are detailed in PRC Section 5097.98.

California Register of Historical Resources (PRC Section 5024.1 and 14 CCR 4850)

California PRC Section 5024.1 establishes the CRHR, which lists all significant resources in California that are considered to be historical resources. In California, the term "historical resource" includes, but is not limited to, "any object, building, structure, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California" (California PRC Section 5020.1[j]). In 1992, the California Legislature established the CRHR "to be used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse change" (California PRC Section 5024.1[a]). The criteria for listing resources in the CRHR were expressly developed to be in accordance with previously established criteria developed for listing in the NRHP. As such, a resource is considered historically significant if it meets at least one of the following criteria outlined under California PRC Section 5024.1(c):

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
2. Is associated with the lives of persons important in our past.
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.
4. Has yielded, or may be likely to yield, information important in prehistory or history.

In addition to meeting one of the significance criteria described in California PRC Section 5024.1(c), a resource must also possess sufficient integrity to qualify for listing in the CRHR. Integrity is defined in 14 California Code of Regulations Section 4852(c) as “the authenticity of an historical resource’s physical identity evidenced by the survival of characteristics that existed during the resource’s period of significance” as evaluated with regard to the resource’s retention of location, design, setting, materials, workmanship, feeling, and association. Historical resources that lack sufficient integrity to meet the criteria for listing in the NRHP may still be eligible for listing in the CRHR if they have the potential to yield significant scientific or historical information, or specific data. The CRHR has three special considerations for resources described under 14 CCR Section 4852(d). These special considerations include moved buildings, structures, or objects; historical resources achieving significance within the past 50 years; and reconstructed buildings.

California Health and Safety Code Section 7050.5 and Public Resources Code Section 5097.98

CEQA Guidelines Section 15064.5 assigns special importance to human remains and specifies procedures to be used when Native American remains are discovered. As described below, the procedures are detailed in California Health and Safety Code Section 7050.5 and Public Resources Code Section 5097.98.

California law protects Native American burials, skeletal remains, and associated grave goods, regardless of their antiquity, and provides for the sensitive treatment and disposition of those remains. Health and Safety Code Section 7050.5 requires that if human remains are discovered in any place other than a dedicated cemetery, no further disturbance or excavation of the site or nearby area reasonably suspected to contain human remains shall occur until the county coroner has examined the remains (California Health and Safety Code Section 7050.5[b]). PRC Section 5097.98 also outlines the process to be followed in the event that remains are discovered. If the coroner determines or has reason to believe the remains are those of a Native American, the coroner must contact the California Native American Heritage Commission (NAHC) within 24 hours (California Health and Safety Code Section 7050.5[c]). In accordance with California Public Resources Code Section 5097.98(a), the NAHC will notify the Most Likely Descendant (MLD). With the permission of the landowner, the MLD may inspect the site of discovery. Within 48 hours of being granted access to the site, the MLD may recommend means of treatment or disposition, with appropriate dignity, of the human remains and associated grave goods.

Native American Historical Cultural Sites (California Public Resources Code Section 5097 et. Seq.)

State law addresses the disposition of Native American burials in archaeological sites and protects such remains from disturbance, vandalism, or inadvertent destruction; establishes procedures to be implemented if Native American skeletal remains are discovered during construction of a project; and establishes the NAHC to resolve disputes regarding the disposition of such remains. In addition, the Native American Historic Resource Protection Act makes it a misdemeanor punishable by up to 1 year in jail to deface or destroy an Indian historic or cultural site that is listed or may be eligible for listing in the CRHR.

California Native American Graves Protection and Repatriation Act

The California Native American Graves Protection and Repatriation Act (California Repatriation Act), enacted in 2001, required all state agencies and museums that receive state funding and that have possession or control over collections of human remains or cultural items, as defined, to complete an inventory and summary of these remains

and items on or before January 1, 2003, with certain exceptions. The California Repatriation Act also provides a process for the identification and repatriation of these items to the appropriate tribes.

California State Assembly Bill 52

Assembly Bill 52 of 2014 amended PRC Section 5097.94 and added PRC Sections 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2, and 21084.3. Assembly Bill 52 established that tribal cultural resources must be considered under CEQA and also provided for additional Native American consultation requirements for the lead agency. Section 21074 describes a tribal cultural resource as a site, feature, place, cultural landscape, sacred place, or object that is considered of cultural value to a California Native American tribe and that is either:

- On or determined to be eligible for the California Register of Historical Resources or a local historic register; or
- A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1.

AB 52 formalizes the lead agency–tribal consultation process, requiring the lead agency to initiate consultation with California Native American groups that are traditionally and culturally affiliated with the project site, including tribes that may not be federally recognized. Lead agencies are required to begin consultation prior to the release of a negative declaration, mitigated negative declaration, or environmental impact report.

Section 1(a)(9) of Assembly Bill 52 establishes that “a substantial adverse change to a tribal cultural resource has a significant effect on the environment.” Effects on tribal cultural resources should be considered under CEQA. Section 6 of Assembly Bill 52 adds Section 21080.3.2 to the PRC, which states that parties may propose mitigation measures “capable of avoiding or substantially lessening potential significant impacts to a tribal cultural resource or alternatives that would avoid significant impacts to a tribal cultural resource.” Further, if a California Native American tribe requests consultation regarding project alternatives, mitigation measures, or significant effects to tribal cultural resources, the consultation shall include those topics (PRC Section 21080.3.2[a]). The environmental document and the mitigation monitoring and reporting program (where applicable) shall include any mitigation measures that are adopted (PRC Section 21082.3[a]).

1.3.3 Area of Potential Effects for Cultural Resources

The APE is the study area delineated to assess the potential impacts from the construction and operation of the project on both archaeological and historic built environment resources (45 years of age or older). Additional considerations used to justify the delineation of the APE include the following:

The vertical aboveground extent of the APE is anticipated to be two and three stories, which is the height of the multi-unit affordable senior community residential building proposed for construction on the project site. The vertical underground extent of the APE is currently unknown, but it is anticipated that ground disturbance would involve tree removals, trenching for utilities, foundation work, and grading. The horizontal limits of the APE considered the proposed project components, which include the footprint of the project site comprising 18597 Altrudy Lane (APN 323-231-18) and 18602 Altrudy Lane (APN 323-231-19), as well as the property to the direct west of the project site, 18551 Altrudy Lane (APN 323-231-26), which will be used for entrance/exit during the project’s construction. The property at 18551 Altrudy Lane (APN 323-231-26) will be temporarily used during the

construction of the proposed project and therefore is included in the APE. This property was not inventoried and evaluated as part of this report because it is less than 45 years old, being constructed in 2021. There is no indication that the property has achieved significance within the last 50 years and is of exceptional importance, and it was therefore not evaluated under NRHP Criterion G. As such, the APE includes three total parcels, as shown in Figure 2, Cultural Area of Potential Effects.

Additional considerations used to justify the delineation of the APE include the following:

- The area of direct physical effect is primarily confined to the rectangular geographic area surrounding the project site wherein all ground disturbance associated with the project will occur. Other construction activities that would occur within the boundary of the project site include the demolition of two existing buildings for the construction of senior community residential buildings. Staging will occur along the southern boundary of the two historic-age subject properties. Because of the geographically constrained nature of these activities, the area of direct physical impact is confined to the project site as presented in Figure 2.
- There are no anticipated indirect physical effects to the surrounding historic-age properties directly adjacent to the project site (defined as parcels adjoining the project site boundaries). These properties include:
 - 18562 Oriente Drive (APN 323-231-02), constructed 1976
 - 18582 Oriente Drive (APN 323-231-01), constructed between 1946 and 1952
 - 4721 Cedar Avenue (APN 323-221-53), constructed 1976
 - 4731 Cedar Avenue (APN 323-221-54), constructed 1976
 - 4741 Cedar Avenue (APN 323-221-55), constructed 1976
 - 4751 Cedar Avenue (APN 323-221-56), constructed 1976

These properties have not been previously evaluated, based on a review of the Governor's Office of Land Use and Climate Innovation (LCI; formerly the Governor's Office of Historic Preservation) Built Environment Resources Directory (BERD) and Dudek's records search at the South Central Coastal Information Center (SCCIC) for historic resources surrounding a 1-mile radius of the APE. The proposed project includes the planting of trees and the construction of a 25-foot-wide surface parking lot north and east of the multi-unit residential building, which will act as a visual buffer. Because of this visual buffer, there are no anticipated indirect physical effects to the surrounding historic-age subject properties.

- Because no historical resources were identified within or adjacent to the delineated APE, and because there are no reasonably foreseeable project activities that would occur later in time or that would be farther removed in distance that could indirectly affect historical resources, the APE is limited to the project site and the property to the direct west, 18551 Altrudy Lane (APN 323-231-26).

Table 1 below provides a list of the resources within the APE for built environment resources.

Table 1. Built Environment Resources Located Within the Area of Potential Effects

Map ID	Property Type	Address and APN	Year Built	Location	Prior Evaluation Status
1	Residential	18597 Altrudy Lane (APN 323-231-18)	1965	Project site	Not Evaluated
2	Residential	18602 Altrudy Lane (APN 323-231-19)	1959	Project site	Not Evaluated

Note: APN = Assessor's Parcel Number.

2 Literature Review, Background Research, and Methods

This section provides the results of the CHRIS records search at the SCCIC, a summary of archival research methods and additional records reviews, and a summary of interested party outreach efforts.

2.1 California Historical Resources Information System

A records search of the CHRIS was completed for the proposed project site and a 1-mile radius by Dudek at SCCIC on October 14, 2024 (Confidential Appendix A, Records Search Map). This search included a review of their collection of mapped prehistoric, historical, and built environment resources; California Department of Parks and Recreation (DPR) site records; technical reports; historical maps; and local inventories. Additional consulted sources included the NRHP, California Inventory of Historical Resources/CRHR and listed Office of Historic Preservation Archaeological Determinations of Eligibility, California Points of Historical Interest, and California Historical Landmarks. The results of the records search are presented in Chapter 4, Results of Identification and Evaluation Efforts.

2.2 Interested Party Correspondence

On October 8, 2024, Dudek Architectural Historian Katie Ahmanson, MHC, sent electronic contact letters to the Orange County Historical Society, Preserve Orange County, and the Yorba Linda Historical Society. The letters briefly described the proposed project and requested information about cultural resources in or near the APE. No responses have been received as of the time of this report's completion. Copies of the historic advocacy outreach submitted in conjunction with this project are found in Appendix B, Interested Party Outreach.

2.3 Background Research

This information was used to understand the history of the APE, its environs, and how the surrounding landscape has changed and developed over time.

Built Environment Resource Directory

LCI maintains the BERD, an inventory of built environment cultural resources that are processed through LCI's office. On September 27, 2024, Dudek searched the BERD for properties within the APE. No properties were identified.

Calisphere

Calisphere provides access to 2,000 collections contributed by more than 300 cultural heritage organizations in California, including universities, libraries, archives, museums, and historical societies. Dudek searched Calisphere for addresses and other keywords pertaining to properties within the APE on September 27, 2024. This search did not identify any materials.

Online Archive of California

The Online Archive of California provides free public access to detailed descriptions of primary resource collections maintained by more than 300 contributing institutions, including libraries, special collections, archives, historical societies, and museums throughout California, as well as collections maintained by the 10 University of California campuses. Dudek searched for historical tenants and addresses associated with the APE on the Online Archive of California on September 27, 2024, and did not identify any relevant materials.

Sanborn Fire Insurance Maps

Dudek reviewed Sanborn Fire Insurance Maps of Yorba Linda from the years 1920 and 1929, and maps of Orange County from the years 1887, 1888, 1891, 1894, 1905, and 1909. However, these maps did not include the subject properties within the APE.

Orange County Historical Sites

None of the properties in the APE are listed on the list of historical sites for Orange County, which includes designated landmarks in Orange County. The subject properties are also not located in an existing or identified as potentially eligible historic district (OHP 2024).

City of Yorba Linda Building Permits

Dudek sent a public records request regarding permits for properties within the APE to the City of Yorba Linda on September 27, 2024. Building permits associated with two of the properties in the APE were returned on September 30, 2024, and included building, electrical, and plumbing permits for the two properties (City of Yorba Linda 2024). Dudek reviewed all available permits for property alterations and ownership information. These permits are summarized in Chapter 4.

Yorba Linda Public Library

Dudek Architectural Historian, Katie Ahmanson, MHC, visited the Yorba Linda Public Library on October 22, 2024, and reviewed source material related to the development of Yorba Linda. The materials reviewed during this visit were used in the preparation of Chapter 3, Historic Context, of this report.

Historical Newspapers

Dudek reviewed historical newspapers from the California Digital Newspaper Collection and Newspapers.com covering Yorba Linda and the surrounding area to understand the development of the area and the properties in the in APE. These documents were used in the preparation of Chapter 3 and Chapter 4.

ParcelQuest

Dudek obtained assessor data for the subject properties from ParcelQuest on September 27, 2024. This data provided information about the subject properties' construction dates, square footage, tract number, and current owners.

U.S. Department of Agriculture Web Soil Survey

Online records of the U.S. Department of Agriculture Web Soil Survey were consulted to better understand the belowground soil composition of the APE and the project site's potential to contain subsurface archaeological resources. The results of this review are summarized in Chapter 4.

U.S. Geological Survey Mineral Resources Online Spatial Data

The U.S. Geological Survey Mineral Resources Online Spatial Dataset was reviewed to understand the geological formations that underly the APE. The results of this review are summarized in Chapter 4.

2.4 Field Survey

Dudek Architectural Historian Katie Ahmanson, MHC, conducted an intensive-level survey of the APE for built resources on October 22, 2024. The survey entailed documenting the exteriors of each property within the APE that were 45 years of age or older with notes and photographs, specifically noting character-defining features, spatial relationships, and observed alterations, and examining any historic landscape features on the properties. Due to the developed nature of the project site, Dudek did not conduct an intensive-level archaeological resources pedestrian survey of the APE.

INTENTIONALLY LEFT BLANK

3 Historic Context

This context is provided to ascertain what significant themes and building types are present in the APE. Dudek provides this context to better understand the context of any of the identified previously recorded or newly documented resources in the APE.

3.1 Historical Overview of Yorba Linda

Yorba Linda is located in Orange County and is named after the original owner of the 1834 land grant containing the area, Bernardo Yorba, combined with Linda, meaning “beautiful” in Spanish. In 1822, Mexico won its independence from Spain; Alta California became part of the Mexican Republic, and the Mexican government opened the area to foreign trade. Private land grants were issued in the early 1820s, creating the rancho system of large agricultural estates. Bernardo Yorba received a land grant from the Mexican government for 13,328 acres, called Rancho Cañon de Santa Ana, along the Santa Ana River in present-day Yorba Linda. By 1848, America had assumed formal control of California through the Treaty of Guadalupe-Hidalgo and introduced Anglo culture and society to the area. After Yorba died in 1858, the ranch was divided between his wife and children, who continued to use the land for ranching until Jacob Stern purchased a portion of the land in 1907. In 1908, the Janns Investment Company bought Stern’s land and named the area Yorba Linda. The company sold agricultural plots in the area for the development of ranches. By 1911, the area had a population of about 35 residents, most of whom were citrus grove farmers (City of Yorba Linda 2021).

Development of Yorba Linda continued during the next three decades with the construction of civic buildings and infrastructure such as the first post office and schoolhouse, the Yorba Linda Friends Church, and Yorba Linda Boulevard. In 1913, the Yorba Linda Library opened, and the Yorba Linda Chamber of Commerce was organized (Yorba Linda History 2024). By 1920, the population had reached 350 residents (City of Yorba Linda 2021). Historical aerial photographs of the area indicate that the land remained primarily agricultural with scattered single-family residences until the 1940s (UCSB 2024). During World War II, manufacturing jobs were abundant in California but housing was lacking, resulting in many workers living in vehicles, tents, and other temporary shelters. Despite the passing of the Lanham Act in 1940, which appropriated \$1.3 billion for the construction of 700,000 homes, in 1942 the War Production Board prohibited non-essential construction during wartime, including market-driven housing. This resulted in a significant lack of housing, with construction being limited to single-family tracts for industry workers and inexpensive and quickly built multifamily housing intended to be temporary. After the end of World War II in 1945, a massive wave of migration and a building boom occurred throughout Southern California, including in Yorba Linda (Caltrans 2011: 5, 12; NETR 2024).

During the post-World War II period, residences reflected a range of regional styles that combined Regional Modernism with elements of the International style and natural materials (Nicholds 2020). Inspired by new construction materials and techniques refined during the war, many architects focused on producing low-cost mass-produced designs. Prefabricated housing systems, also known as manufactured homes or modular homes, were introduced to the market during this period. Additionally, tract home communities were built on tracts of land that were subdivided into smaller lots and had multiple similar houses, typically built by the same developer and at the same time. Yorba Linda’s residential development history reflects a combination of the tract housing development type and the cluster planning development type, which were both common in Orange County and Southern California in the postwar era. Cluster housing referred to a type of planning that involved setting aside a portion of

green space, with the surrounding housing being more densely grouped on the remaining land. The dominant architectural styles during this era for both tract and cluster housing included Ranch, Minimal Traditional, and Contemporary (Nicholds 2020; Survey LA 2021: 91–92; NETR 2024).

Efforts to incorporate the community of Yorba Linda began in the 1950s, as the area experienced a significant population increase from 350 residents in 1920 to 1,198 residents in 1960. Residents felt that there was a need for more orderly planning and development of the land. The first zoning plan was established in 1955 by a nine-person committee comprising three organizations: the Business Association, the Chamber of Commerce, and the Farm Center (Bulz 1970: 139). In 1967, Yorba Linda was incorporated, with a population of 11,433 residents (Yorba Linda History 2024). As a result of the population growth, residential and commercial development in the area continued into the 1970s and 1980s. In 1990, the Richard M. Nixon Library and Birthplace was constructed on 9 acres in the western portion of Yorba Linda, along Yorba Linda Boulevard and Eureka Avenue. President Nixon was buried at the property in 1994 (City of Yorba Linda 2021).

Agriculture in the region declined throughout the second half of the twentieth century, with neighborhoods replacing sprawling ranches and orchards. Higher density introduced new types of residential properties, such as multifamily residences, townhomes, apartment buildings, condominium complexes, and duplexes. Multiple shopping centers were constructed during this period, such the 175-acre multi-use Savi Ranch Center, which included commercial, industrial, and office space (Yorba Linda History 2024). Yorba Linda appears to have been fully developed by the 1990s (City of Yorba Linda 2021; NETR 2024). Presently, Yorba Linda has a population of about 68,000 residents. The economy is primarily composed of the health care and social assistance professions, scientific and technical service industries, and manufacturing (Data USA 2024).

3.2 Present Architectural Styles

Ranch Style (1930–1975)

Ranch-style houses (or ranch houses) in California reflect a national trend of fascination with the “Old West” and were the primary building style for tract housing. Ranch houses were originally developed in the western and southwestern United States, but quickly gained national popularity through the dissemination of building plans and do-it-yourself manuals in national magazines such as *Sunset*, *Better Homes And Gardens*, and *House Beautiful*. Later, ranch houses were popular as a custom-built type of housing, which was especially popular in the later 1940s and 1950s. Ranch houses were typically built between 1930 and 1975 but peaked in the 1950s as the most prevalent type of post-World War II suburban tract-style housing, often housing veterans who secured housing with Federal Housing Administration loans (Grimes and Chiang 2009: 43–46; Horak et.al. 2015: 23–25; McAlester 2019: 597–603).

