# **Environmental Assessment Determinations and Compliance Findings for HUD-assisted Projects 24 CFR Part 58**

## **Project Information**

**Project Name:** Brea PSH

**Responsible Entity:** Orange County Housing and Community Development

**Grant Recipient** (if different than Responsible Entity): Jamboree Housing Corporation

**State/Local Identifier:** California

**Preparer:** Suzanne Harder  
Community Development Compliance and Environmental Coordinator

**Certifying Officer Name and Title:** Julia Bidwell  
Director  
Orange County Housing and Community Development

**Consultant** (if applicable): Dudek  
725 Front Street, Suite 400  
Santa Cruz, CA 95060

**Direct Comments to:** Suzanne Harder  
Community Development Compliance and Environmental Coordinator  
Orange County Housing and Community Development  
(714) 480-2876  
[suzanne.harder@occr.ocgov.com](mailto:suzanne.harder@occr.ocgov.com)

**Project Location:**

The Brea PSH Project (project or proposed project) is located at 323 North Brea Boulevard, Brea, CA 92821 (Assessor's Parcel Number [APN] 296-301-02) (see **Figure 1, Project Location**).

**Description of the Proposed Project** [24 CFR 50.12 & 58.32; 40 CFR 1508.25]:

The proposed project involves the construction and operation of a PSH multifamily development on a 0.437-acre vacant site owned by the City of Brea (City) proposed by Jamboree Housing Corporation (Jamboree). The project would include a total of 39 residential units, including 38 one-bedroom PSH units and 1 two-bedroom property manager's unit. The project would serve individuals experiencing homelessness with incomes at or below 30% of the Area Median Income (AMI). In-house comprehensive supportive services would be provided by Jamboree's services arm, Housing with Heart (HWH), to address various resident needs, such as mental health and substance abuse issues, life skills, and employment.

The new building would be three stories tall along the façades facing Madrona Avenue and North Brea Boulevard and would increase to four stories towards the center of the property. The first floor would contain approximately 2,318 square feet of leasing, management, and service offices; trash, maintenance, and utility/electrical rooms; and a 22-stall parking garage with vehicle ingress and egress from Madrona Avenue. A pedestrian and bike entrance would be provided from North Brea Boulevard. Residential units would be located on the second through fourth floors of the building and each floor would be equipped with a laundry room and access to trash chutes. The building would have elevator access. Shared on-site amenities would include a community room and podium open space area on the second floor (see **Figure 2, Site Plan**, and **Figure 3, Floor Plans**).

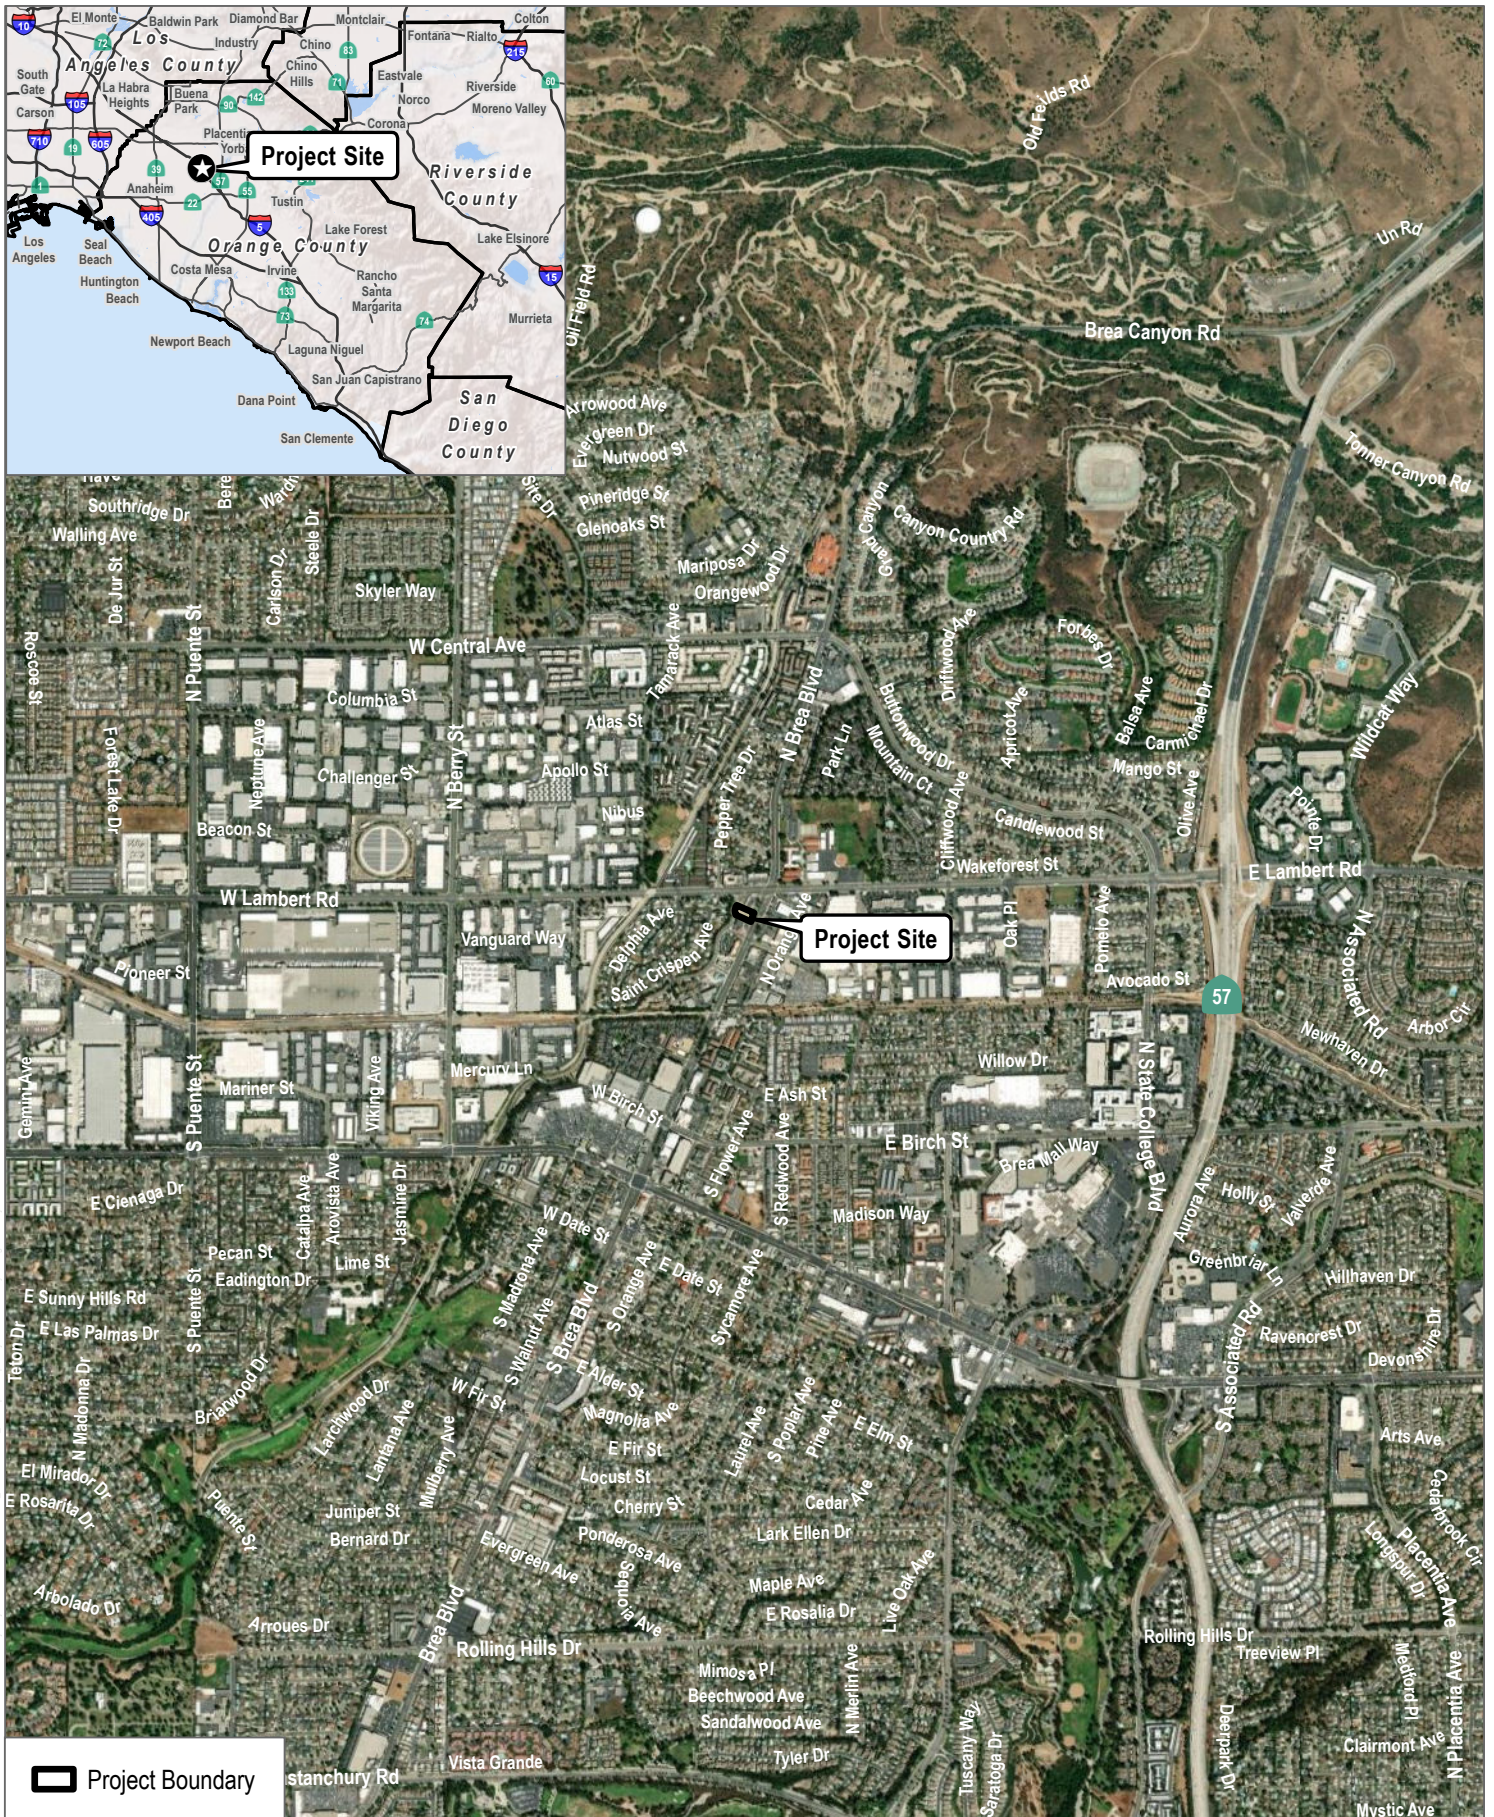

The project site currently has a zoning and General Plan land use designation of Mixed Use I, which permits a residential density of 15 dwelling units per acre (du/ac). To increase the number of units permitted on site, the Applicant has requested a Density Bonus pursuant to Government Code Section 65915 et seq., which allows 100% affordable housing projects to use an up-to-80% density bonus increase and request concessions from zoning regulations as a development incentive, to allow a residential density of 89.2 du/ac. Pursuant to the State Density Bonus Law, the project includes requested concessions for maximum building height requirements, tree replacement planting ratio requirements, and parking lot landscape percentage requirements.

**Statement of Purpose and Need for the Proposal** [40 CFR 1508.9(b)]:

The purpose of the project is to develop 38 units of affordable housing for residents earning 30% AMI in an area with high housing costs and limited affordable housing.

High housing costs, limited affordable housing supply, and scarcity of land pose challenges in the project area. HUD's most recent comprehensive housing market analysis for Anaheim-Santa Ana-Irvine Housing Market Area, which includes the entirety of Orange County including the City of Brea, dated January 1, 2022, found the rental market to be "tight" with a vacancy rate of 4.0% and a demand for 14,200 new rental units over a 3-year forecast period and only 6,000 units under construction (HUD 2022). According to the SCAG Regional Housing Needs Allocation (RHNA) Plan for 2021-2029, the City of Brea needs to add 2,365 new housing units over the planning cycle, including 669 units for the very-low income (<50% of AMI) demographic group to meet housing needs from 2021 to 2029 (SCAG 2021). The project would help address the City's housing needs in compliance with state requirements.

Site Plan

Brea PSH Project

SOURCE: ADC, 2024

**FIGURE 3**  
Floor Plans  
Brea PSH Project

**Existing Conditions and Trends** [24 CFR 58.40(a)]:

The project site is comprised of a 0.437-acre vacant parcel located at 323 North Brea Boulevard, Brea, CA 92821 (APN 296-301-02). The project site was occupied by the Randolph School as early as 1915, before being replaced by a hospital/medical office building by 1926. The medical office was demolished around 2001. The project site has remained vacant since removal of the medical building.

The project site is located in an area zoned for mixed-use development, which supports the construction of a multifamily residential building with an allowable residential density of 12.1 to 50 du/ac. Adjacent land uses consist of a car wash and automotive repair facility to the north, North Brea Boulevard and commercial and healthcare uses within the Founders Plaza Shopping Mall to the east, commercial and healthcare uses to the south, and Madrona Avenue and single-family housing to the west.

**Funding Information**

Grant Number	HUD Program	Funding Amount
N/A	38 Housing Choice Project-Based Vouchers	\$15,412,800 (20-year estimated value)
N/A	HOME Funds	\$2,337,500 (Construction-Permanent Loan)

**Estimated Total HUD Funded Amount:** \$17,750,300

**Estimated Total Project Cost** (HUD and non-HUD funds) [24 CFR 58.32(d)]: \$31,872,993

**Compliance with 24 CFR 50.4, 58.5, and 58.6 Laws and Authorities**

Record below the compliance or conformance determinations for each statute, executive order, or regulation. Provide credible, traceable, and supportive source documentation for each authority. Where applicable, complete the necessary reviews or consultations and obtain or note applicable permits of approvals. Clearly note citations, dates/names/titles of contacts, and page references. Attach additional documentation as appropriate.

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
<b>STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 and 58.6</b>		
<b>Airport Hazards</b>  24 CFR Part 51 Subpart D	Yes    No <input type="checkbox"/> <input checked="" type="checkbox"/>	HUD’s policy is to apply standards to prevent incompatible development around civil airports or military airfields, consistent with Title 24 of the Code of Federal Regulations (CFR), Part 51, Subpart D. According to the U.S. Environmental Protection Agency’s (EPA’s) NEPAassist

<b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		<p>tool (EPA 2024b), the project site is not located within 2,500 feet of a civilian airport or 15,000 feet of a military airport. The nearest civilian airport, Fullerton Municipal Airport, is located approximately 5.7 miles southwest of the project site. The nearest military airport is Los Alamitos Army Airfield, approximately 11.6 miles southwest of the project site. Therefore, the project is in compliance with airport hazards requirements (see <b>Attachment 1</b>; see <b>Environmental Review Record [ERR] 1</b>).</p>
<b>Coastal Barrier Resources</b>  Coastal Barrier Resources Act, as amended by the Coastal Barrier Improvement Act of 1990 [16 USC 3501]	Yes    No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The Coastal Barrier Resources Act (CBRA) of 1982 designated relatively undeveloped coastal barriers along the Atlantic and Gulf coasts as part of the John H. Chafee Coastal Barrier Resources System (CBRS) and made these areas ineligible for most new federal expenditures and financial assistance. The Coastal Barrier Improvement Act (CBIA) of 1990 reauthorized the CBRA; expanded the CBRS to include undeveloped coastal barriers along the Florida Keys, Great Lakes, Puerto Rico, and U.S. Virgin Islands; and added a new category of coastal barriers to the CBRS called “otherwise protected areas” (OPAs). OPAs are undeveloped coastal barriers that are within the boundaries of an area established under federal, state, or local law, or held by a qualified organization, primarily for wildlife refuge, sanctuary, recreational, or natural resource conservation purposes.</p> <p>The project is located in California. There are no units of the CBRS in California and the project site is not located within a CBRS Unit (USFWS 2024a). Therefore, the project is in compliance with the CBRA and CBIA (see <b>Attachment 2</b>).</p>
<b>Flood Insurance</b>  Flood Disaster Protection Act of 1973 and National Flood Insurance Reform Act of 1994 [42 USC 4001-4128 and 42 USC 5154a]	Yes    No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The Flood Disaster Protection Act of 1973 (42 USC 4012a) requires that projects receiving federal assistance and located in an area identified by the Federal Emergency Management Agency (FEMA) as being within a Special Flood Hazard Area (SFHA) be covered by flood insurance under the National Flood Insurance Program (NFIP). SFHAs are hazard areas that are subject to inundation by the base flood (1%-annual-chance flood) and are labeled on flood maps as zones starting with the letters A or V. Flood insurance is required by federally regulated lenders for properties within SFHAs to protect federal financial</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>investments. Non-Special Flood Hazard Areas are either areas between the limits of the base flood and the 0.2%-annual-chance flood (flood zones labeled Zone X [shaded] or B) or areas which are higher than the elevation of the 0.2%-annual-chance flood (flood zones labeled Zone X [unshaded] or Zone C). Flood insurance is available in participating communities but is not required by regulation in these zones.</p> <p>According to the FEMA Flood Insurance Rate Map (FIRM) 06059C0042J, effective December 3, 2009 (FEMA 2017), the project site is located within Zone X (unshaded), an area of minimal flood hazard. Therefore, the project site is not located within a FEMA-designated SFHA.</p> <p>According to the NFIP Community Status Book (FEMA 2024), the project site city (Brea) participates in the NFIP (Community Identification Number 060214#). Therefore, the project is in compliance with flood insurance requirements (see <b>Attachment 3</b>; see <b>ERR 2</b>).</p>
<p><b>STATUTES, EXECUTIVE ORDERS, AND REGULATIONS LISTED AT 24 CFR 50.4 &amp; 58.5</b></p>		
<p><b>Clean Air</b></p> <p>Clean Air Act, as amended, particularly section 176(c) &amp; (d); 40 CFR Parts 6, 51, 93</p>	<p>Yes    No</p> <p><input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>The Clean Air Act was implemented to remedy the damaging effects that bad air quality can have on human health and the environment and was most recently revised in 1990, when major changes were enacted. The Clean Air Act is administered by the U.S. Environmental Protection Agency (EPA), which sets National Ambient Air Quality Standards (NAAQS). NAAQS are limits on certain “criteria” air pollutants, including limits on how much of the pollutants can be in the air anywhere in the U.S. Geographic areas that are in compliance with the NAAQS are called “attainment areas,” while areas that do not meet the standards are called “nonattainment” areas. Federal de minimis thresholds refer to the minimum emission rates of criteria pollutants below which a conformity determination is not required for a project. These thresholds vary depending on the pollutant and the area’s attainment status and are provided at 40 CFR § 93.153(b)(1) and (b)(2).</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>The project site is located in the South Coast Air Basin (SoCAB), which includes all of Orange County and the urbanized portions of Los Angeles, Riverside, and San Bernardino counties, under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is designated as in extreme nonattainment with the NAAQS for ozone (O<sub>3</sub>), serious nonattainment for fine particulate matter (PM<sub>2.5</sub>), and partial nonattainment for lead (Pb) (i.e., Orange County is in attainment but Los Angeles County within the SoCAB is in nonattainment) (EPA 2024a). The SoCAB is designated as a maintenance area for coarse particulate matter (PM<sub>10</sub>), carbon monoxide (CO), nitrogen dioxide (NO<sub>2</sub>), and sulfur dioxide (SO<sub>2</sub>).</p> <p>Project construction and operation would generate criteria air pollutant emissions. Construction equipment and associated heavy-duty truck traffic generate diesel exhaust, which in turn generates air pollutant emissions. Site preparation activities produce fugitive dust emissions (PM<sub>10</sub> and PM<sub>2.5</sub>). The project would be required to comply with SCAQMD regulations for controlling fugitive dust pursuant to SCAQMD Rule 403, which requires the implementation of best available dust control measures during active operations capable of generating fugitive dust. Air pollutant emissions from construction activities on-site would vary daily as construction activity levels change. Long-term criteria air pollutant emissions would result from the operation of the proposed project. Emissions generated during operation of the proposed project would involve the use of on-road mobile vehicles, electricity, water, and landscape equipment, as well as generation of solid waste and wastewater.</p> <p>Emissions from the construction and operational phases of the project were estimated using the California Emissions Estimator Model (CalEEMod) Version 2022.1.1.28. Table 1 summarizes the CalEEMod results. As shown in Table 1, annual construction and operational criteria pollutant emissions would be below federal <i>de minimis</i> thresholds.</p>

**Table 1. Estimated Annual Construction and Operational Criteria Air Pollutant Emissions**

Criteria Pollutant	Annual Construction Emissions (tpy)	Annual Operational Emissions (tpy)	<i>De Minimis</i> Threshold (tpy)	Thresholds Exceeded?
VOC	0.12	0.26	10	No
NO <sub>x</sub>	0.30	0.14	10	No
CO	0.47	1.49	100	No
SO <sub>x</sub>	<0.01	<0.01	N/A	N/A
PM <sub>10</sub>	0.04	0.30	100	No
PM <sub>2.5</sub>	0.02	0.08	70	No

In addition, the SCAQMD has established significance thresholds to determine whether a project would have a significant adverse effect on air quality (SCAQMD 2023). As shown in Table 2 and Table 3, the maximum unmitigated daily construction and operational emissions from the proposed project would not exceed the SCAQMD’s regional construction or operation emissions thresholds.

**Table 2. Estimated Unmitigated Maximum Daily Construction Criteria Air Pollutant Emissions**

Criteria Pollutant	Maximum Daily Construction Emissions (lbs/day)	SCAQMD Significance Threshold (lbs/day)	Thresholds Exceeded?
VOC	32.2	75	No
NO <sub>x</sub>	10.2	55	No
CO	10.5	550	No
SO <sub>x</sub>	0.02	150	No
PM <sub>10</sub>	5.90	150	No
PM <sub>2.5</sub>	3.02	55	No

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>																												
		<p><b>Table 3. Estimated Unmitigated Maximum Daily Operational Criteria Air Pollutant Emissions</b></p> <table border="1" data-bbox="732 575 1416 1020"> <thead> <tr> <th>Criteria Pollutant</th> <th>Maximum Daily Operational Emissions (lbs/day)</th> <th>SCAQMD Significance Threshold (lbs/day)</th> <th>Thresholds Exceeded?</th> </tr> </thead> <tbody> <tr> <td>VOC</td> <td>1.55</td> <td>55</td> <td>No</td> </tr> <tr> <td>NO<sub>x</sub></td> <td>0.78</td> <td>55</td> <td>No</td> </tr> <tr> <td>CO</td> <td>9.74</td> <td>550</td> <td>No</td> </tr> <tr> <td>SO<sub>x</sub></td> <td>0.02</td> <td>150</td> <td>No</td> </tr> <tr> <td>PM<sub>10</sub></td> <td>1.79</td> <td>150</td> <td>No</td> </tr> <tr> <td>PM<sub>2.5</sub></td> <td>0.47</td> <td>55</td> <td>No</td> </tr> </tbody> </table> <p>In summary, project emissions would be below <i>de minimis</i> levels and SCAQMD significance thresholds, in accordance with HUD guidance. Therefore, the proposed project is in compliance with the Clean Air Act (see <b>Attachment 4</b>; see <b>ERR 3</b>).</p>	Criteria Pollutant	Maximum Daily Operational Emissions (lbs/day)	SCAQMD Significance Threshold (lbs/day)	Thresholds Exceeded? <p><b>Coastal Zone Management</b>  Coastal Zone Management Act, sections 307(c) &amp; (d)</p>	<p>Yes    No  <input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>The Coastal Zone Management Act (CZMA) of 1972 (16 USC 1451 et seq.) is administered at the federal level by the Coastal Programs Division within the National Oceanic and Atmospheric Administration’s Office of Ocean and Coastal Resource Management (NOAA-OCRM). Projects that can affect the coastal zone must be carried out in a manner consistent with the state coastal zone management program under Section 307(c) and (d) of the CZMA. Under California’s federally approved Coastal Management Program, the California Coastal Commission (CCC) manages development along the California coast (except for San Francisco Bay). The California Coastal Act is the foundation of the California Coastal Management Program, and defines the State’s coastal management goals and policies, establishes the boundaries of the State’s coastal zone, and creates governmental mechanisms for carrying out the management program. The California Coastal Act requires that individual jurisdictions adopt a</p>																												

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>Local Coastal Program (LCP) to implement the California Coastal Act at the local level. Generally, any “development” activity in the Coastal Zone requires a Coastal Development Permit from the CCC or local government with a certified LCP.</p> <p>The project site is located approximately 17 miles inland in the City of Brea. Neither the project site nor any portion of the City is located within the coastal zone (CCC 2019). As such, the project would not occur within or affect a coastal zone. Therefore, the proposed project is in compliance with the CZMA (see <b>Attachment 5</b>; see <b>ERR 4</b>).</p>
<p><b>Contamination and Toxic Substances</b></p> <p>24 CFR Part 50.3(i) &amp; 58.5(i)(2)</p>	<p>Yes    No  <input checked="" type="checkbox"/>    <input type="checkbox"/></p>	<p>HUD policy, as described in Section 50.3(i) and Section 58.5(i)(2), states the following:</p> <p>(1)... all property proposed for use in HUD programs be free of hazardous materials, contamination, toxic chemicals and gasses, and radioactive substances, where a hazard could affect the health and safety of occupants or conflict with the intended utilization of the property.</p> <p>(2) HUD environmental review of multifamily and non-residential properties shall include evaluation of previous uses of the site and other evidence of contamination on or near the site, to assure that occupants of proposed sites are not adversely affected by the hazards.</p> <p>(3) Particular attention should be given to any proposed site on or in the general proximity of such areas as dumps, landfills, industrial sites, or other locations that contain, or may have contained, hazardous wastes.</p> <p>(4) The responsible entity shall use current techniques by qualified professionals to undertake investigations determined necessary.</p> <p>Sites known or suspected to be contaminated by toxic chemicals or radioactive materials include, but are not limited to, sites: (i) listed on an EPA Superfund National Priorities or the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) List, or equivalent State list; (ii) located within 3,000 feet of a toxic or solid waste landfill site; or (iii) with an underground storage tank (UST) (which is not a residential fuel tank).</p>