Ranch-style houses are usually one-story, single-family residences. Houses designed in this architectural style include several identifying characteristics, such as rambling, elongated plans; a horizontal emphasis; general asymmetry; free-flowing interior spaces; and a designed connection to the outdoors. Features such as low-pitched roofs with wide eaves and a combination of cladding materials, including board-and-batten siding, brick and stone chimneys, and large picture windows, were commonly applied; these features evoked an aesthetic that was reminiscent of past architectural traditions. Decorative features such as wood shutters and dovescotes were often added to enhance the rusticated appearance of ranch houses (Grimes and Chiang 2009: 43–46; Horak et.al. 2015: 23–25; McAlester 2019: 597–603).

Character-defining features include:

- Rambling, elongated plans with a horizontal emphasis
- One to two stories in height
- Low-pitched gabled or hipped roofs with overhanging, open eaves
- General asymmetry
- Free-flowing interior spaces
- Designed connection to the outdoors
- Cladding featuring stucco, board-and-batten, shingles, clapboard, or a combination of materials
- Brick or stone chimney details
- Attached garage often linked to residence by breezeways
- Stone, brick, board-and-batten, clapboard, or horizontal wood siding used for accents on walls, secondary cladding types, and planters
- Functional and nonfunctional shutters details used as trim around windows
- Fenestration that may include a picture window

3.3 Development of the Area of Potential Effects

The APE includes two residential properties, Map ID 1: 18597 Altrudy Lane (APN 323-231-18), constructed in 1965; and Map ID 2: 18602 Altrudy Lane (APN 323-231-19), constructed in 1959 (ParcelQuest 2024). The earliest historical aerial photograph of Map IDs 1 and 2 within the APE dates from 1927 and reveals that the land was primarily agricultural and planted with orchards (Exhibit 1). The surrounding area contained scattered residences on agricultural properties. Commercial and single-family residences were primarily located along the intersection of Yorba Linda Boulevard and Imperial Highway (UCSB 2024). The area remained primarily agricultural until the early 1960s. Historic aerials indicate that residential neighborhoods with gridded streets replaced most of the agricultural properties in the surrounding area by 1963. The APE and surrounding area were almost completely built out with housing and commercial properties by 1985 (NETR 2024).

Exhibit 1. 1946 aerial photograph (left) showing Map IDs 1 and 2 developed with orchards; 1966 aerial photograph (right) showing Map IDs 1 and 2 (outlined in red).

Source: NETR 2024.

3.3.1 Map ID 1: 18597 Altrudy Lane

Map ID 1: 18597 Altrudy Lane (APN 323-231-18) remained agricultural (planted with orchards) until a single-family residence was constructed on the subject property in 1965 (ParcelQuest 2024). The first known occupants of the residence were Deanna L. and Ronald J. Rauch, who were listed at the address in the Anaheim Bulletin in 1976 after the birth of their son (AB 1976: 21). However, archival research was unable to yield further information about Mr. and Mrs. Rauch. That same year, the U.S. Public Records Index lists Alan and Sara Ries as occupants of the subject property with their son, Kenley (Ken) Ries (U.S. Index to Public Records 2024). Ken married Antoinette (Toni) Slaton in 1987. At the time, he was a graduate of Troy High School and self-employed, and Toni was a graduate of Cajon High School and California State University, San Bernardino, and employed as a senior counselor by California Registry in San Juan Capistrano (SBCS 1986: 75). Building permits indicate that Alan and Sara Ries remained at the subject property until at least 1988; Ken and Toni had moved to the subject property by 1998 with their son, Bradley C. Ries, born in 1994 (City of Yorba Linda 2024: Permit No. 8099; U.S. Phone and Address Directories 2024; U.S. Index to Public Records 2024). The Ries family remained at the subject property until it was sold to the City by 2019 (City of Yorba Linda 2024: Permit No. YL-006205). The City of Yorba Linda has continued to own the subject property into the present (ParcelQuest 2024), and according to the City, the subject property has remained abandoned and unoccupied during their ownership. Archival research was unable to reveal further information about the lives and occupations of Alan, Sara, Ken, Toni, or Bradley Ries.

3.3.2 Map ID 2: 18602 Altrudy Lane

The single-family residence at Map ID 2: 18602 Altrudy Lane (APN 323-231-19) was constructed in 1959 (ParcelQuest 2024). Between 1927 and the development of the subject property, the property was used as an orchard (UCSB 2024). Although the original owners/occupants of the subject property are unknown, historic newspaper research indicates that Victor and Ruth Abbott occupied the property in 1965 with their 11 children (AB 1965: 25; DCH 1965: 12). However, it is unknown how long the family remained at the residence. Building permits for the subject property indicate that Richard Ritter owned the property from 1972 to 1973, before it was next owned by Leata Ritter from 1975 to 1978 (City of Yorba Linda 2024: Permit No. 11972, No. 13422, and No. 38329; U.S. Index to Public Records 2024). Cornelia Meyer owned the subject property in 1990, before building permits began listing “Meyer-Utsch” as the property owner in 1994 (U.S. Index to Public Records 2024; City of Yorba Linda 2024: Permit No. 34618). By 2000, Ken Ries owned the subject property and the adjacent property at 18597 Altrudy Lane; however, it is unknown if he occupied the property (City of Yorba Linda 2024: Permit No. YL-0000980). Ries appears to have owned the property until it was sold c. 2019 to the City of Yorba Linda, who continues to own the property into the present (ParcelQuest 2024), and according to the City, the property has remained abandoned and unoccupied during their ownership. Archival research was unable to reveal further information about the lives and occupations of Victor and Ruth Abbott, Richard Ritter, Leata Ritter, Cornelia Meyer, “Meyer-Utsch,” or Ken Ries.

INTENTIONALLY LEFT BLANK

4 Results of Identification and Evaluation Efforts

4.1 Records Search Results

On October 14, 2024, Dudek conducted a search of the CHRIS at the SCCIC, located on the campus of California State University, Fullerton. The records search provided information on all documented cultural resources and previous archaeological investigations within the APE and a 1-mile radius.

4.1.1 Previously Conducted Studies

The records search indicated that 32 previous cultural resources technical investigations were conducted within 1 mile of the APE, none of which directly address or overlap with the APE (Table 2).

4.1.2 Previously Identified Cultural Resources

The SCCIC records search indicated that 13 cultural resources have been previously recorded within 1 mile of the APE, none of which are located within or adjacent to the APE. The previously recorded cultural resources within the 1-mile radius include 2 prehistoric resources, 1 historic-era isolate, and 10 built environment resources. All previously recorded cultural resources located within a 1-mile radius of the APE are summarized in Table 3 below.

Table 3. Previously Identified Cultural Resources Within 1 Mile of Project Site

Primary Number	Trinomial	Resource Name	Age	Resource Type/Attribute	NRHP Status Code	Recording event
Outside Project Site						
P-30-001481	CA-ORA-001481		Prehistoric	AP02: Lithic scatter	Unknown	1997 (L. Carbone)
P-30-001639	CA-ORA-001639		Prehistoric	AP15: Habitation debris, shell midden	Unknown	2005 (Stephen O’Neil)

Table 3. Previously Identified Cultural Resources Within 1 Mile of Project Site

Primary Number	Trinomial	Resource Name	Age	Resource Type/Attribute	NRHP Status Code	Recording event
P-30-100113			Historic-era	AH04: Trash scatter, two glass shards	Unknown	1992 (Kenneth Becker)
P-30-160210		Richard Nixon Birthplace	Historic-era	HP02: Single-family property	1: Property listed in the National Register	1970 (Allen Welts)
P-30-160211		Pacific Electric Railway Company Depot	Historic-era	HP17: Railroad depot	1: Property listed in the National Register	1979 (Steve Rudometkin)
P-30-160248		Mother Fuerte Avocado Trees	Historic-era	HP30: Trees	Unknown	1981 (Denver Miller)
P-30-176702		Trueblood Residence; Janeway House; H&H Packing House Loading Dock; H&H Packing House Avocado Cooler	Historic-era	HP02: Single-family property; HP08: Industrial building	5D3: Appears to be a contributor to a district that appears eligible for local listing or designation through survey evaluation	2003 (Judith Marvin)
P-30-176832		Highland Reservoir	Historic-era	HP09: Public utility building; HP11: Engineering structure; HP22: Reservoir; HP30: Trees/vegetation; HP31: Urban open space; HP46: Walls/gates/fences	3S: Appears eligible for NRHP as an individual property through survey evaluation	2006 (James Steely)
P-30-177505		Smith Residence	Historic-era	HP02: Single-family property	Unknown	2014 (Jeanette McKenna)
P-30-177506		Walker Residence	Historic-era	HP02: Single-family property	Unknown	2014 (Jeanette McKenna)

Table 3. Previously Identified Cultural Resources Within 1 Mile of Project Site

Primary Number	Trinomial	Resource Name	Age	Resource Type/Attribute	NRHP Status Code	Recording event
P-30-177507		BM Lawn and Garden Inc.	Historic-era	HP02: Single-family property	Unknown	2014 (Jeanette McKenna)
P-30-177620		Harold McCabe/August Anderson Residence	Historic-era	HP02: Single-family property	6Z: Found ineligible for NRHP	2016 (Jeanette McKenna)
P-30-177621		George and Dorothy Morgan Residence	Historic-era	HP02: Single-family property	6Z: Found ineligible for NRHP	2016 (Jeanette McKenna)

Note: NRHP = National Register of Historic Places.

4.2 Review of Geomorphological Context

According to the USDA Web Soil Survey (USDA 2024a), the soil type mapped within the APE is Myford sandy loam with 2% to 15% slopes. Myford soils are characterized as deep, moderately well-drained soils formed on terraces at elevations less than 1,500 feet (USDA 2024b). The Myford sandy loam soil series generally occurs in alluvial settings deriving from sandstone. Alluvial soils, which are present in the APE, have moderate potential to contain subsurface archaeological deposits.

A review of U.S. Geological Survey mineral resources (USGS 2024) online spatial data for geology indicates that the APE is comprised of one type of geologic unit. The entirety (100%) of the APE is underlain by Older Quaternary alluvium and marine deposits, generally dating between the Pleistocene and Holocene (<11,700 years ago). Alluvial formations of this age generally have a moderate potential to support the presence of subsurface archaeological deposits.

4.3 Built Environment Survey

Two built environment cultural resources were noted in the APE. These resources are summarized in Table 4. Each resource is described and evaluated below. Complete DPR 523 form sets that include more detailed information on the properties discussed below are available in Appendix C, DPR Forms.

Table 4. Built Environment Properties Recorded and Evaluated in the APE

Map ID	Property Type	Address/APN	Year Built	Primary Numbers
Newly Recorded within the APE				
1	Residential	18597 Altrudy Lane (APN 323-231-18)	1965	N/A
2	Residential	18602 Altrudy Lane (APN 323-231-19)	1959	N/A

Notes: APE = area of potential effects; APN = Assessor’s Parcel Number; N/A = not applicable.

4.4 Descriptions and Evaluations of Resources in the APE

4.4.1 Map ID 1: 18597 Altrudy Lane

Description

The subject property at 18597 Altrudy Lane (APN 323-231-18) is located on the north side of Altrudy Lane, between Lakeview Avenue to the west and Cedar Avenue to the east. Only those buildings and structures constructed in or before 1979 are described in the following. The subject property contains a single-family residence and an attached garage constructed in 1965, an ancillary shed constructed c. 2004 to the rear (northwest) of the residence, and a chicken coop constructed at an unknown date along the northern boundary of the property (ParcelQuest 2024; NETR 2024). The primary (south) elevation of the residence and attached garage is oriented toward Altrudy Lane. The building is set back on the subject property, with a concrete driveway leading from Altrudy Lane to the attached garage. Landscaping includes grass lawns, shrubs, and mature pine trees.

The Ranch-style, single-family residence is one story in height and relatively rectangular in plan, with an attached garage along the west elevation. The residence has a low-pitched, composition-shingle, cross-gable roof with an overhang, exposed rafters, and closed eaves. The garage roof displays a minimal overhang and closed eaves (Photograph 1). Building permits indicate that the roof was reroofed in 1988 (Permit No. 8099). The building is primarily clad with replacement stucco and includes sections of T-1-11 plywood cladding on the rear (north) elevation. A rectangular brick chimney is located on the exterior of the west elevation. A full-width wraparound wood frame porch, added between 1972 and 1980 (NETR 2024), is located along the rear (north) and northwestern elevations. The porch is covered by a wood-board shed and a flat roof with closed eaves and exposed rafters supported by wood posts. Sections of the porch are enclosed by vertical wood board railing. The eastern portion of the rear (north) elevation includes an enclosed porch with metal frame paneling featuring metal-sash sliding windows beneath the overhang of the roof (Photograph 2). The main entrance is recessed on the primary (south) elevation. Four concrete steps provide access to a composition wood entry door obscured by a partially glazed, single-panel, wood board door with decorative paneling. Additionally, the primary (south) elevation of the garage features a vertical wood panel counterweight garage door. Fenestration consists of a variety of replacement vinyl-framed windows, including ungrouped multilight bay windows; grouped and ungrouped multilight casement windows; single-leaf wood doors; grouped and ungrouped metal-sash sliding windows; and wood double French doors flanked by wood-sash sidelights. Alterations observed during the subject property survey include window replacements and recladding with stucco at unknown dates.

Statement of Significance

Under NRHP Criterion A and CRHR Criterion 1, 18597 Altrudy Lane lacks a direct and important association with any event significant in local, state, or national history. Following World War II's conclusion in 1945, Yorba Linda experienced exponential growth. To serve the growing population, the construction of residential neighborhoods reflecting low-cost mass-produced single-family, tract housing, and cluster planning residential development occurred. The subject property, constructed in 1965, was built at the end of Yorba Linda's period of postwar growth that accommodated the needs of an influx of new residents before Yorba Linda's incorporation in 1967. Although postwar growth was an important trend regionally, the subject property did not play a significant role in this trend and did not influence this trend. It is also not known to be directly associated with events that have made a significant contribution to the history of Yorba Linda, Orange County, California, or the nation. Additionally, research did not identify a significant historical event that occurred on the subject property. Therefore, 18597 Altrudy Lane does not meet NRHP Criterion A or CRHR Criterion 1.

Under NRHP Criterion B and CRHR Criterion 2, 18597 Altrudy Lane lacks a direct and significant association with the productive life of any person considered important in history. Archival research and building permits identified several people associated with the subject property throughout its history, including Deanna L. and Ronald J. Rauch (1976); Alan and Sara Ries (1976–1988); and Ken, Antoinette (Toni), and Bradley C. Ries (1998–c. 2019). Research did not uncover information that would indicate these owner/occupants made significant contributions to our past. Therefore, the building is recommended not eligible under NRHP Criterion B or CRHR Criterion 2.

Under NRHP Criterion C and CRHR Criterion 3, 18597 Altrudy Lane lacks design and construction value, because it does not possess architectural distinction or high artistic value, and it does not represent the work of a master or contribute to the significance of a district. The subject property is a modest and architecturally undistinguished example of a ranch house built in 1965. Although the subject property does display character-defining features of the Ranch style (e.g., its horizontal emphasis, one-story height, low-pitched gabled roof with an overhang, general asymmetry, free-flowing interior spaces, designed connection to the outdoors, stucco cladding, brick chimney, and attached garage), this is a ubiquitous style applied to residences throughout the neighborhood, Yorba Linda, Orange County, and California. Due to its simple form and easy replicability with prefabricated components, the Ranch style was widely applied to houses post-World War II for decades throughout Orange County. Additionally, because Ranch-style residences were designed to be simplistic, economical, and able to be produced at a mass scale, alterations to buildings of this style have a larger impact on their overall representation of the style. The multiple alterations to the subject property, including the addition of a porch to the rear (north) and northwest elevations between 1972 and 1980, the reroof with asphalt shingles in 1988, window replacements on all elevations at an unknown date, and recladding with stucco at an unknown date, have substantially diminished distinctive characteristics of the Ranch style. Therefore, the subject property is an unremarkable example of a ubiquitous style, and there are many similar examples. Likewise, the subject property appears to have been constructed through already well-documented and common construction techniques and methods. The subject property does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. The original building permit for the subject property could not be obtained, and research could not identify an architect or builder for the property. Because it is a common property type and style, it is unlikely that the subject property was the work of a master architect or builder. Lastly, the subject property does not contribute to the significance of a potential or existing historic district. Overall, 18597 Altrudy Lane lacks architectural significance and does not meet NRHP Criterion C or CRHR Criterion 3.

Under NRHP Criterion D and CRHR Criterion 4, the building is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D and CRHR Criterion 4.

4.4.2 Map ID 2: 18602 Altrudy Lane

Description

The subject property at 18602 Altrudy Lane (APN 323-231-19) is located on the north side of Altrudy Lane, between Lakeview Avenue to the west and Cedar Avenue to the east. The subject property contains a single-family residence and attached garage constructed in 1959, a pool constructed in 1990 to the rear (north) of the residence, and a tennis court constructed c. 1992 along the northern boundary of the property (ParcelQuest 2024; Permit No. 21585; NETR 2024). The primary (south) elevation of the residence is oriented toward Altrudy Lane. The building is set back on the property, with a concrete driveway leading from Altrudy Lane to the attached garage on the east elevation of the residence. According to building permits, chain-link fencing was installed along the northern and eastern boundaries of the property in 1972, and a concrete masonry unit wall was added along the southern and eastern boundaries in 2000 (Permit No. 11972; Permit No. YL-0000980). Landscaping includes grass lawns, shrubs, and mature California pepper trees, cypress, and palm trees.

This single-family Ranch-style residence is one story in height, with an attached garage along the east elevation. It is irregular in plan because of an addition to the rear (north) elevation, constructed in c. 1980 (NETR 2024). The residence has a low-pitched, composition-shingle, cross-hipped roof with an overhang, exposed rafters, and closed eaves (Photograph 3). Building permits indicate the residence was reroofed in 1994 (Permit No. 34618). The building is clad with stucco and features a rectangular brick chimney located on the exterior of the west elevation. The rear (north) elevation includes a covered porch with a corrugated metal flat roof supported by metal posts (Photograph 4). The main entrance is covered by a composition-shingle flat roof extension supported by wood posts and beams and is enclosed by a metal railing. The main entry is set with a single-panel wood door. Additionally, the east elevation of the garage features a vertical and horizontal wood board counterweight garage door. Fenestration consists of a variety of vinyl-sash windows, including grouped and ungrouped casement, horizontal sliding, and fixed windows, as well as a bay window; ungrouped metal-sash horizontal sliding windows; single-leaf wood doors; and a metal-framed, fully glazed sliding door. Alterations observed during the subject property survey include window and door replacements at unknown dates.

Photograph 4. Rear (north) elevation of the residence at 18602 Altrudy Lane, view looking southeast. Photograph taken on October 22, 2024.

Source: Dudek 2024 (IMG_7693.JPG).

Statement of Significance

Under NRHP Criterion A and CRHR Criterion 1, 18602 Altrudy Lane lacks a direct and important association with any event significant in local, state, or national history. Following World War II's conclusion in 1945, Yorba Linda experienced exponential growth. To serve the growing population, the construction of residential neighborhoods reflecting low-cost mass-produced designs with single-family, tract housing, and cluster planning development types. The subject property, constructed in 1959, was built at the end of Yorba Linda's period of postwar growth, which accommodated the needs of an influx of new residents before Yorba Linda's incorporation in 1967. Although postwar growth was an important trend regionally, the subject property did not play a significant role in this trend and did not influence this trend. It is also not known to be directly associated with events that have made a significant contribution to the history of Yorba Linda, Orange County, California, or the nation. Additionally, research did not identify a significant historical event that occurred on the subject property. Therefore, 18602 Altrudy Lane does not meet NRHP Criterion A or CRHR Criterion 1.

Under NRHP Criterion B and CRHR Criterion 2, 18602 Altrudy Lane lacks a direct and significant association with the productive life of any person considered important in history. Archival research and building permits identified several people associated with the subject property throughout its history, including Victor and Ruth Abbott (1965); Richard Ritter (1972–1973); Leata Ritter (1975–1978); Cornelia Meyer 1990); “Meyer-Utsch” (1994); and Ken Ries (2000–c. 2019). Research did not uncover information that would indicate these owners/occupants made significant contributions to our past. Therefore, the building is recommended not eligible under NRHP Criterion B or CRHR Criterion 2.

Under NRHP Criterion C and CRHR Criterion 3, 18602 Altrudy Lane lacks design and construction value because it does not possess architectural distinction or high artistic value, and it does not represent the work of a master or contribute to the significance of a district. The subject property is a modest and architecturally undistinguished example of a ranch house built in 1959. Although the subject property does display character-defining features of the Ranch style (e.g., its horizontal emphasis, one-story height, low-pitched hipped roof with an overhang, general asymmetry, free-flowing interior spaces, designed connection to the outdoors, stucco cladding, brick chimney, and attached garage), this is a ubiquitous style applied to residences throughout the neighborhood, Yorba Linda, Orange County, and California. Due to its simple form and easy replicability with prefabricated components, the Ranch style was widely applied to houses throughout Orange County in the decades following World War II. Additionally, because Ranch-style residences were designed to be simplistic, economical, and able to be produced at a mass scale, alterations to buildings of this style have a larger impact on their overall representation of the style. The multiple alterations to the subject property, including the addition of a rear porch to the rear (north) and northwest elevations between 1972 and 1980, the reroof with asphalt shingles in 1988, window replacements on all elevations at an unknown date, and recladding with stucco at an unknown date, have substantially diminished distinctive characteristics of the Ranch style. Therefore, the subject property is an unremarkable example of a ubiquitous style, and there are many similar examples in the surrounding area. Likewise, the subject property appears to have been constructed through already well-documented and common construction techniques and methods. The subject property does not appear to possess high artistic values by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. The original building permit for the subject property could not be obtained, and research could not identify an architect or builder for the property. Because it is a common property type and style, it is unlikely that it was the work of a master architect or builder. Lastly, the subject property does not contribute to the significance of a potential or existing

historic district. Overall, 18602 Altrudy Lane Altrudy Lane lacks architectural significance and does not meet NRHP Criterion C or CRHR Criterion 3.

Under NRHP Criterion D and CRHR Criterion 4, the building is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D and CRHR Criterion 4.

4.5 Integrity

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. None of the subject properties (Map IDs 1 and 2) evaluated in this report meet any of the criteria for listing in the NRHP or CRHR, and an integrity analysis was considered immaterial.

5 Summary of Findings and Management Considerations

5.1 Archeological Resources Findings

Dudek's cultural resources inventory of the APE suggests there is a moderate potential for the inadvertent discovery of buried archaeological resources during project implementation. Dudek conducted a records search of the APE and the surrounding 1-mile radius at the SCCIC. The records search did not identify any previously recorded cultural resources within the APE, although a built environment field survey identified two historic-era built environment resources within the APE. Archival research indicates that these built environment resources were constructed in the mid-twentieth century and that before that, the land was used primarily for agricultural purposes. Additionally, a review of the geomorphological context of the APE suggests it is underlain by alluvial deposits, which have a moderate potential to contain intact archaeological deposits.

Based on the nature of the historic-era built environment resources within the APE, there is moderate potential for the inadvertent discovery of subsurface archaeological resources during earthmoving activities for the project.

In the event that archaeological resources are encountered during the exposure of subsurface soils within the APE, ground-disturbing work should be immediately halted in the area, and a qualified archaeologist should be retained to evaluate the resources. Management recommendations to reduce potential impacts to unanticipated archaeological resources and human remains during construction activities are provided below.

5.2 Archaeological Resources Management Recommendations

5.2.1 Unanticipated Discovery of Archaeological Resources

All construction crews should be alerted to the potential to encounter archaeological resources. In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed project, all construction work occurring within a 50-foot buffer of the find shall immediately stop until a qualified specialist meeting the Secretary of the Interior's Professional Qualification Standards can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be typical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appear to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or nonfunctional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or features such as old concrete foundations or privies. Significance of the find will be assessed based on processes outlined by CEQA (14 CCR 15064.5[f]; PRC Section 21082) and Section 106 of the NHPA. Feasible options for avoidance must

also be considered. If the discovery proves significant under CEQA and/or the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted.

Unanticipated Discovery of Human Remains

In accordance with Section 7050.5 of the California Health and Safety Code, if human remains are found, the Orange County Coroner shall be immediately notified of the discovery. No further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur until the Orange County Coroner has determined, within 2 working days of notification of the discovery, the appropriate treatment and disposition of the human remains. If the Orange County Coroner determines that the remains are, or are believed to be, Native American, the coroner shall notify the NAHC in Sacramento within 24 hours. In accordance with California Public Resources Code Section 5097.98, the NAHC must immediately notify those persons it believes to be the MLD from the deceased Native American. The MLD shall complete inspection within 48 hours of being granted access to the site. The designated Native American representative would then determine, in consultation with the property owner, the disposition of the human remains and associated grave goods.

5.3 Built Environment Findings

No historic properties or historical resources were identified within the project APE as a result of archival research, a records search, field survey, and significance evaluations. The subject properties are not currently listed in any national, state, or local registers, nor have they been previously identified in any local historic resources surveys.

Dudek evaluated the resources in the APE in accordance with Section 106 and Section 15064.5 (a)(2) and (3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the PRC and found that neither of the resources within the APE is considered a historic property for the purposes of Section 106 or a historical resource for the purposes of CEQA. The recommended status code for 18597 Altrudy Lane and 18602 Altrudy Lane is 6Z. A summary of the findings is provided below in Table 5.

Table 5. Summary of Significance Evaluations and Findings

Map ID	Address/APN	Year Built	NRHP/CRHR Eligibility	Assigned California Historical Resource Status Code
Newly Recorded Within the APE				
1	18597 Altrudy Lane (APN 323-231-18)	1965	N/A	6Z
2	18602 Altrudy Lane (APN 323-231-19)	1959	N/A	6Z

Notes: APN = Assessor’s Parcel Number; NRHP = National Register of Historic Places; CRHR = California Register of Historical Resources; APE = area of potential effects; N/A = not applicable; 6Z=Found ineligible for NRHP, CRHR, or local designation through survey evaluation.

5.4 Built Environment Management Recommendations

No further work for built environment cultural resources is necessary prior to the proposed project implementation.

Subject: Altrudy II Senior Apartments Project, Yorba Linda, Orange County, California

To Whom it May Concern,

Dudek has been retained by Orange County Housing & Community Development to complete a Cultural Resources Inventory and Evaluation Report for the Altrudy II Senior Apartments Project (Proposed Project). The Proposed Project is located in Yorba Linda, Orange County, California, on two vacant single-family properties located at 18597 Altrudy Lane (APN 323-231-18), constructed c. 1965, and 18602 Altrudy Lane (APN 323-231-19), constructed c. 1959 (see Figure 1 enclosed).

The client is proposing to demolish the existing residences on the two parcels for the construction and operation of a 71-unit senior affordable housing community. The Project is designed with 57 one- and 14 two-bedroom units within two buildings, which would be two and three stories with elevator access. On-site amenities would include an entry plaza, leasing office, community center, sitting areas, and BBQ pavilion for residents. Active and passive green open space would also be provided. The Project would include a total of 72 parking spaces. Access to the site would be from Altrudy Lane, with additional street improvements as part of the project.

As part of our study, we are consulting all regional historical organizations to determine if there are any known historic or cultural resources that may be affected by the Proposed Project. Your efforts in this process will provide invaluable information for the proper identification and treatment of such resources. If you have any information regarding known cultural resources in the Proposed Project area, please feel free to contact me via phone or email (listed below). All comments, emails, or letters received will be included in the reports generated by this study. Thank you for your time regarding our request.

Sincerely,

Katie Ahmanson

18597 Altrudy Lane does not meet the criteria for the National Register of Historic Places (NRHP) or California Register of Historical Resources (CRHR). The property was evaluated in accordance with Section 106 of the National Historic Preservation Act (Section 106) and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the California Public Resources Code. The property is not considered a historic property for the purposes of Section 106 or a historical resource under CEQA. As such, this evaluation assigns a 6Z California Historical Resources Status Code to 18597 Altrudy Lane. See Continuation Sheet pages 7 and 8.

Update

*Date: November 22, 2024 Continuation

***P3a. Description (continued from page 1)**

The primary (south) elevation of the residence and attached garage are oriented toward Altrudy Lane. The building is set back on the property with a concrete driveway leading from Altrudy Lane to the attached garage. Landscaping includes grass lawns, shrubs, and mature pine trees. Only those buildings and structures constructed in or before 1979 are being described.

The Ranch style, single-family residence is one-story in height and relatively rectangular in plan with an attached garage along the west elevation. The residence has a low pitched, composition shingle, cross-gable roof with an overhang, exposed rafters, and closed eaves. The garage's roof displays a minimal overhang and closed eaves (Photograph 1). Building permits indicate that the roof was reroofed in 1988 (Permit # 8099). The building is primarily clad with replacement stucco and includes sections of T-1-11 plywood cladding on the rear (north) elevation. A rectangular brick chimney is located on the exterior of the west elevation. A full-width wraparound wood frame porch is located along the rear (north) and northwestern elevations, which was added between 1972 and 1980 (NETR 2024). The porch is covered by a wood board shed and flat roof with closed eaves and exposed rafters supported by wood posts. Sections of the porch are enclosed by vertical wood board railing. The eastern portion of the rear (north) elevation includes an enclosed porch with metal frame paneling featuring metal sash sliding windows beneath the overhang of the roof (Photograph 2). The main entrance is recessed on the primary (south) elevation. Four concrete steps provide access to a composition entry door obscured by a partially glazed, single-panel, wood board door with decorative paneling. Additionally, the primary (south) elevation of the garage features a vertical wood panel counterweight garage door. Fenestration consists of a variety of replacement vinyl-framed windows including: ungrouped multi-light bay windows; grouped and ungrouped, multi-light, casement windows; single-leaf wood doors; grouped and ungrouped metal-sash sliding windows; and wood double-French doors flanked by wood-sash sidelights. Alterations observed during the property survey include window replacements and recladding with stucco at unknown dates.

***B06. Construction History (continued from page 2)**

The property contains a single-family residence and an attached garage constructed in 1965, an ancillary shed constructed c. 2004 to the rear (northwest) of the residence, and a chicken coop constructed at an unknown date along the northern boundary of the property (ParcelQuest 2024; NETR 2024).

Building permits indicate that the roof was reroofed in 1988 (Permit # 8099).

Alterations observed during the property survey include window replacements and recladding with stucco at unknown dates.

***B10. Significance (continued from page 2):**

Historical Overview of Yorba Linda

The city of Yorba Linda is located in Orange County and is named after the original owner of the land grant containing the area in 1834, Bernardo Yorba, combined with Linda meaning beautiful in Spanish. In 1822, Mexico won its independence from Spain and Alta California became part of the Mexican Republic, and the Mexican government opened California to foreign trade. Private land grants were issued in the in the early 1820s creating the rancho system of large agricultural estates. Bernardo Yorba received a land grant from the Mexican government for 13,328-acres called Rancho Cañon de Santa Ana, along the Santa Ana River in present day Yorba Linda. By 1848, America assumed formal control of California through the Treaty of Guadalupe-Hidalgo and introduced Anglo culture and society to the area. After Yorba died in 1858, the ranch was divided between his wife and children who continued to use the land for ranching until Jacob Stern purchased a portion of the land in 1907. In 1908, the Janns Investment Company bought Stern's land and named the area Yorba Linda. The company sold agricultural plots in the area for the development of ranches. By 1911, the area contained a population of about 35 residents, most of whom were citrus grove farmers (City of Yorba Linda 2024b).

Development of Yorba Linda continued during the next three decades with the construction of civic buildings and infrastructure such as the first post office and schoolhouse, the Yorba Linda Friends Church, and Yorba Linda Boulevard.

In 1913, the Yorba Linda Library opened, and the Yorba Linda Chamber of Commerce was organized (Yorba Linda History 2024). By 1920, the population reached 350 residents (City of Yorba Linda 2024b). Historic aerial photographs of the area indicate that the land remained primarily agricultural with scattered single-family residence until the 1940s (UCSB 2024). During World War II, manufacturing jobs were abundant in California while housing was lacking, resulting in many workers living in vehicles, tents, and other temporary shelters. Despite the passing of the Lanham Act in 1940, which appropriated \$1.3 billion for the construction of 700,000 homes, two years later the War Production Board prohibited non-essential construction during wartime including market-driven housing. This resulted in an enormous lack of housing, with construction being limited to single-family tracts for industry workers and inexpensive and quickly built multi-family housing intended to be temporary. After the end World War II in 1945, a massive wave of migration and building boom occurred throughout Southern California including Yorba Linda (Caltrans 2011: 5, 12; NETR 2024).

During the post-World War II period, residences reflected a range of regional styles that combined Regional Modernism with elements of the International style and natural materials (Nicholds 2020). Inspired by new construction materials and techniques refined during the war, many architects focused on producing low-cost mass-produced designs. Prefabricated housing systems, also known as manufactured homes or modular homes, were introduced to the market during this period. Additionally, tract home communities were built on a tract of land that was subdivided into smaller lots and had multiple similar houses built typically by the same developer and at the same time. Yorba Linda's residential development history reflects a combination of the tract housing development type and the cluster planning development type, which were both common in Orange County and Southern California in the post-war era. Cluster housing referred to a type of planning that involved setting aside a portion of green space with the surrounding housing being more densely grouped on the remaining land. The dominant architectural styles during this era for both tract and cluster housing included Ranch, Minimal Traditional, and Contemporary (Nicholds 2020; Survey LA 2021: 91-92; NETR 2024).

Efforts to incorporate the community of Yorba Linda began in the 1950s, as the area experienced a significant population increase from 350 residents in 1920 to 1,198 residents in 1960. Residents felt that there was a need for more orderly planning and development of the land. The first zoning plan was established in 1955 by a nine-person committee comprised of three organizations in the town, the Business Association, the Chamber of Commerce, and the Farm Center (Bulz 1970: 139). By 1967, Yorba Linda was incorporated with a population of 11,433 residents (Yorba Linda History 2024). As a result of the population growth, residential and commercial development in the area continued into the 1970s and 1980s. In 1990, the Richard M. Nixon Library and Birthplace was constructed on nine acres in the western portion of Yorba Linda along Yorba Linda Boulevard and Eureka Avenue. Nixon was buried at the property in 1994 (City of Yorba Linda 2024b).

Agriculture in the region declined throughout the second half of the twentieth century with neighborhoods replacing sprawling ranches and orchards. Higher density introduced new types of residential properties such as multi-family residences, townhomes, apartment buildings, condominium complexes, and duplexes. During this period multiple shopping centers were constructed such the 175-acre multi-use Savi Ranch Center, which included commercial, industrial, and office space (Yorba Linda History 2024). Yorba Linda appears to have been fully developed by the 1990s (City of Yorba Linda 2024b; NETR 2024). Presently, the city includes a population of about 68,000 residents. The economy is primarily comprised of health care and social assistance professionals, scientific and technical service industries, and manufacturing (Data USA 2024).

Development of the Subject Property

The APE includes two residential properties, Map ID 1: 18597 Altrudy Lane (APN 323-231-18) constructed in 1965, and Map ID 2: 18602 Altrudy Lane (APN 323-231-19) constructed in 1959 (ParcelQuest 2024). The earliest historic aerial photograph of Map IDs 1 and 2 within the APE dates from 1927 and reveals that the land was primarily agricultural and planted with orchards (Photograph 3). The surrounding area contained scattered residences on agricultural properties. Commercial and single-family residences were primarily located along the intersection of Yorba Linda Boulevard and Imperial Highway (UCSB 2024). The area remained primarily agricultural until the early 1960s. Historic aerials indicate that residential neighborhoods with gridded streets replaced most of the agricultural properties in the surrounding area by 1963. The APE and surrounding area were almost completely built-out with housing and commercial properties by 1985 (NETR 2024).

Continuation

Map ID 1: 18597 Altrudy Lane

Map ID 1: 18597 Altrudy Lane (APN 323-231-18) remained agricultural with orchards until a single-family residence was constructed on the property in 1965 (ParcelQuest 2024). The first known occupants of the residence were Deanna L. and Ronald J. Rauch, who were listed at the address in the Anaheim Bulletin in 1976 after the birth of their son (AB 1976: 21). However, archival research was unable to yield further information about Mr. and Mrs. Rauch. That same year, the U.S. Public Records Index lists Alan and Sara Ries as occupants of the property with their son, Ken Ries (U.S. Index to Public Records 2024). Ken married Antoinette (Toni) Slaton in 1987. At the time, he was a graduate of Troy High School and self-employed, while Toni was a graduate of Cajon High School and California State University, San Bernardino and employed as a senior counselor by California Registry in San Juan Capistrano (SBCS 1986: 75). Building permits indicate that Alan and Sara Ries remained at the property until at least 1988, before Ken and Toni moved to the subject property by 1998 with their son, Bradley C. Ries, born in 1994 (City of Yorba Linda 2024a: Permit #8099; U.S. Phone and Address Directories 2024; U.S. Index to Public Records 2024). The Slaton family remained at the property until it was sold to the City of Yorba Linda by 2019 (City of Yorba Linda 2024a: Permit #YL-006205). The city has continued to own the property into the present (ParcelQuest 2024). According to the city, the property has remained abandoned and unoccupied since their ownership. Archival research was unable to reveal further information about the lives and occupations of Alan Ries, Sara Ries, Ken Ries, Toni Ries, or Bradley Ries.

Architectural Style: Ranch Style (1930-1975)

Ranch-style houses in California reflect a national trend of fascination with the “Old West” and were a building style of choice for tract housing. Ranch homes were originally developed in the western and southwestern United States, but quickly gained national popularity through the dissemination of do-it-yourself manuals and plans in national magazines such as Sunset, Better Homes And Gardens, and House Beautiful. Later, ranch houses were popular as a custom-built type of housing, which was especially popular in the later 1940s and 1950s. Ranch houses were typically built between 1930 and 1975, but peaked in the 1950s, as the most prevalent type of post-World War II suburban tract-style housing, often housing veterans who secured housing with Federal Housing Administration loans (Grimes and Chiang 2009: 43-46; Horak et.al. 2015: 23-25; McAlester 2019: 597-603).

Ranch style houses are usually a one-story, single-family residence. Houses designed in this architectural style include several identifying characteristics such as rambling, elongated plans; a horizontal emphasis; general asymmetry; free-flowing interior spaces; and a designed connection to the outdoors. Features such as low-pitched roofs with wide eaves, a combination of cladding materials including board-and-batten siding, brick and stone chimneys, and large picture windows were commonly applied and evoked an aesthetic that was reminiscent of these past architectural traditions. Decorative features such as wood shutters and dovescotes were often added to enhance the rusticated appearance of Ranch houses (Grimes and Chiang 2009: 43-46; Horak et.al. 2015: 23-25; McAlester 2019: 597-603).