<b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		<p>A Phase I Environmental Site Assessment (ESA) was completed for the project by Barr &amp; Clark, Inc. (Barr &amp; Clark) in April 2024 (<b>Attachment 6</b>). No underground storage tanks (USTs) or aboveground storage tanks (ASTs) were observed during the site reconnaissance. In addition, no significant amounts of petroleum products were observed to be in use on site. In accordance with ASTM standards, a recognized environmental condition (REC) is defined as the presence or likely presence of hazardous substances or petroleum products due to a release or likely release or posing a threat of a future release to the environment. A controlled recognized environmental condition (CREC) is defined as a REC that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls. A historical recognized environmental condition (HREC) is defined as a previous release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority meeting unrestricted use criteria without subjecting the project site to any controls. The Phase I ESA did not reveal evidence of any HRECs or CRECs on the project site. A REC was identified related to the current and previous uses of the adjacent properties to the north and east of the project site, which included listings for leaking USTs and dry-cleaning equipment utilizing hazardous solvents. Because these listings could represent a potential vapor encroachment condition they are considered a REC.</p> <p>As a result, a Phase II Subsurface Investigation Report was conducted by Partner Engineering and Science, Inc. (Partner) in August 2024 (<b>Attachment 7</b>) to assess the potential impacts from hazardous materials, volatile organic compounds (VOCs), and soil vapor impacts related to adjacent property uses.</p> <p>Soil gas samples were collected in compliance with the July 2015 Department of Toxic Substances Control (DTSC) and Los Angeles Regional Water Quality Control Board's (LARWQCB) <i>Advisory-Active Soil Gas Investigations</i>. A total of six soil borings, drilled to maximum depths of 5 feet below the ground surface, were collected from across the project site to gather</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>representative soil gas samples for analysis. Soil gas probes were then inserted into each boring location.</p> <p>The six soil samples were analyzed for VOCs in accordance with EPA Method TO-15 and were compared to the DTSC Regional Screening Levels published in the June 2015 document, <i>Office of Solid Waste and Emergency Response (OSWER) Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air</i>, which recommends a default attenuation factor of 0.03 for sub-slab soil gas and near-source exterior soil gas. The results of the analysis found that benzene, perchloroethylene, ethylbenzene, m,p-xylenes, and total xylenes were detected above residential and/or commercial/industrial soil gas screening levels (SGSLs); all remaining VOCs were detected below applicable SGSLs. The Phase II found evidence of a release of VOCs to soil gas, which has the potential to negatively impact the health of residents at the proposed affordable housing development through vapor intrusion. The lateral and vertical extent of the soil gas impacts are unknown. Therefore, to reduce soil gas impacts at the project site, the Phase II recommended implementing engineering controls to mitigate known soil gas impacts and prevent a vapor intrusion concern for residents. Implementation of <b>MM-TOX-1</b> would ensure that any adverse impacts related to vapor intrusion would be avoided.</p> <p><u>Asbestos and Lead</u></p> <p>The site, which is currently vacant and undeveloped, showed no evidence of suspect asbestos or lead-based paints (LBPs) during the site reconnaissance completed as part of the Phase I ESA. Therefore, no further action or investigation is recommended for asbestos or LBP at the subject property.</p> <p><u>Polychlorinated Biphenyls</u></p> <p>Polychlorinated biphenyls (PCBs) have been historically used in electric equipment, though their use outside of totally enclosed equipment was prohibited in 1977. Transformers and other potential PCB-containing equipment, such as indoor transformers, were not observed on the project site during the site visit. In addition, no</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>evidence of pooling liquid, stained soils, pits, ponds, or lagoons were identified on site.</p> <p><u>Radon</u></p> <p>HUD guidance issued on January 11, 2024, requires that radon be considered in the contamination analysis for 24 CFR Parts 50 or 58. Radon is a naturally occurring, odorless, and invisible gas. Radon is a decay product of the unstable element uranium, a common constituent of soil and rock. Under certain natural conditions, the radon gas can enter surface soils and become part of the soil gas environment, which then can enter the air, including air inside of buildings. When soil gas that contains radon enters a building, radon and its decay products are either directly inhaled, or attached to dust on walls, floors and in the air, which then can be inhaled. These decay products then undergo further decay, resulting in the release of subatomic alpha particles. This alpha particle radiation can cause mutations in lung tissue which can lead to lung cancer. The risk of contracting lung cancer from radon increases with an increase in the concentration of radon in the air that is breathed by building occupants. EPA recommends mitigation for residences with radon concentrations at or above 4.0 picocuries per liter (pCi/L) of air (HUD 2021).</p> <p>HUD requires new multifamily construction projects to follow radon-resistant construction requirements in accordance with standards developed by the American Association of Radon Scientists and Technologists (AARST) in collaboration with the American National Standards Institute (ANSI) for Soil Gas Control Systems in New Construction of Buildings (ANSI-AARST CC-1000-2018). This standard provides minimum requirements for construction of buildings intended for human occupancy, except for one- and two-family dwellings, to reduce occupant exposure to radon and other hazardous soil gases. HUD also requires post-construction radon testing prior to final completion inspection per Section 9.6.3.5 of the MAP Guide (HUD 2021).</p> <p>In addition, per Section 9.6.3.2 of HUD’s Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), radon testing is required for new construction of</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>multifamily housing at completion of construction and prior to final endorsement. If indoor radon levels are found to exceed the EPA action level of 4.0 pCi/L, then mitigation is required. Implementation of <b>MM-TOX-2</b> would ensure compliance with HUD’s radon requirements by requiring post-construction radon testing, followed by mitigation if testing determines that radon levels are at or above the EPA’s threshold of 4.0 pCi/L. This ERR will be updated with the radon evaluation and proof of any required mitigation when complete prior to project occupancy.</p> <p>Therefore, the proposed project is in compliance with HUD’s requirements related to contamination and toxic substances (see <b>Attachments 6 and 7</b>; see <b>ERR 5</b>).</p>
<p><b>Endangered Species</b></p> <p>Endangered Species Act of 1973, particularly section 7; 50 CFR Part 402</p>	<p>Yes    No  <input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>The Endangered Species Act of 1973, as amended, and its implementing regulations are designed to protect and recover species in danger of extinction and the ecosystems that they depend upon. When passed, the Endangered Species Act spoke specifically to the value—tangible and intangible—of conserving species for future generations. In passing the Endangered Species Act, Congress recognized a key fact that subsequent scientific understanding has only confirmed: the best way to protect species is to conserve their habitat.</p> <p>According to HUD guidance, the environmental review of a proposed project must consider potential impacts to endangered and threatened species and critical habitats. A No Effect determination can be made if none of the activities involved in the project have potential to affect species or habitats.</p> <p>Due to the urban and commercial setting surrounding the project site, no federally listed special-status plant or wildlife species are expected to be present on site. The USFWS offers consultation on threatened and endangered wildlife and plant species, as well as critical habitats, on a project-by-project basis. According to the USFWS Environmental Conservation Online System (ECOS) Information for Planning and Consultation (IPaC) (USFWS 2024b), six special-status species (one mammal,</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>one bird, one reptile, one amphibian, one insect, and one plant species) have the potential to occur on the project site:</p> <ul style="list-style-type: none"> <li>• Coastal California gnatcatcher (<i>Polioptila californica californica</i>), threatened</li> <li>• Least Bell’s vireo (<i>Vireo bellii pusillus</i>), endangered</li> <li>• Southwestern willow flycatcher (<i>Empidonax traillii extimus</i>), endangered</li> <li>• Southwestern pond turtle (<i>Actinemys pallida</i>), proposed threatened</li> <li>• Western spadefoot (<i>Spea hammondi</i>), proposed threatened</li> <li>• Monarch butterfly (<i>Danaus plexippus</i>), candidate</li> <li>• Nevin’s barberry (<i>Berberis nevinii</i>), endangered</li> </ul> <p>As stated in the IPaC report, although the general habitat ranges of these seven species overlap with the proposed project, their critical habitat areas do not intersect with the project site. Furthermore, according to the NEPA Assist Critical Habitat layer, which uses data compiled by the USFWS, the nearest designated critical habitat area (Coastal California gnatcatcher) is approximately 1 mile to the northeast of the project site (EPA 2024c). Given the urbanized nature of the project site and scarcity of on-site native vegetation, it is unlikely that any special-status species would occur onsite due to a lack of suitable habitat. Migratory birds protected under the Migratory Bird Treaty Act (MBTA) are also unlikely to be present on site due to a lack of suitable nesting sites. As such, the project would not result in potential substantial adverse effects to plant and wildlife species, or their habitats protected under the Endangered Species Act. Therefore, the proposed project is in compliance with the Endangered Species Act (see <b>Attachment 8</b>; see <b>ERR 6</b>).</p>
<p><b>Explosive and Flammable Hazards</b>  24 CFR Part 51 Subpart C</p>	<p>Yes    No  <input checked="" type="checkbox"/>    <input type="checkbox"/></p>	<p>Regulations set forth in 24 CFR Part 51 Subpart C require HUD-assisted projects to be separated from hazardous facilities that store, handle, or process hazardous substances by a distance based on the contents and volume of the facilities’ aboveground storage tank (AST), or to</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>implement mitigation measures. The requisite distances are necessary, because Project Sites that are too close to facilities handling, storing, or processing conventional fuels, hazardous gases, or chemicals of an explosive or flammable nature may expose occupants or end-users of a project to the risk of injury in the event of a fire or an explosion. The regulations apply only to ASTs with a storage capacity of at least 100 gallons.</p> <p>A search of the California Environmental Protection Agency (CalEPA) website for aboveground petroleum storage and chemical storage sites was conducted to identify aboveground flammable materials storage within a 1-mile radius of the project site (CalEPA 2024). A review of the database search results identified a total of 113 facilities within 1 mile of the project site that reported storing flammable chemicals on site, of which 75 sites contained hazardous chemicals listed in Appendix I of 24 CFR Part 51 Subpart C. Chemicals not listed in § 51.201 were considered non-hazardous. HUD’s Acceptable Separation Distance (ASD) Assessment Tool was used to calculate the minimum separation distance between the project site and these 75 CalEPA sites. When calculating the ASD, all ASTs were assumed to be unpressurized and not diked, and the maximum quantity stored was used to calculate the ASD.</p> <p>Results of the analysis identified three properties storing hazardous materials located below HUD’s minimum ASD. The properties include Crimson Pipeline Stewart Station, Kirkhill Inc., and Econo Lube N’ Tune &amp; Brake #33. The location of the ASTs, surrounding barriers, and layout of the proposed project were evaluated to determine if natural or manmade barriers are in place which could adequately mitigate impacts following U.S. Code of Federal Regulations (CFR) Title 24 Section 51.205 Subpart C, which states that application of the ASD can be eliminated or modified if a barrier is constructed surrounding the hazard, at the site of the project, or in between the potential hazard and the proposed project. Under 24 CFR 51.205(c), if there is a natural or man-made abatement between the proposed project and the AST that impedes a clear view, then the abatement can serve as mitigation. Furthermore, HUD’s Acceptable Separation Distance Guidebook (HUD</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>n.d.) similarly states that if the ASD is not achievable, but there is no clear line of sight between the proposed project and the AST, mitigation may not be required.</p> <p>Line of sight between the three commercial buildings and the project site was evaluated using Google Earth’s Street View. There is not a clear view of the ASTs stored at Crimson Pipeline Stewart Station or Kirkhill Inc. from the proposed project site, as the ASTs are located inside of the commercial buildings rather than outside. Line of sight between these two properties and the project site is further impeded by intervening buildings separating the proposed development from the ASTs. As such, the commercial building envelopes at the AST locations and the intervening buildings provide adequate separation as defined in 24 CFR 51.205(c) and as outlined in the ASD Guidebook since there is no clear line of sight from the project site to the ASTs. No additional mitigation is required for the ASTs at Crimson Pipeline Stewart Station or Kirkhill Inc.</p> <p>Econo Lube N’ Tune &amp; Brake #33 is located immediately north of the project site and shares a property boundary with the proposed project. According to CalEPA, the chemical storage site contains a waste oil AST with a storage capacity of 120-599 gallons. The distance between the AST and the northern edge of the project site is 87 feet, less than HUD’s required ASD of 223 feet. Similar to most automotive repair shops, the Econo Lube N’ Tune &amp; Brake #33 utilizes metal garage doors that remain open during business hours to allow cars to enter/exit the workshop. Since the garage doors would remain open during business hours, they would not constitute an adequate barrier to line of sight between the project site and the AST. In addition, although CalEPA records state the AST is located in the basement of the Econo Lube N’ Tune &amp; Brake #33, the AST is still visible when the car lifts in the workshop are raised to allow mechanics to perform maintenance work on vehicles. As a result, there is a clear line of sight between the proposed project site and the AST. Therefore, to protect future residents of the project from impacts related to explosive and flammable hazards, implementation of <b>MM-HAZ-1</b> is required. <b>MM-HAZ-1</b> requires that the project shall include either a protective barrier or modified</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>building design that provides protection from blast over pressure and thermal radiation anticipated from the flammable material AST(s) located on the northern adjoining property which were determined to be potential hazards to the proposed project, and to which the ASD could not be met (potential hazard). Protective barriers, building modifications, or a combination thereof (protective features) shall be designed in accordance with the HUD Barrier Design Guidance for HUD Assisted Projects near Hazardous Facilities, Guidebook 6600.G. A licensed professional civil or structural engineer shall design and oversee construction of the protective features. Both buildings and outdoor areas of the project must be protected from the potential hazard and withstand both blast overpressure and thermal radiation in accordance with 24 CFR Part 51.203. Project building plans submitted for approval shall include engineering and design specifications for the protective features and shall be reviewed and approved by the Responsible Entity.</p> <p>Therefore, with implementation of <b>MM-HAZ-1</b>, the project is in compliance with explosive and flammable hazards requirements (see <b>Attachment 9</b>; see <b>ERR 7</b>).</p>
<p><b>Farmlands Protection</b></p> <p>Farmland Protection Policy Act of 1981, particularly sections 1504(b) and 1541; 7 CFR Part 658</p>	<p>Yes    No</p> <p><input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>The importance of farmlands to the national and local economy requires the consideration of the impact of activities on land adjacent to prime or unique farmlands. The purpose of the Farmland Protection Policy Act (7 USC Section 4201 et seq., implementing regulations 7 CFR Part 658, of the Agriculture and Food Act of 1981, as amended) is to minimize the effect of federal programs on the unnecessary and irreversible conversion of farmland to nonagricultural uses.</p> <p>According to the California Department of Conservation (DOC) California Important Farmland Finder (DOC 2022), the project site and surrounding areas are designated as “Urban and Built-up Land.” The DOC defines Urban and Built-up Land as land that is “used for residential, industrial, commercial, construction, institutional, public administration, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes.” As such, the project site does not contain</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>farmland, and the project would not result in the conversion of farmland to a non-agricultural use. Therefore, the project is in compliance with the Farmland Protection Policy Act (see <b>Attachment 10</b>; see <b>ERR 8</b>).</p>
<p><b>Floodplain Management</b>  Executive Order 11988, particularly section 2(a); 24 CFR Part 55</p>	<p>Yes    No  <input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>The provisions of Executive Order 11988, Floodplain Management, require federal activities to avoid impacts to floodplains and to avoid direct and indirect support of floodplain development to the extent practicable. Executive Order 13690, Establishing a Federal Flood Risk Management Standard (FFRMS) and a Process for Further Soliciting and Considering Stakeholder Input, revised Executive Order 11988 and established a new FFRMS to address current and future flood risk, improve resiliency, and ensure that projects funded with taxpayer dollars last as long as intended. Executive Order 14030, Climate-Related Financial Risk, subsequently furthered measures to address climate-related financial risk. HUD’s regulations in 24 CFR Part 55 outline HUD’s procedures for complying with Executive Orders 11988, 13690, and 14030. The regulations define a new floodplain of concern, the FFRMS floodplain, which extends beyond the traditional 100-year floodplain to account for increased flood risk over time.</p> <p>The extent of the FFRMS floodplain can be determined using one of three approaches depending on available data and information: the Climate-Informed Science Approach (CISA), the 0.2-Percent-Annual-Chance Floodplain Approach (0.2PFA), and the Freeboard Value Approach (FVA). For non-critical actions, where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain.</p> <p>Critical actions are activities where even a slight risk of flooding would be too great, because of the potential loss of life, injury to persons, or damage to properties. This applies to hospitals, nursing homes, fire and police stations, and roads providing sole egress from flood-prone areas. Non-critical actions consist of housing, community centers, independent living for the elderly, and commercial activities. Therefore, the project is a non-critical action.</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>No HUD-approved CISA maps are available for the project site; however, FEMA has mapped the 0.2% annual chance of flood (i.e., 500-year floodplain). Therefore, this analysis uses the 0.2PFA approach. As indicated above, the project site is not located within the FEMA-designated 500-year floodplain. As such, based on the project location and designation as a non-critical action, the proposed action is not in the coastal or riverine FFRMS floodplain. Therefore, the project is in compliance with 24 CFR Part 55 (see <b>Attachment 3</b>; see <b>ERR 9</b>).</p>
<p><b>Historic Preservation</b>  National Historic Preservation Act of 1966, particularly sections 106 and 110; 36 CFR Part 800</p>	<p>Yes    No  <input checked="" type="checkbox"/>    <input type="checkbox"/></p>	<p>The National Historic Preservation Act (NHPA) (16 USC 470 et seq.) directs each federal agency, and those tribal, State, and local governments that assume federal agency responsibilities, to protect historic properties and to avoid, minimize, or mitigate possible harm that may result from agency actions. The review process, known as Section 106 review, is detailed in 36 CFR Part 800. Early consideration of historic places in project planning and full consultation with interested parties are key to effective compliance with Section 106. The State Historic Preservation Officer (SHPO) and/or Tribal Historic Preservation Officer (THPO) are primary consulting parties in the process.</p> <p>Dudek prepared a Cultural Resources Inventory and Evaluation Report for the project in December 2024 to determine if the project would impact any historic properties pursuant to Section 106 of the NHPA. The preparation of the report included the development of an area of potential effects (APE), a records search of the California Historical Resources Information System (CHRIS), a review of historic aerial imagery and historic topographic maps, and a review of the geomorphological context of the project APE. The findings of the report are summarized as follows.</p> <p><u>Area of Potential Effects</u></p> <p>The Project APE is located at 323 North Brea Boulevard (APN 269-301-02). The APE is currently undeveloped and encompasses approximately 0.437 acres.</p> <p><u>Records Search</u></p> <p>A confidential records search of the APE and a 1-mile buffer was conducted at the South-Central Coastal</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>Information Center at California State University, Fullerton to identify historic properties located within the APE that might be affected by the proposed undertaking. The records search indicated that 33 previous cultural resources technical investigations were conducted within 1 mile of the APE and 3 previously identified cultural resources have been recorded within 1 mile of the APE. None of the previously identified cultural resources are located within or adjacent to the APE.</p> <p><u>Determination</u></p> <p>No historic properties were identified within or adjacent to the APE. Dudek’s report recommends a finding of No Historic Properties Affected for the project under Section 106 of the NHPA. Implementation of <b>MM-CUL-1</b> and <b>MM-CUL-2</b> would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations.</p> <p><u>Consultation</u></p> <p>Based on a search of HUD’s Tribal Directory Assessment Tool (TDAT), no federally recognized tribes that may have an interest in the area where the project is located were identified. The County sent a letter to the SHPO on December 12, 2024, requesting concurrence on the finding of No Historic Properties Affected. The SHPO did not respond within 30 days of receiving the County’s request for a finding or determination. As a result, the County’s consultation requirements with the SHPO are complete (see <b>Attachments 11, 12, and 13</b>; see <b>ERR 10</b>).</p>
<p><b>Noise Abatement and Control</b></p> <p>Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978; 24 CFR Part 51 Subpart B</p>	<p>Yes    No  <input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>According to HUD’s noise standards set forth in 24 CFR Part 51, Subpart B, all sites whose environmental or community noise exposure exceeds the day night average sound level (DNL) of 65 decibels (dB) are considered noise-impacted areas. HUD guidance includes screening criteria to assist in evaluating a project’s consistency with the foregoing standard. Pursuant to HUD guidance, potentially significant noise generators within the vicinity of a project include major roadways, if within 1,000 feet of a project site, railroads, if within 3,000 feet, and military or Federal Aviation Administration-regulated (FAA)</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>airfields, if within 15 miles. Documentation that a project is not within the applicable distances to the foregoing noise generators demonstrates compliance with HUD’s noise standard. If within the aforementioned distance, a project may show the noise level is at or below 65 dB to demonstrate consistency with the Noise Control Act of 1972.</p> <p>Dudek prepared a Noise Technical Memorandum for the proposed project in November 2024 to evaluate the project’s consistency with HUD’s noise standards. The northern and eastern façades of the proposed residential units would face Lambert Road to the north and Brea Boulevard to the east. State Route 57 is approximately 1,400 feet away and is therefore not considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 6 miles away and would have a negligible contribution to the on-site noise environment at the project site. The primary source of noise in the project vicinity is motor vehicle traffic.</p> <p>A noise analysis of traffic noise from Lambert Road and Brea Boulevard carried out using HUD’s DNL Calculator indicated that worst-case exterior building façade noise levels would be higher than the “acceptable” HUD standard of 65 A-weighted decibels (dBA) DNL. The analysis determined that the exposure from traffic noise along the northern, northeastern, and western building façades and the podium courtyard (southern and western façades) would range from 66 to 72 dBA DNL, exceeding HUD’s exterior noise standard by up to 7 dBA. The noise level at the proposed open space/outdoor area was estimated to be 66 dBA DNL, above HUD’s acceptable noise threshold. However, the proposed open space/outdoor area is not directly exposed to traffic from Lambert Road and Brea Boulevard due to the proposed project’s southern-facing and western-facing exterior façades. The anticipated noise attenuation from the façades was estimated to be approximately 15 dBA using formulas from the Federal Transit Administration’s (FTA) Transit Noise &amp; Vibration Impact Assessment Manual (2018). As a result, traffic noise exposure at the proposed open space/outdoor area would be reduced to 51 dBA DNL and would thus be below the HUD exterior noise standard of 65 dBA DNL.</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>The highest noise levels would occur at the eastern and northeastern façades of the residential rooms closest to both Lambert Road and Brea Boulevard, which are the major sources of traffic noise in the project area. Exterior traffic noise levels at the northern exposure of the project site would be lower but would still exceed the HUD “acceptable” standard of 65 dBA DNL. Thus, the exposure from traffic noise along the northern, northeastern, and eastern building façades would exceed the HUD exterior noise standard of 65 dBA DNL by up to 7 dB, putting noise levels at these façades in the “normally unacceptable” noise range.</p> <p>As described above, 24 CFR Part 51, Subpart B states that sites at which environmental or community noise exposure exceeds the DNL of 65 dBA are considered to be noise-impacted. Approvals in the “normally unacceptable” noise zone require a minimum of 5 dB of additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 dB of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.</p> <p>Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior to interior noise reduction. All residential units will be equipped with a forced-air heating ventilation air conditioning (HVAC) unit that allows for a “windows closed” condition (i.e., windows do not need to be left open for ventilation).</p> <p>To derive the anticipated noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. Minimum interior noise reduction with typical new construction windows and doors closed was calculated for the project to be 33 dBA, resulting in interior noise levels ranging from 33 to 39 dBA, which are all below the HUD interior noise standard of 45 dBA. Therefore, the proposed project would be in</p>

<b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		compliance with 24 CFR Part 51, Subpart B (see <b>Attachment 14</b> ; see <b>ERR 11</b> ).
<b>Sole Source Aquifers</b>  Safe Drinking Water Act of 1974, as amended, particularly section 1424(e); 40 CFR Part 149	Yes    No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>Aquifers and surface water are drinking water systems that may be impacted by development. The Safe Drinking Water Act of 1974 requires protection of drinking water systems that are the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health. The EPA's Map of Sole Source Aquifer (SSA) Locations (EPA 2024d) was used to identify sole-source aquifers in the vicinity of the project site.</p> <p>The project site is not located within an area designated by the EPA as being supported by a sole source aquifer. The project site is located approximately 105 miles to the northwest of the nearest sole source aquifer, which is the Campo/Cottonwood Creek Aquifer located in San Diego County at the border of California and Mexico. As such, the project site is not located in a region that depends solely on an aquifer for access to water or located within a sole source aquifer recharge area. Thus, no impact on sole source aquifers would occur. Therefore, the proposed project is in compliance with the Safe Drinking Water Act of 1974 (see <b>Attachment 15</b>; see <b>ERR 12</b>).</p>
<b>Wetlands Protection</b>  Executive Order 11990, particularly sections 2 and 5	Yes    No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>According to the EPA, wetlands are characterized by hydrology, soils, and vegetation. The NEPAAssist Tool (EPA 2024c), which utilizes wetlands data published on the U.S. Fish and Wildlife Service's National Wetland Inventory (NWI) mapper, was used to identify wetlands on or near the project site. No wetlands are located on or near the project site. The nearest wetland feature is the Brea Canyon Channel, which is classified as a riverine feature by USFWS, that runs approximately 0.18 miles west of the proposed project site. As such, no impact to wetlands would occur. Therefore, the project is in compliance with Executive Order 11990 (see <b>Attachment 16</b>; see <b>ERR 13</b>).</p>
<b>Wild and Scenic Rivers</b>  Wild and Scenic Rivers Act of 1968, particularly section 7(b) and (c)	Yes    No <input type="checkbox"/> <input checked="" type="checkbox"/>	<p>The Wild and Scenic Rivers Act (16 USC 1271-1287) provides federal protection for certain free-flowing, wild, scenic, and recreational rivers designated as components or potential components of the National Wild and Scenic Rivers System (NWSRS). The NWSRS was created by Congress in 1968 to preserve certain rivers with outstanding</p>

<p><b>Compliance Factors:</b> Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6</p>	<p>Are formal compliance steps or mitigation required?</p>	<p>Compliance determinations</p>
		<p>natural, cultural, and recreational values in a free-flowing condition for the enjoyment of present and future generations. The EPA’s NEPAAssist tool (EPA 2024c) was used to determine the proximity of the project site to designated Wild and Scenic Rivers. The project site is not located near any NWSRS river, including designated Wild and Scenic Rivers, study rivers, and Nationwide Rivers Inventory (NRI) river segments. The closest designated Wild and Scenic River is Deep Creek, approximately 50 miles northeast of the project site. Therefore, the proposed project is in compliance with the Wild and Scenic Rivers Act (see <b>Attachment 17</b>; see <b>ERR 14</b>).</p>

**ENVIRONMENTAL JUSTICE**

<p><b>Environmental Justice</b>  Executive Order 12898</p>	<p>Yes    No  <input type="checkbox"/>    <input checked="" type="checkbox"/></p>	<p>Environmental justice means ensuring that the environment and human health are protected fairly for all people regardless of race, color, national origin, or income. EO 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, requires certain federal agencies, including HUD, to consider how federally assisted projects may have disproportionately high and adverse human health or environmental effects on minority and low-income populations.</p> <p>The EPA’s EJScreen mapping and screening tool (EPA 2024b) was used to evaluate environmental and demographic data for the project site and determine whether the project would have disproportionate adverse environmental impacts on future residents and/or the surrounding community. Environmental factors are measured using 11 environmental indicators (EI), and demographic factors are measured using seven demographic indicators (DI). An EJScreen report for the subject property was run using a 0.125-mile-radius centered around the project site (study area). According to the demographic data obtained from EJScreen, which reflects American Community Survey statistics collected by the U.S. Census Bureau from 2018 through 2022, the total population within this study area is 94. Approximately 56% of the study area’s population belongs to a minority, with 33% identifying as Hispanic, 14% as Asian, and 1% identifying as two or more races. The remaining 44% of the</p>
--	---	---

Compliance Factors: Statutes, Executive Orders, and Regulations listed at 24 CFR §58.5 and §58.6	Are formal compliance steps or mitigation required?	Compliance determinations
		<p>population is White. Results from the EJScreen assessment indicate that 23% of the study area population is low-income. Based on the factors evaluated by the EJScreen tool, the proposed project is not expected to pose any aggregate environmental justice issues based on the factors evaluated by the EJScreen tool.</p> <p>As discussed throughout this EA, substantial adverse effects related to various environmental topic areas would not occur. Thus, the proposed project, which is an infill site surrounded by multi-family and commercial uses, would not introduce new uses that could result in disproportionately high and adverse human health or environmental effects on existing minority and low-income populations in the project vicinity, nor would the project induce population growth in an area subject to health risks due to poor environmental conditions. Furthermore, the affordable housing project would have a beneficial impact of increasing the supply of affordable housing units in the study area. Therefore, the project is in compliance with EO 12898 (see <b>Attachment 18</b>; see <b>ERR 15</b>).</p>

### **Environmental Assessment Factors [24 CFR 58.40; Ref. 40 CFR 1508.8 & 1508.27]**

Recorded below is the qualitative and quantitative significance of the effects of the proposal on the character, features and resources of the project area. Each factor has been evaluated and documented, as appropriate and in proportion to its relevance to the proposed action. Verifiable source documentation has been provided and described in support of each determination, as appropriate. Credible, traceable and supportive source documentation for each authority has been provided. Where applicable, the necessary reviews or consultations have been completed and applicable permits of approvals have been obtained or noted. Citations, dates/names/titles of contacts, and page references are clear. Additional documentation is attached, as appropriate. **All conditions, attenuation or mitigation measures have been clearly identified.**

**Impact Codes:** Use an impact code from the following list to make the determination of impact for each factor.

- (1) Minor beneficial impact
- (2) No impact anticipated
- (3) Minor Adverse Impact – May require mitigation
- (4) Significant or potentially significant impact requiring avoidance or modification which may require an Environmental Impact Statement