Character-defining features include:

- rambling, elongated plans with a horizontal emphasis
- 1-2 stories in height
- low-pitched gabled or hipped roofs with overhanging, open eaves
- general asymmetry
- free-flowing interior spaces
- designed connection to the outdoors
- cladding featuring stucco, board and batten, shingles, clapboard, or a combination of materials
- brick or stone chimneys details
- attached garages often linked to residence by breezeways
- stone, brick, board and batten, clapboard, or horizontal wood siding used for accent on walls, secondary cladding

NRHP/CRHR Evaluation

Under NRHP Criterion A and CRHR Criterion 1, 18597 Altrudy Lane lacks a direct and important association with any event significant in local, state, or national history. Following World War II's conclusion in 1945, Yorba Linda experienced exponential growth. To serve the growing population, the construction of residential neighborhoods reflecting low-cost mass-produced single-family, tract housing, and cluster planning residential development occurred. The subject property, constructed in 1965, was built at the end of Yorba Linda's period of post-war growth that accommodated the needs of an influx of new residents before the city's incorporation in 1967. While the post-war growth was an important trend regionally, this property did not play a significant role in this trend and did not influence this trend. It is also not known to be directly associated with events that have made a significant contribution to the history of Yorba Linda, Orange County, California, or the nation. Additionally, research did not identify a significant historical event that occurred on the property. Therefore, 18597 Altrudy Lane does not meet NRHP Criterion A or CRHR Criterion 1.

Under NRHP Criterion B and CRHR Criterion 2, 18597 Altrudy Lane lacks a direct and significant association with the productive life of any person considered important in history. Archival research and building permits identified several people associated with the property throughout its history including Deanna L. and Ronald J. Rauch (1976); Alan and Sara Ries (1976-1988); Ken, Antoinette (Toni), and Bradley C. Ries (1998-c. 2019). Research did not uncover information that would indicate these owner/occupants made significant contributions to our past. Therefore, the building is recommended not eligible under NRHP Criterion B or CRHR Criterion 2.

Under NRHP Criterion C and CRHR Criterion 3, 18597 Altrudy Lane lacks design and construction value, because it does not possess architectural distinction or high artistic value, and it does not represent the work of a master or contribute to the significance of a district. The subject property is a modest and architecturally undistinguished example of a Ranch house built in 1965. While the property does display character-defining features of the Ranch style (e.g., its horizontal emphasis, one-story height, low-pitched gabled roof with an overhanging, general asymmetry, free-flowing interior spaces, designed connection to the outdoors, stucco cladding, brick chimney, and attached garage), this is a ubiquitous style applied to residences throughout the neighborhood, Yorba Linda, Orange County, and California. Due to its simple form and easy replicability with prefabricated components, the Ranch style was widely applied to houses in the post-World War II for decades throughout Orange County. Additionally, because Ranch style residences were designed to be simplistic, economical, and able to be produced at a mass scale, alterations to buildings of this style have a larger impact on their overall representation of the style. The multiple alterations to the property, including the addition of a rear porch to the rear (north) and northwest elevations between 1972 and 1980; the reroof with asphalt shingles in 1988; window replacements on all elevations at an unknown date; and recladding with stucco at an unknown date have substantially diminished distinctive characteristics of the Ranch style. Therefore, the subject property is an unremarkable example of a ubiquitous style and there are many similar examples. Likewise, the subject property appears to have been constructed through already well-documented and common construction techniques and methods. The property does not appear to possess high artistic values, by articulating a particular concept of design to the extent that it expresses an aesthetic ideal. The original building permit for the property could not be obtained and research could not identify an architect or builder for the property. As it is a common property type and style, it is unlikely that it was the work of a master architect or builder. Lastly, the property does not contribute to the significance of a potential or existing historic district. Overall, 18597 Altrudy Lane lacks architectural significance and does not meet NRHP Criterion C or CRHR Criterion 3.

Under NRHP Criterion D and CRHR Criterion 4, the building is not significant as a source, or likely source, of

Page 8 of 11

important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific monographs. As such, the subject property lacks significance under NRHP Criterion D and CRHR Criterion 4.

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. The property evaluated in this report meet any of the criteria for listing in the NRHP or CRHR, and an integrity analysis was considered immaterial.

Summary of Evaluation Findings

Dudek evaluated the subject property in accordance with Section 106 and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the PRC and found that the subject property is not considered a historic property for the purposes of Section 106 or historical resources for the purposes of CEQA. The recommended Status Code for 18597 Altrudy Lane is 6Z.

18602 Altrudy Lane does not meet the criteria for the National Register of Historic Places (NRHP) or California Register of Historical Resources (CRHR). The property was evaluated in accordance with Section 106 of the National Historic Preservation Act (Section 106) and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the California Public Resources Code. The property is not considered a historic property for the purposes of Section 106 or a historical resource under CEQA. As such, this evaluation assigns a 6Z California Historical Resources Status Code to 18602 Altrudy Lane. See Continuation Sheet pages 7 and 8.

***P3a. Description (continued from page 1)**

The primary (south) elevation of the residence is oriented toward Altrudy Lane. The building is set back on the property, with a concrete driveway leading from Altrudy Lane to the attached garage on the east elevation of the residence. According to building permits, chain-link fencing was installed along the northern and eastern boundaries of the property in 1972, and a concrete masonry unit (CMU) wall along the southern and eastern boundaries was added in 2000 (Permit # 11972; Permit # YL-0000980). Landscaping includes grass lawns, shrubs, and mature California pepper trees, cypress, and palm trees,

This single-family Ranch style residence is one-story in height with an attached garage along the east elevation. It has an irregular in plan because of an addition to the rear (north) elevation, constructed in c. 1980 (NETR 2024). The residence has a low pitched, composition shingle, cross-hipped roof with an overhang, exposed rafters, and closed eaves (Photograph 1). Building permits indicate the residence was reroofed in 1994 (Permit # 34618). The building is clad with stucco and features a rectangular brick chimney located on the exterior of the west elevation. The rear (north) elevation includes a covered porch with a corrugated metal flat roof supported by metal posts (Photograph 2). The main entrance is covered by a composition shingle flat roof extension supported by wood posts and beams and is enclosed by a metal railing. The main entry is set with a single-panel wood door. Additionally, the east elevation of the garage features a vertical and horizontal wood board counterweight garage door. Fenestration consists of a variety of vinyl-sash windows including grouped and ungrouped casement, horizontal sliding, and fixed windows, and a bay window; ungrouped metal-sash horizontal sliding windows; single-leaf wood doors; and a metal frame, fully glazed, sliding door. Alterations observed during the property survey include window and door replacements at unknown dates.

***B06. Construction History (continued from page 2)**

The property contains a single-family residence and attached garage constructed in 1959, a pool constructed in 1990 to the rear (north) of the residence, and a tennis court constructed c. 1992 along the northern boundary of the property.

According to building permits, chain-link fencing was installed along the northern and eastern boundaries of the property in 1972, and a concrete masonry unit (CMU) wall along the southern and eastern boundaries was added in 2000 (Permit # 11972; Permit # YL-0000980).

Building permits indicate the residence was reroofed in 1994 (Permit # 34618).

Alterations observed during the property survey include window and door replacements at unknown dates.

***B10. Significance (continued from page 2):**

Historical Overview of Yorba Linda

The city of Yorba Linda is located in Orange County and is named after the original owner of the land grant containing the area in 1834, Bernardo Yorba, combined with Linda meaning beautiful in Spanish. In 1822, Mexico won its independence from Spain and Alta California became part of the Mexican Republic, and the Mexican government opened California to foreign trade. Private land grants were issued in the in the early 1820s creating the rancho system of large agricultural estates. Bernardo Yorba received a land grant from the Mexican government for 13,328-acres called Rancho Cañon de Santa Ana, along the Santa Ana River in present day Yorba Linda. By 1848, America assumed formal control of California through the Treaty of Guadalupe-Hidalgo and introduced Anglo culture and society to the area. After Yorba died in 1858, the ranch was divided between his wife and children who continued to use the land for ranching until Jacob Stern purchased a portion of the land in 1907. In 1908, the Janns Investment Company bought Stern's land and named the area Yorba Linda. The company sold agricultural plots in the area for the development of ranches. By 1911, the area contained a population of about 35 residents, most of whom were citrus grove farmers (City of Yorba Linda 2024b).

Development of Yorba Linda continued during the next three decades with the construction of civic buildings and infrastructure such as the first post office and schoolhouse, the Yorba Linda Friends Church, and Yorba Linda Boulevard. In 1913, the Yorba Linda Library opened, and the Yorba Linda Chamber of Commerce was organized (Yorba Linda

Continuation

History 2024). By 1920, the population reached 350 residents (City of Yorba Linda 2024b). Historic aerial photographs of the area indicate that the land remained primarily agricultural with scattered single-family residence until the 1940s (UCSB 2024). During World War II, manufacturing jobs were abundant in California while housing was lacking, resulting in many workers living in vehicles, tents, and other temporary shelters. Despite the passing of the Lanham Act in 1940, which appropriated \$1.3 billion for the construction of 700,000 homes, two years later the War Production Board prohibited non-essential construction during wartime including market-driven housing. This resulted in an enormous lack of housing, with construction being limited to single-family tracts for industry workers and inexpensive and quickly built multi-family housing intended to be temporary. After the end World War II in 1945, a massive wave of migration and building boom occurred throughout Southern California including Yorba Linda (Caltrans 2011: 5, 12; NETR 2024).

During the post-World War II period, residences reflected a range of regional styles that combined Regional Modernism with elements of the International style and natural materials (Nicholds 2020). Inspired by new construction materials and techniques refined during the war, many architects focused on producing low-cost mass-produced designs. Prefabricated housing systems, also known as manufactured homes or modular homes, were introduced to the market during this period. Additionally, tract home communities were built on a tract of land that was subdivided into smaller lots and had multiple similar houses built typically by the same developer and at the same time. Yorba Linda's residential development history reflects a combination of the tract housing development type and the cluster planning development type, which were both common in Orange County and Southern California in the post-war era. Cluster housing referred to a type of planning that involved setting aside a portion of green space with the surrounding housing being more densely grouped on the remaining land. The dominant architectural styles during this era for both tract and cluster housing included Ranch, Minimal Traditional, and Contemporary (Nicholds 2020; Survey LA 2021: 91-92; NETR 2024).

Efforts to incorporate the community of Yorba Linda began in the 1950s, as the area experienced a significant population increase from 350 residents in 1920 to 1,198 residents in 1960. Residents felt that there was a need for more orderly planning and development of the land. The first zoning plan was established in 1955 by a nine-person committee comprised of three organizations in the town, the Business Association, the Chamber of Commerce, and the Farm Center (Bulz 1970: 139). By 1967, Yorba Linda was incorporated with a population of 11,433 residents (Yorba Linda History 2024). As a result of the population growth, residential and commercial development in the area continued into the 1970s and 1980s. In 1990, the Richard M. Nixon Library and Birthplace was constructed on nine acres in the western portion of Yorba Linda along Yorba Linda Boulevard and Eureka Avenue. Nixon was buried at the property in 1994 (City of Yorba Linda 2024b).

Agriculture in the region declined throughout the second half of the twentieth century with neighborhoods replacing sprawling ranches and orchards. Higher density introduced new types of residential properties such as multi-family residences, townhomes, apartment buildings, condominium complexes, and duplexes. During this period multiple shopping centers were constructed such the 175-acre multi-use Savi Ranch Center, which included commercial, industrial, and office space (Yorba Linda History 2024). Yorba Linda appears to have been fully developed by the 1990s (City of Yorba Linda 2024b; NETR 2024). Presently, the city includes a population of about 68,000 residents. The economy is primarily comprised of health care and social assistance professionals, scientific and technical service industries, and manufacturing (Data USA 2024).

Development of the Subject Property

The APE includes two residential properties, Map ID 1: 18597 Altrudy Lane (APN 323-231-18) constructed in 1965, and Map ID 2: 18602 Altrudy Lane (APN 323-231-19) constructed in 1959 (ParcelQuest 2024). The earliest historic aerial photograph of Map IDs 1 and 2 within the APE dates from 1927 and reveals that the land was primarily agricultural and planted with orchards (Photograph 3). The surrounding area contained scattered residences on agricultural properties. Commercial and single-family residences were primarily located along the intersection of Yorba Linda Boulevard and Imperial Highway (UCSB 2024). The area remained primarily agricultural until the early 1960s. Historic aerials indicate that residential neighborhoods with gridded streets replaced most of the agricultural properties in the surrounding area by 1963. The APE and surrounding area were almost completely built-out with housing and commercial properties by 1985 (NETR 2024).

Continuation

Map ID 2: 18602 Altrudy Lane

The single-family residence at Map ID 2: 18602 Altrudy Lane (APN 323-231-19) was constructed in 1959 (ParcelQuest 2024). Between 1927 and the development of the property, with the property was an orchard (UCSB 2024). Although the original owners/occupants of the property are unknown, historic newspaper research indicates that Victor and Ruth Abbott occupied the property in 1965 with their 11 children (AB 1965: 25; DCH 1965: 12). However, it is unknown how long the family remained at the residence. Building permits for the subject property indicate that Richard Ritter owned the property from 1972 to 1973, before it was next owned by Leata Ritter from 1975 to 1978 (City of Yorba Linda 2024a: Permits #11972, #13422, and #38329; U.S. Index to Public Records 2024). Cornelia Meyer owned the property in 1990 before building permits began listing "Meyer-Utsch" as the property owner in 1994 (U.S. Index to Public Records 2024; City of Yorba Linda 2024a: Permit #34618). By 2000, Ken Ries owned the subject property as well as the adjacent property at 18597 Altrudy Lane, however, it is unknown if he occupied the property (City of Yorba Linda 2024a: Permit #YL-0000980). Reis appears to have owned the property until it was sold to the City of Yorba Linda c. 2019, who continue to own the property into the present (ParcelQuest 2024). According to the city, the property has remained abandoned and unoccupied since their ownership. Archival research was unable to reveal further information about the lives and occupations of Victor and Ruth Abbott, Richard Ritter, Leata Ritter, Cornelia Meyer, "Meyer-Utsch", or Ken Ries.

Architectural Style: Ranch Style (1930-1975)

Ranch-style houses in California reflect a national trend of fascination with the "Old West" and were a building style of choice for tract housing. Ranch homes were originally developed in the western and southwestern United States, but quickly gained national popularity through the dissemination of do-it-yourself manuals and plans in national magazines such as Sunset, Better Homes And Gardens, and House Beautiful. Later, ranch houses were popular as a custom-built type of housing, which was especially popular in the later 1940s and 1950s. Ranch houses were typically built between 1930 and 1975, but peaked in the 1950s, as the most prevalent type of post-World War II suburban tract-style housing, often housing veterans who secured housing with Federal Housing Administration loans (Grimes and Chiang 2009: 43-46; Horak et.al. 2015: 23-25; McAlester 2019: 597-603).

Ranch style houses are usually a one-story, single-family residence. Houses designed in this architectural style include several identifying characteristics such as rambling, elongated plans; a horizontal emphasis; general asymmetry; free-flowing interior spaces; and a designed connection to the outdoors. Features such as low-pitched roofs with wide eaves, a combination of cladding materials including board-and-batten siding, brick and stone chimneys, and large picture windows were commonly applied and evoked an aesthetic that was reminiscent of these past architectural traditions. Decorative features such as wood shutters and dovescotes were often added to enhance the rusticated appearance of Ranch houses (Grimes and Chiang 2009: 43-46; Horak et.al. 2015: 23-25; McAlester 2019: 597-603).

Character-defining features include:

- rambling, elongated plans with a horizontal emphasis
- 1-2 stories in height
- low-pitched gabled or hipped roofs with overhanging, open eaves
- general asymmetry
- free-flowing interior spaces
- designed connection to the outdoors
- cladding featuring stucco, board and batten, shingles, clapboard, or a combination of materials
- brick or stone chimneys details
- attached garages often linked to residence by breezeways

Continuation

- stone, brick, board and batten, clapboard, or horizontal wood siding used for accent on walls, secondary cladding types, and planters
- functional and non-functional shutters details as trim around windows
- fenestration may include a picture window

NRHP/CRHR Evaluation

Under NRHP Criterion A and CRHR Criterion 1, 18602 Altrudy Lane lacks a direct and important association with any event significant in local, state, or national history. Following World War II's conclusion in 1945, the city experienced exponential growth. To serve the growing population, the construction of residential neighborhoods reflecting low-cost mass-produced designs with single-family, tract housing, and cluster planning development types. The subject property, constructed in 1959, was built at the end of Yorba Linda's period of post-war growth that accommodated the needs of an influx of new residents before the city's incorporation in 1967. While the post-war growth was an important trend regionally, this property did not play a significant role in this trend and did not influence this trend. It is also not known to be directly associated with events that have made a significant contribution to the history of Yorba Linda, Orange County, California, or the nation. Additionally, research did not identify a significant historical event that occurred on the property. Therefore, 18602 Altrudy Lane does not meet NRHP Criterion A or CRHR Criterion 1.

Under NRHP Criterion B and CRHR Criterion 2, 18602 Altrudy Lane lacks a direct and significant association with the productive life of any person considered important in history. Archival research and building permits identified several people associated with the property throughout its history including Victor and Ruth Abbott (1965); Richard Ritter (1972-1973); Leata Ritter (1975-1978); Cornelia Meyer 1990); "Meyer-Utsch" (1994); and Ken Ries (2000-c. 2019;. Research did not uncover information that would indicate these owner/occupants made significant contributions to our past. Therefore, the building is recommended not eligible under NRHP Criterion B or CRHR Criterion 2.

Under NRHP Criterion C and CRHR Criterion 3, 18602 Altrudy Lane lacks design and construction value because it does not possess architectural distinction or high artistic value, and it does not represent the work of a master or contribute to the significance of a district. The subject property is a modest and architecturally undistinguished example of a Ranch house built in 1959. While the property does display character-defining features of the Ranch style (e.g., its horizontal emphasis, one-story height, low-pitched hipped roof with an overhanging, general asymmetry, free-flowing interior spaces, designed connection to the outdoors, stucco cladding, brick chimney, and attached garage), this is a ubiquitous style applied to residences throughout the neighborhood, Yorba Linda, Orange County, and California. Due to its simple form and easy replicability with prefabricated components, the Ranch style was widely applied to houses in the decades following World War II throughout Orange County. Additionally, because Ranch style residences were designed to be simplistic, economical, and able to be produced at a mass scale, alterations to buildings of this style have a larger impact on their overall representation of the style. The multiple alterations to the property, including the addition of a rear porch to the rear (north) and northwest elevations between 1972 and 1980; the reroof with asphalt shingles in 1988; window replacements on all elevations at an unknown date; and recladding with stucco at an unknown date have substantially diminished distinctive characteristics of the Ranch style. Therefore, the subject property is an unremarkable example of a ubiquitous style and there are many similar examples in the surrounding area. Likewise, the subject property appears to have been constructed through already well-documented and common construction techniques and methods. The property does not appear to possess high artistic values by articulating a particular concept of design, to the extent that it expresses an aesthetic ideal. The original building permit for the property could not be obtained and research could not identify an architect or builder for the property. As it is a common property type and style, it is unlikely that it was the work of a master architect or builder. Lastly, the property does not contribute to the significance of a potential or existing historic district. Overall, 18602 Altrudy Lane Altrudy Lane lacks architectural significance and does not meet NRHP Criterion C or CRHR Criterion 3.

Under NRHP Criterion D and CRHR Criterion 4, the building is not significant as a source, or likely source, of important historical information, nor does it appear likely to yield important information about historic construction methods, materials, or technologies. This technology is well understood through contemporary trade journals and scientific

Continuation

monographs. As such, the subject property lacks significance under NRHP Criterion D and CRHR Criterion 4.

Integrity Considerations

Integrity is the ability of a property to convey its significance. Because the concept of integrity is based on significance, the assessment of a property's integrity can only proceed after its significance has been fully established. The property evaluated in this report meet any of the criteria for listing in the NRHP or CRHR, and an integrity analysis was considered immaterial.

Summary of Evaluation Findings

Dudek evaluated the subject property in accordance with Section 106 and Section 15064.5 (a)(2)-(3) of the CEQA Guidelines using the criteria outlined in Section 5024.1 of the PRC and found that the subject property is not considered a historic property for the purposes of Section 106 or historical resources for the purposes of CEQA. The recommended Status Code for 18602 Altrudy Lane is 6Z.

Sacramento, CA 95816

Re: Request for Concurrence for Altrudy II Senior Apartments Project, Yorba Linda, Orange County, California

Dear Ms. Polanco:

In accordance with Section 106 of the National Historic Preservation Act (NHPA) of 1966 as amended (16 U.S.C 470f), and as required by the U.S. Department of Housing and Urban Development, we are requesting your review and comments on the determination of no historic properties affected for the Altrudy II Senior Apartments Project (Project).

Altrudy II Senior Apartments Project
18597 Altrudy Lane (Assessor Parcel Number [APN] 323-231-18) and 18602
Altrudy Lane (APN 323-231-19)
Yorba Linda, CA 92886

Undertaking: The Project would include the demolition of the existing residences on the project site and construction and operation of a 71-unit senior affordable housing community. The Project is designed with 57 one-bedroom and 14 two-bedroom units within two buildings, which would be two and three stories high, with elevator access. On-site amenities would include an entry plaza, leasing office, community center, sitting areas, and barbecue pavilion for residents. The Project includes the planting of trees and the construction of a 25-foot-wide surface parking lot north and east of the multi-unit residential building. Active and passive green open space would also be provided. The project would include a total of 72 parking spaces. Access to the site would be from Altrudy Lane, with additional street improvements as part of the project.

Area of Potential Effects: The area of potential effects (APE) is within Section 22 of Township 3S and Range 9W on the Yorba Linda, California U.S Geological Survey (USGS) 7.5-minute Series Quadrangle Map. Delineation of the APE considered the proposed project components, the horizontal limits of the APE considered the proposed project components, which include the footprint of the project site comprising 18597 Altrudy Lane (Assessor Parcel Number (APN) 323-231-18) and 18602 Altrudy Lane (APN 323-231-19), as well as the property to the direct west of the project site, 18551 Altrudy Lane (APN 323-231-26), which will be used for entrance/exit during the project's construction. The property at 18551 Altrudy Lane (APN 323-231-26) will be temporarily used during the construction of the proposed project and therefore is included in the APE. This property was not inventoried and evaluated as part of this report because it is less than 45 years old, being constructed in 2021. There is no indication that the property has achieved significance within the last 50 years and is of exceptional importance, and it was

1501 E. ST. ANDREW PLACE, 1ST FLOOR
SANTA ANA, CA 92705
PHONE: 714.480.2991
FAX: 714.480.2978

therefore not evaluated under National Register of Historic Places (NRHP) Criterion G. As such, the APE includes three total parcels.

The undertaking will include demolition of the existing buildings onsite and rough grading and over-excavation of the existing ground surface for site development. The vertical underground extent of the APE is currently unknown, but it is anticipated that ground disturbance would involve tree removals, trenching for utilities, foundation work, and grading.

Historic Property Identification Effort: Dudek conducted a records search at the California Historic Resources Information System South Central Coastal Information Center (SCCIC) on October 14, 2024. The records search indicated that 32 previous cultural resources technical investigations were conducted within 1-mile of the APE, none of which directly address or overlap with the APE. The SCCIC records search indicated that 13 cultural resources have been previously recorded within 1-mile of the APE, none of which are located within or immediately adjacent to the APE. The previously recorded cultural resources within the 1-mile radius include two prehistoric resources, one historic-era isolate, and 10 built environment resources. A review of historic aerials and historic topographic maps indicates the APE has been subject to past disturbances associated with the development of the land for agricultural, residential, and commercial uses.

Through archival research and a field survey, two built environment resources were identified in the APE. These were constructed in 1959 and 1965 and consist of residential properties.

Description of Findings: Based on the nature of the historic-era built environment resources within the APE, there is moderate potential for the inadvertent discovery of subsurface archaeological resources during earthmoving activities for the project. The two built environment resources were evaluated using the criteria of the NRHP and all of the properties are recommended not eligible for the NRHP because of a lack of historic and architectural significance.

Determination of Effect: Our investigation did not identify any historic properties within the APE. We have determined that the undertaking would result in no historic properties affected.

Your review and comments on our determination of no historic properties affected is requested. Please provide us with your response on or before 30 days of receipt of this letter.

To assist in your review, included in this packet is the Cultural Resources Inventory and Evaluation Report with confidential records search results and appended California Department of Parks and Recreation 523 form sets prepared by Dudek for the Project, as well undertaking descriptions, photographs, and maps. Should you need further information, please contact me via email at Suzanne.harder@occr.ocgov.com.

Sincerely,

Suzanne Harder, Community Development Compliance and Environmental Coordinator
OC Housing & Community Development

Enclosures

Description of Undertaking:

Address: 18597 Altrudy Lane and 18602 Altrudy Lane
Yorba Linda, CA 92886
Census Tract: 218.02
APNs: 323-231-18 and 323-231-19

Agency Official Determination: Based on our review, it is our determination that no historic properties or archaeological resources will be affected by this Project. We base these findings on:

- SCCIC records search indicating that no previously recorded cultural resources are within the Project APE
- Background research indicating past disturbances within the project APE
- Aerial imagery and site visit indicating the Project APE is currently developed with two vacant residences
- The lack of previously recorded archaeological resources within the project APE
- Archival research for built environment resources in the APE
- Field survey for built environment resources in the APE
- NRHP evaluations for built environment resources in the APE

Project Description: The proposed project would include the demolition of the existing residences on the project site and construction and operation of a 71-unit senior affordable housing community. The Project is designed with 57 one-bedroom and 14 two-bedroom units within two buildings, which would be two and three stories high, with elevator access. On-site amenities would include an entry plaza, leasing office, community center, sitting areas, and barbecue pavilion for residents. The proposed project includes the planting of trees and the construction of a 25-foot-wide surface parking lot north and east of the multi-unit residential building. Active and passive green open space would also be provided. The project would include a total of 72 parking spaces. Access to the site would be from Altrudy Lane, with additional street improvements as part of the project.

Site Information:

- **Zoning Designation:** RS Residential Suburban
- **General Plan Land Use Designation:** RM Residential Medium
- **Existing Use:** Residential (vacant)
- **Prior Use(s)/Development(s):** Agricultural

Existing Conditions and Trends: The APE are parcels containing residential properties. Adjacent land uses consist of predominantly residential, with both single-family and multifamily properties and some commercial businesses.

ATTACHMENT 16

Noise Technical Memorandum

MEMORANDUM

To: Catherine Wade, Dudek; Kristin Arakawa, Dudek
From: Nick Segovia, Dudek
Subject: Noise Technical Memorandum – Altrudy II HUD Project
Date: 11/1/2024
cc: Jim Cowan, Dudek
Attachment(s): Figure 1, Project Location
Figure 2, Noise Model Receiver Locations
Attachment A; Traffic and Rail Noise Model Input/Output Data

This technical noise memo summarizes the results of the noise analysis conducted for on-site uses of the Altrudy II Senior Apartment Project in Yorba Linda, California (see Figure 1).

1 Background

1.1 Project Description

The proposed project is located on two parcels at 18597 Altrudy Lane (APN 323-231-18) and 18602 Altrudy Lane (APN 323-231-19). The project site is currently owned by the City of Yorba Linda (City) and is occupied by two single-story dwellings with garages, single-story storage sheds, a tennis court, and a swimming pool. The project site is located at the end of Altrudy Lane and is bordered by single family residential land uses to the north and east. Multi-family housing and commercial land uses are located along the project site's southern boundary. Additional multi-family housing, the recently completed Altrudy Lane I Senior Apartments, is located along the project site's western boundary.

The proposed Altrudy II Senior Apartments project would include demolition of existing structures on the project site and construction of a new one-building 71-unit affordable senior housing community. Apartments would include 57 one-bedroom and 14 two-bedroom units, along with one unit reserved for an onsite manager.

The height and scale of the building would be limited to two and three stories, allowing the proposed project to blend into the surrounding community. The northern, southern, and western sides of the proposed development would be three-stories while the side of the building along the eastern property boundary would be two-stories to better fit with the neighboring single-family homes. The project would be accessible via Altrudy Lane and additional street improvements would be included as part of the proposed development.

Additional onsite amenities for residents would include an entry plaza, leasing office, community center, sitting areas, a dog park, parking area, and a barbeque pavilion. The onsite parking lot would include a total

of 72 parking stalls, with six reserved for individuals with mobility or sensory impairments. The parking lot would also include four stalls with access to electric vehicle charging stations. Active and passive open spaces would be included in the project design, with pedestrian walkways strategically placed throughout the site to increase connectivity between the building and the parking lot.

1.2 Noise Fundamentals and Terminology

Vibrations, traveling as waves through air from a source, exert a force perceived by the human ear as sound. Sound pressure level (referred to as sound level) is measured on a logarithmic scale in decibels (dB) that represent the fluctuation of air pressure above and below atmospheric pressure. Frequency, or pitch, is a physical characteristic of sound and is expressed in units of cycles per second or hertz (Hz). The normal frequency range of hearing for most people extends from about 20 to 20,000 Hz. The human ear is more sensitive to middle and high frequencies, especially when the noise levels are quieter. As noise levels get louder, the human ear starts to hear the frequency spectrum more evenly. To accommodate for this phenomenon, a weighting system to evaluate how loud a noise level is to a human was developed. The frequency weighting called “A” weighting is typically used for quieter noise levels, which de-emphasizes the low-frequency components of the sound in a manner similar to the response of a human ear. This A-weighted sound level is called the “noise level” and is referenced in units of dBA.

Because sound is measured on a logarithmic scale, a doubling of sound energy results in a 3 dBA increase in the noise level. Changes in a community noise level of less than 3 dB are not typically noticed by the human ear (Caltrans 2013). Changes from 3 to 5 dB may be noticed by some individuals who are extremely sensitive to changes in noise. A 5 dB increase is readily noticeable. The human ear perceives a 10 dB increase in sound level as a doubling of the sound level (i.e., 65 dBA sounds twice as loud as 55 dBA to a human ear).

An individual’s noise exposure occurs over a period of time; however, noise level is a measure of noise at a given instant in time. The equivalent continuous sound level (L_{eq}), also referred to as the average sound level, is a single number representing the fluctuating sound level in A-weighted decibels (dBA) over a specified period of time. It is a sound-energy average of the fluctuating level and is equal to a constant unchanging sound of that dB level. Community noise sources vary continuously, being the product of many noise sources at various distances, all of which constitute a relatively stable background or ambient noise environment.

Noise levels are generally higher during the daytime and early evening when traffic (including airplanes), commercial, and industrial activity is the greatest. However, noise sources experienced during nighttime hours when background levels are generally lower can be potentially more conspicuous and irritating to the receiver. In order to evaluate noise in a way that considers periodic fluctuations experienced throughout the day and night, a concept termed “community noise equivalent level” (CNEL) was developed. The CNEL scale represents a time-weighted 24-hour average noise level based on the A-weighted sound level. CNEL accounts for the increased noise sensitivity during the evening hours (7 p.m. to 10 p.m.) and nighttime hours (10 p.m. to 7 a.m.) by adding 5 dB to the average sound levels occurring during the evening hours and 10 dB to the sound levels occurring during nighttime hours. Additional noise definitions are provided below.

Ambient Noise Level. The composite of noise from all sources near and far. The normal or existing level of environmental noise at a given location.

A-Weighted Sound Level (dBA). The sound pressure level in decibels as measured on a sound level meter using the A-weighted filter network. The A-weighting filter deemphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with community responses to noise.

Community Noise Equivalent Level (CNEL). CNEL is the A-weighted equivalent continuous sound exposure level for a 24-hour period with a 10 dB adjustment added to sound levels occurring during the nighttime hours (10 p.m.–7 a.m.) and 5 dB added to the sound during the evening hours (7 p.m.–10 p.m.).

Day Night Average Sound Level (DNL or L_{dn}). Similar to the CNEL noise metric, except that no penalty is added during the evening hours (7 p.m.–10 p.m.). Typically, the CNEL and L_{dn} noise metrics vary by approximately 1 decibel or less and are often considered to be functionally equivalent.

Decibel (dB). The decibel is a unit for measuring sound pressure level and is equal to 10 times the logarithm to the base 10 of the ratio of the measured sound pressure squared to a reference pressure, which is 20 micropascals.

2 Noise Analysis Methodology

2.1 Applicable Noise Standards

Because the proposed project may receive funding from the U.S. Department of Housing and Urban Development (HUD), the noise standards specified by HUD were used for this analysis. HUD's noise standards may be found in 24 CFR Part 51, Subpart B (CFR 2013). Exterior uses with a day night average sound level (DNL) of 65 dBA or less are considered normally acceptable. Sites at which the environmental or community noise exposure exceeds 65 decibels DNL are considered noise-impacted areas. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required by HUD environmental criteria and standards contained in Subpart B (Noise Abatement and Control) of 24 CFR Part 51.

The "Normally Unacceptable" noise zone includes community noise levels from above 65 decibels to 75 decibels. Approvals in this noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

The interior noise standard is 45 dBA DNL.

2.2 Traffic Noise Modeling

The primary noise source in the project vicinity is motor vehicle traffic. The western façade of the proposed residential units would face Lakeview Avenue, the northern façade would face Oriente Drive, and the eastern façade would face Avocado Avenue. SR-90 is approximately 1,670 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 9.8 miles away. Based upon the Airport Environs Land Use Plan for Fullerton Municipal

Airport (ALUC 2019), the project site is located outside of the airport’s 60 dB CNEL noise contour. Thus, noise from the airport would have a negligible contribution to the on-site noise environment.

A noise analysis of traffic from Lakeview Avenue, Oriente Drive, and Avocado Avenue was carried out using HUD’s DNL Calculator¹, which indicated that worst-case exterior building façade noise levels would not exceed the “normally acceptable” HUD standard of 65 dBA DNL. Average Daily Traffic (ADT) volumes for Lakeview Avenue, Oriente Drive, and Avocado Avenue were retrieved from the City of Yorba Linda (2022).

3 Noise Analysis Results

The results of the traffic noise analysis for the modeled on-site receivers (shown in Figure 2) are summarized in Table 1. The modeled input and output data are provided in Attachment A. As shown in Table 1, the highest noise levels would occur at Receivers M1 through M3. M1 is representative of the outdoor dog park at the northwestern corner of the project site, closest to Lakeview Avenue and Oriente Drive, where levels are predicted to be 54 dBA DNL. Exterior traffic noise levels at Receivers M2 and M3 (facing west on the northwest and southwest corners of the project site closest to Lakeview Avenue) would also be 54 dBA DNL. Receivers M4 and M5, while closest to Avocado Avenue, are furthest from Lakeview Avenue resulting in a lower exterior DNL of 52 dBA.

Thus, the exposure from traffic noise at all building facades would not exceed the HUD exterior noise standard of 65 dBA DNL, putting these receivers in the “normally acceptable” noise range, and no enhanced building designs are required for noise.

Table 1 – Traffic Noise Level Results Summary	
Receiver #	Noise Level (DNL (dBA))
M1 - northwestern outdoor exposure	54
M2 - northwestern exposure	54
M3 - southwestern exposure	54
M4 - southeastern exposure	52
M5 - northeastern exposure	52

[Home \(/\)](#) > [Programs \(/programs/\)](#) > [Environmental Review \(/programs/environmental-review/\)](#) > [Day/Night Noise Level \(DNL\) Calculator](#)

Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the [Day/Night Noise Level Calculator Electronic Assessment Tool Overview \(/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/\)](#).

Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

Airport Noise Level

Loud Impulse Sounds? Yes No

Combined DNL for all Road and Rail sources

Combined DNL including Airport

Site DNL with Loud Impulse Sound

Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative:** Cancel the project at this location
- **Other Reasonable Alternatives:** Choose an alternate site
- **Mitigation**
 - Contact your **Field or Regional Environmental Officer** (</programs/environmental-review/hud-environmental-staff-contacts/>)
 - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
 - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
 - Incorporate natural or man-made barriers. See *The Noise Guidebook* (</resource/313/hud-noise-guidebook/>)
 - Construct noise barrier. See the **Barrier Performance Module** (</programs/environmental-review/bpm-calculator/>)

**U.S. Environmental Protection Agency
EJScreen Report**

EJScreen Community Report

This report provides environmental and socioeconomic information for user-defined areas, and combines that data into environmental justice and supplemental indexes.

Yorba Linda, CA

0.125 miles Ring around the Area
 Population: 362
 Area in square miles: 0.08

COMMUNITY INFORMATION

BREAKDOWN BY RACE

BREAKDOWN BY AGE

LIMITED ENGLISH SPEAKING BREAKDOWN

Notes: Numbers may not sum to totals due to rounding. Hispanic population can be of any race. Source: U.S. Census Bureau, American Community Survey (ACS) 2018-2022. Life expectancy data comes from the Centers for Disease Control.

LANGUAGES SPOKEN AT HOME

LANGUAGE	PERCENT
No language data available.	

Environmental Justice & Supplemental Indexes

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the [EJScreen website](#).

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

EJ INDEXES FOR THE SELECTED LOCATION

SUPPLEMENTAL INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low income, percent persons with disabilities, percent less than high school education, percent limited English speaking, and percent low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION

Report for 0.125 miles Ring around the Area

Report produced November 22, 2024 using EJScreen Version 2.3

EJScreen Environmental and Socioeconomic Indicators Data

SELECTED VARIABLES	VALUE	STATE AVERAGE	PERCENTILE IN STATE	USA AVERAGE	PERCENTILE IN USA

PARTNER WORKSHEETS

ERR 1

Airport Hazards

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Airport Hazards (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/airport-hazards>

1. To ensure compatible land use development, you must determine your site’s proximity to civil and military airports. Is your project within 15,000 feet of a military airport or 2,500 feet of a civilian airport?

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within the applicable distances to a military or civilian airport.*

Yes → *Continue to Question 2.*

2. Is your project located within a Runway Potential Zone/Clear Zone (RPZ/CZ) or Accident Potential Zone (APZ)?

Yes, project is in an APZ → *Continue to Question 3.*

Yes, project is an RPZ/CZ → *Project cannot proceed at this location.*

No, project is not within an APZ or RPZ/CZ

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within either zone.*

3. Is the project in conformance with DOD guidelines for APZ?

Yes, project is consistent with DOD guidelines without further action.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

No, the project cannot be brought into conformance with DOD guidelines and has not been approved.

→ *Project cannot proceed at this location.*

If mitigation measures have been or will be taken, explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

Click here to enter text.

→ Work with the RE/HUD to develop mitigation measures. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.

Worksheet Summary

The project site is not within 15,000 feet of a military airport or 2,500 feet of a civilian airport. The nearest municipal airport is the Fullerton Municipal Airport, approximately 9.5 miles west of the project site.

See Attachment 1.

ERR 2

Flood Insurance

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Flood Insurance (CEST and EA)

General requirements	Legislation	Regulation
Certain types of federal financial assistance may not be used in floodplains unless the community participates in National Flood Insurance Program and flood insurance is both obtained and maintained.	Flood Disaster Protection Act of 1973 as amended (42 USC 4001-4128)	24 CFR 50.4(b)(1) and 24 CFR 58.6(a) and (b); 24 CFR 55.1(b).
Reference		
https://www.hudexchange.info/environmental-review/flood-insurance		

1. Does this project involve mortgage insurance, refinance, acquisition, repairs, construction, or rehabilitation of a structure, mobile home, or insurable personal property?