Environmental Assessment Factor	Impact Code	Impact Evaluation
<b>LAND DEVELOPMENT</b>		
<p>Conformance with Plans / Compatible Land Use and Zoning / Scale and Urban Design</p>	<p>2</p>	<p>The project site is designated within the City’s downtown, including the Birch Street Corridor, and is zoned as Mixed Use I in the City’s General Plan.</p> <p>The Brea General Plan land use designations identify the permitted land uses and intensity of development allowed in all areas of the City. The project site is located within an assortment of detached single-family homes, multifamily housing, commercial buildings, industrial buildings, and public facilities. The project site is located in a mixed-use residential and commercial area and is bordered by lands within the city limits to the west and northeast and lands within the County’s unincorporated area to the north, southeast, and south. Adjacent land uses include single family residential to the west, general commercial to the north and east, and mixed-use to the south. The project’s scale and urban design is consistent with the surrounding uses. The Mixed Use I General Plan land use designation applies to areas primarily intended for mixed-use development. All residential uses are permitted in the Mixed Use I designation including multifamily residential, affordable housing, and PSH that contribute to the city’s mixed-use character. Developments within this zoning area prioritize easy access to transportation, aligning with the City’s goal of providing mixed-use urban environments that offer opportunities for people to live, work, and shop (City of Brea 2024b). The project is consistent with permitted uses in this land use designation and also is consistent with the policies of the General Plan.</p> <p>The maximum permitted residential density in the Mixed Use I designation is between 12.1 to 50 du/ac depending upon the zoning classification. However, the project is requesting a Density Bonus pursuant to California Government Code Sections 65915-65918, which allows 100% affordable housing projects to utilize the 80% Density Bonus increase and permits up to four concessions/incentives from the City’s development standards. The Density Bonus allows the project to exceed the General Plan density of 15 du/ac in the Mixed Use I zoning district. Pursuant to the State Density Bonus Law, the project requested concessions from the City’s private open space requirements, maximum building height requirements, tree replacement planting ratio requirements, and parking lot landscape percentage requirements.</p> <p>The project would be consistent with zoning regulations pursuant to provisions under the State Density Bonus Law, which allow for waivers and concessions to the City’s zoning regulations, the approval of which would not render the project inconsistent with City zoning requirements. The court decision in <i>Wollmer v. City of Berkeley</i> expressly held that the waivers and concessions a city was required to grant for a density-bonus-eligible project did not result</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>in planning and zoning inconsistencies, because the mandatory nature of the waivers meant that those standards were inapplicable to the project. Therefore, the project is consistent with the applicable General Plan land use designation and all applicable General Plan policies as well as with the applicable zoning designation and regulations.</p>
<p>Soil Suitability/ Slope/ Erosion/ Drainage/ Storm Water Runoff</p>	<p>2</p>	<p><u>Soil Suitability and Slope</u></p> <p>According to the Phase I ESA, which obtained soils data from the EDR report for the project, the project site consists of Myford sandy loam. The soil is described as sandy loam, sandy clay, sandy clay loam, and sandy loam to a depth from 70-79 inches. These soils are described as clayey, have a high-water table, or are shallow to an impervious layer, and good drainage. Slope measurements for the project site were obtained through analysis of the USGS 7.5 Minute Topographic Map for La Habra, CA in the Phase I ESA. According to this review, the proposed project site generally slopes towards the west/northwest.</p> <p>As required by local and state regulations and policies, a geotechnical report would be prepared for the project prior to issuance of a building permit to determine soil suitability and provide recommendations for the project, including recommendations for site grading, foundation construction, and other geotechnical considerations, which the project would be required to adhere to. Therefore, no impacts related to soil suitability or slope are anticipated.</p> <p><u>Erosion, Drainage, and Stormwater Runoff</u></p> <p>Project construction would include ground disturbance, which could result in increased potential for erosion. The State Water Resources Control Board (SWRCB) has implemented a National Pollutant Discharge Elimination System (NPDES) Construction General Permit for the State of California for projects disturbing 1 acre or more of soil, requiring dischargers to obtain coverage under the General Permit, file a Notice of Intent (NOI), and prepare a stormwater pollution prevention plan (SWPPP) prior to commencement of construction. is Because the project footprint would be less than 1 acre, it would not be subject to the NPDES permit requirements for construction site stormwater discharges and would comply with those requirements.</p> <p>However, the project would be subject to compliance with the current Orange County Drainage Area Management Plan (DAMP), which requires an Erosion and Sediment Control Plan to be prepared for a project area of less than 1 acre that would ensure that sediments from areas disturbed by construction would be retained on site using an effective combination of erosion and sediment controls to the maximum extent practicable. In addition, the Erosion and Sediment</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>Control Plan would require stockpiles of soil to be properly contained to minimize sediment transport. The project would also be subject to compliance with the Stormwater Program Local Implementation Plan (LIP) implemented by the Orange County Flood Control District (OCFCD). The LIP describes the activities that the County is undertaking in order to meet the requirements of the Santa Ana Regional Water Quality Control Board Order No. R8-2009-0030 and NPDES Permit No. CAS618030 (also known as the “Fourth Term MS4 Permit”). The LIPs outlined in the DAMP serve as the primary policy and implementation documents for compliance with the NPDES Stormwater permits. MS4 permits are issued by local RWQCBs to provide the means to address stormwater quality issues specific to the local watershed or region. MS4 permits require permittees to develop and implement a stormwater management program with the goal of reducing the discharge of pollutants to the maximum extent practicable (MEP). The project would be in accordance with the County’s Standard Conditions of Approval, as well as all in compliance with applicable LIP requirements. The proposed project and its facilities would discharge into the MS4 within the jurisdiction of Brea. Pursuant to the Orange County MS4 Permit, the City is responsible for controlling or limiting urban pollutants generated by postconstruction activities from reaching their MS4s. The proposed project is, therefore, subject to the requirements of the Orange County MS4 Permit (Santa Ana Region) as it is applied by the permittee and its co-permittees.</p> <p>Therefore, while the project is not subject to the NPDES Construction General Permit, the project must comply with OCFCD’s LIP, including LIP Section A-8, Construction Component, which includes a detailed set of erosion and sediment controls and waste and a list of best management practices (BMPs) that must be employed during construction phases to prevent or minimize the impacts of urban runoff generated by construction activities within the City of Brea on receiving water bodies. By following these prevention practices and compliance with these state and local standards, project construction would not have adverse impacts related to erosion, drainage, and stormwater runoff.</p>
Hazards and Nuisances including Site Safety and Noise	3	<p><u>Hazards and Site Safety</u></p> <p>Hazards related to contamination and toxic substances and explosives or flammable hazardous materials are discussed above. The Phase I ESA conducted by Barr &amp; Clark Inc. in April 2024 did not identify any CRECs, HRECs, asbestos, and LBP on the project site. However, a REC was identified related to potential soil vapor impacts from previous land uses on adjacent properties. A subsequent Phase II Subsurface Investigation Report completed by Partner in August 2024 confirmed the release of VOCs to soil gas,</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>which could negatively impact the health of future residents of the proposed project through vapor intrusion. As a result, implementation of <b>MM-TOX-1</b> is required to mitigate against potential vapor intrusion at the proposed residential development. As indicated above, the project site is not within a flood zone and is not subject to flood hazards.</p> <p>As discussed in the preceding Explosive and Flammable Hazards section, the project would not expose occupants to risks from nearby facilities storing hazardous materials in ASTs. The Crimson Pipeline Stewart Station, 0.88 miles away, stores crude oil and poses no significant risk. Kirkhill Inc., 0.17 miles away, stores acetone and lubricant base oil that poses no significant risk. Lastly, Econo Lube N Tune &amp; Brake #33, located 0.02 miles away, stores waste oil within thresholds, requiring mitigation measures. Hazards related to explosives or flammable hazardous materials would be addressed by <b>MM-HAZ-1</b>.</p> <p>The City, including the project site, is located within a seismically active margin between the North American and Pacific tectonic plates. The project site is not located within an Alquist-Priolo Earthquake Fault Zone, Liquefaction Zone, or Landslide Zone as designated by the California Geological Survey (CGS 2024) (see <b>Attachment 19</b>). The nearest fault to the project site is the Whittier Fault, located approximately 1.57 miles to the northeast. As a result, the project site could experience strong seismic ground shaking during an earthquake. Seismic hazards would be addressed through compliance with California building codes which are focused on prioritizing protection of life and property from seismic-related impacts and require adherence to recommendations of a project geotechnical report, including factors for seismic design. Due to its location in an urbanized area, the project site is not subject to wildfire hazards (CAL FIRE 2024) (<b>Attachment 20</b>). The project site is within the local responsibility area, approximately 1 mile southwest of Brea Canyon and the Puente Foothills, which is classified as a Very High Fire Hazard Severity Zone in the state responsibility area.</p> <p><u>Nuisances</u></p> <p>The project would not be affected by nuisances atypical of an urban environment. There are no industrial uses nearby that would generate substantial odors, fumes, smoke, or other nuisances affecting the project site. It is possible that during construction of the project, construction traffic, noise, dust, and vapor encroachment could be considered a nuisance to the construction crew or immediate neighbors; however, any such nuisances would be temporary. As discussed in the Air Quality section above, The project would be required to comply with SCAQMD regulations for controlling fugitive dust pursuant to SCAQMD Rule 403, which</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>requires the implementation of best available dust control measures during active operations capable of generating fugitive dust, to control fugitive dust emissions from project construction.</p> <p><u>Noise</u></p> <p>The proposed project is not a noise-generating facility. Noise generated by project operations would be similar to existing conditions and would be typical of other multi-family residential uses in the City. Although the project would involve construction noise near sensitive receptors such as residential uses, construction noise would be temporary, resulting in intermittent increases in ambient noise levels which would fluctuate depending on the particular construction phase. Pursuant to Chapter 8.20, Noise Control, of the City’s Municipal Code, construction activities would be restricted to the daytime hours between 7:00 a.m. and 7:00 p.m. on Monday through Saturday. Construction is not allowed on Sundays or federal holidays. The project would not require nighttime construction or construction on weekends or holidays (City of Brea 2024c).</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
<b>SOCIOECONOMIC</b>		
Employment and Income Patterns	1	<p>Project construction would generate a limited number of temporary construction jobs and operation would generate a nominal number of permanent jobs (e.g., management, clerical, and janitorial jobs), which could result in a minor increase in per capita income. Construction activity could result in direct economic effects related to increased spending on construction materials, equipment, and services. The magnitude of the economic benefits of construction spending to the City’s economy would depend on the proportion of employment, goods, and services procured from local residents and businesses and would likely have a relatively minor benefit on the City’s economy.</p>
Demographic Character Changes, Displacement	2	<p>The proposed project would not have an adverse impact on demographic character or result in the displacement of existing businesses or individuals. The project would occur on land that has been vacant and undeveloped since at least 2001; therefore, no existing residents or businesses would be displaced. Since the immediate neighborhood bordering the site is a mixture of residential uses including single-family residential, multi-family residential, and commercial uses; as well as industrial uses, the proposed development would maintain existing demographic character.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
Environmental Justice	1	<p>Many of the workers that comprise the City’s workforce earn modest incomes, making it challenging to afford to live and work in Brea. According to the City’s Housing Element 2021-2029 (6<sup>th</sup> Cycle), extremely low-income (ELI) households, which earn less than 30% AMI, comprise approximately 10% of the City’s households and have significant housing needs. Comprehensive Housing Affordability Strategy data compiled by HUD determined that 76% of the City’s ELI households are spending more than half their income towards housing, and 58% of the City’s ELI households are renters, a group particularly vulnerable to rising rents. Furthermore, according to the City’s Housing Element, the level of poverty in Brea has increased slightly over the past two decades. Approximately 7% of individuals and were living in poverty within the City in 2019, compared to only 5% in 1999. Families (with and without children) in the City experienced a similar trend with approximately 5% of families living in poverty in 2019, compared to only 3% in 1999.</p> <p>The proposed project would have a beneficial impact on the City’s low-income population by providing affordable housing to very-low-income families in the southwest corner of the City (west of Brea Boulevard and south of Lambert Road), which has the highest concentration of people living in poverty (8.4% -16%) (City of Brea 2021a). As discussed above, based on the EJSscreen assessment for the project site, regardless of the population group served by the proposed development, the local population would not be affected disproportionately by environmental issues.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
<b>COMMUNITY FACILITIES AND SERVICES</b>		
Educational and Cultural Facilities	2	<p><u>Educational Facilities</u></p> <p>The project would include 38 one-bedroom units to provide affordable housing for individuals and families. While families with children could be housed at the proposed development, the number of school-aged living at the project is expected to be negligible given the small size of the project and the fact that the project would provide 1-bedroom apartments. School-aged children would likely attend the schools of residence for the project address. The project site is within the Brea Olinda Unified School District (BOUSD) The schools that serve the project site are:</p> <ul style="list-style-type: none"> <li>• Laurel Elementary School, located at 200 S Flower Avenue, CA, approximately 0.7 miles to the south</li> </ul>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<ul style="list-style-type: none"> <li>• Brea Junior High School, located N Brea Blvd, Brea, CA, approximately 0.2 miles to the northwest</li> <li>• Brea Olinda High School, located at 798 Wildcat Way, Brea, CA, approximately 1.5 miles to the northeast</li> </ul> <p>As of the 2022-2023 school year, Laurel Elementary School had an enrollment of 447 students, Brea Junior High School had 907 students, and Brea Olinda High had 1,681 students (CDE 2024). Schools serving the project would have the capacity to accommodate any school-aged children potentially living at the new affordable housing community.</p> <p><u>Cultural Facilities</u></p> <p>Cultural facilities include publicly accessible buildings, structures, and establishments that are used primarily for the performance, exhibition, or benefit of arts and heritage activities, including, but not limited to, performing arts, visual arts, heritage and cultural endeavors. Numerous cultural facilities would be accessible to project occupants in the immediate project area and beyond within Orange County, including cinemas, galleries, libraries, museums, theaters, and stadiums.</p> <p>Cultural facilities near the project site include the Brea Museum and Historical Society approximately 1.1 miles north, and Lagos De Moreno Park, approximately 0.7 miles northeast of the project site. Brea Library, located at 1 Civic Center Circle, is located approximately 1.3 miles east of the project site. The project would result in an incremental increase in demand for cultural facilities. However, as an affordable housing project, the project would be expected to serve existing area residents by addressing existing unmet needs for rental assistance in the project area, rather than result in an influx of new residents. Furthermore, due to the relatively small project size, any incremental increase in demand would not exceed the capacity of existing facilities.</p> <p>Brea showcases an array of talent through its art galleries, museums, festivals, and outdoor theater performances. Premier cultural events like the shows at Curtis Theatre, Brea’s County Fair, Concerts in the Park, Brea’s fest, Pet Expo, Family film events, Brea Bonanza musical Festival and others draw visitors to this vibrant, eclectic area. The city offers countless cultural events and venues offering live music, outdoor theater and more. Therefore, there are adequate cultural facilities in the City and surrounding areas of the County to accommodate any potential increased usage generated by the project.</p>
Commercial Facilities	1	<p>No adverse impacts to nearby commercial facilities are anticipated. The project site is located along the Brea Boulevard commercial corridor and would be potentially beneficial to nearby businesses as a result of increased business. Additionally, placing residents in</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		more affordable housing provides more disposable income for spending on non-housing-related goods and services.
Health Care and Social Services	2	<p><u>Health Care</u></p> <p>Because the proposed project is relatively small in size and would likely serve existing area residents, it is not anticipated to significantly increase demand for health care services in the area. Sufficient health care is available in the surrounding community to handle any potential increase in demand. Healthcare facilities near the project site include the following:</p> <ul style="list-style-type: none"> <li>• UCI Health- Brea Outpatient Center, approximately 1 mile north of the project site at 380 W Central Ave Suite 400, Brea, CA 92821</li> <li>• CareMore, approximately 1 mile southeast of the project site at 380 W Central Ave Ste. 230, Brea, CA 92821</li> <li>• Brea Urgent Care, approximately 1 mile north of the project site at 395 W Central Ave, Brea, CA 92821</li> <li>• St. Jude Heritage Primary Care-Brea, approximately 3.2 miles southwest of the project site at 101 E Valencia Mesa Dr, Fullerton, CA 92835</li> <li>• Providence Brea Center for Health Promotion approximately 3.2 miles southwest of the project site at 101 E Valencia Mesa Dr, Fullerton, CA 92835</li> </ul> <p>Numerous other smaller health care facilities including clinics and specialty services are also located in the area. Thus, the project would not be expected to have adverse impacts on health care services.</p> <p><u>Social Services</u></p> <p>Social services are offered by a wide variety of both public and private non-profit agencies in the City of Brea and broader community within Orange County. These agencies provide a variety of services to residents including benefits enrollment, connection to other community services such as health care, education/vocational training and career development, harm reduction strategies, veteran’s services, child protective services, foster care, nutrition assistance, and cash aid, among others. The City of Brea is one of 11 cities in Orange County that participates in The North Orange County Public Safety Collaborative (NOCPSC), a coalition of cities, police agencies, nonprofits, and agencies dedicated to providing health and human services to the community (NOCPSC 2021). In addition, the City’s Community Services Department hosts several holiday-themed events throughout the year and provides a range of services to local and regional communities (City of Brea 2024). Considering the project’s relatively small size, it is anticipated to result in an</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>incremental increase in demand for social services that could be accommodated by existing services.</p> <p>In conclusion, the proposed project would not adversely affect health care and social services. The project would result in a beneficial effect since it would be providing PSH to individuals experiencing homelessness.</p>
Solid Waste Disposal / Recycling	2	<p>Solid waste disposal and recycling services at the project site would be provided by Republic Services, the City's franchise waste hauler, located at 1131 North Blue Gum Street, Anaheim, California 92806. Republic Services provides weekly residential, multifamily, and commercial waste collection services to Brea's residents and businesses. The City's waste collection system keeps recyclables and green waste separate from trash to help extend the life of the County's landfills (City of Brea 2024d). All waste generated during the construction and operational phases would be properly disposed of and recycled where possible. The amount of solid waste generated by the proposed project during the construction and operational phases would be a fraction of the throughput taken in by Republic Services daily. Adverse impacts from solid waste disposal associated with the proposed project are not anticipated.</p>
Waste Water / Sanitary Sewers	2	<p>The City of Brea would provide sanitary sewer and wastewater services to the project site. The City's Public Works Department manages the water distribution and wastewater systems (City of Brea 2024f). The project would connect to existing wastewater and sanitary sewer facilities and does not include the construction or use of a septic system. The project would be required to pay standard wastewater connection fees and ongoing user fees, which would ensure the project's impacts on existing sewer facilities are adequately offset. Payment of these fees would fund the collection, treatment, and disposal of generated wastewater, and would offset the project's increase in demand for wastewater collection services. Adverse impacts to wastewater systems and sanitary sewers servicing the project site are not anticipated due to the city's capacity and existing infrastructure.</p>
Water Supply	2	<p>The City's Water Division is responsible for maintaining the City's potable water system, which includes resolving backflow prevention and water quality issues. Brea imports 100% of its water from two major water suppliers, Metropolitan Water District of Southern California (MWDSC), which supplies treated imported surface water to the City, and California Domestic Water Company (Cal Domestic), which supplies the City with treated groundwater. MWDSC's imported water sources are the Colorado River and the State Water Project, which draws water from the Sacramento- San Joaquin River Delta, while Cal Domestic water originates from the Main San Gabriel water basin. The City's Water Division maintains</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>an extensive supply system with over 100 miles of pipeline and 13,000 water connections. As evidenced by the City's annual Water Quality Confidence Report, water delivered throughout Brea meets the quality standards required by federal and state regulatory agencies (City of Brea 2024g).</p> <p>The project would result in an incremental increase in water demand and would comply with water conservation goals and policies set forth in the City's General Plan (City of Brea 2021b). Payment of standard water connection fees and ongoing user fees would ensure the project's impacts on existing water facilities are adequately offset. In addition, revenues collected from these water rates pay for operations and maintenance of the City's water system and related assets, including six reservoirs with a combined capacity of 67.5 million gallons (City of Brea 2024f). Adverse impacts to the City's water supply are not anticipated.</p>
Public Safety - Police, Fire and Emergency Medical	2	<p>Police protection services to the project site are provided by the Brea Police Department. The Brea Police Department is located at 1 Civic Center Circle in the City of Brea, approximately 1.2 miles southeast of the project site.</p> <p>Fire and emergency medical services are provided by the Brea Fire Department, which serves approximately 47,000 residents throughout Brea. The closest fire station to the project site is Station I, which is located approximately 0.9 miles east of the project site at 555 N Berry Street. The project would result in an incremental increase in demand for police, fire, and emergency medical services at the project site. The project would be required to comply with all applicable codes for fire safety and emergency access. Therefore, the project would not have adverse impacts on public safety.</p>
Parks, Open Space and Recreation	2	<p>There are abundant parks, open space, and recreational facilities in the City of Brea, Orange County, and the surrounding areas. Numerous state parks are located nearby the project area, including Carbon Canyon Park and Chino Hills State Park which are approximately 3.5 miles and 4.1 miles east of the project site, respectively. Orange County Parks operates a range of public parks, open spaces, historical sites, and recreational facilities across 60,000 acres. County parks include regional parks, urban recreational spaces, beaches, and historical cultural landmarks, as well as dog parks, garden plots to rent, surf schools and an adopt-a-beach program. The City of Brea's recreation department, Brea Recreation, operates the Brea Community Center and Brea Senior located at 695 E Madison Way and 500 Sievers Avenue. Brea Recreation offers various programs from children, adults, and seniors, such as adult sports leagues, aquatics program, after school programs, summer day camp, fitness center, and recreational classes. Additionally, the City maintains a two-way bike trail called</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>The Tracks at Brea Trail, consisting of a separate pedestrian path, nine fitness stations, two bike repair stations, seating areas with shade structures, benches, drinking fountains, and restrooms. The trail was originally a railroad and train depot, but later transformed into a 50-acre linear park that traverses the city across four miles (City of Brea 2024e).</p> <p>Public parks and open spaces in proximity to the project site include the following:</p> <ul style="list-style-type: none"> <li>• Tamarack Park, approximately 0.5 miles northwest of the project site at 520 Tamarack Ave, Brea, CA 92821</li> <li>• Central Park, approximately 1 mile north of the project site at 380 W Central Ave, Brea, CA 92821</li> <li>• Arovista Park, approximately 1 mile southwest of the project site at 500 W Imperial Hwy, Brea, CA 92821</li> <li>• Founders Park, approximately 1.5 miles northwest of the project site at 777 Skyler Way, Brea, CA 92821</li> <li>• Craig Regional Park, approximately 2.3 miles southeast of the project site at 3300 N State College Blvd, Fullerton, CA 92835</li> </ul> <p>Given the relatively small size of the project and the large number of local and state parks in the vicinity, the project would not have an adverse impact on parks, open space, and recreation.</p>
<p>Transportation and Accessibility</p>	<p>2</p>	<p>The project site is located in the Brea Core, a central area of the City that is undergoing a significant planning and development process to enhance accessibility through improvements to streets, sidewalks, and public spaces, and opportunities for workforce housing, diverse businesses, and a pedestrian-friendly environment (City of Brea n.d.). The project is a 100% affordable residential development in an infill location; therefore, impacts related to vehicle miles traveled or traffic congestion would not occur. Pre-existing urban development and readily available public transit near the project site would further minimize issues related to transportation and accessibility.</p> <p>Bus transit service and paratransit service in the City is provided by Orange County Transportation Authority (OCTA) which serves the entirety of Orange County. The closest bus stops to the project site are located on both sides of North Brea Boulevard, adjacent to the project site. Specifically, these stops are located at the intersection of North Brea Boulevard and West Lambert Road and at the intersection of North Brea Boulevard and West Cypress Street, which are both less than 0.5 miles of the project site. The nearest transit hub is located at the Brea Mall Transit Center, approximately 1.5 miles from the project site. Route 129 provides service between</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>La Habra and Anaheim, offering easy access to residential and commercial areas. On weekdays, the bus service operates from 5:00 a.m. to 9:30 p.m. eastbound to Anaheim and westbound to La Habra. Bus transit services operate from 6:00 a.m. to 9:00 p.m. on weekends. Thus, transit services would be available to residents, and the project would have no adverse effect on transit facilities.</p> <p>A Class II bike lane is delineated along North Brea Boulevard adjacent to the project site. Residents traveling by bicycle could easily connect to the Tracks at Brea Trail, a Class I bike path that runs just south of the project site and which intersects the bike lane along North Brea Boulevard. Class I bike paths are paved facilities designated for bicycle use that re physically separated from roadways by space or by a physical barrier (City of Brea 2021c). The Tracks is the City’s newest dedicated pedestrian and bicycle path and is considered the primary bikeway in the City (City of Brea 2020). The Tracks is a multi-use trail that traverses the city from east to west. It has a two-way paved bikeway and a separate pedestrian footpath providing an opportunity to make easy connections across town. The trail starts at Arovista Park, 1.2 miles from the project site, and ends at Nasa Street. In addition, most adjacent streets to the project site provide sidewalks. Thus, pedestrian and bicycle facilities would be readily accessible to project residents, and the project would have no adverse effect on pedestrian and bicycle facilities.</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
<b>NATURAL FEATURES</b>		
Unique Natural Features, Water Resources	2	The project site is infill development in an area zoned for mixed commercial and residential uses. The project site does not contain any unique natural features or water resources. There are no watercourses, wetlands, or other aquatic resources present on or near the project site. Therefore, the project would have no impact on unique natural features or water resources.
Vegetation, Wildlife	2	The project site does not contain native vegetation or critical habitat for any special-status plant or wildlife species. Although the proposed project is within the ranges of seven endangered or threatened species, none are likely to occur on site due to a lack of suitable habitat (USFWS 2020b) (see <b>Attachment 8</b> ). Therefore, the project would have no impact on vegetation or wildlife.
Other Factors	1	The project would provide low-income, affordable housing and provide on-site services and programs for residents. The project would provide a safe, clean, and sanitary place for residents in a location convenient to public transportation and other amenities.

Environmental Assessment Factor	Impact Code	Impact Evaluation
		Therefore, the proposed project would be beneficial to both residents and the community.

Environmental Assessment Factor	Impact Code	Impact Evaluation
<b>CLIMATE AND ENERGY</b>		

Climate Change Impacts	2	<p>Although climate change is driven by global atmospheric conditions, climate change impacts are felt locally. An expanding body of scientific research supports the theory that global climate change is currently causing changes in weather patterns, average sea level, ocean acidification, chemical reaction rates, and precipitation rates, and that it will increasingly do so in the future. The climate and several naturally occurring resources within California are adversely affected by climate change. Increased precipitation and sea level rise will increase coastal flooding, saltwater intrusion, and degradation of wetlands. Mass migration and/or loss of plant and animal species could also occur. Potential effects of global climate change that could adversely affect human health include more extreme heat waves and heat-related stress; an increase in climate-sensitive diseases; more frequent and intense natural disasters such as flooding, hurricanes, wildfire, heatwaves, and drought; and increased levels of air pollution. Similarly, climate change may alter site suitability factors, such as air quality, urban heat island effects, soil stability, water resources, groundwater availability (e.g., water table level, reliance on a sole source aquifer), excessive stormwater runoff and site flooding, wastewater control systems, and water treatment facilities.</p> <p>As discussed above, the project site is not within a coastal community or low-lying area and would not be impacted by sea level rise (see <b>Figure 1</b>). As previously discussed, the project site is not in an area that relies on a sole-source aquifer. No substantial issues related to air quality, soil suitability, stormwater, wastewater systems, or water supply have been identified in the preceding analyses. Thus, the project would not lead to potential climate-change-related impacts that would substantially adversely affect residents.</p> <p>The Climate Mapping for Resilience and Adaptation (CMRA) tool (NOAA 2023) and FEMA’s National Risk Index mapping tool (FEMA 2024b) were used to assess exposure to the following five key climate hazards at the project site: extreme heat, drought, wildfire, flooding, and coastal inundation from sea-level rise. Based on the results of the CMRA tool analysis, the project site is most susceptible to climate change impacts related to extreme heat and drought. Currently, the project area census tract only receives approximately 14 inches of precipitation annually and experiences approximately 24 days annually where temperatures are greater</p>
------------------------	---	---

Environmental Assessment Factor	Impact Code	Impact Evaluation
		<p>than 90 degrees Fahrenheit. At the end of the century, the amount of precipitation received by the census tract would remain constant at approximately 14 inches, but the days reaching temperatures greater than 90 degrees Fahrenheit would increase to 60. The single highest maximum temperature this census tract may experience is currently 99.2 degrees Fahrenheit; though, by the end of this century, the census tract’s maximum highest temperature is expected to increase to 104.7 degrees Fahrenheit. The project site is located within a census tract that is not designated as a Disadvantaged Community according to the Climate and Economic Justice Screening Tool (NOAA 2023) (<b>Attachment 21</b>).</p> <p>Data obtained from FEMA’s National Risk Index coincided with the results of the CRMA tool. Index ratings ranging from very low to very high were analyzed at the County level. According to the National Risk Index, the project site is at very high risk of experiencing earthquakes, riverine flooding, and wildfire (FEMA 2024b) (<b>Attachment 22</b>). While the County overall is at very high risk of experiencing riverine flooding and wildfire, as discussed above, the project site is not located within a flood zone (<b>Attachment 3</b>) or in an area subject to wildfire hazards (<b>Attachment 20</b>). Given the project site’s location in an urbanized area, wildfire risk does not pose a substantial climate-related hazard to the project site.</p> <p>The project would not include use of natural gas. The project would include EV charging stations and would comply with the California Green Building Standards (CALGreen) Code, which would ensure the project incorporates various measures to reduce greenhouse gas (GHG) emissions. The project is located adjacent to transit and bicycle facilities, which would serve to reduce the GHG emissions associated with motor vehicle travel. As previously discussed, criteria air pollutant emissions from project construction and operation would be below <i>de minimis</i> thresholds, and daily emissions from the proposed project would not exceed the SCAQMD’s regional construction or operational emissions thresholds (see <b>Attachment 4</b>). In addition, the SCAQMD has established a screening threshold of 3,000 metric tons of carbon dioxide equivalent per year (MT CO<sub>2</sub>e/yr) that is used to determine if a project would have significant GHG emissions impacts. This approach is a widely accepted screening threshold used by numerous cities within the SoCAB and is based on the SCAQMD staff’s proposed GHG screening threshold for stationary source emissions for non-industrial projects, as described in the SCAQMD’s Interim CEQA GHG Significance Threshold for Stationary Sources, Rules and Plans (AQMD 2008). Based on modeling conducted for the project in CalEEMod, estimated annual construction emissions for the proposed project would be approximately 96.59 MT CO<sub>2</sub>e/yr (30-year amortized emissions would reduce this to 3.22 MT CO<sub>2</sub>e per year). Estimated annual emissions during the operational phase</p>

Environmental Assessment Factor	Impact Code	Impact Evaluation
		would be approximately 387.54 MT CO <sub>2</sub> e/yr. As such, the project's GHG emissions would be below the SCAQMD's screening threshold. Therefore, the proposed project would not contribute substantially to climate change impacts.
Energy Efficiency	2	The project would be required to comply with applicable building energy efficiency standards pursuant to Title 24, Part 6 of the California Code of Regulations. At the building permit stage, the project would comply with the CALGreen Code that establishes mandatory green building standards for all buildings in California. The project would be 100% electric and would not use natural gas. The proposed project would include EV charging stations. The project site is also located in close proximity to public transportation, with bus stops adjacent to the project site. Therefore, the project would not have an adverse effect related to energy efficiency.

#### Additional Studies Performed:

- *Phase I Environmental Site Assessment Report*, prepared by Barr & Clark Inc., April 2024
- *Phase II Subsurface Investigation Report*, prepared by Barr & Clark Inc., August 2024
- *Noise Technical Memorandum*, prepared by Dudek, December 2024

**List of Permits Obtained:** None.

**Public Outreach** [24 CFR 50.23 & 58.43]:

The Draft Environmental Assessment will be made available for public review and comment beginning on February 3, 2025, and concluding on February 18, 2025. The combined Notice of Finding of No Significant Impact (FONSI)/Notice of Intent to Request Release of Funds (NOI-RROF) will be published in the newspaper and will contain information about where the public may find the Environmental Review Record pertinent to the project.

**Cumulative Impact Analysis** [24 CFR 58.32]:

The proposed project would not contribute to a significant cumulative impact because it would consist of an urban infill development project consistent with the site's General Plan land use and zoning designations and would be near existing transit services and commercial amenities. State and local planning guidelines encourage the development of urban multifamily housing in areas served by transit and near commercial amenities because this type of development contributes less to cumulative effects on the environment in comparison to development of previously undisturbed sites in more remote locations with fewer transit connections, many of which may contain native vegetation and wildlife species.

**Alternatives** [24 CFR 58.40(e); 40 CFR 1508.9]:

Site identification has proven to be a major obstacle in providing affordable housing units. Residential sites available at reasonable cost are extremely limited, and sites that do not meet cost and land use criteria are generally eliminated as alternatives. The developer identifies potential properties for affordable housing based on feasibility, location, affordability, and ownership/site control of a potential project site. In addition to the developer's site selection criteria, physical and social constraints are also considered in identifying and rejecting alternatives.

A reduced density of the project site was considered but deemed infeasible and contrary to state law permitting Density Bonuses for affordable housing projects. A reduced-density project would be inconsistent with the planning application approvals already achieved.

Based on the developer's site selection criteria and constraints that limit identification of alternative affordable housing project sites, and well as the State Density Bonus Law, no other build alternatives are analyzed or included in this environmental document.

**No Action Alternative** [24 CFR 58.40(e)]:

Under the No Action Alternative, the proposed project would not proceed, and the project site would remain vacant for the foreseeable future. The beneficial impacts identified in this EA would not occur related to providing much-needed affordable housing and associated amenities to the community. The project site may remain vacant, or potentially sold for other development purposes. It is unknown at this time if or when another proposed development would be forthcoming. As previously stated, the project site has a General Plan Land Use and zoning designation of Mixed Use I. This zoning district provides areas for intense, mixed-use urban environments that offer opportunities for people to live, work, shop, and recreate without having to use their vehicles. This designation applies to areas throughout the community with ready access to major roadways and public transit and encourages the integration of compatible residential and nonresidential uses, whereby the uses share the same structure or parcel. Thus, it is reasonable to assume that any forthcoming proposed projects could involve such uses. Physical impacts to the environment would occur if and when the project site were developed with another use, whether subsidized with federal funds or built at market rates.

**Summary of Findings and Conclusions:**

The project involves the construction of a 38-unit affordable housing development on a vacant parcel at 323 North Brea Boulevard, Brea, CA. The project would benefit the City of Brea and very-low-income residents experiencing homelessness and needing affordable housing by providing high-quality affordable housing in a desirable area with access to transit services, commercial amenities, employment opportunities, and all standard community services. Residents of the affordable housing project would benefit from being in proximity to transportation corridors and activity centers which would provide opportunity for employment, social engagement, and commerce. The proximity of existing transit options to the project site would reduce long-term air pollutant emissions and energy use associated with motor vehicle travel.

Because the project is within a developed urban area, the project would be adequately served by utilities and public services. The project would conform to all applicable federal, state, and local regulations associated with land use compatibility, air pollutant emissions, water quality, geologic hazards, and related environmental resources addressed herein. Based on the analyses of environmental issues contained in this document, the project is not expected to have significant environmental impacts.

**Mitigation Measures and Conditions** [40 CFR 1505.2(c)]

Summarize below all mitigation measures adopted by the Responsible Entity to reduce, avoid, or eliminate adverse environmental impacts and to avoid non-compliance or non-conformance with the above-listed authorities and factors. These measures/conditions must be incorporated into project contracts, development agreements, and other relevant documents. The staff responsible for implementing and monitoring mitigation measures should be clearly identified in the mitigation plan.

Law, Authority, or Factor	Mitigation Measure
Contamination and Toxic Substances	<b>MM-TOX-1: Vapor Intrusion Risk.</b> The potential preferential pathway of VOCs to upper, residential levels of the building shall be addressed by installing conduit seals at mechanical and electrical conduits that penetrate through the subsurface and enter through upper-level residential units throughout the building footprint. Conduit seals shall be specified by the mechanical, electrical, and plumbing engineer (MEP) for the project consistent with Class 1 Division 2 hazardous area classifications. Additionally, existing unused utilities shall be abandoned and sealed where appropriate as part of redevelopment activities. Newly

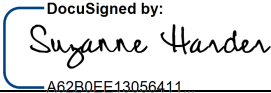

Law, Authority, or Factor	Mitigation Measure
	<p>installed utilities and utility trenches shall be sealed at or near the building perimeter using a controlled density fill (CDF) plug to limit vapor migration within the utility trench.</p> <p><b>MM-TOX-2: Post-Construction Radon Evaluation.</b> In accordance with Section 9.6.3.2 of HUD’s Multifamily Accelerated Processing (MAP) Guide (revised March 19, 2021), after completion of construction and issuance of the occupancy certificate for the project and before residents move in, indoor radon testing shall be conducted for 100% of ground-contact units and 10% of units on each floor above ground level in all buildings included in the project. Testing shall be performed by, or under the direct supervision of, a licensed Radon Professional certified by the American Association of Radon Scientists and Technologists (AARST), National Radon Proficiency Program (NRPP) or the National Radon Safety Board (NRSB). Radon testing shall follow the AARST Protocol for Conducting Radon and Radon Decay Product Measurements in Multifamily Buildings (ANSI-AARST MAMF-2017).</p> <p>If testing determines that indoor radon levels are or may be above the U.S. EPA’s threshold for unacceptability of 4.0 pCi/L, then the project applicant must implement a radon mitigation plan. The mitigation plan must identify the radon level on site, describe the radon reduction system that will be installed, establish an ongoing maintenance plan, establish a reasonable timeframe for system implementation, and require post-installation testing by a licensed radon professional.</p> <p>A radon report shall be prepared and submitted at final completion inspection, and shall document the results of testing performed, the sampling strategy, the details of any mitigation deemed necessary, and the timing of any such mitigation. Indoor radon levels must be demonstrated to be below the EPA action level of 4.0 pCi/L prior to project occupancy. Incoming project occupants shall be informed of radon mitigation activities.</p>
<p>Explosive and Flammable Hazards</p>	<p><b>MM-HAZ-1: Explosive and Flammable Hazard Protection.</b> In accordance with 24 CFR Part 51 Subpart C, the project design shall include either a protective barrier or modified building design that provides protection from blast overpressure and thermal radiation anticipated from the flammable material AST(s) located on the northern adjoining property which were determined to be potential hazards to the proposed project, and to which the Acceptable Separation Distance could not be met (potential hazard). Protective barriers, building modifications, or a combination thereof (protective features) shall be designed in accordance with the HUD Barrier Design Guidance for HUD Assisted Projects near Hazardous Facilities, Guidebook 6600.G. A licensed professional civil or structural engineer will design and oversee construction of the protective features. Both buildings and outdoor areas of the project must be protected from the potential hazard and withstand both blast overpressure and thermal radiation in accordance with 24 CFR Part 51.203.</p>

Law, Authority, or Factor	Mitigation Measure
	Project building plans submitted for approval will include engineering and design specifications for the protective features and will be reviewed and approved by the Responsible Entity for the project.
Historic Preservation	<p><b>MM-CUL-1: Unanticipated Discovery of Archaeological Resources.</b> In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed Project, all construction work occurring within 50 feet of the find shall immediately stop until a qualified specialist, meeting the Secretary of the Interior’s Professional Qualification Standards, can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be atypical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appeared to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or non-functional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or old features such as concrete foundations or privies. Depending upon the significance of the find under the NHPA, the archaeologist may simply record the find and allow work to continue. Feasible options for avoidance must also be considered. If the discovery proves significant under the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted.</p> <p><b>MM-CUL-2: Unanticipated Discovery of Human Remains.</b> In accordance with Section 7050.5 of the California Health and Safety Code, if human remains are found, the Orange County Coroner shall be immediately notified of the discovery. No further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur until the Orange County Coroner has determined, within 2 working days of notification of the discovery, the appropriate treatment and disposition of the human remains. If the Orange County Coroner determines that the remains are, or are believed to be, Native American, the coroner shall notify the NAHC in Sacramento within 24 hours. In accordance with California Public Resources Code Section 5097.98, the NAHC must immediately notify those persons it believes to be the MLD from the deceased Native American. The MLD shall complete inspection within 48 hours of being granted access to the site. The designated Native American representative would then determine, in consultation with the property owner, the disposition of the human remains and associated grave goods.</p>

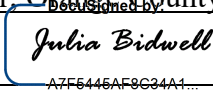

**Determination:**

**Finding of No Significant Impact** [24 CFR 58.40(g)(1); 40 CFR 1508.27]  
The project will not result in a significant impact on the quality of the human environment.

**Finding of Significant Impact** [24 CFR 58.40(g)(2); 40 CFR 1508.27]  
The project may significantly affect the quality of the human environment.

Preparer Signature:  Date: 1/29/2025

Name/Title/Organization: Suzanne Harder, Community Development Compliance and Environmental Coordinator, Orange County Housing and Community Development

Certifying Officer Signature:  Date: 1/29/2025

# 1. Basic Project Information

## 1.1. Basic Project Information

Data Field	Value
Project Name	Jamboree Brea PSH HUD Project
Construction Start Date	6/1/2025
Operational Year	2026
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	1.80
Precipitation (days)	21.2
Location	323 N Brea Blvd, Brea, CA 92821, USA
County	Orange
City	Brea
Air District	South Coast AQMD
Air Basin	South Coast
TAZ	5782
EDFZ	7
Electric Utility	Southern California Edison
Gas Utility	Southern California Gas
App Version	2022.1.1.29

## 1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
Apartments Mid Rise	39.0	Dwelling Unit	0.44	19,580	2,580	—	116	—

General Office Building	4.05	1000sqft	0.00	4,051	0.00	—	—	—
Enclosed Parking with Elevator	22.0	Space	0.00	8,800	0.00	—	—	—

### 1.3. User-Selected Emission Reduction Measures by Emissions Sector

No measures selected

## 2. Emissions Summary

### 2.1. Construction Emissions Compared Against Thresholds

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

## 6. Climate Risk Detailed Report

### 6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	12.3	annual days of extreme heat
Extreme Precipitation	5.15	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.59	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about  $\frac{3}{4}$  an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters

Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

### 6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

### 6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

### 6.4. Climate Risk Reduction Measures

## 7. Health and Equity Details

### 7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	57.0

AQ-PM	82.7
AQ-DPM	72.2
Drinking Water	93.7
Lead Risk Housing	64.3
Pesticides	0.00
Toxic Releases	98.5
Traffic	70.0
Effect Indicators	—
CleanUp Sites	72.9
Groundwater	2.11
Haz Waste Facilities/Generators	92.0
Impaired Water Bodies	0.00
Solid Waste	87.9
Sensitive Population	—
Asthma	21.4
Cardio-vascular	25.2
Low Birth Weights	29.0
Socioeconomic Factor Indicators	—
Education	46.8
Housing	31.2
Linguistic	38.1
Poverty	25.7
Unemployment	23.8

## 7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—

Above Poverty	61.00346465
Employed	73.4377005
Median HI	70.61465418
Education	—
Bachelor's or higher	64.6862569
High school enrollment	100
Preschool enrollment	80.67496471
Transportation	—
Auto Access	70.20402926
Active commuting	51.04581034
Social	—
2-parent households	69.02348261
Voting	63.01809316

2016 Voting	83.4

### 7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	44.0
Healthy Places Index Score for Project Location (b)	70.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	No
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

### 7.4. Health & Equity Measures

No Health & Equity Measures selected.

### 7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

### 7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

## 8. User Changes to Default Data

Screen	Justification
Land Use	39 unit permanent supportive housing with associated parking and office/services
Construction: Construction Phases	Default construction schedule. No demolition required.
Construction: Trips and VMT	Rounded default trips up to nearest even number and added vendor truck trips to account for water trucks.
Operations: Vehicle Data	Default trip rates assumed for residential units. Zeroed out trip rates for General Office Building, which was used as surrogate for leasing/service office and community amenities and would serve the project.
Operations: Hearths	No fireplaces or wood stoves assumed for the project.

## **1.0 EXECUTIVE SUMMARY**

Barr & Clark completed a Phase I Environmental Site Assessment (Phase I ESA) for the Vacant Land located at 323 North Brea Boulevard, Brea, CA 92821 (the Subject Property).

The Subject Property consists of one unimproved slightly irregular-shaped parcel of land located along the west side of North Brea Boulevard, in Brea, California.

Based on a review of historical sources, the subject property was identified to consist of a portion of the Randolph School in 1915, a hospital/medical office building from at least 1926 through 2001, when the hospital/medical office building was demolished. The property has been comprised of vacant land since at least 2001. The Subject Property parcel contains approximately 0.441 acres according to records reviewed by Barr & Clark.

The Subject Property is located in a neighborhood of Brea which is located in a mixed residential and commercial area. The immediately surrounding properties consist of a car wash (Brea Car Wash at 100 West Lambert Road) and auto repair facility (Econo Lube N' Tune at 395 North Brea Boulevard) to the north; North Brea Boulevard followed by a retail building (CVS at 390 North Brea Boulevard) and a multi-tenant retail building at 330 North Brea Boulevard) to the east; a mixed-use property (Energetic Smile Family Dental at 307 North Brea Boulevard) and (Cabo Grill and Cantina at 301 North Brea Boulevard) to the south; and Madrona Avenue followed by single family residential properties to the west.

Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut was retained to perform an environmental database search for locations identified as hazardous substance and/or hazardous waste facilities near the Subject Property. The Subject Property address was listed in the databases searched by EDR.

The Subject Property was identified on the Environmental Data Resources, Inc. (EDR) environmental records database as Northside Medical Clinic, at 323 North Brea Boulevard, on the HAZNET and HWTS databases.

- The subject property was identified on the HWTS and HAZNET database under EPA ID Number CAL000066684 and CAD981402522. The HAZNET listings relate to the on-site generation of 0.0208 tons of Photochemicals / photo-processing waste in 1994 and 0.0125 tons of Photochemicals / photo-processing waste in 1993 . Based on the aforementioned, this HAZNET and HWTS listing is not anticipated to represent a significant environmental concern.

The EDR database search identified numerous properties listed on databases indicating environmental impairment in the vicinity of the Subject Property within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21).

The following is a discussion of listed sites:

- Brea Vehicle Cleaning, at 101 West Lambert Road, is located adjacent to the north of the Subject Property. According to the regulatory database report, this site is listed on the UST FINDER, UST, LUST, HIST UST, CORTEST, HIST CORTESE and CERS databases.

Barr & Clark reviewed a tank closure report, prepared by Healy Environmental, Inc. and dated February 12, 1990. The report identified that “one 12,000 gallon unleaded gasoline steel underground storage tank was located on the property and the tank was removed on January 30, 1990. Results of the analyses indicate below reporting limit concentrations of contaminants in all soil samples, except sample SP1 which contains 33 parts per million Total Petroleum Fuel Hydrocarbons and 0.20 parts per million xylenes. Based on the guidelines established by the Regional Water Quality Control Board from the Leaking Underground Fuel Tank manual, these concentrations are considered to be insignificant and are below current regulatory action

- levels. Based on our findings and the analytical results, we conclude that insignificant concentrations of Purgeable Aromatic Hydrocarbons and Total Petroleum Fuel Hydrocarbons are present in the soil around the former underground storage tank. As ground water was not encountered and well data indicate a ground water depth of 135 feet below the surface 4,000 feet away, we have determined that approximately 120 feet of uncontaminated soil is present before ground water is encountered. We conclude that this site has no environmental impact on local ground water. It is suggested that investigations be considered complete and the site be closed.” A letter from the County of Orange Health Care Agency Department of Environmental Health, dated April 4, 1990 confirmed case closure.” Based on the presence of the leaking underground storage tank, the potential for a vapor encroachment condition cannot be ruled out.
- Econo Lube N’ Tube #33, at 395 North Brea Boulevard, is located adjacent to the north of the Subject Property. According to the regulatory database report, this site is listed on the RCRA NonGen/NLR, CERS TANKS, CERS, CERS HAZ WASTE, CA FID UST, UST, SWEEPS UST, RCRA-SQG, FINDS, ECHO, HWTS, HAZNET, UST, SWEEPS UST and HWTS databases. The UST listing identified a 500-gallon above ground storage tank containing petroleum. The HAZNET listings relate to the on-site generation of the following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures and the following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures. No violations were reported for the subject property. Based on the current use of the subject property and the underground storage tank listing, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

- CVS Pharmacy #11111, at 390 North Brea Boulevard, is located adjacent to the east of the Subject Property across North Brea Boulevard. According to the regulatory database report, this site is listed on the UST, CERS HAZ WASTE, HWTS, HAZNET, NPDES, CIWQS and RCRA-LQG databases. The HAZNET listings relate to the on-site generation of off-specification, aged or surplus organics, pharmaceutical waste, unspecified solvent mixture and other inorganic solid waste. No information was provided regarding the UST listing. No violations were reported for the subject property. Based on the underground storage tank listing and lack of information regarding the location or removal of the underground storage tank, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).
- American Quality Dry Cleaners, at 330 North Brea Boulevard, Suite C, is located adjacent to the east of the Subject Property across North Brea Boulevard. According to the regulatory database report, this site is listed on the EDR HIST CLEANER, DRYCLEANERS, RCRA-SQG, FINDS and ECHO databases. American Quality Dry Cleaners is not currently located at the site address. The listings identify the site as a dry cleaner utilizing equipment with Perchloroethylene. Based on the previous use of dry cleaning equipment utilizing solvents such as perchloroethylene, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

The EDR database search identified several additional facilities located within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21). Based on the reported information, the listed facilities have a low potential to impact soil or groundwater beneath the Subject Property.

Barr & Clark has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by 40 CFR §312 et al and Jamboree Housing for a full Phase I Environmental Site Assessment of the Vacant Land located at 323 North Brea Boulevard, Brea, CA 92821 (the Subject Property). Any exceptions to, or deletions from, Jamboree Housing's Scope of Work were previously described in this report where applicable.

This assessment has revealed no evidence of historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Subject Property. However, the following environmental issues were identified that warrants mention:

- Based on the current and previous uses of the adjacent properties to the north and east of the subject property, including listings for leaking underground storage tanks and dry cleaning equipment utilizing solvents such as perchloroethylene, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

Based on the conclusions of this assessment, Barr & Clark recommends the following:

- Based on the current and previous uses of the adjacent properties to the north and east of the subject property, including listings for leaking underground storage tanks and dry cleaning equipment utilizing solvents such as perchloroethylene, a Phase II Subsurface Investigation of the subject property to assess potential impacts from hazardous materials and volatile organic compounds and soil vapor impacts is recommended.

*This executive summary is provided solely for the purpose of overview. Any party authorized to rely on this document must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter. This report must be read in its entirety, no one page, sentence or section stands alone.*

## **2.0 INTRODUCTION**

### **2.1 Subject Property**

This Phase I Environmental Site Assessment (Phase I ESA) was conducted by Barr & Clark, Inc. in general accordance with criteria listed in the ASTM Standard E1527-21 (the Standard) and in conformance with the Scope of Work required by Jamboree Housing to evaluate the Vacant Land located at 323 North Brea Boulevard, Brea, CA 92821 (the Subject Property, see attached Figure 1) for the possible presence of contaminants as defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, 42 USC Section 9601). The assessment was also conducted to evaluate the possible presence of petroleum products at the Subject Property which are not regulated by CERCLA. Finally, the assessment was conducted in general accordance with the *All Appropriate Inquiries* (AAI) criteria as defined by 42 USC Section 9601. Barr & Clark was retained by Jamboree Housing (client) to conduct this assessment. This report is formatted to provide general consistency with the guidelines provided by the Standard.

### **2.2 Scope of Services**

This assessment was conducted to evaluate environmental concerns caused by past or present on-site and off-site activities. The scope of work for this assessment consisted of the following tasks as relevant and possible:

- An on-site reconnaissance and inspection by a Barr & Clark environmental professional to evaluate current conditions at the subject Site and vicinity;
- A review of environmental databases, including listings of known or suspected contaminated sites, known landfill locations, known leaking underground storage tank (LUST) locations, and operations regulated under federal or state hazardous waste regulations;
- A review of historical aerial photographs and topographic maps;
- A review of previous documented environmental site assessments and evaluations performed at the subject site as such are relevant and provided to Barr & Clark;
- A review of title documentation for evidence of environmental liens on the Subject Property;
- An interview with the Subject Property owner's representative;
- A description of the regional geologic and hydrogeologic setting for the Subject Property; and
- Preparation of a written report.

Issues that were evaluated with respect to the Subject Property consisted of the following as relevant and possible:

- Storage, use and disposal of chemicals, hazardous materials, or hazardous waste at the Subject Property;
- Previous on-site activities;
- Possible contamination resulting from off-site sources and nearby properties; and
- Historical or current circumstances that suggest that the Subject Property could be a source of contamination.

### **2.3 Significant Assumptions**

This assessment was conducted in general accordance with ASTM Standard E1527-21 and in conformance with the Scope of Work required by Jamboree Housing. Accordingly, it is understood that the assessment is not exhaustive. General conformance to the Standard is intended to reduce but not eliminate uncertainties regarding potential *Recognized Environmental Conditions* (RECs) at the Subject Property. It is recognized within the Standard that there are reasonable limits of time and cost to conduct a Phase I ESA that must always be considered.

The Standard also recognizes that the level of inquiry will vary from one Site to another depending on, but not limited to factors such as: size, age, history, chemical usage, past remedial efforts and/or off-site concerns.

In evaluating the Subject Property, Barr & Clark has relied in good faith on information provided by individuals as noted in this report. We assume that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatements or inaccuracies contained in this report as a result of omissions, misinterpretation, deception or fraudulent acts of the persons interviewed or contacted.

This assessment represents Barr & Clark's professional interpretation and judgment of the existing site conditions based on the facts currently available within the limits of the mutually agreed scope of work, budget and schedule, which are not intended to be exhaustive in scope. It is Barr & Clark's specific intent that the conclusions and recommendations presented herein be used as guidance and not necessarily as a firm course of action unless explicitly stated as such. We make no warranties, express or implied, as to the functionality of the Subject Property for a particular purpose. The information provided in this report is not to be construed as legal advice.

## **2.4 Limitations and Exceptions**

This assessment was prepared based on the information collected by Barr & Clark during this evaluation. Barr & Clark cannot guarantee the accuracy or completeness of governmental or site records. This report documents the condition of the sites on the date visited.

The services conducted by Barr & Clark have been rendered in a manner generally consistent with the level of skill and care ordinarily exercised by members of the environmental consulting profession currently practicing under similar conditions. As noted above, this assessment was conducted in general accordance with the ASTM Standard and the Barr & Clark proposal. Accordingly, no evaluation was completed with respect to the following potential issues as part of this project: an assessment of the regional potential for radon contamination of structures on the subject Site or a measurement of the radon concentration in structures on the subject Site; an assessment of the possible asbestos content of building materials; a geophysical survey for buried vaults, tanks or sumps; an assessment of wetlands on the subject Site; an assessment of molds or fungi or other air quality issues that may be present; an assessment of California Prop 65 issues; geotechnical/Seismic/Methane/EMF issues; an assessment of endangered flora or fauna; paleontological, cultural or historical resources; soils or ground water testing; Environmental, Safety and Industrial Hygiene regulatory compliance of the operations conducted at the facility; an evaluation of possible lead concentration in drinking water at the Subject Property; and an evaluation of possible lead concentration in on-site paints.

Barr & Clark is not engaged in environmental reporting for the purpose of advertising, sales promotion, or endorsement of any client's interest, including raising investment capital, recommending investment decisions, or other publicity purposes. Our client acknowledges that this report has been prepared for the exclusive use of the client and agrees that Barr & Clark reports and correspondence will not be used nor relied upon in any prospectus or offerings circular. This report is based on data and information collected during the evaluation of the subject Site conducted by Barr & Clark personnel and is based solely on the Subject Property conditions encountered on the date and time of the Subject Property visit, supplemented by relevant historical information and data as provided and described in this report. No assurance is made regarding changes in conditions that could occur subsequent to the time of the assessment.

## **2.5 Limiting Conditions**

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.5), this data gap is not expected to alter the findings of this assessment.
- Barr & Clark requested information relative to deed restrictions and environmental liens and a title search. This information was not provided at the time of the assessment.
- Barr & Clark was not able to document the historical use of the Subject Property prior to 1915. The following sources were reviewed during the course of this assessment and found to be limited: Aerial photographs were not available prior to 1928; Sanborn fire insurance maps were not available prior to 1915; historical topographic maps were not available prior to 1896, and historical city directories were not available prior to 1965. This data failure is not considered critical and does not change the conclusions of this report, as the 1928 historical aerial photograph revealed the Subject Property to be developed for agricultural purposes as row crops.

## **2.6 User Reliance**

This report is prepared for the sole use and benefit of Barr & Clark's client (Jamboree Housing) and it is reasonable for the client to rely upon the extent, character, and conclusions of this report. No other parties are granted that right without the express written authorization of Barr & Clark. This report is copyrighted. No copies may be made by any party other than Barr & Clark or Jamboree Housing without the written permission of Barr & Clark.

### **3.0 SITE DESCRIPTION**

#### **3.1 Property Location and Description**

The Subject Property consists of one unimproved slightly irregular-shaped parcel of land located along the west side of North Brea Boulevard, in Brea, California (Figures 1 and 2). The Subject Property parcel contains approximately 0.441 acres according to records reviewed by Barr & Clark.

The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 296-301-02. Title is reportedly vested in the City of Brea.

The Subject Property is located in a neighborhood of Brea which is located in a mixed residential and commercial area. The immediately surrounding properties consist of a car wash (Brea Car Wash at 100 West Lambert Road) and auto repair facility (Econo Lube N' Tune at 395 North Brea Boulevard) to the north; North Brea Boulevard followed by a retail building (CVS at 390 North Brea Boulevard) and a multi-tenant retail building at 330 North Brea Boulevard) to the east; a mixed-use property (Energetic Smile Family Dental at 307 North Brea Boulevard) and (Cabo Grill and Cantina at 301 North Brea Boulevard) to the south; and Madrona Avenue followed by single family residential properties to the west.

#### **3.2 Physical Setting**

The United States Geological Survey (USGS), *La Habra, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the Subject Property is located at approximately 386 feet above mean sea level (MSL). The contour lines in the area of the Subject Property indicate the area slopes gently towards the west/northwest. The Subject Property is depicted as undeveloped.

According to California's Groundwater: Bulletin 118, published by the State of California Department of Water Resources, the Site is located in the Coastal Plain of Orange County Groundwater Basin. The Coastal Plain of Orange County Groundwater Basin (Orange County Basin) underlies a coastal alluvial plain in the northwestern portion of Orange County. The basin is bounded by consolidated rocks exposed on the north in the Puente and Chino Hills, on the east in the Santa Ana Mountains, and on the south in the San Joaquin Hills. The basin is bounded by the Pacific Ocean on the southwest and by a low topographic divide approximated by the Orange County - Los Angeles County line on the northwest. The basin underlies the lower Santa Ana River watershed.

Review of soils information for the Subject area provided by EDR indicated the following: According to the soils information provided by EDR, the soils beneath the subject property are identified as Myford sandy loam. The typical soil profile is sandy loam from 0 to 11 inches, sandy clay from 11 to 18 inches, sandy clay loam from 18 to 70 inches and sandy loam from 70 to 79 inches. These soils are in the Class D Hydrologic Group with very slow infiltration rates. These soils are described as clayey, have a high water table, or are shallow to an impervious layer. These soils are moderately well drained. Depth to water table is 0 inches.

The nearest surface water in the vicinity of the Subject Property is the Brea Creek, located approximately 0.18 miles west of the Subject Property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to environmental documentation posted on the State Water Resources Control Board, GeoTracker website (<http://geotracker.swrcb.ca.gov>), the depth and direction of groundwater in the vicinity of the Subject Property is inferred to be present at approximately 45 feet below ground surface (bgs) and the flow is southwest.

### **3.3 Current and Historic Use of Site**

Based on a review of historical sources, the subject property was identified to consist of a portion of the Randolph School in 1915, a hospital/medical office building from at least 1926 through 2001, when the hospital/medical office building was demolished. The property has been comprised of vacant land since at least 2001.

### **3.4 Historical Uses of Site**

#### **3.4.1 Historical Aerial Photographs**

Information regarding the history of the Subject Property was obtained by purchasing and reviewing historical aerial photographs from EDR of Shelton, Connecticut. A total of 14 aerial photographs were reviewed for the following years: 1928, 1938, 1947, 1953, 1963, 1977, 1987, 1990, 1995, 2005, 2009, 2012, 2016 and 2020. The following observations were made from our review of the historical aerial photographs:

- 1928. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with an office building. The adjacent properties to the east appear to be developed with undeveloped land, a lumber sales yard and a machine shop. The adjacent properties to the south appear to be developed with single-family dwellings. The adjacent properties to the west appear to be undeveloped land.
- 1938. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with an office building. The adjacent properties to the east appear to be developed with undeveloped land and a machine shop. The adjacent property to the south appear to be developed with a hospital/medical office building. The adjacent properties to the west appear to be undeveloped land.
- 1947. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be undeveloped land. The adjacent properties to the east appear to be developed with undeveloped land, a commercial building and a machine shop. The adjacent property to the south appear to be developed with a hospital/medical office building. The adjacent properties to the west appear to be undeveloped land.

- 1953. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with a parking lot. The adjacent properties to the east appear to be developed with undeveloped land, a commercial building and a machine shop. The adjacent property to the south appear to be developed with a hospital/medical office building. The adjacent properties to the west appear to be undeveloped land.
- 1963. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with a parking lot. The adjacent properties to the east appear to be developed with undeveloped land, commercial buildings and a machine shop. The adjacent properties to the south appear to be developed with a hospital/medical office building and single-family dwellings. The adjacent properties to the west appear to be undeveloped land and developed with a single-family dwelling.
- 1977. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with a parking lot. The adjacent properties to the east appear to be developed with commercial retail buildings. The adjacent properties to the south appear to be developed with commercial buildings. The adjacent properties to the west appear to be developed with the existing single-family dwellings.
- 1987. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with a parking lot and the carwash building. The adjacent properties to the east appear to be developed with commercial retail buildings. The adjacent properties to the south appear to be developed with the existing commercial building. The adjacent properties to the west appear to be developed with the existing single-family dwellings.
- 1990, 1995, 2005. The Subject Property appears to be developed with a hospital/medical office building. The adjacent property to the north appears to be developed with the existing carwash building and auto repair facility. The adjacent properties to the east appear to be developed with commercial retail buildings. The adjacent properties to the south appear to be developed with the existing commercial building. The adjacent properties to the west appear to be developed with the existing single-family dwellings.

- 2009, 2012, 2016. The Subject Property appears to be undeveloped land. The adjacent property to the north appears to be developed with the existing carwash building and auto repair facility. The adjacent properties to the east appear to be developed with commercial retail buildings. The adjacent properties to the south appear to be developed with the existing commercial building. The adjacent properties to the west appear to be developed with the existing single-family dwellings.
- 2020. The Subject Property appears to be undeveloped land. The adjacent property to the north appears to be developed with the existing carwash building and auto repair facility. The adjacent properties to the east appear to be developed with the existing commercial retail buildings. The adjacent properties to the south appear to be developed with the existing commercial building. The adjacent properties to the west appear to be developed with the existing single-family dwellings.

### 3.4.2 Sanborn Fire Insurance Map Review

Information regarding the history of the Subject Property was obtained by purchasing and reviewing historical Sanborn fire insurance maps from EDR of Shelton, Connecticut. A total of 4 Sanborn maps was reviewed for the following years: 1915, 1920, 1926 and 1933. The following observations were made from our review of the historical Sanborn fire insurance maps:

- 1915  
Subject property: The subject property is depicted as developed with a portion of the Randolph School.  
Off-site: The property to the north is depicted as the remainder of the Randolph School property. The property to the east is depicted as undeveloped land and a machine and forging shop. The property to the south is depicted as single-family dwellings. The property to the west is not defined on the Sanborn fire insurance map.
- 1920  
Subject property: The subject property is depicted as undeveloped land.  
Off-site: The property to the north is depicted as the developed with an office building. The property to the east is depicted as a lumber storage yard and shop and a machine and forging shop. The property to the south is depicted as single-family dwellings. The property to the west is not defined on the Sanborn fire insurance map.
- 1926  
Subject property: The subject property is depicted as a hospital building.  
Off-site: The property to the north is depicted as the developed with an office building. The property to the east is depicted as a lumber storage yard and shop and a machine and forging shop. The property to the south is depicted as single-family dwellings. The property to the west is not defined on the Sanborn fire insurance map.
- 1933  
Subject property: The subject property is depicted as a hospital building.  
Off-site: The property to the north is depicted as the developed with an office building. The property to the east is depicted as a lumber storage yard and shop and a machine and forging shop. The property to the south is depicted as a hospital building. The property to the west is not defined on the Sanborn fire insurance map.