No. This project does not require flood insurance or is excepted from flood insurance.
→ Continue to the Worksheet Summary.

Yes → Continue to Question 2.

2. Provide a FEMA/FIRM map showing the site.

The Federal Emergency Management Agency (FEMA) designates floodplains. The [FEMA Map Service Center](#) provides this information in the form of FEMA Flood Insurance Rate Maps (FIRMs). For projects in areas not mapped by FEMA, use the best available information to determine floodplain information. Include documentation, including a discussion of why this is the best available information for the site. Provide FEMA/FIRM floodplain zone designation, panel number, and date within your documentation.

Is the structure, part of the structure, or insurable property located in a FEMA-designated Special Flood Hazard Area?

No → Continue to the Worksheet Summary.

Yes → Continue to Question 3.

3. Is the community participating in the National Flood Insurance Program or has less than one year passed since FEMA notification of Special Flood Hazards?

Yes, the community is participating in the National Flood Insurance Program.

For loans, loan insurance or loan guarantees, flood insurance coverage must be continued for the term of the loan. For grants and other non-loan forms of financial assistance, flood insurance coverage must be continued for the life of the building irrespective of the transfer of ownership. The amount of coverage must equal the total project cost or the maximum coverage limit of the National Flood Insurance Program, whichever is less.

Provide a copy of the flood insurance policy declaration or a paid receipt for the current annual flood insurance premium and a copy of the application for flood insurance.

→ *Continue to the Worksheet Summary.*

Yes, less than one year has passed since FEMA notification of Special Flood Hazards.

If less than one year has passed since notification of Special Flood Hazards, no flood insurance is required.

→ *Continue to the Worksheet Summary.*

No. The community is not participating, or its participation has been suspended.

Federal assistance may not be used at this location. Cancel the project at this location.

Worksheet Summary

According to FEMA FIRM # 06059C0068J, effective on December 3, 2009 and accessed at <https://msc.fema.gov/portal/home>, the project site is within Zone X - Unshaded (Area of minimal flood hazard) (FEMA 2012). The project site is designated as an area outside the 100-year base flood zone and the 500-year flood zone. According to the National Flood Insurance Program's (NFIP) Community Status Book (<https://www.fema.gov/flood-insurance/work-with-nfip/community-status-book>), the project site is in Community ID 060238#, which is a participating community in the NFIP. However, because no structures or insurable properties are within a Special Flood Hazard Area, flood insurance is not required under the NFIP. Although flood insurance may not be mandatory in this instance, HUD recommends that all insurable structures maintain flood insurance under the NFIP. The project is in compliance with flood insurance requirements.

See Attachment 3.

Are formal compliance steps or mitigation required?

Yes

No

ERR 3

Air Quality

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Air Quality (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/air-quality>

- 1. Does your project include new construction or conversion of land use facilitating the development of public, commercial, or industrial facilities OR five or more dwelling units?**

Yes → *Continue to Question 2.*

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide any documents used to make your determination.*

- 2. Is your project’s air quality management district or county in non-attainment or maintenance status for any criteria pollutants?**

Follow the link below to determine compliance status of project county or air quality management district:

<http://www.epa.gov/oaqps001/greenbk/>

No, project’s county or air quality management district is in attainment status for all criteria pollutants

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

Yes, project’s management district or county is in non-attainment or maintenance status for one or more criteria pollutants. → *Continue to Question 3.*

- 3. Determine the estimated emissions levels of your project for each of those criteria pollutants that are in non-attainment or maintenance status on your project area. Will your project exceed any of the *de minimis* or *threshold* emissions levels of non-attainment and maintenance level pollutants or exceed the screening levels established by the state or air quality management district?**

No, the project will not exceed *de minimis* or threshold emissions levels or screening levels

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Explain how you determined that the project would not exceed *de minimis* or *threshold* emissions.*

Yes, the project exceeds *de minimis* emissions levels or screening levels.

→ Continue to Question 4. Explain how you determined that the project would not exceed *de minimis* or threshold emissions in the Worksheet Summary.

- 4. For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

Click here to enter text.

Worksheet Summary

CalEEMod Version 2022.1.1.28 was used to model emissions during the construction and operational phases of the proposed project. Results of the model indicate that the proposed project would not exceed the South Coast Air Quality Management District's *de minimis* emissions thresholds for criteria pollutants (VOC, NO_x, CO, SO_x, PM₁₀, and PM_{2.5}) during the construction or operational phases. In addition, the maximum unmitigated daily construction and operational emissions from the proposed project would not exceed the SCAQMD's regional construction or operation emissions thresholds. Therefore, the proposed project is in compliance with HUD guidance and the Clean Air Act.

See Attachment 4.

ERR 4

Coastal Zone Management Act

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Coastal Zone Management Act (CEST and EA)

General requirements	Legislation	Regulation
Federal assistance to applicant agencies for activities affecting any coastal use or resource is granted only when such activities are consistent with federally approved State Coastal Zone Management Act Plans.	Coastal Zone Management Act (16 USC 1451-1464), particularly section 307(c) and (d) (16 USC 1456(c) and (d))	15 CFR Part 930
References		
https://www.onecpd.info/environmental-review/coastal-zone-management		

Projects located in the following states must complete this form.

Alabama	Florida	Louisiana	Mississippi	Ohio	Texas
Alaska	Georgia	Maine	New Hampshire	Oregon	Virgin Islands
American Samona	Guam	Maryland	New Jersey	Pennsylvania	Virginia
California	Hawaii	Massachusetts	New York	Puerto Rico	Washington
Connecticut	Illinois	Michigan	North Carolina	Rhode Island	Wisconsin
Delaware	Indiana	Minnesota	Northern Mariana Islands	South Carolina	

1. Is the project located in, or does it affect, a Coastal Zone as defined in your state Coastal Management Plan?

Yes → Continue to Question 2.

No → Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within a Coastal Zone.

2. Does this project include activities that are subject to state review?

Yes → Continue to Question 3.

No → Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.

3. Has this project been determined to be consistent with the State Coastal Management Program?

Yes, with mitigation. → *Continue to Question 4.*

Yes, without mitigation. → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.*

No, project must be canceled.
Project cannot proceed at this location.

4. Explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

→ *Continue to the Worksheet Summary below. Provide documentation of the consultation (including the State Coastal Management Program letter of consistency) and any other documentation used to make your determination.*

Worksheet Summary

The proposed project site is located approximately 20 miles inland in the City of Yorba Linda, which is not within the California Coastal Zone. Therefore, the proposed undertaking is in compliance with HUD's Coastal Zone Management Act regulations, and no mitigation is warranted. The project is in compliance with the Coastal Zone Management Act.

See Attachment 5.

Are formal compliance steps or mitigation required?

Yes

No

ERR 5

Contamination and Toxic Substances

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Contamination and Toxic Substances (Multifamily and Non-Residential Properties) – PARTNER

<https://www.hudexchange.info/programs/environmental-review/site-contamination>

1. How was site contamination evaluated?¹ Select all that apply.

- ASTM Phase I ESA
- ASTM Phase II ESA
- Remediation or clean-up plan
- ASTM Vapor Encroachment Screening
- None of the above

→ Provide documentation and reports and include an explanation of how site contamination was evaluated in the Worksheet Summary.

Continue to Question 2.

2. Were any on-site or nearby toxic, hazardous, or radioactive substances found that could affect the health and safety of project occupants or conflict with the intended use of the property? (Were any recognized environmental conditions or RECs identified in a Phase I ESA and confirmed in a Phase II ESA?)

- No → Explain below.

The proposed project site is currently vacant. A Phase I Environmental Site Assessment (ESA) conducted by Integrated Property Analysis, Inc. (IPA) in August 2024 did not find any recognized environmental conditions (RECs), controlled RECs, or historical RECs on the project site. An Asbestos Inspection Report and Lead-Based Paint Inspection Report for the project site completed by Barr & Clark in December 2019 identified asbestos containing construction materials and lead-based paint in the existing building at 18597 Altrudy Lane. The Asbestos and Lead-Based Paint reports did not include testing on 18602 Altrudy Lane. Visible signs of mold growth or conditions conducive for suspect mold growth were not observed during the site reconnaissance for the Phase I ESA.

¹ HUD regulations at 24 CFR § 58.5(i)(2)(ii) require that the environmental review for multifamily housing with five or more dwelling units or non-residential property include the evaluation of previous uses of the site or other evidence of contamination on or near the site. For acquisition and new construction of multifamily and nonresidential properties HUD strongly advises the review include an ASTM Phase I Environmental Site Assessment (ESA) to meet real estate transaction standards of due diligence and to help ensure compliance with HUD’s toxic policy at 24 CFR §58.5(i) and 24 CFR §50.3(i). Also note that some HUD programs require an ASTM Phase I ESA.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

Yes → Describe the findings, including any recognized environmental conditions (RECs), in Worksheet Summary below. Continue to Question 3.

3. Can adverse environmental impacts be mitigated?

Adverse environmental impacts cannot feasibly be mitigated → HUD assistance may not be used for the project at this site. Project cannot proceed at this location.

Yes, adverse environmental impacts can be eliminated through mitigation.
→ Provide all mitigation requirements² and documents. Continue to Question 4.

4. Describe how compliance was achieved. Include any of the following that apply: State Voluntary Clean-up Program, a No Further Action letter, use of engineering controls³, or use of institutional controls⁴.

[Click here to enter text.](#)

If a remediation plan or clean-up program was necessary, which standard does it follow?

- Complete removal
 Risk-based corrective action (RBCA)

→ Continue to the Worksheet Summary.

Worksheet Summary

A Phase I Environmental Site Assessment (ESA) conducted by IPA in August 2024 did not find any recognized environmental conditions (RECs), controlled RECs, or historical RECs on the project site. An Asbestos Inspection Report and Lead-Based Paint Inspection Report for the project site completed by Barr & Clark in December 2019 identified asbestos containing construction materials and lead-based paint in the existing buildings at 18597 and 18602 Altrudy Lane.

ACCMs were identified in multiple areas throughout the existing building, including in the building's exterior stucco, roofing mastic, duct insulation material, and asbestos cement pipes. All ACCMs at 18597 Altrudy Lane were found to be in "Damaged" condition at the time of the assessment, except for the

² Mitigation requirements include all clean-up actions required by applicable federal, state, tribal, or local law. Additionally, provide, as applicable, the long-term operations and maintenance plan, Remedial Action Work Plan, and other equivalent documents.

³ Engineering controls are any physical mechanism used to contain or stabilize contamination or ensure the effectiveness of a remedial action. Engineering controls may include, without limitation, caps, covers, dikes, trenches, leachate collection systems, signs, fences, physical access controls, ground water monitoring systems and ground water containment systems including, without limitation, slurry walls and ground water pumping systems.

⁴ Institutional controls are mechanisms used to limit human activities at or near a contaminated site, or to ensure the effectiveness of the remedial action over time, when contaminants remain at a site at levels above the applicable remediation standard which would allow for unrestricted use of the property. Institutional controls may include structure, land, and natural resource use restrictions, well restriction areas, classification exception areas, deed notices, and declarations of environmental restrictions.

asbestos cement pipes, which were in good condition. All ACCMS identified at 18602 Altrudy Lane were in good condition. Materials found to contain asbestos and/or presumed to contain asbestos that could be impacted during demolition activities, by law, must first be abated and properly disposed of by a licensed asbestos abatement contractor prior to such work. ACCMs in damaged or significantly damaged condition pose the greatest risk for asbestos exposure and should be removed in accordance with SCAQMD Rule 1403 Procedure 5 (**MM-TOX-1**). No action is recommended for ACCMs in good condition as they present minimal risk for asbestos exposure.

Several painted components throughout the project site at 18597 Altrudy Lane indicated the presence of LBP at concentrations at or above the action level. These locations included in the tiled surfaces in bathroom 2 inside the property, and in the eaves, rafters, and fascia on the exterior of the property. Building components at 18602 Altrudy Lane were also found to contain lead, including the interior and exterior passageways leading to the garage door and some of the tiled surfaces in the living room and kitchen. Sampling for LBPs onsite is considered representative and any components that were not tested but are similar to components that tested positive for LBP during the assessment should be considered and treated as lead laden. The results from the LBP inspection should be provided to any individuals that may disturb the painted surfaces containing LBP onsite. All lead-laden components identified would be demolished or abated by certified lead trained personnel in accordance with all applicable federal, state, and local regulations (**MM-TOX-2**). Additional recommendations that could help minimize exposures to lead hazards are included in the mitigation measures listed in the Lead-Based Paint Inspection Report.

HUD guidance issued on January 11, 2024, requires that radon be considered in the contamination analysis for 24 CFR Parts 50 or 58. Radon is a naturally occurring, odorless, and invisible gas. Radon is a decay product of the unstable element uranium, a common constituent of soil and rock. Under certain natural conditions, the radon gas can enter surface soils and become part of the soil gas environment, which then can enter the air, including air inside of buildings. When soil gas that contains radon enters a building, radon and its decay products are either directly inhaled, or attached to dust on walls, floors and in the air, which then can be inhaled. These decay products then undergo further decay, resulting in the release of subatomic alpha particles. This alpha particle radiation can cause mutations in lung tissue which can lead to lung cancer. The risk of contracting lung cancer from radon increases with an increase in the concentration of radon in the air that is breathed by building occupants. EPA recommends mitigation for residences with radon concentrations at or above 4.0 picocuries per liter (pCi/L) of air (HUD 2021).

HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases. HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021).

In addition, per Section 9.6.3.2 of HUD's Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), radon testing is required for new construction of multifamily housing at completion of construction and prior to final endorsement. If indoor radon levels are found to exceed the EPA action level of 4.0 pCi/L, then mitigation is required. Implementation of **MM-TOX-3** would ensure compliance with HUD's radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA's threshold of 4.0 pCi/L. This ERR will be

updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy.

See Attachments 6-10.

ERR 6

Endangered Species Act

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Endangered Species Act (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/endangered-species>

1. Does the project involve any activities that have the potential to affect species or habitats?

No, the project will have No Effect due to the nature of the activities involved in the project.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.

No, the project will have No Effect based on a letter of understanding, memorandum of agreement, programmatic agreement, or checklist provided by local HUD office.

Explain your determination:

Click here to enter text.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.

Yes, the activities involved in the project have the potential to affect species and/or habitats. → Continue to Question 2.

2. Are federally listed species or designated critical habitats present in the action area?

Obtain a list of protected species from the Services. This information is available on the [FWS Website](#).

No, the project will have No Effect due to the absence of federally listed species and designated critical habitat.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation may include letters from the Services, species lists from the Services’ websites, surveys or other documents and analysis showing that there are no species in the action area.

Yes, there are federally listed species or designated critical habitats present in the action area. → Continue to Question 3.

3. Recommend one of the following effects that the project will have on federally listed species or designated critical habitat:

No Effect: Based on the specifics of both the project and any federally listed species in the action area, you have determined that the project will have absolutely no effect on listed species or critical habitat.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation should include a species list and explanation of your conclusion, and may require maps, photographs, and surveys as appropriate.*

May Affect, Not Likely to Adversely Affect: Any effects that the project may have on federally listed species or critical habitats would be beneficial, discountable, or insignificant.

→ Partner entities should not contact the Services directly. *If the RE/HUD agrees with this recommendation, they will have to complete Informal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

Likely to Adversely Affect: The project may have negative effects on one or more listed species or critical habitat.

→ Partner entities should not contact the Services directly. *If the RE/HUD agrees with this recommendation, they will have to complete Formal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

Worksheet Summary

The U.S. Fish and Wildlife Service IPaC database was used to identify federally protected species at the project site. Six species classified as endangered or threatened were identified as possibly occurring on the project site. However, given the urban and commercial setting of the site and of the surrounding project area, no federally listed special-status plant or wildlife species are expected to be present due to the lack of suitable habitat.

See Attachment 11.

ERR 7

Explosive and Flammable Hazards

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Explosive and Flammable Hazards (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/explosive-and-flammable-facilities>

- 1. Does the proposed HUD-assisted project include a hazardous facility (a facility that mainly stores, handles or processes flammable or combustible chemicals such as bulk fuel storage facilities and refineries)?**

No

→ Continue to Question 2.

Yes

Explain:

Click here to enter text.

→ Continue to Question 5.

- 2. Does this project include any of the following activities: development, construction, rehabilitation that will increase residential densities, or conversion?**

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

Yes → Continue to Question 3.

- 3. Within 1 mile of the project site, are there any current *or planned* stationary aboveground storage containers:**

- Of more than 100-gallon capacity, containing common liquid industrial fuels OR
- Of any capacity, containing hazardous liquids or gases that are not common liquid industrial fuels?

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide all documents used to make your determination.

Yes → Continue to Question 4.

- 4. Is the Separation Distance from the project acceptable based on standards in the Regulation?**

Please visit HUD’s website for information on calculating Acceptable Separation Distance.

Yes

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the “assessed tank.”

No

→ Continue to Question 6.

Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the “assessed tank.”

5. Is the hazardous facility located at an acceptable separation distance from residences and any other facility or area where people may congregate or be present?

Please visit HUD’s website for information on calculating Acceptable Separation Distance.

Yes

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

No

→ Continue to Question 6.

Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.

6. For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to make the Separation Distance acceptable, including the timeline for implementation. If negative effects cannot be mitigated, cancel the project at this location.

Note that only licensed professional engineers should design and implement blast barriers. If a barrier will be used or the project will be modified to compensate for an unacceptable separation distance, provide approval from a licensed professional engineer.

Click here to enter text.

Worksheet Summary

The following resources were reviewed to identify aboveground storage tank (AST) locations, contents, volumes, and distance from subject property:

- California Environmental Protection Agency (CalEPA) Regulated Site Portal at <https://siteportal.calepa.ca.gov/nsite/map/help>
- Appendix I to Subpart C of Parts 51- Specific Hazardous Substances at <https://www.ecfr.gov/current/title-24/subtitle-A/part-51/subpart-C>
- HUD Acceptable Separation Distance (ASD) Electronic Assessment Tool at <https://www.hudexchange.info/programs/environmental-review/asd-calculator/>

The CalEPA Regulated Site Portal website was used to identify aboveground petroleum storage and chemical storage sites within a 1-mile radius of the proposed project site. Chemicals listed for each site

were compared to a list of hazardous substances provided in Appendix I to Subpart C of Part 51 (§ 51.201). With the exception of petrochemicals, including waste oil, motor oil, oil, diesel, and petroleum, chemicals not listed in § 51.201 were considered non-hazardous. HUD's Acceptable Separation Distance (ASD) Assessment Tool was used to calculate the acceptable separation distance between the project site and the CalEPA sites that contained hazardous materials.

Of the 20 chemical storage sites within 1-mile of the project site, seven sites contained chemicals listed in § 51.201. All eight sites identified as potentially storing hazardous or flammable materials in ASTs were located adequate distances away from the project site. Maps and ASD calculations for the sites that contain materials listed 24 CFR 51C are provided in **Attachment 12**.

ERR 8

Farmlands Protection

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Farmlands Protection (CEST and EA)

General requirements	Legislation	Regulation
The Farmland Protection Policy Act (FPPA) discourages federal activities that would convert farmland to nonagricultural purposes.	Farmland Protection Policy Act of 1981 (7 U.S.C. 4201 et seq.)	7 CFR Part 658
Reference		
https://www.hudexchange.info/environmental-review/farmlands-protection		

1. Does your project include any activities, including new construction, acquisition of undeveloped land or conversion, that could convert agricultural land to a non-agricultural use?