### **3.5 Oil and Gas History**

Barr & Clark researched the State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR), DOGGR Online Mapping System (<https://maps.conservation.ca.gov/doggr/wellfinder/>) to information regarding oil and gas development. According to the DOGGR Online Mapping System, no oil or gas wells are located on or adjacent to the Subject Property.

### **3.6 Adjacent Sites**

The Subject Property is located in a neighborhood of Brea which is located in a mixed residential and commercial area. The following adjacent properties were observed:

- North: Car wash (Brea Car Wash at 100 West Lambert Road) and auto repair facility (Econo Lube N' Tune at 395 North Brea Boulevard).
- East: North Brea Boulevard followed by a retail building (CVS at 390 North Brea Boulevard) and a multi-tenant retail building at 330 North Brea Boulevard).
- South: A mixed-use property (Energetic Smile Family Dental at 307 North Brea Boulevard) and (Cabo Grill and Cantina at 301 North Brea Boulevard).
- West: Madrona Avenue followed by single family residential properties.

## **4.0 USER PROVIDED INFORMATION**

### **4.1 Interviews**

#### 4.1.1 Interview with Owner

The owner of the Subject Property, identified as The City of Brea, was not available to be interviewed at the time of the assessment.

#### 4.1.2 Interview with Report User

Ms. Riddhi Chakraborty, Designated Representative of the User, indicated that she had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Subject Property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

#### 4.1.3 Interview with Key Site Manager

The subject property is a vacant lot, and property related personnel were not present at the Subject on the day of the Subject Property assessment.

#### 4.1.4 Interviews with Past Owners, Operators or Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

#### 4.1.5 Interview with Others

As the Subject Property is not an abandoned property as defined by ASTM E1527-21, interview with others were not performed.

### **4.2 Title Records**

A chain-of-title report was not requested by the client for this project.

### **4.3 Environmental Liens/Activity and Use Limitations**

An environmental liens/activity and use limitations report was not requested by the client for this project.

#### **4.4 Specialized Knowledge**

No specialized knowledge of the Subject Property was communicated from the client to Barr & Clark.

#### **4.5 Commonly Known Information**

No commonly known information that could relate to a Recognized Environmental Condition (REC) associated with the Subject Property was communicated from the client to Barr & Clark.

#### **4.6 Valuation Reduction for Environmental Issues**

No information was received from the client indicating that the selling price of the Subject Property was *significantly* reduced due to the chemical impacts existing on the Subject Property.

#### **4.7 Owner/Property Manager/Occupant Information**

The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 296-301-02. Title is reportedly vested in the City of Brea. The Subject Property consists of one unimproved slightly irregular-shaped parcel of land located along the west side of North Brea Boulevard, in Brea, California.

#### **4.8 Reason for Conducting this Phase I ESA**

According to the client, this Phase I ESA is being conducted for due diligence purposes.

#### **4.9 Other**

No additional information was provided to Barr & Clark for review.

#### **4.10 Historical Uses of Site**

Other than as indicated in Section 5.3 below, no other specific adverse historical uses of the Subject Property resulting in potential environmental concerns was communicated to Barr & Clark by the client.

## **5.0 RECORDS REVIEW**

### **5.1 Federal and State Database Records**

Barr & Clark retained Environmental Data Resources (EDR) of Shelton, Connecticut to provide a search of available environmental database records. The records search was conducted to meet the requirements of ASTM Standard Practice for Environmental Site Assessments, E1527-21. Search distances (radii) were selected generally pursuant to the ASTM E1527-21 standard. A copy of the EDR Report, included as Appendix C, normally contains the results of a review of the following databases and often others:

- Federal Records: US Environmental Protection Agency's Comprehensive Environmental Response Compensation, and Liability Information System (CERCLIS); National Priority List (NPL); RCRA Treatment, Storage, and Disposal Sites; toxic release reporting, Resource Conservation and Recovery Act (RCRA) violators; toxic substance manufacturers and importers; generators, or transporters, commercial storers and/or brokers and disposers of polychlorinated biphenyls (PCBs); hazardous material spill incidents reported to the department of Transportation; and Federal Superfund Liens.
- California Records: State hazardous waste sites; wastewater treatment facilities; solid waste facilities/landfill sites; and registered and leaking underground storage tank (UST) incident reports.

#### 5.1.1 Subject Property

The Subject Property was identified on the Environmental Data Resources, Inc. (EDR) environmental records database as Northside Medical Clinic, at 323 North Brea Boulevard, on the HAZNET and HWTS databases.

- The subject property was identified on the HWTS and HAZNET database under EPA ID Number CAL000066684 and CAD981402522. The HAZNET listings relate to the on-site generation of 0.0208 tons of Photochemicals / photo-processing waste in 1994 and 0.0125 tons of Photochemicals / photo-processing waste in 1993 . Based on the aforementioned, this HAZNET and HWTS listing is not anticipated to represent a significant environmental concern.

### 5.1.2 Off-Site Facilities with Known Locations

The EDR database search identified numerous properties listed on databases indicating environmental impairment in the vicinity of the Subject Property within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21).

The following is a discussion of listed sites:

- Brea Vehicle Cleaning, at 101 West Lambert Road, is located adjacent to the north of the Subject Property. According to the regulatory database report, this site is listed on the UST FINDER, UST, LUST, HIST UST, CORTEST, HIST CORTESE and CERS databases.

Barr & Clark reviewed a tank closure report, prepared by Healy Environmental, Inc. and dated February 12, 1990. The report identified that “one 12,000 gallon unleaded gasoline steel underground storage tank was located on the property and the tank was removed on January 30, 1990. Results of the analyses indicate below reporting limit concentrations of contaminants in all soil samples, except sample SP1 which contains 33 parts per million Total Petroleum Fuel Hydrocarbons and 0.20 parts per million xylenes. Based on the guidelines established by the Regional Water Quality Control Board from the Leaking Underground Fuel Tank manual, these concentrations are considered to be insignificant and are below current regulatory action levels. Based on our findings and the analytical results, we conclude that insignificant concentrations of Purgeable Aromatic Hydrocarbons and Total Petroleum Fuel Hydrocarbons are present in the soil around the former underground storage tank. As ground water was not encountered and well data indicate a ground water depth of 135 feet below the surface 4,000 feet away, we have determined that approximately 120 feet of uncontaminated soil is present before ground water is encountered. We conclude that this site has no environmental impact on local ground water. It is suggested that investigations be considered complete and the site be closed.” A letter from the County of Orange Health Care Agency Department of Environmental Health, dated April 4, 1990 confirmed case closure.” Based on the presence of the leaking underground storage tank, the potential for a vapor encroachment condition cannot be ruled out.

- Econo Lube N' Tube #33, at 395 North Brea Boulevard, is located adjacent to the north of the Subject Property. According to the regulatory database report, this site is listed on the RCRA NonGen/NLR, CERS TANKS, CERS, CERS HAZ WASTE, CA FID UST, UST, SWEEPS UST, RCRA-SQG, FINDS, ECHO, HWTS, HAZNET, UST, SWEEPS UST and HWTS databases. The UST listing identified a 500-gallon above ground storage tank containing petroleum. The HAZNET listings relate to the on-site generation of the following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures and the following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures. No violations were reported for the subject property. Based on the current use of the subject property and the underground storage tank listing, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).
- CVS Pharmacy #11111, at 390 North Brea Boulevard, is located adjacent to the east of the Subject Property across North Brea Boulevard. According to the regulatory database report, this site is listed on the UST, CERS HAZ WASTE, HWTS, HAZNET, NPDES, CIWQS and RCRA-LQG databases. The HAZNET listings relate to the on-site generation of off-specification, aged or surplus organics, pharmaceutical waste, unspecified solvent mixture and other inorganic solid waste. No information was provided regarding the UST listing. No violations were reported for the subject property. Based on the underground storage tank listing and lack of information regarding the location or removal of the underground storage tank, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

- American Quality Dry Cleaners, at 330 North Brea Boulevard, Suite C, is located adjacent to the east of the Subject Property across North Brea Boulevard. According to the regulatory database report, this site is listed on the EDR HIST CLEANER, DRYCLEANERS, RCRA-SQG, FINDS and ECHO databases. American Quality Dry Cleaners is not currently located at the site address. The listings identify the site as a dry cleaner utilizing equipment with Perchloroethylene. Based on the previous use of dry cleaning equipment utilizing solvents such as perchloroethylene, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

The EDR database search identified several additional facilities located within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21). Based on the reported information, the listed facilities have a low potential to impact soil or groundwater beneath the Subject Property.

## **5.2 Orphan Summary**

A total of three properties were identified in the EDR report as “orphan sites”. These are properties listed in environmental databases, but which EDR has been unable to locate with adequate precision to determine whether they are pertinent to the investigation at the Subject Property.

Barr & Clark was able to determine to a reasonable degree of certainty that the listed orphan sites were not within the specified database search distances, or if a site was in the distance specified, it was not an identified concern. Some of the sites listed could not be evaluated due to insufficient information.

### **5.3 State, City and County Files**

Public agencies were contacted to review file information, if available, regarding the possible presence of environmental impacts, remedial activities, hazardous materials storage or hazardous material usage at the subject property. The information obtained from the governmental agencies is summarized below.

#### 5.3.1 California Regional Water Quality Control Board

The Regional Water Quality Control Board (RWQCB) maintains records for groundwater contamination and remedial activities at selected impacted sites. Barr & Clark researched the RWQCB GeoTracker website ([www.geotracker.waterboards.ca.gov](http://www.geotracker.waterboards.ca.gov)) was researched on April 11, 2024. No records regarding a release on the Subject Property were on-file on the RWQCB GeoTracker website.

#### 5.3.2 California Department of Toxic Substances Control

The California Department of Toxic Substances Control (DTSC) files include records of hazardous materials storage and/or impacts at various sites. Barr & Clark researched the DTSC EnviroStor website on April 11, 2024. No records regarding a release on the Site were on-file at the DTSC.

#### 5.3.3 Department of Environmental Health

A written request for file review was submitted to the Orange County Department of Environmental Health (OCDEH) for records pertaining to underground storage tanks and hazardous materials. No information has been provided to date.

#### 5.3.4 Fire Department

A request for file review was submitted to the City of Brea Fire Department on April 11, 2024 for records pertaining to underground storage tanks, hazardous materials and fire prevention information. No potential environmental concerns were identified in the review of the building records for the Site.

#### 5.3.5 Building Department

Barr & Clark visited the City of Brea Building and Safety Division on April 11, 2024 for information regarding historical tenants and property use of the Site. No potential environmental concerns were identified in the review of the building records for the Site.

### 5.3.6 Planning Department

Barr & Clark visited the City of Brea Planning Division on April 11, 2024 for information regarding historical tenants and property use of the Site. According to the Planning Division, the Site is zoned MU-I for Mixed Use 1.

### 5.3.7 South Coast Air Quality Management District (SCAQMD)

Barr & Clark researched the Air Quality Management District (AQMD) online database on April 11, 2024 for information regarding any Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) records for the subject property related to air emission equipment, which may include dry cleaning machines and USTs. The subject property is not listed on the AQMD databases. No PTOs, NOVs or NTCs were issued for the Subject Property.

## **5.4 Historical Environmental Reports**

Although requested, no previous reports or other pertinent documentation was provided to Barr & Clark for review during the course of this assessment.

## **6.0 SITE RECONNAISSANCE**

### **6.1 Summary of Site Reconnaissance**

Barr & Clark assessor Michael Atallah visited the Subject Property on April 11, 2024. The weather at the time of the site visit was clear and approximately 65 degrees Fahrenheit.

The Subject Property consists of one unimproved slightly irregular-shaped parcel of land located along the west side of North Brea Boulevard, in Brea, California (Figures 1 and 2). The Subject Property parcel contains approximately 0.441 acres according to records reviewed by Barr & Clark.

The Subject Property is identified as Orange County Assessor's Parcel Number (APN): 296-301-02. Title is reportedly vested in the City of Brea.

The Subject Property is located in a neighborhood of Brea which is located in a mixed residential and commercial area. The immediately surrounding properties consist of a car wash (Brea Car Wash at 100 West Lambert Road) and auto repair facility (Econo Lube N' Tune at 395 North Brea Boulevard) to the north; North Brea Boulevard followed by a retail building (CVS at 390 North Brea Boulevard) and a multi-tenant retail building at 330 North Brea Boulevard) to the east; a mixed-use property (Energetic Smile Family Dental at 307 North Brea Boulevard) and (Cabo Grill and Cantina at 301 North Brea Boulevard) to the south; and Madrona Avenue followed by single family residential properties to the west.

Southern California Edison (SCE) provides electricity, the City of Brea provides water and sewer services and Southern California Gas Company (natural gas) provides natural gas service to the Site. Trash and recycling services is provided by a licensed trash hauler, which is detailed in Section 6.2.5 below.

## **6.2 Evaluation of Specific Concerns**

### 6.2.1 Hazardous Substances and Petroleum Products

No hazardous materials or petroleum products were observed at the Subject. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the Subject.

### 6.2.2 Storage Tanks

No underground storage tanks (USTs) or aboveground storage tanks (ASTs) for hazardous materials storage were reported for the Site. No visible evidence of such was observed during the site reconnaissance.

### 6.2.3 Polychlorinated Biphenyls

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. No transformers were observed on the Subject Property. Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the Subject Property during Barr & Clark’s reconnaissance.

### 6.2.4 Waste Disposal

The Subject Property is currently a vacant lot and is not involved in the generation of wastes. During Barr and Clark’s site survey, we observed small amounts of miscellaneous nuisance trash in the form of metal, tires, plastic and paper at the Subject. No evidence of hazardous materials or petroleum products was observed in the areas of the miscellaneous nuisance trash. Further, this trash is not considered environmentally significant. No further action or investigation is recommended regarding wastes at the Subject.

6.2.5 Sewage Discharge and Disposal

The Subject Property is currently a vacant lot and is not involved in the generation of wastes. No wastewater treatment facilities or septic systems were observed or reported on the Subject Property.

6.2.6 Stained Soils

No evidence of stained soils or distressed vegetation was observed during the Barr & Clark site reconnaissance.

6.2.7 Surface Runoff

The Subject Property is currently a vacant lot. Storm water is removed from the Subject Property primarily by sheet flow action.

6.2.8 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the Subject Property were observed.

6.2.9 Pools of Liquid

No evidence of pools of liquid was observed during the Barr & Clark site reconnaissance.

6.2.10 Pits, Ponds or Lagoons

No evidence of pits, ponds or lagoons was observed during the Barr & Clark site reconnaissance.

6.2.11 Strong, Pungent or Noxious Odors

No evidence of strong, pungent or noxious odors was evident during the Barr & Clark site reconnaissance.

6.2.12 Stressed Vegetation

No evidence of stressed vegetation was observed at the Subject Property during the Barr & Clark site reconnaissance.

6.2.13 Clarifiers, Sumps, Oil Water Separators or Septic Tanks

No clarifiers, sumps or oil water separators were observed or reported for the Subject Property addresses.

6.2.14 Groundwater Wells

No groundwater wells were observed or reported for the Subject Property.

6.2.15 Oil Wells / Pipelines

No oil wells or pipelines were observed or reported for the Subject Property.

6.2.16 High Voltage Power Lines

No high voltage power lines were observed in the nearby vicinity of the Subject Property.

6.2.17 Imported Fill

No information related to the use of imported fill material was identified in records for the Subject Property addresses.

6.2.18 Wetlands

Coverage for the U.S. Fish and Wildlife Service National Wetland Inventory (NWI) Maps was reviewed via the U.S. Fish and Wildlife Service website at <http://wetlandsfws.er.usgs.gov/wtlnds/launch.html>. Based on the information provided on the NWI map, there are no wetlands located on the Subject Property.

Barr & Clark performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06059C0042J, dated December 3, 2009, the subject property appears to be located in Zone X, Areas of Minimal Flooding.

#### 6.2.19 Asbestos

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are “presumed asbestos-containing material” (PACM).

The Subject Property is currently unimproved land and no suspect ACM were observed during the site assessment. No further action or investigation is recommended regarding ACM at the Subject.

#### 6.2.20 Lead Based Paints

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm<sup>2</sup> (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as “Title X”, to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a “hazard,” although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

The Subject Property is currently unimproved land and no suspect lead-based paint was observed during the site assessment. No further action or investigation is recommended regarding LBP at the Subject.

#### 6.2.21 Radon

The Site is located in Radon Zone 3, which has a predicted average indoor screening level less than 2.0 pCi/L. The USEPA action level for radon is 4 pCi/L. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.2.22 Drinking Water Quality

According to available information, a public water system operated by the City of Brea serves the Site vicinity. According to a representative of the City of Brea, shallow groundwater beneath the Site is not utilized for domestic purposes. The sources of public water for the City of Brea are from imported by the MWDSC, and ground water imported from Cal Domestic in Whittier. MWDSC's imported water sources are the Colorado River and the State Water Project, which draws water from the Sacramento-San Joaquin River Delta. Cal Domestic water originates from the Main San Gabriel groundwater basin. According to the 2023 Water Quality Report, water supplied to the Site is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.2.23 Water Intrusion and Mold Growth

The Subject Property is currently unimproved land and no mold, conditions conducive to mold, or evidence of moisture problems were observed during the site assessment. No further action or investigation is recommended regarding mold at the Subject.

## **7.0 VAPOR ENCROACHMENT SCREEN**

Barr & Clark has completed a Tier 1 Vapor Encroachment Screen of the Subject in accordance with ASTM Standard E 2600-10: Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

### **7.1 Purpose**

The purpose of this Tier 1 Vapor Encroachment Screen (VES) is to identify, to the extent feasible pursuant to the procedures presented in the ASTM E 2600-10 standard guide, the potential for a Vapor Encroachment Condition (VEC) to exist at the Subject property.

### **7.2 Methodology**

Barr & Clark utilized for this assessment EDR's VEC App to accurately identify and document potential VEC sites within the Subject's Area of Concern (AOC). By using integrated data applications and state-of-the-art analytical tools, EDR's VEC App has been specifically designed to adhere to ASTM E 2600-10. EDR's VEC App performs an initial search of all ASTM E 2600-10 standard government record databases and EDR proprietary historical records related to former dry cleaners, gas stations, and manufactured gas plants within the 1/3 mile maximum distance defined in ASTM E 2600-10 for COC-contaminated sites.

### **7.3 Results**

**Subject:** The Subject Property was identified on the Environmental Data Resources, Inc. (EDR) environmental records database as Northside Medical Clinic, at 323 North Brea Boulevard, on the HAZNET and HWTS databases.

- The subject property was identified on the HWTS and HAZNET database under EPA ID Number CAL000066684 and CAD981402522. The HAZNET listings relate to the on-site generation of 0.0208 tons of Photochemicals / photo-processing waste in 1994 and 0.0125 tons of Photochemicals / photo-processing waste in 1993 . Based on the aforementioned, this HAZNET and HWTS listing is not anticipated to represent a significant environmental concern and a vapor encroachment condition can be ruled out.

**Area of Concern (AOC):**

The EDR database search identified numerous properties listed on databases indicating environmental impairment in the vicinity of the Subject Property within the search distances specified in the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Designation E1527-21).

The following is a discussion of listed sites:

- Brea Vehicle Cleaning, at 101 West Lambert Road, is located adjacent to the north of the Subject Property. According to the regulatory database report, this site is listed on the UST FINDER, UST, LUST, HIST UST, CORTEST, HIST CORTESE and CERS databases.

Barr & Clark reviewed a tank closure report, prepared by Healy Environmental, Inc. and dated February 12, 1990. The report identified that “one 12,000 gallon unleaded gasoline steel underground storage tank was located on the property and the tank was removed on January 30, 1990. Results of the analyses indicate below reporting limit concentrations of contaminants in all soil samples, except sample SP1 which contains 33 parts per million Total Petroleum Fuel Hydrocarbons and 0.20 parts per million xylenes. Based on the guidelines established by the Regional Water Quality Control Board from the Leaking Underground Fuel Tank manual, these concentrations are considered to be insignificant and are below current regulatory action levels. Based on our findings and the analytical results, we conclude that insignificant concentrations of Purgeable Aromatic Hydrocarbons and Total Petroleum Fuel Hydrocarbons are present in the soil around the former underground storage tank. As ground water was not encountered and well data indicate a ground water depth of 135 feet below the surface 4,000 feet away, we have determined that approximately 120 feet of uncontaminated soil is present before ground water is encountered. We conclude that this site has no environmental impact on local ground water. It is suggested that investigations be considered complete and the site be closed.” A letter from the County of Orange Health Care Agency Department of Environmental Health, dated April 4, 1990 confirmed case closure.” Based on the presence of the leaking underground storage tank, the potential for a vapor encroachment condition cannot be ruled out.

- Econo Lube N' Tube #33, at 395 North Brea Boulevard, is located adjacent to the north of the Subject Property. According to the regulatory database report, this site is listed on the RCRA NonGen/NLR, CERS TANKS, CERS, CERS HAZ WASTE, CA FID UST, UST, SWEEPS UST, RCRA-SQG, FINDS, ECHO, HWTS, HAZNET, UST, SWEEPS UST and HWTS databases. The UST listing identified a 500-gallon above ground storage tank containing petroleum. The HAZNET listings relate to the on-site generation of the following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures and the following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures. No violations were reported for the subject property. Based on the current use of the subject property and the underground storage tank listing, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).
- CVS Pharmacy #11111, at 390 North Brea Boulevard, is located adjacent to the east of the Subject Property across North Brea Boulevard. According to the regulatory database report, this site is listed on the UST, CERS HAZ WASTE, HWTS, HAZNET, NPDES, CIWQS and RCRA-LQG databases. The HAZNET listings relate to the on-site generation of off-specification, aged or surplus organics, pharmaceutical waste, unspecified solvent mixture and other inorganic solid waste. No information was provided regarding the UST listing. No violations were reported for the subject property. Based on the underground storage tank listing and lack of information regarding the location or removal of the underground storage tank, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

- American Quality Dry Cleaners, at 330 North Brea Boulevard, Suite C, is located adjacent to the east of the Subject Property across North Brea Boulevard. According to the regulatory database report, this site is listed on the EDR HIST CLEANER, DRYCLEANERS, RCRA-SQG, FINDS and ECHO databases. American Quality Dry Cleaners is not currently located at the site address. The listings identify the site as a dry cleaner utilizing equipment with Perchloroethylene. Based on the previous use of dry cleaning equipment utilizing solvents such as perchloroethylene, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

## **8.0 FINDINGS AND RECOMMENDATIONS**

Barr & Clark has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by 40 CFR §312 et al and Jamboree Housing for a full Phase I Environmental Site Assessment of the Vacant Land located at 323 North Brea Boulevard, Brea, CA 92821 (the Subject Property). Any exceptions to, or deletions from, Jamboree Housing 's Scope of Work were previously described in this report where applicable.

This assessment has revealed no evidence of historical recognized environmental conditions (HRECs), or controlled recognized environmental conditions (CRECs) in connection with the Subject Property. However, the following environmental issues were identified that warrants mention:

- Based on the current and previous uses of the adjacent properties to the north and east of the subject property, including listings for leaking underground storage tanks and dry cleaning equipment utilizing solvents such as perchloroethylene, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC).

Based on the conclusions of this assessment, Barr & Clark recommends the following:

- Based on the current and previous uses of the adjacent properties to the north and east of the subject property, including listings for leaking underground storage tanks and dry cleaning equipment utilizing solvents such as perchloroethylene, a Phase II Subsurface Investigation of the subject property to assess potential impacts from hazardous materials and volatile organic compounds and soil vapor impacts is recommended.

*This executive summary is provided solely for the purpose of overview. Any party authorized to rely on this document must read the full report. The executive summary may omit details, any one of which could be crucial to the proper understanding and risk assessment of the subject matter. This report must be read in its entirety, no one page, sentence or section stands alone.*

## **9.0 SIGNATURE PAGE**

By signing below, Barr & Clark declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. Barr & Clark has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Barr & Clark has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/29/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 18 ENVIROSTOR sites within approximately 1 mile of the target property.

### ***Lists of state and tribal leaking storage tanks***

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 18 LUST sites within approximately 0.5 miles of the target property.

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 43 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 8 DRYCLEANERS sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Evaluation:

Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 03-05-2019  
 Violations Found: No  
 Eval Type: Routine done by local agency

Eval Notes: The hazardous waste found here include: - Corrosive Waste (returned and broken consumer commodity) - Flammable Waste (returned and broken consumer commodity) - Toxic Waste (returned and broken consumer commodity) There was a pharmacy on site, but there was no hazardous waste accumulated in this area during this inspection. Manifest was available and was reviewed and waste is being picked up by Stericycle. The pharmacy on site did generate P-listed waste of quantity one pound since its opening in November 2018. Per Ms. Quezada, hazardous waste training is being conducted for employees on an annual basis. Weekly inspections are performed. The trash cans inside the store were checked and there was no hazardous waste. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Violation Program: HMRRP  
Violation Source: CERS,

Site ID: 413301  
Site Name: ECONO LUBE N TUNE & BRAKE # 33  
Violation Date: 02-02-2018  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 02/02/2018. All containers of hazardous waste had faded labels. Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Used oil containers need the following information: Used oil , and accumulation start date. Used oil filters need the following information: Used oil Filters , and accumulation start date. Violation was noted for improper labeling, was corrected during the inspection.

Eval Date: 02-02-2018  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct an above ground storage tank inspection. The site had down-sized and does not have aggregate petroleum storage greater than 1320 gallons. Per Mr. Jun Park, the tanks are too heavy to be removed from the location and they used to hold oil with heavier grades for the old cars. Assisted Ms. Park today to make signs to post on the hydraulic tanks to permanently close them. This site will be removed from the APSA program an RUR will be submitted for accounting purposes. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Notes: On site to conduct an initial APSA inspection with Jun Park. Your facility has the following regulated tanks on site: ABOVEGROUND: (1) new oil (10W30) AST = 240 gallons. BASEMENT: (2) waste oil ASTs = 240 gallons each Your business is subject to the APSA regulations. You may refer to the OCHCA webs site for more information regarding the Spill Prevention Control and Countermeasure (SPCC) requirements at [www.ochealthinfo.com/about-hca/public-health-services/environmental-health-services/hazardous-materials/programs](http://www.ochealthinfo.com/about-hca/public-health-services/environmental-health-services/hazardous-materials/programs). You need to complete and implement a Tier 1, SPCC plan. You may find a blank SPCC Plan on the OCHCA web site listed above. This Plan needs to be maintained on site and does not need to be submitted to OCHCA.

Met with Jun Park of Econo Lube N Tune. Consent was provided to enter and conduct inspection activities. Facility is regulated under the Aboveground Storage Tank Act (APSA). Facility has approximately 2,000 gallons of petroleum oils with not tank greater than 5,000 gallons. This facility is regulated as a Tier 1 APSA facility. Facility has the Following: 1) On site SPCC Prepared and implemented on this date. The SPCC plan was recertified on 7/11/2022. The plan is required to be recertified every 5 years. a. Facilities that are a qualified Tier 1 facility (store less than 10,000 gallons, with no single tank/container having a volume greater than 5,000 gallons) can create their own SPCC Plan using a federal template. 2) Periodic inspections (monthly) were observed. 3) Visual inspections are conducted daily to ensure tanks are not leaking. 3) Appropriate secondary containment or diversionary structures available. Boo

Hazardous Waste Summary:

Waste Code: F002  
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004  
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:  
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Site Name: COMMUNITY TIRE AUTO SERVICE  
Violation Date: 12-12-2016  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 11/17/2017. The used oil drums did not have anything filled out on the label, and the used oil filter drums did not have an accumulation start date. For Used oil, the following information needs to be on the label: Used oil, and accumulation start date. Used oil filters need the following information: Used oil Filters, and accumulation start date.

Site ID: 413259  
Site Name: COMMUNITY TIRE AUTO SERVICE  
Violation Date: 12-12-2016  
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173  
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
Violation Notes: Returned to compliance on 11/17/2017. One waste oil drum has open bung hole, both drums of used oil filters were open, and two waste antifreeze drums had open bung holes. All hazardous waste drums must be closed unless you are in the process of adding and/ or removing waste from the drum.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 12-12-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the owner, Roger Rosenberg at 12:20 pm. The hazardous waste found here: - Used oil = 400 gallons (1 tank and 2X55 gal drums) - Waste Antifreeze = 110 gallons - Parts Washer = 30 gallon - Used oil filters = 300 items Containers of hazardous waste were not covered and some of them were not labeled properly. Manifests were available and were reviewed. Hazardous waste is being picked up Safety Kleen and Alexis oil company. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Emergency response information is posted. The common dumpsters outside the shop was checked and no hazardous waste was observed. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-05-2014  
Violations Found: No  
Eval Type: Routine done by local agency

Eval Notes: On-site for routine inspection. Met with Roger Rosenberg this date and obtained consent to conduct the inspection. Hazardous Waste receipts made available and reviewed. HW containers properly labeled. One (1) new label was placed on a 55-gallon drum of used oil. The old label could not be read. Facility has completed and submitted an OCHCA BEP plan via the e submit portal that has emergency coordinator information. Inspected trash/dumpster and it does not contain any hazardous waste. The perimeter of the facility was also inspected; no signs of releases were noted.

Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Michael York of Community Tire and Auto. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database on 1/12/2022. The 2022 HMBEP has been approved. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Eval Date: 05-30-2019  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary pictures was given by the Manager, Josh Guterrez. There are 6 employees here at this site. The hazardous waste found here: - Used Oil = 240 gallons - Waste Antifreeze - Used Oil Filters (paper, metal and gasoline) - Parts Washer Manifests were available and were reviewed, and waste was being picked up by World Oil. Walked the perimeter of the site, and there were no oil spills on the ground and near the above tanks. The dumpster at the front of the store was checked and there was no hazardous waste. Necessary Emergency Response information was posted inside the store. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Business Emergency Plan inspection. Met with Ruben Rojas of Autozone. Consent was provided to enter and conduct inspection activities. The HMBEP has been submitted into the CERS Database on 1/13/2022. The 2022 HazMat Inventory and Emergency Plan has been accepted. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Eval Type: Routine done by local agency  
Eval Notes: INSPECTOR COMMENTS: On-site for a routine inspection. Met with Kevin Yurasits, the store manager, and obtained consent. Toured the facility. Verified the site map and inventory. Spoke to Deborah Williams over the phone. The 2016 HMBP submittal has been completed in the CERS database. The submission will be reviewed for accuracy.  
Eval Division: Orange County Environmental Health  
Eval Program: HMRRP  
Eval Source: CERS,

Eval General Type: Other/Unknown  
Eval Date: 03-30-2016  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: HWTS File review  
Eval Division: Orange County Environmental Health  
Eval Program: HW  
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-12-2014  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On-site for routine inspection. Met with the store manager, Priscilla Velasco this date and obtained consent to conduct the inspection. No hazardous waste manifests could be located during the inspection. HW containers properly labeled. A small spill of what appeared to be transmission fluid was noticed on one of the 1-gallon waste pails. Spoke to the manager who agreed to clean up the spill with a paper towel and place the contaminated towel in the proper waste bucket. Facility has a OCHCA hazardous materials disclosure that contains information for the emergency coordinator. The perimeter of the facility was also inspected; no signs of releases were noted.

Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Rob Piattoni of Ron & Waynes Automotive. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database for 2022. The 2022 HMBEP has been approved. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Eval General Type: Other/Unknown  
Eval Date: 12-29-2014  
Violations Found: Yes  
Eval Type: Other, not routine, done by local agency  
Eval Notes: INSPECTOR COMMENTS: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to [www.esubmit.ocgov.com](http://www.esubmit.ocgov.com) to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit [Truncated]

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/16/2017. The Used Oil drum, waste antifreeze drums and the used drained oil filter drum all had faded labels. Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Used oil containers need the following information: Used oil , and accumulation start date. Used oil filters need the following information: Used oil Filters , and accumulation start date. Violation was noted for improper labeling, was corrected during the inspection.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/20/2020. Observation: One of the Used oil drums was missing a label and the waste antifreeze drum was missing accumulation start date. Corrective Action: Please make sure all containers holding hazardous waste has the following information on the label. Used oil containers need the following information: Used oil , and accumulation start date. The date was added to the waste antifreeze container and both violations were corrected during this inspection.

**Violations:**

Site ID: 560760  
Site Name: Fix Auto Brea  
Violation Date: 12-15-2014  
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.  
Violation Notes: Returned to compliance on 01/26/2015. The TSDf signed copy of manifest 013238832 JJK dated 07/09/14 could not be located. Obtain copies and have them available of for review within 30 days.  
Violation Division: Orange County Environmental Health  
Violation Program: HW  
Violation Source: CERS,

Site ID: 560760  
Site Name: Fix Auto Brea  
Violation Date: 09-11-2019  
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)  
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.  
Violation Notes: Returned to compliance on 10/10/2019. Observation: Hazardous waste training records were available for Selvi, but not for the other employees at the facility. Corrective Action: Please conduct employee training on an annual basis for hazardous waste management procedures and emergency response training relevant to the positions in which they are employed. The training sign in sheet should include: name, date, signature and type of training and submit training documentation to this agency within 60 days.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 09-11-2019  
Violations Found: Yes  
Eval Type: Routine done by local agency

Eval Notes: The facility had eight employees. The hazardous waste found here include: - Oily Rags - Used Oil - Waste antifreeze - Paint waste (Non-RCRA) - Flammable waste (acetone and paint) Manifests were available and waste was being picked up by Pacific Resources recovery. Test results were available for paint booth filters from October of 2018 from Bob's Filter services. A total metals test was conducted on the filter waste, the Barium exceeded the TTLC thresholds and required an STLC. A STLC was performed on Barium and the test indicated the waste paint booth filters were non-hazardous. Per the owner, Selvi, the paint booth filters are changed out on a quarterly basis. The dumpster inside the store and outside were checked. The facility had a couple of units that were contiguous. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 01-27-2017  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the owner, Tony Santos. Mr. Santos confirmed that there are 6 employees present on-site. The hazardous waste found here: - Used oil = 500 gallon tank - Used oil filters = 3X 55 gallon drums - Waste Antifreeze = 5 gallons (inside a 275 gallon tote) Containers of hazardous waste were not covered and some did not have complete labels Manifests were available and were reviewed and waste is being picked by Asbury Environmental Services. Walked the perimeter of the site, and there were several used oil spills observed on the floor of the car shop during this inspection. The mechanic on-site cleaned up the spills with mop and absorbent liquid. Emergency information is posted near the office wall for employees. The common trash cans outside the shop were checked and found two non-empty aerosol cans inside them. The owner removed the [Truncated]

Eval Division: Orange County Environmental Health  
Eval Program: HW  
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-30-2019  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: The following material was observed in amounts that meet or exceed the minimum volumes required for disclosure: - Lubricating Oil - Oxygen - Acetylene - Waste Oil - Antifreeze - Waste Antifreeze - ATF Reviewed BEP and the site map with the business. Emergency response equipment was present on site. Site map was current and was reflective of site conditions. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) on CERS within 30 days of the change. Please contact Shruthi Sill at [ssill@ochca.com](mailto:ssill@ochca.com) with regards to any questions.

Violations:

Site ID: 91770  
Site Name: American Tire Depot #89 Brea  
Violation Date: 07-24-2020  
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.  
Violation Notes: Returned to compliance on 02/03/2022. Observation: Manifests were only available for Used Oil. Corrective Action: Please submit manifests for waste antifreeze and used oil filter for 2020 and 2019 to this agency within 30 days to abate this violation

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-13-2017  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary pictures was given by the Manager, Eric Schinke. Per Mr. Schinke, there are four employees on-site. The hazardous waste found here include: - Used Oil = 200 gallons (tank) - Waste Antifreeze = 55 gallons - Used drained oil filters - Paper Oil filters All hazardous waste containers were closed and labeled properly. Manifests were available and were reviewed, and waste was being picked up by Asbury Environmental Services. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Weekly inspections are performed by the Manager. Emergency response sticker with the necessary information was posted near the restroom area. The dumpsters at the front of the store was checked and it was empty at the time of this inspection. Please contact Shruthi Sill at ssill@ochca.com [Truncated]

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-25-2022  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Donnie Hall of American Tire Depot. Consent was provided to enter and conduct inspection activities. The HMBEP has been submitted into the CERS Database on 2/23/2022. The 2022 HazMat Inventory and Emergency Plan has been accepted. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; Ensure that annual training is being conducted and documented. - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Violation Date: 08-23-2019  
Citation: HSC 6.95 25505(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(c)

Violation Description: Failure to have a business plan readily available to personnel of the business or the unified program facility with responsibilities for emergency response or training.

Violation Notes: Returned to compliance on 08/23/2019. OBSERVATION: The business failed to have the hazardous material business plan readily available to personnel of the business or the unified program facility with responsibilities for emergency response or training. CORRECTIVE ACTION: Provide a readily available business plan to personnel of the business or the unified program facility with responsibilities for emergency response or training. Document that appropriate personnel have the business plan readily available. The business plan was printed and filed during this inspection.

to enter and conduct inspection activities. Facility is regulated under the Aboveground Storage Tank Act (APSA). Facility has approximately 3,545 gallons of petroleum oils with not tank greater than 5,000 gallons. This facility is regulated as a Tier 1 APSA facility. Facility has the Following: 1) On site SPCC Prepared and implemented. The SPCC plan was recertified in September 2021. The plan is required to be recertified every 5 years. a. Facilities that are a qualified Tier 1 facility (store less than 10,000 gallons, with no single tank/container having a volume greater than 5,000 gallons) can create their own SPCC Plan using a federal template. 2) Periodic inspections (monthly) were observed. 3) Appropriate secondary containment or diversionary structures were available. The facility is in compliance.

**Violations:**

Site ID: 413002  
Site Name: PACIFIC INTERNATIONAL ELECTRIC  
Violation Date: 08-12-2020  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.  
Violation Notes: Returned to compliance on 08/12/2020. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date of March 1st 2020. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date on CERS at <https://cersbusiness3.calepa.ca.gov/> The facility submitted a CERS submission during the inspection and this violation has been corrected.

Violation Notes: if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Returned to compliance on 02/03/2022. Observation: A 55 gallon drum of used oil has been on-site since 10-23-2015. The drum is currently close to full. The facility has not added any additional waste to the drum for a past couple of months per Mr. White. Corrective Action: Dispose of hazardous waste that has been stored over the applicable time limit and submit manifest after the waste has been shipped off-site to abate this violation.

Violation Division: Orange County Environmental Health  
Violation Program: HW  
Violation Source: CERS,

Site ID: 413002

Violation Date: 08-12-2020  
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 08/12/2020. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; quantity of mineral oil. CORRECTIVE ACTION: Update all submittal elements effected by the change(s) and electronically submit the update within 30 days. An updated CERS submission was completed during inspection and this violation has been corrected.

Eval Notes: On site to conduct a routine hazardous material and business emergency plan inspection. Consent to enter, inspect and take any necessary pictures was given by the Vice President, Garry White. Mr. White confirmed that the ownership remains the same. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. The dumpsters at the back of the warehouse was checked and there was no hazardous waste. The site has no hazardous waste, the site has changed their practices on accepting transformer units with oil in them. The last hazardous waste shipment was completed on September 2015 and the waste was picked up by Safety Kleen. Educated the facility on active EPA ID number and questionnaire. The facility status will be adjusted to reflect the absence of hazardous waste. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

INSPECTOR COMMENTS: On-site for a routine inspection. Met with Gary White and obtained consent to conduct the inspection. EPA ID number CAL000331317 has been obtained and from DTSC and is active. No hazardous waste has been disposed of in the last three years. There are two drums of used oil on site. One drum holds Non-PCB transformer oil and the other is used cutting oil. There is less than 27 gallons total on-site in the two 55-gallon drums. There is a contingency plan on-site that contains emergency numbers and contact procedures. Both containers were properly labeled during the inspection.

Site ID: 413198  
Site Name: BIG O TIRES # 5304  
Violation Date: 07-03-2020  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 02/03/2022. Observation: The drum of waste antifreeze and the drum of used oil filter (both paper and metal) did not have legible label on them. Labels were faded on three drums. Corrective Action: Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Used oil filters need the following information: Used oil Filters , and accumulation start date. Please send pictures of correctly labeled drums to this agency to abate this violation.

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Rudy Torres of Big O Tires. Consent was provided to enter and conduct inspection activities. The HMBEP has been submitted into the CERS Database on 2/22/2022. The 2022 HazMat Inventory and Emergency Plan has been accepted. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; Please complete the annual Hazardous Materials contingency plan training. - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Eval Notes: On-site for routine inspection. Met with Erick Rivas this date and obtained consent to conduct the inspection. Hazardous Waste receipts made available and reviewed. HW containers properly labeled this date by the operator. Labels and accumulation start dates added to the containers during the inspection. The labels at the time of inspection were on the walls behind the drums. Emergency numbers posted during the inspection by the operator. Inspected the trash/dumpster and it does not appear to contain hazardous waste. The perimeter of the facility was also inspected; no obvious signs of releases were noted.

Eval Notes: INSPECTOR COMMENTS: Reviewed and accepted the E Submit disclosure this date

Eval Division: Orange County Environmental Health  
Eval Program: HMRRP  
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-03-2017  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the Manager. The hazardous waste include: - Waste Antifreeze = 55 gallons (X2 drums) - Brake Washer = 15 gallons - Used oil filters = 200 items - Used oil = 100 gallons (tank), 55 gallon (drum) Manifests were available and were reviewed, and waste was being picked up by World Oil and Asbury services. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Weekly inspections are performed by the Store Manager. Emergency response sticker with the necessary information was posted inside the bathroom. The dumpsters at the back of the store was checked and there was no hazardous waste. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Division: Orange County Environmental Health  
Eval Program: HW  
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-03-2020  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine SQG HW inspection. The hazardous waste found here includes: - Used Oil - Waste Antifreeze - Used Oil filter (paper and metal) Manifest were available and were reviewed. The dumpster at the back of the facility was checked and there was no hazardous waste. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Division: Orange County Environmental Health  
Eval Program: HW  
Eval Source: CERS,

Eval General Type: Other/Unknown  
Eval Date: 09-29-2014  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: INSPECTOR COMMENTS: On-site for a follow up inspection and to discuss the open violation. Met with David Feltenberger and reviewed the annual hazardous materials training log. The training has been completed and the log was reviewed. Abate violation 1442 from the previous inspection report.

**Hazardous Waste Summary:**

Waste Code: D001  
Waste Description: Ignitable Waste

Waste Code: D002  
Waste Description: Corrosive Waste

Waste Code: D003  
Waste Description: Reactive Waste

Waste Code: D006  
Waste Description: Cadmium

Waste Code: D007  
Waste Description: Chromium

Waste Code: D008  
Waste Description: Lead

Waste Code: D009  
Waste Description: Mercury

Waste Code: D022  
Waste Description: Chloroform

Waste Code: D035  
Waste Description: Methyl Ethyl Ketone

Waste Code: F001  
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent

**Environmental Interest/Information System:**

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).  
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES  
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.  
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.  
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.  
The Integrated Compliance Information System (ICIS) provides a

**KIRKHILL RUBBER CO (Continued)**

**1000270392**

database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

City,State,Zip: BREA, CA 92621  
Site ID: 41826  
CERS ID: 10152473  
CERS Description: Chemical Storage Facilities

**Violations:**

Site ID: 41826  
Site Name: Kirkhill Inc.  
Violation Date: 04-08-2014  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
Violation Description: Failure to provide adequate secondary containment, or no secondary containment for mobile or portable storage tanks.  
Violation Notes: Returned to compliance on 05/28/2014. 55-gallon drums cannot be stored on wooden pallets on top of containment pallets. Please correct this immediately.  
Violation Division: Orange County Environmental Health  
Violation Program: APSA  
Violation Source: CERS,

Site ID: 41826  
Site Name: Kirkhill Inc.  
Violation Date: 11-20-2018  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 11/26/2018. Observation: There were multiple containers throughout the facility with incorrect labels. Two drums of toxic sandblast waste containing chromium and a drum of waste flammable liquid did not have accumulation start date after being moved from the satellite storage area to the hazardous waste storage area. Correction: Please make sure all containers holding hazardous

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 07/11/2014. Also discussed the three (3) used oil drums in the satellite accumulation areas by Mixing Branbury 12 (2 drums) and Mixing Branbury 11 (1 drum). Thus drums collect oil from the Branbury machines. These containers need to be kept closed when waste is not actually flowing into them. Please correct this violation within 30 days.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 08/08/2019. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. REQUIRED MATERIALS: Kevlar pulp, Kelton.

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/12/2020. Observation: The two 20-yard bins of Non-RCRA zinc contaminated rubber waste were missing accumulation start date. Corrective Action: Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Violation was noted for improper labeling, and was corrected during the inspection.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173  
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
Violation Notes: Returned to compliance on 09/08/2017. The flammable liquid drum had no gasket in the funnel that would be it water-tight. The used oil drum in the maintenance area had a lid that was not water-tight. Please make sure all hazardous waste (liquid) containers have water-tight lids so the hazardous waste liquid does not escape the container and cause a release to the environment when the container tips over. All hazardous waste drums must be closed unless you are in the process of adding and/ or removing waste from the drum

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 01/08/2020. Observation: Multiple drums of 55gallon flammable liquids with waste codes F003 and F005 did not have the correct hazard category identified on the labels. A drum of solvent waste was missing an accumulation start date. Two cubic yard boxes labeled Oily debris had no hazard property. A cubic yard box with toluene and acetone rags also had no hazard category identified. Multiple yard bins of uncured rubber were labeled as non-hazardous waste. A container of sandblast dust had no label. Corrective Action: All containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Correct the labels on the containers identified at this inspection and send documentation to this agency to correct the violation.

Violation Description: 6.67, Section(s) 25270.4.5(a)  
Failure to adequately discuss the facility transfer operations, pumping, and facility process within the SPCC plan.

Violation Notes: Returned to compliance on 05/28/2014. The SPCC needs to include calculations for the sized secondary containment. This includes bermed areas, drip pans and containment pallets. If the gallonage of the containment pallets can be obtained from the manufacturer, calculations do not have to be done.

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: Failure to meet the following conditions of satellite accumulation regulations, Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with sections 66265.171, 66264.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Observation: The satellite containers of Flammable liquid waste, Used oil and solvent rags were missing an accumulation start date. The satellite container holding Non- RCRA waste and waste flammable waste did not have a hazard property identified. Corrective Action: Please make sure all containers holding hazardous waste at a Satellite Accumulation Area has the following information on the label: "Hazardous Waste Satellite Accumulation", Waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date (satellite and waste storage room), and the business address and name. Labeling violations were corrected on 11-26-2018.

Violation Notes: Returned to compliance on 07/06/2020. Observation: The uncured rubber on site is being shipped off to the landfill in Azusa, CA as non-hazardous waste. The test results present on site today from March 12, 2018 revealed that the rubber had 11,600 mg/kg of zinc in it. The TTLC limit for zinc is 5000 mg/kg. This is a hazardous waste per 66261.24 (a) for zinc. Corrective Action: Immediately discontinue disposing of hazardous waste at any facility not permitted by DTSC or causing hazardous waste to be disposed of at any point which is not authorized pursuant to HSC chapter 6.5. Submit a statement to the CUPA indicating improperly disposed of hazardous waste has been properly managed, and that all hazardous wastes will only be disposed at facilities permitted by DTSC in the future.

Violation Description: Failure to provide appropriate secondary containment and/or diversionary structures or equipment for the following: bulk storage containers, mobile or portable containers, oil-filled equipment, piping and related appurtenances, mobile refuelers or non-transportation-related tank cars, and transfer areas, equipment and activities and ensure that the entire containment system, including walls and floor, are capable of containing oil and constructed so that any discharge will not escape the containment system before cleanup occurs.  
Violation Notes: Returned to compliance on 08/08/2019. OBSERVATION: Hydraulic machine in Blue Room was observed with oil from machine pooling in secondary containment. Facility manager stated that the oil is pumped from the secondary containment on a weekly frequency. Oil cannot be stored in the secondary containment, secondary containment must only be used to contain accidental releases of oils. CORRECTIVE ACTIONS: Pump all oil from secondary containment and continue to remove any excess oil on a daily basis in order to prevent secondary containment from becoming an oil storage reservoir. Send documentation of empty secondary containment to the agency within 30 days.

Danny Mohammad, facility specialist. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Raw rubber - Rubber additives - Oil - Oxygen - Acetylene - Nitrogen - Propane - 250+ other chemicals used in the process of rubber production, machining, and shop maintenance. CERS updated and complete for 2019. Facility is required to update their inventory for materials: kelton, kevlar. Business emergency plan available for review. Plan accepted. Training records available for review. Records accepted.

Eval Notes: A routine LQG hazardous waste inspection was conducted virtually. The facility has about 550 employees per Mr. Ngo. The biennial report, manifests, training documents were electronically submitted prior to the virtual inspections and they were reviewed. The hazardous waste found here includes: - Solvent debris (blue tote at 90-day storage area) - Solvent Rags (drums at 90-day storage area) - Bead Blast (sand-blasting room) - Waste flammable liquids (manufacturing room) - Flammable solvents (manufacturing room and 3-D room) - Non-RCRA waste

Violations Found: No  
Eval Type: Routine done by local agency

Eval Notes: On site for a routine aboveground petroleum storage tank (APST) inspection. Met with EHS Manager Mark Ngo of Kirkhill. Consent was given to inspect and take photos (if necessary) of the facility. The facility is regulated under the Aboveground Storage Tank Act (APSA). The facility contains over 10,000 gallons of regulated petroleum products. An SPCC plan was prepared and certified by a professional

 Eval Notes: On-site for a routine inspection. Met with Julie Swanson and Linda Shafer this date and obtained consent to conduct the inspection. This facility is in the OCHCA recycler program. According to previous Recycling Report forms (2013) the facility has an outside company to filter coolant and uses it at the facility as a substitute for raw material. Received OCHCA has revived the recyclable materials report signed 06/06/12. This report is due again on 07/01/14.

who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database  
ALLOWS PERMITTING AUTHORITIES TO SUBMIT NEW SOURCE REVIEW (NSR) AND TITLE V PERMIT ACTIONS TO EPA FOR REVIEW.  
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES  
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

on site. The facility is staffed for more than 4 hours/day. Please maintain an SPCC at the facility. Notify the agency when the SPCC has been moved from the City laydown yard to the Brea Fire office.

Violation Division: Orange County Environmental Health  
Violation Program: APSA  
Violation Source: CERS,

Site ID: 412825  
Site Name: BREA FIRE STATION #2  
Violation Date: 10-24-2019  
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)  
Violation Description: Failure to conduct spill prevention briefing for oil-handling personnel at least once a year to assure adequate understanding of the SPCC Plan.  
Violation Notes: Returned to compliance on 03/02/2021. OBSERVATION: Failure to schedule and conduct spill prevention briefings at least once a year. The last training was completed 11/2016. The inspectors at this location only check for leaks in piping. CORRECTIVE ACTION: Discharge prevention briefings must be conducted with all oil-handling personnel annually to assure adequate understanding of SPCC plan, and the training should also review known discharges or failure, malfunctioning components, and any recently developed precautionary measures. The training sign in sheet should include: name, date, signature and type of training. Please provide training for the employees and submit training documentation within 30 days. Please ensure that the inspectors are trained to check to corrosion/leaks on the tanks, valves and other appurtenances.

Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Joel Valencia of the City of Brea. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database on 1/4/2023. The 2023 HMBEP has been approved. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D035  
Waste Description: Methyl Ethyl Ketone

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006  
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007  
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 03/20/2020. OBSERVATION: The generator has not obtained the correct EPA ID number for disposing of RCRA hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an EPA ID number. Please goto <https://dtsc.ca.gov/hazardous-waste-id-numbers/> and obtain a permanent HHW ID number.

Site Name: HBT LABS INC  
Violation Date: 02-20-2020  
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)  
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated  
Violation Notes: Returned to compliance on 02/20/2020. OBSERVATION: The containers of Methanol from the HPLC machines and the containers of Methanol/Acetonitrile wastes (room 119) were missing start date and some were missing labels altogether. CORRECTIVE ACTION: Ensure that all hazardous wastes at satellite locations have hazardous waste labels and have the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Violation was noted for improper labeling, and were corrected.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval General Type: Case Development Inspection  
Eval Date: 03-07-2013  
Violations Found: No  
Eval Type: Industrial Storm Water Enforcement Follow-up  
Eval Notes: This follow-up inspection occurred to investigate the principle of operation of the vaults at the SW corner and to confirm that a new sweeper was procured. The vaults were reported to be cleaned out, allowing inspection of the interior chambers. No hanging baffles were observed; only screened weirs were found with secondary overflow weirs that do not appear used. Overflow appears to occur around the sides of the vaults. Contact reported that the vaults were installed at the recommendation of the City. Further inspection of the regrind building roof found regrind powder piled up around the air cyclone. Cyclone is

Eval Date: 08-26-2000  
Violations Found: No  
Eval Type: Industrial Storm Water Enforcement Follow-up  
Eval Notes:

On August 28, 2000. Regional Water Board Staff responded to a citizen complaint against the above mentioned facility. A large amount of PVC dust and water was observed flowing south through the storm swale. The discharge occurred over the weekend of 26-27th of August(see photos). Regional Water Board staff made contact with Charlie McLary the Plant Manager of Russell Co. Charlie showed staff the pictures he had taken over the weekend and gave a quick explanation of what he observed. Staff took the pictures in to custody. Staff then made contact with the owner of Pacific Plastic Dr. Anayat Raminfar. Staff showed Dr. Anayat Raminfar the pictures that were taken over the weekend, and questioned him as to what happened. Dr. Raminfar stated that he was not a were of the problem. After review of the pictures, Dr. Raminfar and staff inspected the facility. Specifically, the south portion of the facility where the discharge occurred. Dr. Raminfar stated one of his employees had mistakenly emptied out the street sweeper in the back of the facility. Dr. Raminfar stated that he knew who it was and that he would " fire" this employee today. Staff stated that this type of discharge is unauthorized and needs to be stopped immediately. Dr. Raminfar stated that this would be the last time this would happen.

Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 02-28-2013  
Violations Found: Yes  
Eval Type: Industrial Storm Water Compliance Evaluation  
Eval Notes: Weather: warm and clear. Contact was unable to produce SWPPP. Facility is fitted with two vaults at the southwest corner. Contact no longer has manufacturer's information on them (Jensen Pre-cast) due to a fire years ago. Contact reports stormwater samples taken from inside of first rectangular vault; instructed them to sample at outlet of second cylindrical vault. First vault appears to be a settling vault with filter fabric separating three chambers. Cylindrical vault appears to be a simple settling chamber without filters or baffles. Both reported emptied and inspected 2x/year on a regular schedule. Last vault outlets into a swale after passing through another filter fabric at the fence; this fabric is torn and needs replacement and area in front needs to have dirt/debris removed. Found plastic powder spill prevention efforts ineffective at the rail car unloading area. Plastics overfill or spill out of cardboard totes in two instances. Yard is swept with a mechanical sweeper; has been broken for about a week with expected repair in another week. Pipe is being washed on site with wastewater discharged to ground.

Eval General Type: Case Development Inspection  
Eval Date: 01-17-2001  
Violations Found: No  
Eval Type: Industrial Storm Water Enforcement Follow-up  
Eval Notes: On January 17, 2001, Regional Water Board staff responded to a citizen complaint against the above mentioned company. Contact was made with Charlie McLary the Plant Manager of Russell Co. Charlie produced photos from the last rain event which occurred over the weekend (Jan 11-12th). Charlie stated that during the last storm there was heavy flows of PVC dust and water coming from Pacific Plastic. Staff inspected the storm swale located on the south side of Pacific Plastic and, running south through Russell Co. there was evidence of PVC dust throughout the entire storm swale(see photos). Also, there was evidence that an employee from pacific Plastic placed a two by ten (2x10) board and propped up the fabric filter so that the water could flow faster thus making any BMPs ineffective. Staff took several pictures at this time. Regional water Board staff then went to Pacific to speak with Dr. Raminfar. Staff made contact with John Grajeda. John stated that no one was in at this time and that he expected the management to be in at around 10:30 a.m. Staff asked if John would

accompany them to the back of the facility to inspect and take a few pictures. John said yes and led us to the south side of the facility. Upon inspection of the south side of the property there was evidence of PVC dust that had collected up against the fence and, also, evidence that the water had risen so high that it flowed west out of the facility's storm swale to the neighbors property located to the west of the facility. Staff instructed John to let Dr. Raminfar we stopped by and to call us in regards to the last discharge.

Eval Source: SMARTS,

Eval General Type: Case Development Inspection  
Eval Date: 01-25-2001  
Violations Found: No  
Eval Type: Industrial Storm Water Enforcement Follow-up  
Eval Notes:

On January 25, 2001 Regional Board staff followed up a citizen complaint in regards to the above mentioned facility. Contact was first made with Charles McLary of Russell Co. Staff stopped to take pictures from the last storm event which occurred on the 24th of January. There was evidence of a PVC discharge in the storm swale ( see photos). After the pictures were taken staff went to Pacific Plastic for a scheduled meeting. Contact was made Raphael Barhremand the CEO of the company, Dr. Anayat Raminfar and, Farhad the Maintenance Supervisor. Staff started the meeting by going over the prior discharges and all the visits that occurred over the last 6 months. Staff told Dr. Anayat Raminfar that the Regional Water Board is now considering further action against his company. Dr. Raminfar made clear all of the steps that his company has taken and is still taken to prevent unauthorized discharges from leaving the property. For example, they have retained an environmental consultant, they have filled all the necessary paper work necessary and, they have implemented several BMPs to prevent pollutants from coming in contact with storm water. Dr. Raminfar expressed that he wanted Regional Water Board staff to convey all measures that the company was taken to the Executive Officer. The following observations were made during the inspection of the facility; The facility was clean over all ( see photos). The south side of the facility showed signs of PVC dust and water from the prior discharge (see photos). Pictures were also taken of the new BMPs that the facility was implementing currently. Dr. Raminfar wanted to set up a meeting with the Executive Officer immediately. Staff instructed Dr. Raminfar to wait till he received correspondence from this office.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/29/2024	Source: EPA
Date Data Arrived at EDR: 03/01/2024	Telephone: N/A
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 03/01/2024
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/08/2024
	Data Release Frequency: Quarterly

EPA Region 10  
Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/29/2024	Source: EPA
Date Data Arrived at EDR: 03/01/2024	Telephone: N/A
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 03/01/2024
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/08/2024
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/29/2024

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023  
Date Data Arrived at EDR: 12/20/2023  
Date Made Active in Reports: 01/24/2024  
Number of Days to Update: 35

Last EDR Contact: 03/26/2024  
Next Scheduled EDR Contact: 07/08/2024  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2024  
Date Data Arrived at EDR: 02/01/2024  
Date Made Active in Reports: 02/22/2024  
Number of Days to Update: 21

Telephone: 800-424-9346  
Last EDR Contact: 03/01/2024  
Next Scheduled EDR Contact: 04/22/2024  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/29/2024	Source: EPA
Date Data Arrived at EDR: 02/01/2024	Telephone: 800-424-9346
Date Made Active in Reports: 02/22/2024	Last EDR Contact: 03/06/2024
Number of Days to Update: 21	Next Scheduled EDR Contact: 06/17/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/04/2023	Source: EPA
Date Data Arrived at EDR: 12/06/2023	Telephone: 800-424-9346
Date Made Active in Reports: 12/12/2023	Last EDR Contact: 03/19/2024
Number of Days to Update: 6	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 12/12/2023	Last EDR Contact: 03/19/2024
Number of Days to Update: 6	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 12/12/2023	Last EDR Contact: 03/19/2024
Number of Days to Update: 6	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 12/12/2023	Last EDR Contact: 03/19/2024
Number of Days to Update: 6	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/06/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 12/12/2023	Last EDR Contact: 03/19/2024
Number of Days to Update: 6	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/03/2023	Source: Department of the Navy
Date Data Arrived at EDR: 08/07/2023	Telephone: 843-820-7326
Date Made Active in Reports: 10/10/2023	Last EDR Contact: 02/02/2024
Number of Days to Update: 64	Next Scheduled EDR Contact: 05/20/2024
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/26/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/17/2023	Telephone: 703-603-0695
Date Made Active in Reports: 02/13/2024	Last EDR Contact: 02/21/2024
Number of Days to Update: 88	Next Scheduled EDR Contact: 06/03/2024
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/26/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/17/2023	Telephone: 703-603-0695
Date Made Active in Reports: 02/13/2024	Last EDR Contact: 02/21/2024
Number of Days to Update: 88	Next Scheduled EDR Contact: 06/03/2024
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/12/2023

Source: National Response Center, United States Coast Guard

Date Data Arrived at EDR: 12/13/2023

Telephone: 202-267-2180

Date Made Active in Reports: 02/28/2024

Last EDR Contact: 03/19/2024

Number of Days to Update: 77

Next Scheduled EDR Contact: 07/01/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/23/2023

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/24/2023

Telephone: 916-323-3400

Date Made Active in Reports: 01/11/2024

Last EDR Contact: 01/23/2024

Number of Days to Update: 79

Next Scheduled EDR Contact: 05/06/2024

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/23/2023

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/24/2023

Telephone: 916-323-3400

Date Made Active in Reports: 01/11/2024

Last EDR Contact: 01/23/2024

Number of Days to Update: 79

Next Scheduled EDR Contact: 05/06/2024

Data Release Frequency: Quarterly

## ***Lists of state and tribal landfills and solid waste disposal facilities***

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/06/2023

Source: Department of Resources Recycling and Recovery

Date Data Arrived at EDR: 11/07/2023

Telephone: 916-341-6320

Date Made Active in Reports: 02/05/2024

### INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 09/29/2015	Telephone: 617-918-1102
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 03/18/2024
Number of Days to Update: 142	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Varies

### INDIAN VCP R7: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008	Source: EPA, Region 7
Date Data Arrived at EDR: 04/22/2008	Telephone: 913-551-7365
Date Made Active in Reports: 05/19/2008	Last EDR Contact: 07/08/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

## ***Lists of state and tribal brownfield sites***

### BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/13/2023	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/13/2023	Telephone: 916-323-7905
Date Made Active in Reports: 03/07/2024	Last EDR Contact: 03/19/2024
Number of Days to Update: 85	Next Scheduled EDR Contact: 07/01/2024
	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 08/15/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/30/2023	Telephone: 202-566-2777

Number of Days to Update: 30	Next Scheduled EDR Contact: 05/06/2024
	Data Release Frequency: No Update Planned

### SWRCY: Recycler Database

A listing of recycling facilities in California.