- Yes → Continue to Question 2.
 No

Explain how you determined that agricultural land would not be converted:

The California Department of Conservation’s California Important Farmland Finder, accessed at <https://maps.conservation.ca.gov/dlrp/ciff/>, was used to identify Important Farmlands in the project area.

→ Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documentation supporting your determination.

2. Does “important farmland,” including prime farmland, unique farmland, or farmland of statewide or local importance regulated under the Farmland Protection Policy Act, occur on the project site?

You may use the links below to determine important farmland occurs on the project site:

- Utilize USDA Natural Resources Conservation Service’s (NRCS) Web Soil Survey <http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>
- Check with your city or county’s planning department and ask them to document if the project is on land regulated by the FPPA (zoning important farmland as non-agricultural does not exempt it from FPPA requirements)

- Contact NRCS at the local USDA service center <http://offices.sc.egov.usda.gov/locator/app?agency=nrsc> or your NRCS state soil scientist http://soils.usda.gov/contact/state_offices/ for assistance

No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

Yes → *Continue to Question 3.*

3. Consider alternatives to completing the project on important farmland and means of avoiding impacts to important farmland.

- Complete form **AD-1006**, "Farmland Conversion Impact Rating" http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1045394.pdf and contact the state soil scientist before sending it to the local NRCS District Conservationist. (NOTE: for corridor type projects, use instead form **NRCS-CPA-106**, "Farmland Conversion Impact Rating for Corridor Type Projects: http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1045395.pdf.)
- Work with NRCS to minimize the impact of the project on the protected farmland. When you have finished with your analysis, return a copy of form AD-1006 (or form NRCS-CPA-106 if applicable) to the USDA-NRCS State Soil Scientist or his/her designee informing them of your determination.

Document your conclusion:

Project will proceed with mitigation.

Explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.

→ *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

Project will proceed without mitigation.

Explain why mitigation will not be made here:

- *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

Worksheet Summary

The California Department of Conservation’s California Important Farmland Finder, accessed at <https://maps.conservation.ca.gov/dlrp/ciff/>, was used to identify Important Farmlands in the project area. The project site is on land designated as Urban and Built-Up Land. Furthermore, the proposed project would be built above an existing garage, and no ground-disturbing activities are required. There are no Important Farmlands on the project site or in adjacent areas. The project is in compliance with the Farmland Protection Policy.

See Attachment 13.

ERR 9

Floodplain Management

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Floodplain Management (CEST and EA)

General Requirements	Legislation	Regulation
Executive Order 11988, Floodplain Management, requires Federal activities to avoid impacts to floodplains and to avoid direct and indirect support of floodplain development to the extent practicable.	Executive Order 11988 Executive Order 13690 42 USC <u>4001-4128</u> 42 USC 5154a	24 CFR 55
Reference		
https://www.hudexchange.info/environmental-review/floodplain-management		

1. Does this project meet an exemption at [24 CFR 55.12](#) from compliance with HUD’s floodplain management regulations in Part 55 or utilize the delayed compliance date for certain Office of Housing programs?

Yes

Select the applicable citation at [24 CFR 55.12](#) and provide supporting documentation for the determination if applicable.

- a) HUD-assisted activities described in 24 CFR 58.34 and 58.35(b)
- b) HUD-assisted activities described in 24 CFR 50.19, except as otherwise indicated in § 50.19
- c) The approval of financial assistance for restoring and preserving the natural and beneficial functions and values of floodplains and wetlands, including through acquisition of such floodplain and wetland property, where a permanent covenant or comparable restriction is place on the property’s continued use for flood control, wetland protection, open space, or park land, but only if:
 - (1) The property is cleared of all existing buildings and walled structures; and
 - (2) The property is cleared of related improvements except those which:
 - (i) Are directly related to flood control, wetland protection, open space, or park land (including playgrounds and recreation areas);
 - (ii) Do not modify existing wetland areas or involve fill, paving, or other ground disturbance beyond minimal trails or paths; and
 - (iii) Are designed to be compatible with the beneficial floodplain or wetland function of the property.

- d) An action involving a repossession, receivership, foreclosure, or similar acquisition of property to protect or enforce HUD's financial interests under previously approved loans, grants, mortgage insurance, or other HUD assistance
- e) Policy-level actions described at 24 CFR 50.16 that do not involve site-based decisions
- f) A minor amendment to a previously approved action with no additional adverse impact on or from a floodplain or wetland;
- g) HUD's or the responsible entity's approval of a project site, an incidental portion of which is situated in the FFRMS floodplain (not including the floodway, LiMWA, or coastal high hazard area) but only if:
 - (1) The proposed project site does not include any existing or proposed buildings or improvements that modify or occupy the FFRMS floodplain except de minimis improvements such as recreation areas and trails; and
 - (2) the proposed project will not result in any new construction in or modifications of a wetland
- h) Issuance or use of Housing Vouchers or other forms of rental subsidy where HUD, the awarding community, or the public housing agency that administers the contract awards rental subsidies that are not project-based (i.e., do not involve site-specific subsidies)
- i) Special projects directed to the removal of material and architectural barriers that restrict the mobility of and accessibility to elderly and persons with disabilities.

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

Yes. Office of Housing programs utilizing the January 1, 2025 compliance date. These reviews must comply with the 2013 version of the Part 55 regulations. Continue to Worksheet Summary for 2013 version to upload supporting documentation.

No. *Continue to Question 2.*

2. Does the project include a Critical Action?

Yes. Describe the Critical Action. Examples of Critical Actions include projects involving hospitals, fire and police stations, nursing homes, hazardous chemical storage, storage of valuable records, and utility plants. Continue to Question 4.

No. Continue to Question 3.

3. Determine the extent of the FFRMS floodplain and provide mapping documentation in support of that determination.

The extent of the FFRMS floodplain can be determined using a Climate Informed Science Approach (CISA), 0.2 percent flood approach (0.2 PFA), or freeboard value approach (FVA). For projects in areas without available CISA data or without FEMA Flood Insurance Rate Maps (FIRMs), Flood Insurance Studies (FISs) or Advisory Base Flood Elevations (ABFEs), use the best available information to determine flood elevation. Include documentation and an explanation of why this is the best available information for the site. Note that newly constructed and substantially improved structures must be elevated to the FFRMS floodplain regardless of the approach chosen to determine the floodplain.

Select one of the following three options:

CISA for non-critical actions. If using a local tool, data, or resources, ensure that the FFRMS elevation is higher than would have been determined using the 0.2 PFA or the FVA.

0.2-PFA. Where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.

FVA. If neither CISA nor 0.2-PFA is available, for non-critical actions, the FFRMS floodplain is the area that results from adding two feet to the base flood elevation as established by the effective FIRM or FIS or—if available—a FEMA-provided preliminary or pending FIRM or FIS or advisory base flood elevations, whether regulatory or informational in nature. However, an interim or preliminary FEMA map cannot be used if it is lower than the current FIRM or FIS.

a. Does your project occur in the FFRMS floodplain?

Yes, continue to part b.

No. Review for floodplain management is complete.

b. Is your project located in any of the floodplain categories below? Select all that apply. If none apply, continue to question 7.

Floodway: *Continue to Question 5. Floodways.*

Coastal High Hazard Area (V Zone) or Limit of Moderate Wave Action (LiMWA): *Continue to Question 6. Coastal High Hazard Areas and LiMWAs.*

4. Determine the extent of the FFRMS floodplain and provide mapping documentation in support of that determination.

The extent of the FFRMS floodplain can be determined using a Climate Informed Science Approach (CISA), or the higher of the 0.2 percent flood approach (0.2 PFA), or freeboard value approach (FVA). For projects in areas without available CISA data or without FEMA Flood Insurance Rate Maps (FIRMs), Flood Insurance Studies (FISs) or Advisory Base Flood Elevations (ABFEs), use the best available information to determine flood elevation. Note that newly constructed and substantially improved structures must be elevated to the FFRMS floodplain regardless of the approach chosen to determine the floodplain.

Utilize CISA to determine the FFRMS floodplain for critical actions

CISA for Critical Actions. If using a local tool, ensure that the FFRMS elevation provided is higher than the 0.2 PFA or 3' above the base flood elevation.

OR;

Choose the higher of 0.2 PFA or FVA elevations

0.2-PFA. Where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.

FVA. For critical actions, the FFRMS floodplain is the area that results from adding three feet to the base flood elevation as established by the effective FEMA FIRM or FIS or—if available—a FEMA-provided preliminary or pending FIRM or FIS or advisory base flood elevations, whether regulatory or informational in nature. However, an interim or preliminary FEMA map cannot be used if it is lower than the current FIRM or FIS.

a. Does your project occur in the FFRMS floodplain?

Yes, continue to part b.

No. Review for floodplain management is complete.

b. Is your project located in any of the floodplain categories below? Select all that apply. If none apply, continue to question 7.

Floodway: *Continue to Question 5. Floodways.*

Coastal High Hazard Area (V Zone) or LiMWA: *Continue to Question 6. Coastal High Hazard Areas and LiMWAs.*

5. Floodways

Do the floodway exemptions at [55.8](#) or [55.21](#) apply?

Yes

The 8-Step Process is required. Document mitigation measures necessary to meet the requirements in 55.8 or 55.21. Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 7. 8-Step Process.

No

Federal assistance may not be used at this location. You must either choose an alternate site or cancel the project at this location.

6. Coastal High Hazard Area (V Zone) and LiMWAs

Do the exemptions at [55.8](#) or [55.21](#) apply?

Yes

The 8-Step Process is required. Document mitigation measures necessary to meet the requirements in 55.8 or 55.21. Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 7. 8-Step Process.

No

Federal assistance may not be used at this location. You must either choose an alternate site or cancel the project at this location.

7. 8-Step Process.

Does the 8-Step Process apply? Select one of the following options:

8-Step Process is inapplicable per 55.13.

Select the applicable citation:

- (a) HUD's mortgage insurance actions and other financial assistance for the purchasing, mortgaging, or refinancing of existing one- to four-family properties in communities that are in the Regular Program of the NFIP and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24), where the action is not a critical action and the property is not located in a floodway, coastal high hazard area, or LiMWA;
- (b) Financial assistance for minor repairs or improvements on one- to four-family properties that do not meet the thresholds for "substantial improvement" under § 55.2(b)(12);
- (c) HUD or a recipient's actions involving the disposition of individual HUD or recipient held, one- to four-family properties;
- (d) HUD guarantees under the Loan Guarantee Recovery Fund Program (24 CFR part 573), where any new construction or rehabilitation financed by the existing loan or mortgage has been completed prior to the filing of an application under the program, and the refinancing will not allow further construction or rehabilitation, nor result in any physical impacts or changes except for routine maintenance;
- (e) The approval of financial assistance to lease units within an existing structure located within the floodplain, but only if;
 - (1) The structure is located outside the floodway or coastal high hazard area, and is in a community that is in the Regular Program of the NFIP and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24); and
 - (2) The project is not a critical action; and
 - (3) The entire structure is or will be fully insured or insured to the maximum extent available under the NFIP for at least the term of the lease.
- (f) Special projects for the purpose of improving efficiency of utilities or installing renewable energy that involve the repair, rehabilitation, modernization, weatherization, or improvement of existing structures or infrastructure, do not meet the thresholds for "substantial improvement" under § 55.2(b)(12), and do not include the installation of equipment below the FFRMS floodplain elevation.

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

5-Step Process is applicable per 55.14.

Provide documentation of 5-Step Process.

Select the applicable citation:

- (a) HUD actions involving the disposition of HUD-acquired multifamily housing projects or “bulk sales” of HUD-acquired one- to four-family properties in communities that are in the Regular Program of the National Flood Insurance Program (NFIP) and in good standing (i.e., not suspended from program eligibility or placed on probation under 44 CFR 59.24).
- (b) HUD's actions under the National Housing Act (12 U.S.C. 1701) for the purchase or refinancing of existing multifamily housing projects, hospitals, nursing homes, assisted living facilities, board and care facilities, and intermediate care facilities, in communities that are in good standing under the NFIP.
- (c) HUD's or the recipient's actions under any HUD program involving the repair, rehabilitation, modernization, weatherization, or improvement of existing multifamily housing projects, hospitals, nursing homes, assisted living facilities, board and care facilities, intermediate care facilities, and one- to four-family properties, in communities that are in the Regular Program of the National Flood Insurance Program (NFIP) and are in good standing, provided that the number of units is not increased more than 20 percent, the action does not involve a conversion from nonresidential to residential land use, the action does not meet the thresholds for “substantial improvement” under § 55.2(b)(10), and the footprint of the structure and paved areas is not increased by more than 20 percent.
- (d) HUD's (or the recipient's) actions under any HUD program involving the repair, rehabilitation, modernization, weatherization, or improvement of existing nonresidential buildings and structures, in communities that are in the Regular Program of the NFIP and are in good standing, provided that the action does not meet the thresholds for “substantial improvement” under § 55.2(b)(10) and that the footprint of the structure and paved areas is not increased by more than 20 percent
- (e) HUD's or the recipient's actions under any HUD program involving the repair, rehabilitation, or replacement of existing nonstructural improvements including streets, curbs and gutters, where any increase of the total impervious surface area of the facility is de minimis. This provision does not include critical actions, levee systems, chemical storage facilities (including any tanks), wastewater facilities, or sewer lagoons.

Continue to Question 8. Mitigation.

8-Step Process applies.

Provide a completed 8-Step Process, including the early public notice and the final notice.

Continue to Question 8. Mitigation.

8. Mitigation

For the project to comply with this section, all adverse impacts must be mitigated. Explain in detail the measures that must be implemented to mitigate the impact or effect, including the timeline for implementation. Note: newly constructed and substantially improved structures within the FFRMS floodplain must be elevated to the FFRMS floodplain elevation or floodproofed, if applicable.

Which of the following if any mitigation/minimization measures have been identified for this project in the 8-Step or 5-Step Process? Select all that apply.

- Buyout and demolition or other supported clearance of floodplain structures
- Insurance purchased in excess of statutory requirement under the Flood Disaster Protection Act of 1973
- Permeable surfaces
- Natural landscape enhancements that maintain or restore natural hydrology
- Planting or restoring native plant species
- Bioswales
- Stormwater capture and reuse
- Green or vegetative roofs with drainage provisions
- Natural Resources Conservation Service conservation easements or similar easements
- Floodproofing of structures as allowable (e.g. non-residential floors)
- Elevating structures (including freeboard above the required base flood elevations)
- Levee or structural protection from flooding
- Channelizing or redefining the floodway or floodplain through a Letter of Map Revision (LOMR)

Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.

Worksheet Summary

No HUD-approved CISA maps are available for the project site; however, FEMA has mapped the 0.2% annual chance of flood (i.e., 500-year floodplain). Therefore, this analysis uses the 0.2PFA approach. According to FEMA Flood Insurance Rate Map No. 06059C0068J, effective December 3, 2009, the project site is located within unshaded Zone X, in an area of minimal flood hazard. The project site is not located within the FEMA-designated 0.2-percent-annual-chance floodplain. Therefore, based on the project location and designation as a non-critical action, the proposed action is not in the coastal or riverine FFRMS floodplain.

See Attachment 3.

Worksheet Summary for 2013 Version
Compliance Determination

Attach 'Floodplain Management Partner Worksheet' (OMB No. 2506-0177), FIRM map indicating project location, and summary of 8-step or 5-step decision making process if applicable.

Provide a clear description of your determination and a synopsis of the information that it was based on, such as:

- Map panel numbers and dates
- Names of all consulted parties and relevant consultation dates
- Names of plans or reports and relevant page numbers
- Any additional requirements specific to your region

Include all documentation supporting your findings in your submission to HUD

ERR 10

Historic Preservation

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Historic Preservation (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/historic-preservation>

Threshold

Is Section 106 review required for your project?

- No, because a Programmatic Agreement states that all activities included in this project are exempt. (See the [PA Database](#) to find applicable PAs.)

Either provide the PA itself or a link to it here. Mark the applicable exemptions or include the text here:

[Click here to enter text.](#)

→ *Continue to the Worksheet Summary.*

- No, because the project consists solely of activities included in a No Potential to Cause Effects memo or other determination [36 CFR 800.3(a)(1)].

Either provide the memo itself or a link to it here. Explain and justify the other determination here:

[Click here to enter text.](#)

→ *Continue to the Worksheet Summary.*

- Yes, because the project includes activities with potential to cause effects (direct or indirect). → *Continue to Step 1.*

The Section 106 Process

After determining the need to do a Section 106 review, HUD or the RE will initiate consultation with regulatory and other interested parties, identify and evaluate historic properties, assess effects of the project on properties listed on or eligible for the National Register of Historic Places, and resolve any adverse effects through project design modifications or mitigation.

Step 1: Initiate consultation

Step 2: Identify and evaluate historic properties

Step 3: Assess effects of the project on historic properties

Step 4: Resolve any adverse effects

Only RE or HUD staff may initiate the Section 106 consultation process. Partner entities may gather information, including from SHPO records, identify and evaluate historic properties, and make initial assessments of effects of the project on properties listed in or eligible for the National Register of Historic Place. Partners should then provide their RE or HUD with all of their analysis and documentation so that they may initiate consultation.

Step 1 - Initiate Consultation

The following parties are entitled to participate in Section 106 reviews: Advisory Council on Historic Preservation; State Historic Preservation Officers (SHPOs); federally recognized Indian tribes/Tribal Historic Preservation Officers (THPOs); Native Hawaiian Organizations (NHOs); local governments; and project grantees. The general public and individuals and organizations with a demonstrated interest in a project may participate as consulting parties at the discretion of the RE or HUD official. Participation varies with the nature and scope of a project. Refer to HUD's website for guidance on consultation, including the required timeframes for response. Consultation should begin early to enable full consideration of preservation options.

Use the [When To Consult With Tribes checklist](#) within [Notice CPD-12-006: Process for Tribal Consultation](#) to determine if the RE or HUD should invite tribes to consult on a particular project. Use the [Tribal Directory Assessment Tool \(TDAT\)](#) to identify tribes that may have an interest in the area where the project is located. Note that only HUD or the RE may initiate consultation with Tribes. Partner entities may prepare a draft letter for the RE or HUD to use to initiate consultation with tribes, but may not send the letter themselves.

List all organizations and individuals that you believe may have an interest in the project here:
State Historic Preservation Office

→ Continue to Step 2.

Step 2 - Identify and Evaluate Historic Properties

Provide a preliminary definition of the Area of Potential Effect (APE), either by entering the address(es) or providing a map depicting the APE. Attach an additional page if necessary.

18597 and 18602 Altrudy Lane
Yorba Linda, CA 92886

Gather information about known historic properties in the APE. Historic buildings, districts and archeological sites may have been identified in local, state, and national surveys and registers, local historic districts, municipal plans, town and county histories, and local history websites. If not already listed on the National Register of Historic Places, identified properties are then evaluated to see if they are eligible for the National Register. Refer to HUD's website for guidance on identifying and evaluating historic properties.

In the space below, list historic properties identified and evaluated in the APE.

Every historic property that may be affected by the project should be listed. For each historic property or district, include the National Register status, whether the SHPO has concurred with the finding, and whether information on the site is sensitive. Attach an additional page if necessary.

Click here to enter text.

Provide the documentation (survey forms, Register nominations, concurrence(s) and/or objection(s), notes, and photos) that justify your National Register Status determination.

Was a survey of historic buildings and/or archeological sites done as part of the project?