Date of Government Version: 11/29/2023	Source: Department of Conservation
Date Data Arrived at EDR: 11/29/2023	Telephone: 916-323-3836
Date Made Active in Reports: 02/23/2024	Last EDR Contact: 03/05/2024
Number of Days to Update: 86	Next Scheduled EDR Contact: 06/17/2024
	Data Release Frequency: Quarterly

### HAULERS: Registered Waste Tire Haulers Listing

A listing of registered waste tire haulers.

Date of Government Version: 11/16/2022	Source: Integrated Waste Management Board
Date Data Arrived at EDR: 11/22/2022	Telephone: 916-341-6422
Date Made Active in Reports: 02/13/2023	Last EDR Contact: 02/20/2024
Number of Days to Update: 83	Next Scheduled EDR Contact: 05/20/2024
	Data Release Frequency: Varies

### INDIAN ODI: Report on the Status of Open Dumps on Indian Lands

Location of open dumps on Indian land.

Date of Government Version: 12/31/1998	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/03/2007	Telephone: 703-308-8245
Date Made Active in Reports: 01/24/2008	Last EDR Contact: 01/26/2024
Number of Days to Update: 52	Next Scheduled EDR Contact: 05/06/2024
	Data Release Frequency: Varies

### ODI: Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations

A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 01/12/2009	Source: EPA, Region 9
Date Data Arrived at EDR: 05/07/2009	Telephone: 415-947-4219
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 01/11/2024
Number of Days to Update: 137	Next Scheduled EDR Contact: 04/29/2024
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## IHS OPEN DUMPS: Open Dumps on Indian Land

A listing of all open dumps located on Indian Land in the United States.

Date of Government Version: 04/01/2014	Source: Department of Health & Human Services, Indian Health Service
Date Data Arrived at EDR: 08/06/2014	Telephone: 301-443-1452
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 01/17/2024
Number of Days to Update: 176	Next Scheduled EDR Contact: 05/06/2024
	Data Release Frequency: Varies

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 11/17/2023	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 11/17/2023	Telephone: 202-307-1000
Date Made Active in Reports: 02/07/2024	Last EDR Contact: 02/21/2024
Number of Days to Update: 82	Next Scheduled EDR Contact: 06/03/2024
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 10/23/2023	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 10/24/2023	Telephone: 916-323-3400
Date Made Active in Reports: 01/11/2024	Last EDR Contact: 01/23/2024
Number of Days to Update: 79	Next Scheduled EDR Contact: 05/06/2024
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2021	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/28/2023	Telephone: 916-255-6504
Date Made Active in Reports: 12/18/2023	Last EDR Contact: 03/08/2024
Number of Days to Update: 81	Next Scheduled EDR Contact: 05/13/2024
	Data Release Frequency: Varies

### CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

	Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 11/22/2023	Source: DTSC and SWRCB
Date Data Arrived at EDR: 11/22/2023	Telephone: 916-323-3400

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000
Date Made Active in Reports: 06/17/2014	Last EDR Contact: 01/29/2024
Number of Days to Update: 88	Next Scheduled EDR Contact: 05/13/2024
	Data Release Frequency: No Update Planned

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency

### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2020	Source: EPA
Date Data Arrived at EDR: 06/14/2022	Telephone: 202-260-5521
Date Made Active in Reports: 03/24/2023	Last EDR Contact: 03/14/2024
Number of Days to Update: 283	Next Scheduled EDR Contact: 06/24/2024
	Data Release Frequency: Every 4 Years

### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2022	Source: EPA
Date Data Arrived at EDR: 11/13/2023	Telephone: 202-566-0250
Date Made Active in Reports: 02/07/2024	Last EDR Contact: 02/15/2024
Number of Days to Update: 86	Next Scheduled EDR Contact: 05/27/2024
	Data Release Frequency: Annually

### SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 01/16/2024	Source: EPA
Date Data Arrived at EDR: 01/17/2024	Telephone: 202-564-4203
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 01/17/2024
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/29/2024
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 02/29/2024	Source: EPA
Date Data Arrived at EDR: 03/01/2024	Telephone: 703-416-0223
Date Made Active in Reports: 03/27/2024	Last EDR Contact: 03/01/2024
Number of Days to Update: 26	Next Scheduled EDR Contact: 06/10/2024
	Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 09/01/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/27/2023	Telephone: 202-564-8600
Date Made Active in Reports: 12/21/2023	Last EDR Contact: 01/12/2024
Number of Days to Update: 85	Next Scheduled EDR Contact: 04/19/2024
	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## PRP: Potentially Responsible Parties

A listing of verified Potentially Responsible Parties

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 202-564-6023
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 03/06/2024
Number of Days to Update: 16	Next Scheduled EDR Contact: 05/13/2024
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 03/20/2023	Source: EPA
Date Data Arrived at EDR: 04/04/2023	Telephone: 202-566-0500
Date Made Active in Reports: 06/09/2023	Last EDR Contact: 01/05/2024
Number of Days to Update: 66	Next Scheduled EDR Contact: 04/15/2024
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 11/18/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/23/2016	Telephone: 202-564-2501
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/28/2024
Number of Days to Update: 79	Next Scheduled EDR Contact: 07/15/2024

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 03/25/2024
Number of Days to Update: 84	Next Scheduled EDR Contact: 07/08/2024
	Data Release Frequency: Quarterly

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

### PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

### PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

### PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

## CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

Date of Government Version: 06/08/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2023	Telephone: 202-564-0394
Date Made Active in Reports: 01/18/2024	Last EDR Contact: 02/09/2024

## UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

Date of Government Version: 06/08/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/31/2023	Telephone: 202-564-0394

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date Made Active in Reports: N/A	Last EDR Contact: N/A
Number of Days to Update: N/A	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/06/2023	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 11/07/2023	Telephone: 860-424-3375
Date Made Active in Reports: 01/31/2024	Last EDR Contact: 02/06/2024
Number of Days to Update: 85	Next Scheduled EDR Contact: 05/20/2024
	Data Release Frequency: No Update Planned

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

VACANT LAND  
323 NORTH BREA BOULEVARD  
BREA, CA 92821

### TARGET PROPERTY COORDINATES

Latitude (North):	33.924206 - 33° 55' 27.14"
Longitude (West):	117.896723 - 117° 53' 48.20"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	417112.9
UTM Y (Meters):	3753920.0
Elevation:	386 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	50005784 LA HABRA, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1875F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
Not Reported	

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LA HABRA	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	PETROLITE CORP - TRETOLITE
Site EPA ID Number:	CAD008324360
Surficial Aquifer Flow Dir.:	Southwest
Measured Depth to Water:	21 feet to 28 feet.
Hydraulic Connection:	Near-surface groundwater appears to be hydraulically continuous with the Talbert aquifer that is present at a depth of approximately 100 feet. The nearby Whittier and Norwalk fault zones both act as barriers to lateral ground water movement.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
---------------	-------------------------	---

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

1G	1/2 - 1 Mile East	S, SE
2G	1/2 - 1 Mile West	SW
3G	1/2 - 1 Mile WSW	Not Reported
4G	1/2 - 1 Mile WSW	SW
5G	1/4 - 1/2 Mile SSW	S
6G	1/2 - 1 Mile SSW	Not Reported
7G	1/2 - 1 Mile SSW	W

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1
2	11 inches	18 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

5	70 inches	79 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

**Soil Map ID: 6**

Soil Component Name:                   SORRENTO

Soil Surface Texture:                   clay loam

Hydrologic Group:                    Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:                   Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	11 inches	61 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

### Soil Map ID: 7

Soil Component Name: SORRENTO

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	11 inches	61 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

### Soil Map ID: 8

Soil Component Name: XERALFIC ARENTS

Soil Surface Texture: variable

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

### Soil Map ID: 9

Soil Component Name: ALO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	14 inches	22 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.1
2	22 inches	25 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.1
3	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.1

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

### RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

# Certified Sanborn® Map Report

04/01/24

**Site Name:**

Vacant Land  
323 North Brea Boulevard  
Brea, CA 92821  
EDR Inquiry # 7610777.3

**Client Name:**

Barr & Clark  
12684 Hoover Street  
Garden Grove, CA 92841  
Contact: Michael Atallah

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Barr & Clark were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 2429-4A6E-A31C

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

## Limited Permission To Make Copies

Barr & Clark (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

### Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by EDR. The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

<b>STANDARD ENVIRONMENTAL RECORDS</b>	<b>Default Area of Concern (Miles)*</b>	<b>property</b>	<b>1/10</b>	<b>&gt; 1/10</b>
Lists of Federal NPL (Superfund) sites	1.0	0	0	0
Lists of Federal Delisted NPL sites	1.0	0	0	0
Lists of Federal sites subject to CERCLA removals and CERCLA orders	0.5	0	0	0
Lists of Federal CERCLA sites with NFRAP	0.5	0	2	1
Lists of Federal RCRA facilities undergoing Corrective Action	1.0	0	0	0
Lists of Federal RCRA TSD facilities	0.5	0	0	0
Lists of Federal RCRA generators	0.25	0	1	3
Federal institutional controls / engineering controls registries	0.5	0	0	0
Federal ERNS list	0.001	0	0	-
Lists of state- and tribal (Superfund) equivalent sites	1.0	0	0	0
Lists of state- and tribal hazardous waste facilities	1.0	0	2	2
Lists of state and tribal landfills and solid waste disposal facilities	0.5	0	0	0
Lists of state and tribal leaking storage tanks	0.5	0	1	5
Lists of state and tribal registered storage tanks	0.25	0	0	1
State and tribal institutional control / engineering control registries	not searched	-	-	-
Lists of state and tribal voluntary cleanup sites	0.5	0	0	0
Lists of state and tribal brownfield sites	0.5	0	0	0

### **ADDITIONAL ENVIRONMENTAL RECORDS**

Local Brownfield lists	0.5	0	0	0

Records of Emergency Release Reports	0.5	0	0	1
Other Ascertainable Records	1.0	1	14	10

### **EDR HIGH RISK HISTORICAL RECORDS**

EDR Exclusive Records	1.0	0	2	0
Exclusive Recovered Govt. Archives	0.001	0	0	-

## EXECUTIVE SUMMARY

### EDR RECOVERED GOVERNMENT ARCHIVES

EDR Exclusive Records	1.0	0	2	0
Exclusive Recovered Govt. Archives	0.001	0	0	-

\*The Default Area of Concern may be adjusted by the environmental professional using experience and professional judgement. Each category may include several databases, and each database may have a different distance. A list of individual databases is provided at the back of this report.

# EXECUTIVE SUMMARY

## TARGET PROPERTY INFORMATION

### ADDRESS

VACANT LAND  
323 NORTH BREA BOULEVARD  
BREA, CA 92821

### COORDINATES

Latitude (North): 33.924206 - 33° 55' 27.140808"  
Longitude (West): 117.896723 - 117° 53' 48.19519"  
Elevation: 386 ft. above sea level

## TARGET PROPERTY SEARCH RESULTS

The target property was identified in the following records.

### Site

NORTHSIDE MEDICAL CLINIC  
323 N BREA BLVD  
BREA, CA 92621

### Database(s)

HAZNET  
GEPaid: CAL000066684  
HWTS

# EXECUTIVE SUMMARY

## SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

Site ID: 447463  
CERS ID: 10779667  
CERS Description: RCRA LQ HW Generator

**Evaluation:**

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-05-2019  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: The hazardous waste found here include: - Corrosive Waste (returned and broken consumer commodity) - Flammable Waste (returned and broken consumer commodity) - Toxic Waste (returned and broken consumer commodity) There was a pharmacy on site, but there was no hazardous waste accumulated in this area during this inspection. Manifest was available and was reviewed and waste is being picked up by Stericycle. The pharmacy on site did generate P-listed waste of quantity one pound since its opening in November 2018. Per Ms. Quezada, hazardous waste training is being conducted for employees on an annual basis. Weekly inspections are performed. The trash cans inside the store were checked and there was no hazardous waste. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 03-11-2022  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Leticia Quesada of CVS Brea. Consent was provided to enter and conduct inspection activities. The following was observed on this date: -- Hazardous waste generated was properly stored and labeled. -- Waste manifests were available for review and were properly completed. -- Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility. The facility is in compliance.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
 Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
 Violation Notes: Returned to compliance on 02/02/2018. All containers of hazardous waste had faded labels. Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Used oil containers need the following information: Used oil , and accumulation start date. Used oil filters need the following information: Used oil Filters , and accumulation start date. Violation was noted for improper labeling, was corrected during the inspection.

**Evaluation:**

Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 02-02-2018  
 Violations Found: No  
 Eval Type: Routine done by local agency  
 Eval Notes: On site to conduct an above ground storage tank inspection. The site had down-sized and does not have aggregate petroleum storage greater than 1320 gallons. Per Mr. Jun Park, the tanks are too heavy to be removed from the location and they used to hold oil with heavier grades for the old cars. Assisted Ms. Park today to make signs to post on the hydraulic tanks to permanently close them. This site will be removed from the APSA program an RUR will be submitted for accounting purposes. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

**Environmental Interest/Information System:**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Click here to access additional FINDS: detail in the EDR Site Report. database contains <http://www.edrnet.com/srf2/FinalSiteReport.aspx?ID=4SS4pcSOsShr28XpJoc.89dMOc4svy4d.hLP7I2ij8CtXoF30mJ92OI66g7.cJ8KABu3dufMas2ZTcr34sFB7Jvz4yRX4oDSolS0z2Ezp3dc788QfO2gs7u2B0hYVrhx6sQ88.XLm2nHJ3wOCm3QP.L28KE4.6dqyMzq6Ymc8B4Mg4yCSGpSYs3KophGcSP2giOHascp9lohiCrQT87W8CTXjL3xOJrWOgL2uS.SS8.J975dNmM639tCcOn4Qr9sKvBqyLI1rWdL.NJ4yxLq4PjouPt7O.ITB4neSP4SvC3ivp.3cJ92wVO45sE.3RbhGCrZZ2dl8QiXsG2L0JnVOkc2qY.MB8yP5UQdCUMTsAmCcod4s53vfeRyy28RzdtK.VYBpeLpuPKo7XT7XLI5A2> additional records for this site. Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
 Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
 Violation Notes: Returned to compliance on 11/17/2017. The used oil drums did not have anything filled out on the label, and the used oil filter drums did not have an accumulation start date. For Used oil, the following information needs to be on the label: Used oil , and accumulation start date. Used oil filters need the following information: Used oil Filters , and accumulation start date.

 Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173  
 Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
 Violation Notes: Returned to compliance on 11/17/2017. One waste oil drum has open bung hole, both drums of used oil filters were open, and two waste antifreeze drums had open bung holes. All hazardous waste drums must be closed unless you are in the process of adding and/ or removing waste from the drum.

Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the owner, Roger Rosenberg at 12:20 pm. The hazardous waste found here: - Used oil = 400 gallons (1 tank and 2X55 gal drums) - Waste Antifreeze = 110 gallons - Parts Washer = 30 gallon - Used oil filters = 300 items Containers of hazardous waste were not covered and some of them were not labeled properly. Manifests were available and were reviewed. Hazardous waste is being picked up Safety Kleen and Alexis oil company. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Emergency response information is posted. The common dumpsters outside the shop was checked and no hazardous waste was observed. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 04/22/2019. The container of Battery acid clean up waste did not have hazard property marked on the label. Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Violation was noted for improper labeling, and was corrected during the inspection.

Violation Source: CERS,

Site ID: 387182

Site Name: AutoZone #5519

Violation Date: 05-12-2014

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 05/26/2014. Please obtain copies of the manifests for the last three years and have them available on-site for review within 30 days.

Violation Division: Orange County Environmental Health

Violation Program: HW

Violation Source: CERS,

**Evaluation:**

Eval General Type: Other/Unknown

Eval Date: 08-25-2017

Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: This CERS Submittal has been reviewed and ACCEPTED for 2017: - Facility Information - Hazardous Materials Inventory (3) - Emergency Response and Training Plans.

Eval Division: Orange County Environmental Health

Eval Program: HMRRP

Eval Source: CERS,

Eval General Type: Other/Unknown

Eval Date: 11-30-2015

Violations Found: No

Eval Type: Other, not routine, done by local agency

Eval Notes: Reviewed hazmat disclosure submittal in Esubmit. Declined. Only report those hazardous materials that exceed the reporting thresholds. Remove the disclosure information for the following: Damaged Non-RCRA Retail Chemical Waste Products, Damaged Corrosive Retail Chemical Waste Products, Damaged Alkaline Retail Chemical Waste Products, Damaged Flammable Aerosol Retail Chemical Waste Products, Damaged Flammable Retail Chemical Waste Products, Damaged Reactive Retail Products, Used Oil Filters. Add EPA ID# CAL000206828 on the Business Activities page. Mark the YES boxes for Hazardous Materials and Hazardous Waste Generator on the Business Activities page.

Eval General Type: Other/Unknown

Eval Date: 03-31-2016

Violations Found: No

Eval Type: Other, not routine, done by local agency

MAP FINDINGS

**SUNSHINE DRY CLEANERS, 105 W LAMBERT RD, BREAA, CA 92621 (Continued)**

Eval Notes: Reviewed and declined. The inventory sheet for the spent petroleum is incorrect. The average and maximum amount on site should be 55 gallons. The annual amount of waste amount should be 1,320 gallons. The CAS number, name and percent wt. needs to be added to the table. The Map needs to show the location of the spent oil drum as well as the emergency shutoffs for the water and natural gas(if applicable). The contingency plan also needs to be corrected. Kindred Hospital is a private facility with no emergency room. Please change to St. Jude Medical Center (714-871-3280).

 Eval General Type: Compliance Evaluation Inspection  
 Eval Date: 04-06-2022  
 Violations Found: No  
 Eval Type: Routine done by local agency  
 Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Ruben Rojas of Autozone. Consent was provided to enter and conduct inspection activities. The HMBEP has been submitted into the CERS Database on 1/13/2022. The 2022 HazMat Inventory and Emergency Plan has been accepted. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

 Eval Notes: On site to conduct a routine Hazardous Materials Disclosure and Business Emergency Plan inspection. Met with Rob Piattoni of Ron & Waynes Automotive. Consent was provided to enter and conduct inspection activities. The HazMat Inventory and Emergency Plan (HMBEP) has been submitted into the CERS Database for 2022. The 2022 HMBEP has been approved. The following were verified: - Chemical Disclosure at the facility; - Contingency plan/BEP; - Training program; and, - Facility Map. Please note that if the facility decides to discontinue any of the above chemicals, proper disposal or removal of chemicals is required and maintenance of disposal records will be verified. Within 30 days of removal, contact this agency to verify that the hazardous material is no longer stored on site and remove it from the facility's listed disclosable chemicals.

 Eval Notes: INSPECTOR COMMENTS: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to [www.esubmit.ocgov.com](http://www.esubmit.ocgov.com) to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit [Truncated]

MAP FINDINGS

**FIX AUTO BREA, 300 N ORANGE AVE, BREA, CA 92821 (Continued)**

Eval Notes: The facility had eight employees. The hazardous waste found here include: - Oily Rags - Used Oil - Waste antifreeze - Paint waste (Non-RCRA) - Flammable waste (acetone and paint) Manifests were available and waste was being picked up by Pacific Resources recovery. Test results were available for paint booth filters from October of 2018 from Bob's Filter services. A total metals test was conducted on the filter waste, the Barium exceeded the TTLC thresholds and required an STLC. A STLC was performed on Barium and the test indicated the waste paint booth filters were non-hazardous. Per the owner, Selvi, the paint booth filters are changed out on a quarterly basis. The dumpster inside the store and outside were checked. The facility had a couple of units that were contiguous. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone

MAP FINDINGS

**KIRKHILL RUBBER CO, 300 E CYPRESS AVE, BREA, CA 92622-0000 (Continued)**

Waste Code: F001  
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003  
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005  
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

**Environmental Interest/Information System:**

The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).

MAP FINDINGS

**KIRKHILL RUBBER CO, 360 EAST CYPRESS, BREA, CA 92621 (Continued)**

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

MAP FINDINGS

**KIRK HILL INC, 300 E CYPRESS AVE, BREA, CA 926220000 (Continued)**

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/26/2018. Observation: There were multiple containers throughout the facility with incorrect labels. Two drums of toxic sandblast waste containing chromium and a drum of waste flammable liquid did not have accumulation start date after being moved from the satellite storage area to the hazardous waste storage area. Correction: Please make sure all containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Labeling violations were corrected on 11-26-2018.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 07/11/2014. Also discussed the three (3) used oil drums in the satellite accumulation areas by Mixing Branbury 12 (2 drums) and Mixing Branbury 11 (1 drum). Thus drums collect oil from the Branbury machines. These containers need to be kept closed when waste is not actually flowing into them. Please correct this violation within 30 days.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173  
 Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
 Violation Notes: Returned to compliance on 09/08/2017. The flammable liquid drum had no gasket in the funnel that would be it water-tight. The used oil drum in the maintenance area had a lid that was not water-tight. Please make sure all hazardous waste (liquid) containers have water-tight lids so the hazardous waste liquid does not escape the container and cause a release to the environment when the container tips over. All hazardous waste drums must be closed unless you are in the process of adding and/ or removing waste from the drum

 Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
 Violation Description: Failure to determine if the waste generated is a hazardous waste.  
 Violation Notes: Returned to compliance on 12/27/2020. Observation: The abrasive water waste stream is being shipped off as Non-hazardous waste. No test results were available to determine the if the waste is hazardous or not. Previously this waste was being shipped as Non-RCRA waste. Corrective Action: Take a representative sample of the waste abrasive water to a State Certified laboratory and have a Total Threshold Limit Concentration (TTL) test for regulated heavy metals. Provide a copy of the lab results to this Agency within 30 days. Based on the lab results, additional testing may be required.

 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
 Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
 Violation Notes: Returned to compliance on 01/08/2020. Observation: Multiple drums of 55gallon flammable liquids with waste codes F003 and F005 did not have the correct hazard category identified on the labels. A drum of solvent waste was missing an accumulation start date. Two cubic yard boxes labeled Oily debris had no hazard property. A cubic yard box with toluene and acetone rags also had no hazard category identified. Multiple yard bins of uncured rubber were labeled as non-hazardous waste. A container of sandblast dust had no label. Corrective Action: All containers holding hazardous waste has the following information on the label: "Hazardous Waste", waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date, and the business address. Correct the labels on the containers identified at this inspection and send documentation to this agency to correct the violation.

MAP FINDINGS

**KIRKHILL INC, 300 E CYPRESS AVE, BREA, CA 926220000 (Continued)**

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to adequately discuss the facility transfer operations, pumping, and facility process within the SPCC plan.

Violation Notes: Returned to compliance on 05/28/2014. The SPCC needs to include calculations for the sized secondary containment. This includes bermed areas, drip pans and containment pallets. If the gallonage of the containment pallets can be obtained from the manufacturer, calculations do not have to be done.

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: Failure to meet the following conditions of satellite accumulation regulations, Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with sections 66265.171, 66264.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Observation: The satellite containers of Flammable liquid waste, Used oil and solvent rags were missing an accumulation start date. The satellite container holding Non- RCRA waste and waste flammable waste did not have a hazard property identified. Corrective Action: Please make sure all containers holding hazardous waste at a Satellite Accumulation Area has the following information on the label: "Hazardous Waste Satellite Accumulation", Waste (name), hazard property (Eg: toxic, flammable, corrosive, reactive etc.), physical state (solid, liquid), accumulation start date (satellite and waste storage room), and the business address and name. Labeling violations were corrected on 11-26-2018.

Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.

MAP FINDINGS

**KIRKHILL INC, 300 E CYPRESS AVE, BREA, CA 926220000 (Continued)**

Violation Notes: Returned to compliance on 07/06/2020. Observation: The uncured rubber on site is being shipped off to the landfill in Azusa, CA as non-hazardous waste. The test results present on site today from March 12, 2018 revealed that the rubber had 11,600 mg/kg of zinc in it. The TTLC limit for zinc is 5000 mg/kg. This is a hazardous waste per 66261.24 (a) for zinc. Corrective Action: Immediately discontinue disposing of hazardous waste at any facility not permitted by DTSC or causing hazardous waste to be disposed of at any point which is not authorized pursuant to HSC chapter 6.5. Submit a statement to the CUPA indicating improperly disposed of hazardous waste has been properly managed, and that all hazardous wastes will only be disposed at facilities permitted by DTSC in the future.

 Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 01/03/2020. Observation: Facility has training records for the hazardous waste trainings conducted on site with employee numbers instead of job title and description. Corrective Action: Please make sure employees at the facility as trained on hazardous waste requirement based on their job title and description, and please sure to include the documentation of the job title and description in the training records.

 Eval Notes: INSPECTOR COMMENTS: On-site for a routine hazardous waste inspection. Met with James Stoll, the EHS Manager and obtained consent to conduct the inspection. Facility is a RCRA Large Quantity Generator. Reviewed manifests, LDRs as well as the spread sheet kept to track waste streams. Training program was discussed. The plan was available and reviewed. Only two employees are authorized to handle the hazardous waste on-site. Biennial report is signed and dated. The submission date is printed on the bottom of each page. Facility has A federal EPA ID number which is being used on their manifests. Discussed and explained how the hazardous waste manifests need to be tracked. See the violation above. The TSDf signed copies need to be matched with the original copies left on-site by the hauler. All containers observed were labeled and were within the 90 day accumulation time. The SB-14 documents were on-site. The SPR was last done in September of 2015 is [Truncated]

 Eval Notes: Received manifest from this facility that the two 40 yard dumpster waste was shipped off as Non-RCRA waste. Per Mark Ngo, the facility is currently working with a consultant to develop a waste profile for the rubber samples. Violation I045 is still open. Violation I 300 for abrasive water testing has been corrected and is now closed. The facility tested the abrasive water, and the heavy metals were observed to be below reportable quantities as the abrasive water goes into the sewer directly for discharge. Please contact Shruthi Sill at ssill@ochca.com with regards to any questions.

Eval Notes: Verified the number of employees and ownership. The hazardous waste containers found here: - Waste Paint - Used Oil - Flammable Solvent - Waste Solvent Rags - Oily Debris - Uncured Rubber - Non- RCRA plastic waste (Totes) Propane cylinder are being stored and shipped off as Excluded recyclable material to Cylinder depot in Washington. Please submit paperwork to this agency for excluded recyclable materials. The site has satellite storage of hazardous waste containers throughout the facility. There are various dust collection units on-site and they are integral to the process. The waste from the units are managed as hazardous waste per Mark. Biennial report was prepared and present on-site. Sb-14 documents were present on site and reviewed for 2018 reporting year. Manifests were available and were reviewed and waste was picked up by Worldwide. Emergency response information is posted throughout the facility. The two compactors on-site were [Truncated]

**Environmental Interest/Information System:**

MAP FINDINGS

**KIRKHILL, INC., 300 E CYPRESS ST, BREAA, CA 92821 (Continued)**

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Registry ID: 110070596035  
Click Here for FRS Facility Detail Report: [https://ofmpub.epa.gov/frs\\_public2/fii\\_query\\_detail.disp\\_program\\_facility?p\\_registry\\_id=110070596035](https://ofmpub.epa.gov/frs_public2/fii_query_detail.disp_program_facility?p_registry_id=110070596035)

**Environmental Interest/Information System:**

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

ALLOWS PERMITTING AUTHORITIES TO SUBMIT NEW SOURCE REVIEW (NSR) AND TITLE V PERMIT ACTIONS TO EPA FOR REVIEW.

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

**Hazardous Waste Summary:**

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	F007
Waste Description:	Spent Cyanide Plating Bath Solutions From Electroplating Operations.

MAP FINDINGS

**CIRTECH BREA, 351 THOR PL, BREA, CA 92821 (Continued)**

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 4/24/2024 at 9:23 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

## **Appendix F – Qualifications**

# **BARR & CLARK**

Independent Environmental Testing  
Asbestos • Lead • Mold • Phase I

## **MICHAEL ATALLAH** **Senior Project Manager**

Mr. Atallah has hands on experience in the real estate due diligence fields and has maintained excellence in his knowledge of construction, environmental and real estate properties in general.