If the APE contains previously unsurveyed buildings or structures over 50 years old, or there is a likely presence of previously unsurveyed archeological sites, a survey may be necessary. For Archeological surveys, refer to HP Fact Sheet #6, [Guidance on Archeological Investigations in HUD Projects](#).

Yes → *Provide survey(s) and report(s) and continue to Step 3.*

Additional notes:

On October 24, 2024, Dudek architectural historian Katie Ahmanson, MHC, conducted an intensive-level survey of the entire APE for built resources 45 years of age or older. Due to the developed nature of the project site, Dudek did not conduct an intensive-level archaeological resources pedestrian survey of the APE. The built environment survey included an evaluation of two historic-era resources within the APE under NRHP and CRHR listing criteria. The survey concluded that neither of the subject properties is eligible for listing in the NRHP or CRHR due to a lack of significant associations and architectural merit.

No → *Continue to Step 3.*

Step 3 - Assess Effects of the Project on Historic Properties

Only properties that are listed on or eligible for the National Register of Historic Places receive further consideration under Section 106. Assess the effect(s) of the project by applying the Criteria of Adverse Effect. ([36 CFR 800.5](#)) Consider direct and indirect effects as applicable as per HUD guidance.

Choose one of the findings below to recommend to the RE or HUD.

Please note: this is a recommendation only. It is **not** the official finding, which will be made by the RE or HUD, but only your suggestion as a Partner entity.

No Historic Properties Affected

Document reason for finding:

No historic properties present.

Historic properties present, but project will have no effect upon them.

No Adverse Effect

Document reason for finding and provide any comments below.

Comments may include recommendations for mitigation, monitoring, a plan for unanticipated discoveries, etc.

Adverse Effect

Document reason for finding:

Copy and paste applicable Criteria into text box with summary and justification.

Criteria of Adverse Effect: [36 CFR 800.5](#)

[Click here to enter text.](#)

Provide any comments below:

Comments may include recommendations for avoidance, minimization, and/or mitigation. Dudek prepared a Cultural Resources Inventory and Evaluation Report for the project in November 2024 to determine if the project would impact any historic properties pursuant to Section 106 of the NHPA (**Attachment 14**). The preparation of the report included the development of an area of potential effects (APE), a records search of the California Historical Resources Information System (CHRIS), outreach to local historical societies requesting information about historic properties in the vicinity of the APE, an intensive-level survey of the APE for built resources of historic age (45 years of age or older), building development and archival research, and the development of appropriate historic contexts, and recordation and evaluation of these two historic-era properties located within the APE under National Register of Historic Places (NRHP) and California Register of Historical Resources (CRHR) listing criteria. The findings of the report are summarized as follows.

Area of Potential Effects

The APE includes two residential properties, 18597 Altrudy Lane (APN 323-231-18), constructed in 1965; and 18602 Altrudy Lane (APN 323-231-19), constructed in 1959. The APE encompasses approximately 2 acres.

Records Search

A confidential records search of the APE and a 1-mile buffer was conducted at the South Central Coastal Information Center at California State University, Fullerton to identify historic properties located within the APE that might be affected by the proposed undertaking. The records search indicated that 32 previous cultural resources technical investigations were conducted within 1 mile of the APE and 13 previously identified cultural resources have been recorded within 1 mile of the APE. None of the previously identified cultural resources are located within or adjacent to the APE.

Site Survey

On October 24, 2024, Dudek architectural historian Katie Ahmanson, MHC, conducted an intensive-level survey of the entire APE for built resources 45 years of age or older. Due to the developed nature of the project site, Dudek did not conduct an intensive-level archaeological resources pedestrian survey of the APE. The built environment survey included an evaluation of two historic-era resources within the APE under NRHP and CRHR listing criteria. The survey concluded that neither of the subject properties is eligible for listing in the NRHP or CRHR due to a lack of significant associations and architectural merit.

Determination

No historic properties were identified within or adjacent to the APE. Dudek's report recommends a finding of No Historic Properties Affected for the project under Section 106 of the NHPA. Mitigation Measures CUL-1 and CUL-2 would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations.

Consultation

Based on a search of HUD's Tribal Directory Assessment Tool (TDAT), no federally recognized tribes that may have an interest in the area where the project is located were identified. The City sent a letter to the SHPO on December 9, 2024, requesting concurrence on the finding of No Historic Properties Affected (**Attachment 15**). The SHPO did not respond within 30 days of receiving the City's request for a finding or determination. As a result, the City's consultation requirements with the SHPO are complete (see **Attachments 14-15**).

ERR 11

Noise

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Noise (EA Level Reviews) – PARTNER

<https://www.hudexchange.info/programs/environmental-review/noise-abatement-and-control>

1. What activities does your project involve? Check all that apply:

- New construction for residential use

NOTE: HUD assistance to new construction projects is generally prohibited if they are located in an Unacceptable zone, and HUD discourages assistance for new construction projects in Normally Unacceptable zones. See 24 CFR 51.101(a)(3) for further details.

→ Continue to Question 2.

- Rehabilitation of an existing residential property

NOTE: For major or substantial rehabilitation in Normally Unacceptable zones, HUD encourages mitigation to reduce levels to acceptable compliance standards. For major rehabilitation in Unacceptable zones, HUD strongly encourages mitigation to reduce levels to acceptable compliance standards. See 24 CFR 51 Subpart B for further details.

→ Continue to Question 2.

- None of the above

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

2. Complete the Preliminary Screening to identify potential noise generators in the vicinity (1000’ from a major road, 3000’ from a railroad, or 15 miles from an airport).

Indicate the findings of the Preliminary Screening below:

- There are no noise generators found within the threshold distances above.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing the location of the project relative to any noise generators.

- Noise generators were found within the threshold distances.

→ Continue to Question 3.

3. Complete the Noise Assessment Guidelines to quantify the noise exposure. Indicate the findings of the Noise Assessment below:

- Acceptable (65 decibels or less; the ceiling may be shifted to 70 decibels in circumstances described in §24 CFR 51.105(a))

Indicate noise level here: [Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide noise analysis, including noise level and data used to complete the analysis.*

Normally Unacceptable: (Above 65 decibels but not exceeding 75 decibels; the floor may be shifted to 70 decibels in circumstances described in 24 CFR 51.105(a))

Indicate noise level here:

→

If project is rehabilitation:

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

If project is new construction:

Is the project in a largely undeveloped area¹?

No

Yes → ***The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i).***

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

Unacceptable: (Above 75 decibels)

Indicate noise level here: [Click here to enter text.](#)

If project is rehabilitation:

HUD strongly encourages conversion of noise-exposed sites to land uses compatible with high noise levels. Consider converting this property to a non-residential use compatible with high noise levels.

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis, and any other relevant information.*

If project is new construction:

The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i). Work with HUD or the RE to either complete an EIS or obtain a waiver signed by the appropriate authority.

→ *Continue to Question 4.*

- 4. HUD strongly encourages mitigation be used to eliminate adverse noise impacts. Work with the RE/HUD on the development of the mitigation measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

Mitigation as follows will be implemented:

¹ A largely undeveloped area means the area within 2 miles of the project site is less than 50 percent developed with urban uses or does not have water and sewer capacity to serve the project.

→ Provide drawings, specifications, and other materials as needed to describe the project's noise mitigation measures.

Continue to the Worksheet Summary.

No mitigation is necessary.

Explain why mitigation will not be made here:

[Click here to enter text.](#)

→ *Continue to the Worksheet Summary.*

Worksheet Summary

Dudek completed a Technical Noise Memorandum for the proposed project in November 2024 to evaluate the project's consistency with HUD's noise standards. The primary noise source in the project vicinity is motor vehicle traffic. The western façade of the proposed residential units would face Lakeview Avenue, the northern façade would face Oriente Drive, and the eastern façade would face Avocado Avenue. SR-90 is approximately 1,670 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 9.5 miles away and would have a negligible contribution to the onsite noise environment at the project site.

A noise analysis of traffic from Lakeview Avenue, Oriente Drive, and Avocado Avenue was carried out using HUD's DNL Calculator, which indicated that worst-case exterior building façade noise levels would not exceed the "normally acceptable" HUD standard of 65 A-weighted decibels (dBA) DNL. Average Daily Traffic (ADT) volumes for Lakeview Avenue, Oriente Drive, and Avocado Avenue were retrieved from the City of Yorba Linda. The results of the traffic noise analysis determined that exposure from traffic noise at all building facades would not exceed the HUD exterior noise standard of 65 dBA DNL, placing noise levels at the proposed project in the "acceptable" noise range.

See Attachment 16.

ERR 12

Sole Source Aquifers

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Sole Source Aquifers (CEST and EA)

General requirements	Legislation	Regulation
The Safe Drinking Water Act of 1974 protects drinking water systems which are the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health.	Safe Drinking Water Act of 1974 (42 U.S.C. 201, 300f et seq., and 21 U.S.C. 349)	40 CFR Part 149
Reference		
https://www.hudexchange.info/environmental-review/sole-source-aquifers		

1. Does your project consist solely of acquisition, leasing, or rehabilitation of an existing building(s)?

- Yes → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below.*
- No → *Continue to Question 2.*

2. Is the project located on a sole source aquifer (SSA)¹?

- No → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination, such as a map of your project (or jurisdiction, if appropriate) in relation to the nearest SSA and its source area.*
- Yes → *Continue to Question 3.*

3. Does your region have a memorandum of understanding (MOU) or other working agreement with EPA for HUD projects impacting a sole source aquifer?

Contact your Field or Regional Environmental Officer or visit the HUD webpage at the link above to determine if an MOU or agreement exists in your area.

¹ A sole source aquifer is defined as an aquifer that supplies at least 50 percent of the drinking water consumed in the area overlying the aquifer. This includes streamflow source areas, which are upstream areas of losing streams that flow into the recharge area.

Yes → Provide the MOU or agreement as part of your supporting documentation. Continue to Question 4.

No → Continue to Question 5.

4. Does your MOU or working agreement exclude your project from further review?

Yes → Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination and document where your project fits within the MOU or agreement.

No → Continue to Question 5.

5. Will the proposed project contaminate the aquifer and create a significant hazard to public health?

Consult with your Regional EPA Office. Your consultation request should include detailed information about your proposed project and its relationship to the aquifer and associated streamflow source area. EPA will also want to know about water, storm water and waste water at the proposed project. Follow your MOU or working agreement or contact your Regional EPA office for specific information you may need to provide. EPA may request additional information if impacts to the aquifer are questionable after this information is submitted for review.

No → Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide your correspondence with the EPA and all documents used to make your determination.

Yes → Work with EPA to develop mitigation measures. If mitigation measures are approved, attach correspondence with EPA and include the mitigation measures in your environmental review documents and project contracts. If EPA determines that the project continues to pose a significant risk to the aquifer, federal financial assistance must be denied. Continue to Question 6.

6. In order to continue with the project, any threat must be mitigated, and all mitigation must be approved by the EPA. Explain in detail the proposed measures that can be implemented to mitigate for the impact or effect, including the timeline for implementation.

→ *Continue to the Worksheet Summary below. Provide documentation of the consultation (including the Managing Agency's concurrence) and any other documentation used to make your determination.*

Worksheet Summary

According to the EPA Sole Source Aquifer Locations Map, accessed at <https://www.epa.gov/dwssa/map-sole-source-aquifer-locations>, there are no sole-source aquifers in or near the project site. The proposed project is in compliance with the Safe Water Drinking Act.

See Attachment 17.

ERR 13

Wetlands

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Wetlands (CEST and EA) – Partner

<https://www.hudexchange.info/environmental-review/wetlands-protection>

1. Does this project involve new construction as defined in Executive Order 11990, expansion of a building’s footprint, or ground disturbance?

The term "new construction" includes draining, dredging, channelizing, filling, diking, impounding, and related activities and construction of any structures or facilities.

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Yes → *Continue to Question 2.*

2. Will the new construction or other ground disturbance impact a wetland as defined in E.O. 11990?

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map or any other relevant documentation to explain your determination.*

Yes → *Work with HUD or the RE to assist with the 8-Step Process.* *Continue to Question 3.*

3. Does Section 55.12 state that the 8-Step Process is not required?

No, the 8-Step Process applies.

This project will require mitigation and may require elevating structure or structures. See the link to the HUD Exchange above for information on HUD’s elevation requirements.

→ *Work with the RE/HUD to assist with the 8-Step Process. Continue to Worksheet Summary.*

5-Step Process is applicable per 55.12(a).

Provide the applicable citation at 24 CFR 55.12(a) here.

[Click here to enter text.](#)

→ *Work with the RE/HUD to assist with the 5-Step Process. This project may require mitigation or alternations. Continue to Worksheet Summary.*

8-Step Process is inapplicable per 55.12(b).

Provide the applicable citation at 24 CFR 55.12(b) here.

[Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

8-Step Process is inapplicable per 55.12(c).

Provide the applicable citation at 24 CFR 55.12(c) here.

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

Worksheet Summary

According to the National Wetlands Inventory map regulated by the U.S. Fish and Wildlife Service and accessible at <https://www.fws.gov/program/national-wetlands-inventory/wetlands-mapper>, there are no wetlands on the project site. The nearest wetland feature is a drainage ditch located approximately 0.52 miles southwest of the project site. In addition, according to the Phase I ESA, no wetland features were observed onsite or near the project site during the site reconnaissance. As a result, the proposed project is in compliance with Executive Order 11990.

See Attachment 18.

ERR 14

Wild and Scenic Rivers

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Wild and Scenic Rivers (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/wild-and-scenic-rivers>

1. Is your project within proximity of a Wild and Scenic River, Study River, or Nationwide Rivers Inventory River?

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation used to make your determination.*

Yes → *Continue to Question 2.*

2. Could the project do *any* of the following?

- Have a direct and adverse effect within Wild and Scenic River Boundaries,
- Invade the area or unreasonably diminish the river outside Wild and Scenic River Boundaries, or
- Have an adverse effect on the natural, cultural, and/or recreational values of a NRI segment.

Consult with the appropriate federal/state/local/tribal Managing Agency(s), pursuant to Section 7 of the Act, to determine if the proposed project may have an adverse effect on a Wild & Scenic River or a Study River and, if so, to determine the appropriate avoidance or mitigation measures.

Select one:

The Managing Agency has concurred that the proposed project will not alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation of the consultation (including the Managing Agency’s concurrence) and any other documentation used to make your determination.*

The Managing Agency was consulted and the proposed project may alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *The RE/HUD must work with the Managing Agency to identify mitigation measures to mitigate the impact or effect of the project on the river.*

Worksheet Summary

According to the EPA’s NEPAassist mapping tool, the project site does not contain any rivers protected under the Wild and Scenic Rivers Act. The closest protected waterway is Deep Creek, approximately 55

miles northeast of the project site. Therefore, the proposed project is in compliance with Executive Order 11990.

See Attachment 19.

ERR 15

Environmental Justice

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

Environmental Justice (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/environmental-justice>

HUD strongly encourages starting the Environmental Justice analysis only after all other laws and authorities, including Environmental Assessment factors if necessary, have been completed.

1. Were any adverse environmental impacts identified in any other compliance review portion of this project’s total environmental review?

Yes → *Continue to Question 2.*

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

2. Were these adverse environmental impacts disproportionately high for low-income and/or minority communities?

Yes

Explain:

Click here to enter text.

→ *The RE/HUD must work with the affected low-income or minority community to decide what mitigation actions, if any, will be taken. Provide any supporting documentation.*

No

Explain:

The project site currently occupied by two unoccupied single family homes and associated parking and landscaped areas and does not possess any recognized environmental conditions (RECs) or hazardous materials. Though not considered RECs, asbestos-containing construction materials (ACCMs) and lead-based paint (LBP) were identified throughout the existing building at 18597 Altrudy Lane. Prior to demolition of the existing building, ACCMs and LBPs would be removed by licensed asbestos abatement contractors and certified lead trained personnel in accordance with all applicable federal, state, and local regulations. In addition, with the implementation of best management practices required for the control of fugitive dust, erosion, and storm water at construction sites, no disproportionate impacts to low income and/or minority communities would occur as a result of impacts to air quality. As a result, potential adverse impacts would be avoided or reduced for all residents during the operational phase.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Worksheet Summary

The proposed project would demolish the existing unoccupied single-family homes located at 18597 and 18602 Altrudy Lane and construct a new affordable housing community with 71 units. Increasing affordable housing units for seniors supports the housing priorities detailed in the City's Housing Element. The proposed project, which is an infill site, would not result in any disproportionately high or adverse impacts to minority or low-income populations.

Several studies have been conducted on the potential for environmental impacts related to the project. Some of these studies identified environmental concerns and mitigation measures:

- **Air Quality:** Construction activities such as grading may cause temporary adverse impacts to air quality from fugitive dust during construction of the residential community; however, with the implementation of air quality mitigation measures required for fugitive dust required by SCQAMD Rule 403 (see **MM-AIR-1**), impacts to air quality would be minimized or avoided. Therefore, no disproportionate impacts to low income and/or minority communities would occur as a result of air quality.
- **Asbestos:** An Asbestos Inspection Report was completed by Barr & Clark Independent Environmental Testing (Barr & Clark) in December 2019. The purpose of the asbestos assessment was to identify whether ACCMs were present so that they may be properly managed prior to demolition of the structure. The assessment included the collection of physical bulk samples of suspect materials from representative locations throughout the property for submission to an independent laboratory for analysis. If asbestos was detected at any concentration within a sample of a construction material, it was concluded that the material contained asbestos. Suspect materials were also inspected visually to assess their condition. ACCMs were identified in multiple areas throughout the existing building, including in the building's exterior stucco, roofing mastic, duct insulation material, and asbestos cement pipes. All ACCMs were found to be in "Damaged" condition at the time of the assessment, except for the asbestos cement pipes, which were in "Good" condition. Materials found to contain asbestos and/or presumed to contain asbestos that could be impacted during demolition activities, by law, must first be abated and properly disposed of by a licensed asbestos abatement contractor prior to such work. ACCMs in "Damaged" or "Significantly Damaged" condition pose the greatest risk for asbestos exposure and should be removed in accordance with SCAQMD Rule 1403 Procedure 5 (**MM-TOX-1**). No action is recommended for ACCMs in "Good" condition as they present minimal risk for asbestos exposure.
- **Lead Paint:** A Lead-Based Paint Inspection Report was completed by Barr & Clark in December 2019. LBP testing at the proposed project site was conducted in accordance with Chapter 7 of the HUD Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing. Several painted components throughout the project site indicated the presence of LBP at concentrations at or above the action level. These locations included in the tiled surfaces in bathroom 2 inside the property, and in the eaves, rafters, and fascia on the exterior of the property. Sampling for LBPs onsite is considered representative and any components that were not tested but are similar to components that tested positive for LBP during the assessment should be considered and treated as lead laden. The results from the LBP inspection should be provided to any individuals that may disturb the painted surfaces containing LBP onsite. All lead-laden components identified would be demolished or abated by certified lead trained personnel in accordance with all applicable federal, state, and local regulations. Additional recommendations

that could help minimize exposures to lead hazards are included in the mitigation measures listed in the Lead-Based Paint Inspection Report (**MM-TOX-2**). In addition, the project would be required to adhere to HUD's radon requirements for new multifamily construction, including post-construction testing (**MM-TOX-3**).

- **Cultural:** The results of the Cultural Resources Inventory and Evaluation report completed by Dudek in November 2024 did not identify any cultural resources located within or adjacent to the project site. Furthermore, neither of the properties on the project site are eligible for listing in the National Register of Historic Places or California Register of Historic Places due to a lack of significant associations and architectural merit. However, mitigation measures **MM-CUL-1** (unanticipated discovery of archaeological resources) and **MM-CUL-2** (unanticipated discovery of human remains) would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations.