### **Qualifications:**

Over 17 years experience in preparing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.

### **Professional Experience:**

#### **Barr & Clark, Inc.**

**2000 - Current**

- Providing Physical Needs Assessments, Green Physical Needs Assessments, Phase I Environmental Site Assessments, Asbestos Consulting, Lead-Based Paint Consulting, Radon Consulting, ADA/Section 504 Consulting, Project Management, Construction Progress Monitoring and Probable Maximum Loss Assessments.
- Coordinate field services and perform site assessments in accordance with, but not limited to, ASTM, HUD, USDA, TCAC, Fannie Mae, Freddie Mac, CALHFA and client guidelines.
- Quality control, including reviewing and editing of outgoing reports and draft contracts.
- Business Development to establish and maintain cooperative working relationships with clients.

### **Education & Licenses:**

- California State University in Fullerton – Bachelor of Arts Degree in Business Administration with Concentrations in Real Estate and Finance
- LEED Accredited Professional
- Registered Environmental Property Assessor No. REPA 266318
- Certified Professional Radon Measurement Provider by the National Environmental Health Association No. NRPP ID#105517RT
- Certificate of Completion of EPA accredited AHERA Asbestos Abatement Contractors/Supervisors 40-hour course.

Subject: Phase II Subsurface Investigation Report  
Vacant Land  
323 North Brea Boulevard  
Brea, California 92821  
Partner Project No. 24-450165.1

Dear Ms. Kelly:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the assessment performed at the above-referenced property. The following report describes the field activities, methods, and findings of the Phase II Subsurface Investigation conducted at the above-referenced property.

This assessment was performed consistent with acceptable industry standards. The independent conclusions represent Partner's best professional judgment based upon existing conditions and the information and data available to us during the course of this assignment.

We appreciate the opportunity to provide these services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact Misty Ponce at (818) 337-1203.

Sincerely,

**Partner Engineering and Science, Inc.**

# 1.0 INTRODUCTION

---

## 1.1 Purpose

The purpose of the investigation was to evaluate the potential impact of volatile organic compounds (VOCs) to soil gas as a consequence of a release or releases from adjacent properties. Jamboree Housing Corporation provided project authorization of Partner Proposal Number P24-450165.1.

## 1.2 Limitations

This report presents a summary of work conducted by Partner. The work includes observations of site conditions encountered and the analytical results provided by an independent third-party laboratory of samples collected during the course of the project. The number and location of samples were selected to provide the required information. It cannot be assumed that the limited available data are representative of subsurface conditions in areas not sampled.

Conclusions and/or recommendations are based on the observations, laboratory analyses, and the governing regulations. Conclusions and/or recommendations beyond those stated and reported herein should not be inferred from this document.

Partner warrants that the environmental consulting services contained herein were accomplished in accordance with generally accepted practices in the environmental engineering, geology, and hydrogeology fields that existed at the time and location of work. No other warranties are implied or expressed.

## 1.3 User Reliance

Partner was engaged by Jamboree Housing Corporation (the Addressee), or their authorized representative, to perform this investigation. The engagement agreement specifically states the scope and purpose of the investigation, as well as the contractual obligations and limitations of both parties. This report and the information therein, are for the exclusive use of the Addressee. This report has no other purpose and may not be relied upon, or used, by any other person or entity without the written consent of Partner. Third parties that obtain this report, or the information therein, shall have no rights of recourse or recovery against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, the Addressee and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this report shall constitute acceptance of, and commitment to, these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted Partner's standard Terms and Conditions, a copy of which can be found at <http://www.partneresi.com/terms-and-conditions.php>.

## 2.0 SITE BACKGROUND

---

### 2.1 Site Description

The subject property consists of one parcel of land comprising 0.441 acre located to the west of North Brea Boulevard within a mixed residential and commercial area of Brea, Orange County, California. The subject property is currently undeveloped land.

The subject property is bound by commercial development to the north, commercial development to the east across North Brea Boulevard, commercial development to the south, and residential development to the west across Madrona Avenue. Refer to Figure 1 for a site vicinity map showing site features and surrounding properties.

### 2.2 Site History

Partner was provided with a Barr & Clark, Inc. (BC) *Phase I Environmental Site Assessment Report* (Phase I) for the subject property, dated April 19, 2024, on behalf of Jamboree Housing Corporation. According to the reviewed historical sources, "the subject property was identified to consist of a portion of the Randolph School in 1915, a hospital/medical office building from at least 1926 through 2001, when the hospital/medical office building was demolished. The property has been comprised of vacant land since at least 2001."

The following recognized environmental condition (REC) was identified in the Phase I:

- "Based on the current and previous uses of the adjacent properties to the north and east of the subject property, including listings for leaking underground storage tanks and dry cleaning equipment utilizing solvents such as perchloroethylene, the potential of an impact from a vapor encroachment condition cannot be ruled out and is a Recognized Environmental Condition (REC)."

## 3.0 FIELD ACTIVITIES

---

The Phase II Subsurface Investigation scope included the advancement of six borings (B1 through B6) to collect representative soil gas samples. Refer to Table 1 for a summary of the borings, sampling schedule, and laboratory analyses for this investigation.

### 3.1 Preparatory Activities

Prior to the initiation of fieldwork, Partner completed the following activities.

#### 3.1.1 Utility Clearance

Partner delineated the work area with white spray paint and notified Underground Service Alert of Southern California (USA/SC) to clear public utility lines as required by law at least two business days prior to drilling activities. USA/SC issued ticket number A242050867-00A for the project.

Partner subcontracted with SAFESCANN, LLC on July 26, 2024, to clear boring locations of utilities. SAFESCANN, LLC systematically free-traversed each proposed probe location with a Schonstedt GA-72Cd magnetic gradiometer, a GSSI 400 MHz Antenna w/ SIR 4000 and ground penetrating radar (GPR) unit, and a Radio Detection 8000 (RD 8000) utility locator with line-tracing capabilities. The data was interpreted in real time for evidence of utility lines and/or other subsurface features of potential concern. Based on the findings of the GPR survey, no subsurface utilities were identified within the proposed probe locations.

#### 3.1.2 Health and Safety Plan

Partner prepared a site-specific Health and Safety Plan, which was reviewed with on-site personnel involved in the project prior to the commencement of drilling activities.

### 3.2 Drilling Equipment

On July 26, 2024, Partner subcontracted with Munoz Direct Push (Munoz) to provide and operate drilling equipment. Munoz, under the direction of Partner, advanced borings B1 through B6 with a limited-access Geoprobe Model 420M direct push rig. Sampling equipment was decontaminated between sample intervals and boring locations to prevent cross-contamination.

### 3.3 Sample Locations

Borings B1 through B6 were advanced in the southeast, northeast, east, north, west, and northwest portions of the subject property, respectively.

Refer to Figure 3 for a map indicating sample locations.

### 3.4 Soil Gas Sampling

Borings B1 through B6 were located in unimproved areas and advanced to a terminal depth of 5 feet bgs.

Borings were advanced to the terminal depth using a 2-foot long by 1.5-inch diameter sampler with a sampling point. The sampler was advanced by the direct-push drill rig using 4-foot long by 1.25-inch diameter hollow rods with the inner rods in place. Upon completion to the terminal depth, the rods were removed from the borehole.

### *Soil Gas Probe Construction*

Soil gas probes screened at 5 feet bgs were constructed within the boreholes upon completion of the boring to the terminal depth. A new section of ¼-inch diameter Nylaflow tubing with a new ¼-inch diameter polypropylene filter at the terminal end was inserted into the borehole to the desired sampling depth. One-inch diameter polyvinyl chloride (PVC) casing was used as a guide for the tubing to ensure that the desired sampling depth was achieved. Sand was poured into the boring annulus to form an approximately 1-foot long sand pack around the polypropylene filter, at which time the PVC piping was withdrawn. Approximately 1 foot of dry, granular bentonite was placed atop the sand pack and the remainder of the borehole was backfilled with hydrated bentonite to the ground surface to form a seal. The sampling end of the tubing was fitted with a valve and the probe was labeled for identification.

### *Soil Gas Sampling Methodology*

Soil gas samples were collected in general accordance with the July 2015 Department of Toxic Substances Control (DTSC) and Los Angeles Regional Water Quality Control Board (LARWQCB) "Advisory – Active Soil Gas Investigations."

Soil gas samples were collected using 1-liter, stainless-steel, cylindrical SUMMA canisters. The sampling containers were provided by Enthalpy Analytical, LLC (Enthalpy) a state-certified laboratory (California Department of Public Health Environmental Laboratory Accreditation Program certificate number 1338) in Orange, California, which subjected each canister to a rigorous cleaning process using a combination of dilution, heat, and high vacuum. After cleaning, the canisters were batch certified to be free of target contaminants to a specified reporting limit via gas chromatography/mass spectroscopy prior to delivery.

Partner received the SUMMA canisters evacuated to approximately minus 26 to 28 inches of mercury. The SUMMA canisters were fitted with stainless-steel flow controllers, which Enthalpy calibrated to maintain constant flow (approximately 0.1 liter per minute) for approximately 5 to 10 minutes of sampling time.

Each probe was allowed to equilibrate for a minimum of two hours after installation prior to sampling. After equilibration, the sample tubing and sampler screen were purged of ambient air using a plastic syringe. A tracer gas [1,1-difluoroethane (1,1-DFA)] was placed around each probe at the ground surface while sampling to detect ambient air intrusion. Once the sampling tubing was purged of ambient air, the sampling end of the tubing was fitted to the sampling canister and the port valve was opened, causing air to enter the sample container due to the pressure differential. Partner closed the valves after the canister was evacuated to approximately minus 2 to 5 inches of mercury, with pertinent data (e.g., time, canister vacuum) recorded at the start and end of sampling.

Partner successfully connected individual 1-liter SUMMA canisters to each sampling point. The SUMMA canisters were labeled for identification and stored away from direct sunlight prior to analysis.

Soil gas samples were collected from borings B1 through B6 at 5 feet bgs.

### **3.5 Post-Sampling Activities**

Probes were removed from the subsurface and the boreholes were backfilled with hydrated bentonite chips following sampling activities.

No significant amounts of derived wastes were generated during this investigation.

## 4.0 DATA ANALYSIS

---

### 4.1 Laboratory Analysis

Partner collected six soil gas samples on July 26, 2024, which were transported at ambient temperature under chain-of-custody protocol to Enthalpy for analysis. Each soil gas sample (six soil gas samples total) was analyzed for VOCs via Environmental Protection Agency (EPA) Method TO-15.

Laboratory analytical results are included in Appendix A and discussed below.

### 4.2 Regulatory Agency Comparison Criteria

#### *Department of Toxic Substances Control Regional Screening Levels*

Regional Screening Levels (RSLs) are generic, risk-based chemical concentrations developed by the EPA for use in initial screening-level evaluations. RSLs combine human health toxicity values with standard exposure factors to estimate contaminant concentrations that are considered to be health protective of human exposures over a lifetime through direct-contact exposure pathways (e.g., via inhalation and/or ingestion of and/or dermal contact with impacted soil and/or indoor air). RSLs are not legally enforceable standards, but rather are considered guidelines to evaluate if potential risks associated with encountered chemical impacts may warrant further evaluation.

The DTSC Office of Human and Ecological Risk (HERO) developed California-Modified RSLs based on a review of 1) RSL concentrations, and 2) recent toxicity values.

While soil gas detections are not immediately comparable to the indoor air quality guidelines within the RSLs, the DTSC issued a recommended default attenuation factor of 0.03 for sub-slab soil gas and near-source exterior soil gas in the June 2015 document *Office of Solid Waste and Emergency Response (OSWER) Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air*. With the subsurface contaminant concentrations and default attenuation factors, the associated contaminant concentrations in soil gas can be estimated as Calculated Residential and Commercial/Industrial Soil Gas Screening Levels (SGSLs).

### 4.3 Soil Gas Sample Data Analysis

Freon 12; chloromethane; chloroethane; trichlorofluoromethane; 1,1-dichloroethene; Freon 113; acetone; carbon disulfide; isopropanol; methylene chloride; trans-1,2-dichloroethene; n-hexane; naphthalene; 2-butanone; chloroform; carbon tetrachloride; benzene; 1,2-dichloroethane; 4-methyl-2-pentanone; toluene; tetrachloroethene (PCE); 2-hexanone; ethylene; m,p-xylenes; o-xylene; styrene; 4-ethyltoluene; 1,3,5-trimethylbenzene; 1,2,4-trimethylbenzene; and xylenes (total) were detected in the analyzed soil gas samples at concentrations above laboratory reporting limits (RLs) or at trace concentrations [below laboratory RLs and above laboratory method detection limits (MDLs)]. None of the remaining VOCs were detected in the soil gas samples at concentrations above laboratory RLs/MDLs and the RLs/MDLs were below applicable SGSLs.

Benzene was detected in each of the analyzed soil gas samples at concentrations ranging from 42 to 72 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ), exceeding the residential and commercial/industrial SGSLs of 3 and 14  $\mu\text{g}/\text{m}^3$ , respectively. PCE was detected in five of the analyzed soil gas samples (B1-SG through B5-SG) at concentrations ranging from 16 to 230  $\mu\text{g}/\text{m}^3$ , exceeding the residential and/or commercial/industrial SGSLs of 15 and 67  $\mu\text{g}/\text{m}^3$ , respectively. Ethylbenzene was detected in each of the analyzed soil gas samples at concentrations ranging from 480 to 1,200  $\mu\text{g}/\text{m}^3$ , exceeding the residential and commercial/industrial SGSLs of 37 and 163  $\mu\text{g}/\text{m}^3$ , respectively. m,p-Xylenes were detected in one of the analyzed soil gas samples (B2-SG) at a concentration of 4,900  $\mu\text{g}/\text{m}^3$ , exceeding the residential SGSL of 3,333  $\mu\text{g}/\text{m}^3$ . Total xylenes was detected in five of the analyzed soil gas samples (B1-SG, B2-SG, B4-SG, B5-SG, and B6-SG) at concentrations ranging from 3,400 to 6,660  $\mu\text{g}/\text{m}^3$ , exceeding the residential SGSL of 3,333  $\mu\text{g}/\text{m}^3$ . None of the remaining VOCs detected in soil gas exceeded the applicable SGSLs.

The tracer compound, 1,1-DFA, was detected in three of the six analyzed soil gas samples. According to the DTSC, detection of tracer compound at concentrations of less than 10 times the laboratory RL of the target analyte are considered insignificant. For the purposes of this investigation, the lowest RL (0.62  $\mu\text{g}/\text{m}^3$  for chloromethane) was utilized for comparison, resulting in a significance threshold of 6.2  $\mu\text{g}/\text{m}^3$ . The 1,1-DFA concentrations detected in soil gas sample B3-SG through B5-SG were at trace concentrations ranging from 0.32 to 1  $\mu\text{g}/\text{m}^3$ , less than the significance threshold and the detections are not anticipated to materially impact the findings of this investigation.

Refer to Table 2 for a summary of the soil gas sample VOCs laboratory analysis results.

#### 4.4 Discussion

**Benzene was detected** in each of the analyzed soil gas samples at concentrations ranging from 42 to 72  $\mu\text{g}/\text{m}^3$ , exceeding the residential and commercial/industrial SGSLs of 3 and 14  $\mu\text{g}/\text{m}^3$ , respectively. **PCE was detected** in five of the analyzed soil gas samples (B1-SG through B5-SG) at concentrations ranging from 16 to 230  $\mu\text{g}/\text{m}^3$ , exceeding the residential and/or commercial/industrial SGSLs of 15 and 67  $\mu\text{g}/\text{m}^3$ , respectively. **Ethylbenzene was detected** in each of the analyzed soil gas samples at concentrations ranging from 480 to 1,200  $\mu\text{g}/\text{m}^3$ , exceeding the residential and commercial/industrial SGSLs of 37 and 163  $\mu\text{g}/\text{m}^3$ , respectively. **m,p-Xylenes** was detected in one of the analyzed soil gas samples (B2-SG) at a concentrations of 4,900  $\mu\text{g}/\text{m}^3$ , exceeding the residential SGSL of 3,333  $\mu\text{g}/\text{m}^3$ . Total xylenes was detected in five of the analyzed soil gas samples (B1-SG, B2-SG, B4-SG, B5-SG, and B6-SG) at concentrations ranging from 3,400 to 6,660  $\mu\text{g}/\text{m}^3$ , exceeding the residential SGSL of 3,333  $\mu\text{g}/\text{m}^3$ . None of the remaining VOCs detected in soil gas exceeded the applicable SGSLs.

**Based on the analytical data, there is evidence of a release of VOCs to soil gas which has the potential to negatively impact the health of future subject property occupants via vapor intrusion.** The lateral and vertical extent of the soil gas impacts are unknown at this time.

## 5.0 SUMMARY AND CONCLUSIONS

---

Partner conducted a Phase II Subsurface Investigation at the subject property to evaluate the potential impact of VOCs to soil gas as a consequence of a release or releases from adjacent properties. The scope of the Phase II Subsurface Investigation included advancement of six borings. Six soil gas samples were analyzed for VOCs.

Benzene; PCE; ethylbenzene; m,p-xylenes; and total xylenes were detected in one or more of the analyzed soil gas samples above residential and/or commercial/industrial SGSLs. None of the remaining VOCs were detected in soil gas above the applicable SGSLs.

Based on the Phase II Subsurface Investigation, there is evidence of a release of VOCs to soil gas which has the potential to negatively impact the health of proposed residential occupants of the subject property redevelopment via vapor intrusion. The lateral and vertical extent of the soil gas impacts are unknown. Partner recommends engineering controls to mitigate the known soil gas impacts to prevent a vapor intrusion concern for the proposed residential development.

Notes:

<sup>^</sup>Calculated soil gas screening levels (SGSLs) for soil gas concentrations were derived by dividing the June 2020 (Revised May 2022) Department of Toxic Substances Control (DTSC) or May 2024 United States Environmental Protection Agency (EPA) Regional Screening Level (RSL) for each compound using the more conservative 2015 attenuation factor of 0.03 regardless of depth. DTSC RSLs are provided in the June 2020 (Revised May 2022) DTSC Human and Ecological Risk Office (HERO) Human Health Risk Assessment (HHRA) Note 3. Where DTSC RSLs were not available, EPA RSLs were utilized.

VOCs = volatile organic compounds

µg/m<sup>3</sup> = micrograms per cubic meter

< = not detected above indicated laboratory method detection limit (MDL)

J = detected at a trace concentration below laboratory reporting limit (RL) and above laboratory MDL

NE = not established

ND = not detected above laboratory RLs

Values in **bold** detected above laboratory RLs

Yellow highlighted values exceed residential regulatory guideline

Orange highlighted values exceed residential and commercial/industrial regulatory guidelines

---

This data package contains sample and QC results for six air samples, requested for the above referenced project on 07/26/24. The samples were received intact.

### **Volatile Organics in Air by MS (EPA TO-15):**

- 1,1-difluoroethane was detected between the MDL and the RL in the method blank for batch 346250; this analyte was not detected in samples at or above the RL.
- No other analytical problems were encountered.

## SAMPLE ACCEPTANCE CHECKLIST

**Section 1**  
 Client: Partner Project: 323 W. Brea Blvd  
 Date Received: 7/26/24 Sampler's Name Present:  Yes  No

**Section 2**  
 Sample(s) received in a cooler?  Yes, How many? \_\_\_\_\_  No (skip section 2) Sample Temp (°C) (No Cooler) 7.5  
 Sample Temp (°C), One from each cooler: #1: \_\_\_\_\_ #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_  
*(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)*  
 Shipping Information: \_\_\_\_\_

**Section 3**  
 Was the cooler packed with:  Ice  Ice Packs  Bubble Wrap  Styrofoam  
 Paper  None  Other \_\_\_\_\_  
 Cooler Temp (°C): #1: \_\_\_\_\_ #2: \_\_\_\_\_ #3: \_\_\_\_\_ #4: \_\_\_\_\_

Section 4	YES	NO	N/A
Was a COC received?	/		
Are sample IDs present?	/		
Are sampling dates & times present?	/		
Is a relinquished signature present?	/		
Are the tests required clearly indicated on the COC?	/		
Are custody seals present?		/	
If custody seals are present, were they intact?			/
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			/
Did all samples arrive intact? If no, indicate in Section 4 below.	/		
Did all bottle labels agree with COC? (ID, dates and times)	/		
Were the samples collected in the correct containers for the required tests?	/		
Are the containers labeled with the correct preservatives?			/
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			/
Was a sufficient amount of sample submitted for the requested tests?	/		

**Section 5** Explanations/Comments

**Section 6**  
 For discrepancies, how was the Project Manager notified?  Verbal PM Initials: \_\_\_\_\_ Date/Time \_\_\_\_\_  
 Email (email sent to/on): \_\_\_\_\_ / \_\_\_\_\_  
 Project Manager's response:

Completed By: [Signature] Date: 7/26/24

# Critical Habitat

October 4, 2024

 Project Site

 Critical Habitat - Polygon Features - Final

1:72,224

City of Fullerton, County of Los Angeles, California State Parks, Esri, TomTom, Garmin, SafeGraph, GeoTechnologies, Inc, METI/NASA, USGS,

# IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

## Location

Orange County, California

## Local office

Carlsbad Fish And Wildlife Office

☎ (760) 431-9440

📅 (760) 431-5901

2177 Salk Avenue - Suite 250  
Carlsbad, CA 92008-7385

NOT FOR CONSULTATION

# Endangered species

**This resource list is for informational purposes only and does not constitute an analysis of project level impacts.**

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species<sup>1</sup> and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries<sup>2</sup>).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

- 
1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information. IPaC only shows species that are regulated by USFWS (see FAQ).

2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

## Birds

NAME	STATUS
<p>Coastal California Gnatcatcher <i>Polioptila californica californica</i> Wherever found There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat. <a href="https://ecos.fws.gov/ecp/species/8178">https://ecos.fws.gov/ecp/species/8178</a></p>	Threatened
<p>Least Bell's Vireo <i>Vireo bellii pusillus</i> Wherever found There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat. <a href="https://ecos.fws.gov/ecp/species/5945">https://ecos.fws.gov/ecp/species/5945</a></p>	Endangered
<p>Southwestern Willow Flycatcher <i>Empidonax traillii extimus</i> Wherever found There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat. <a href="https://ecos.fws.gov/ecp/species/6749">https://ecos.fws.gov/ecp/species/6749</a></p>	Endangered

## Reptiles

NAME	STATUS
<p>Southwestern Pond Turtle <i>Actinemys pallida</i> Wherever found No critical habitat has been designated for this species. <a href="https://ecos.fws.gov/ecp/species/4768">https://ecos.fws.gov/ecp/species/4768</a></p>	Proposed Threatened

## Amphibians

NAME	STATUS
<p>Western Spadefoot <i>Spea hammondi</i> Wherever found No critical habitat has been designated for this species. <a href="https://ecos.fws.gov/ecp/species/5425">https://ecos.fws.gov/ecp/species/5425</a></p>	Proposed Threatened

## Insects

NAME	STATUS
<p>Monarch Butterfly <i>Danaus plexippus</i></p> <p>Wherever found</p> <p>No critical habitat has been designated for this species.  <a href="https://ecos.fws.gov/ecp/species/9743">https://ecos.fws.gov/ecp/species/9743</a></p>	Candidate

## Flowering Plants

NAME	STATUS
<p>Nevin's Barberry <i>Berberis nevinii</i></p> <p>Wherever found</p> <p>There is <b>final</b> critical habitat for this species. Your location does not overlap the critical habitat.  <a href="https://ecos.fws.gov/ecp/species/8025">https://ecos.fws.gov/ecp/species/8025</a></p>	Endangered

## Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

There are no critical habitats at this location.

You are still required to determine if your project(s) may have effects on all above listed species.

## Bald & Golden Eagles

Bald and golden eagles are protected under the Bald and Golden Eagle Protection Act<sup>1</sup> and the Migratory Bird Treaty Act<sup>2</sup>.

Any person or organization who plans or conducts activities that may result in impacts to bald or golden eagles, or their habitats<sup>3</sup>, should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below.

Specifically, please review the ["Supplemental Information on Migratory Birds and Eagles"](#).

Additional information can be found using the following links:

- Eagle Management <https://www.fws.gov/program/eagle-management>
- Measures for avoiding and minimizing impacts to birds  
<https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take-migratory-birds>
- Nationwide conservation measures for birds  
<https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>
- Supplemental Information for Migratory Birds and Eagles in IPaC  
<https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action>

There are likely bald eagles present in your project area. For additional information on bald eagles, refer to [Bald Eagle Nesting and Sensitivity to Human Activity](#)

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME

BREEDING SEASON

Bald Eagle *Haliaeetus leucocephalus*

Breeds Jan 1 to Aug 31

This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities.

<https://ecos.fws.gov/ecp/species/1626>

## Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read ["Supplemental Information on Migratory Birds and Eagles"](#), specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

### Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is  $0.25/0.25 = 1$ ; at week 20 it is  $0.05/0.25 = 0.2$ .
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

### Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

### Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

### No Data (-)

A week is marked as having no data if there were no survey events for that week.

### Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

**What does IPaC use to generate the potential presence of bald and golden eagles in my specified location?**

The potential for eagle presence is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply). To see a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

### What does IPaC use to generate the probability of presence graphs of bald and golden eagles in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

### What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to obtain a permit to avoid violating the [Eagle Act](#) should such impacts occur. Please contact your local Fish and Wildlife Service Field Office if you have questions.

## Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act<sup>1</sup> and the Bald and Golden Eagle Protection Act<sup>2</sup>.

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats<sup>3</sup> should follow appropriate regulations and consider implementing appropriate conservation measures, as described in the links below. Specifically, please review the ["Supplemental Information on Migratory Birds and Eagles"](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Eagle Management <https://www.fws.gov/program/eagle-management>

- Measures for avoiding and minimizing impacts to birds  
<https://www.fws.gov/library/collections/avoiding-and-minimizing-incident-take-migratory-birds>
- Nationwide conservation measures for birds <https://www.fws.gov/sites/default/files/documents/nationwide-standard-conservation-measures.pdf>
- Supplemental Information for Migratory Birds and Eagles in IPaC  
<https://www.fws.gov/media/supplemental-information-migratory-birds-and-bald-and-golden-eagles-may-occur-project-action>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern \(BCC\)](#) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the FAQ [below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, see the PROBABILITY OF PRESENCE SUMMARY below to see when these birds are most likely to be present and breeding in your project area.

NAME	BREEDING SEASON
Allen's Hummingbird <i>Selasphorus sasin</i> This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/9637">https://ecos.fws.gov/ecp/species/9637</a>	Breeds Feb 1 to Jul 15
Bald Eagle <i>Haliaeetus leucocephalus</i> This is not a Bird of Conservation Concern (BCC) in this area, but warrants attention because of the Eagle Act or for potential susceptibilities in offshore areas from certain types of development or activities. <a href="https://ecos.fws.gov/ecp/species/1626">https://ecos.fws.gov/ecp/species/1626</a>	Breeds Jan 1 to Aug 31

- Belding's Savannah Sparrow** *Passerculus sandwichensis* Breeds Apr 1 to Aug 15  
beldingi  
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA  
<https://ecos.fws.gov/ecp/species/8>
- Bullock's Oriole** *Icterus bullockii* Breeds Mar 21 to Jul 25  
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA
- California Gull** *Larus californicus* Breeds Mar 1 to Jul 31  
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
- California Thrasher** *Toxostoma redivivum* Breeds Jan 1 to Jul 31  
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.
- Common Yellowthroat** *Geothlypis trichas sinuosa* Breeds May 20 to Jul 31  
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA  
<https://ecos.fws.gov/ecp/species/2084>
- Lawrence's Goldfinch** *Spinus lawrencei* Breeds Mar 20 to Sep 20  
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.  
<https://ecos.fws.gov/ecp/species/9464>
- Northern Harrier** *Circus hudsonius* Breeds Apr 1 to Sep 15  
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA  
<https://ecos.fws.gov/ecp/species/8350>
- Nuttall's Woodpecker** *Dryobates nuttallii* Breeds Apr 1 to Jul 20  
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA  
<https://ecos.fws.gov/ecp/species/9410>
- Oak Titmouse** *Baeolophus inornatus* Breeds Mar 15 to Jul 15  
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.  
<https://ecos.fws.gov/ecp/species/9656>

Olive-sided Flycatcher <i>Contopus cooperi</i>	Breeds May 20 to Aug 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/3914">https://ecos.fws.gov/ecp/species/3914</a>	
Santa Barbara Song Sparrow <i>Melospiza melodia graminea</i>	Breeds Mar 1 to Sep 5
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA <a href="https://ecos.fws.gov/ecp/species/5513">https://ecos.fws.gov/ecp/species/5513</a>	
Western Grebe <i>Aechmophorus occidentalis</i>	Breeds Jun 1 to Aug 31
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska. <a href="https://ecos.fws.gov/ecp/species/6743">https://ecos.fws.gov/ecp/species/6743</a>	
Western Gull <i>Larus occidentalis</i>	Breeds Apr 21 to Aug 25
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	
Western Screech-owl <i>Megascops kennicottii carolinensis</i>	Breeds Mar 1 to Jun 30
This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA	
Wrentit <i>Chamaea fasciata</i>	Breeds Mar 15 to Aug 10
This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.	

## Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read ["Supplemental Information on Migratory Birds and Eagles"](#), specifically the FAQ section titled "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

### Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is  $0.25/0.25 = 1$ ; at week 20 it is  $0.05/0.25 = 0.2$ .
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

### Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

### Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

### No Data (-)

A week is marked as having no data if there were no survey events for that week.

### Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

## Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

## What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

## What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

## How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the [RAIL Tool](#) and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

### What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

### Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

### What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

### Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of

presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

## Facilities

### National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

There are no refuge lands at this location.

### Fish hatcheries

There are no fish hatcheries at this location.

### Wetlands in the National Wetlands Inventory (NWI)

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

This location did not intersect any wetlands mapped by NWI.

**NOTE:** This initial screening does **not** replace an on-site delineation to determine whether wetlands occur. Additional information on the NWI data is provided below.

#### Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

#### Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

#### Data precautions

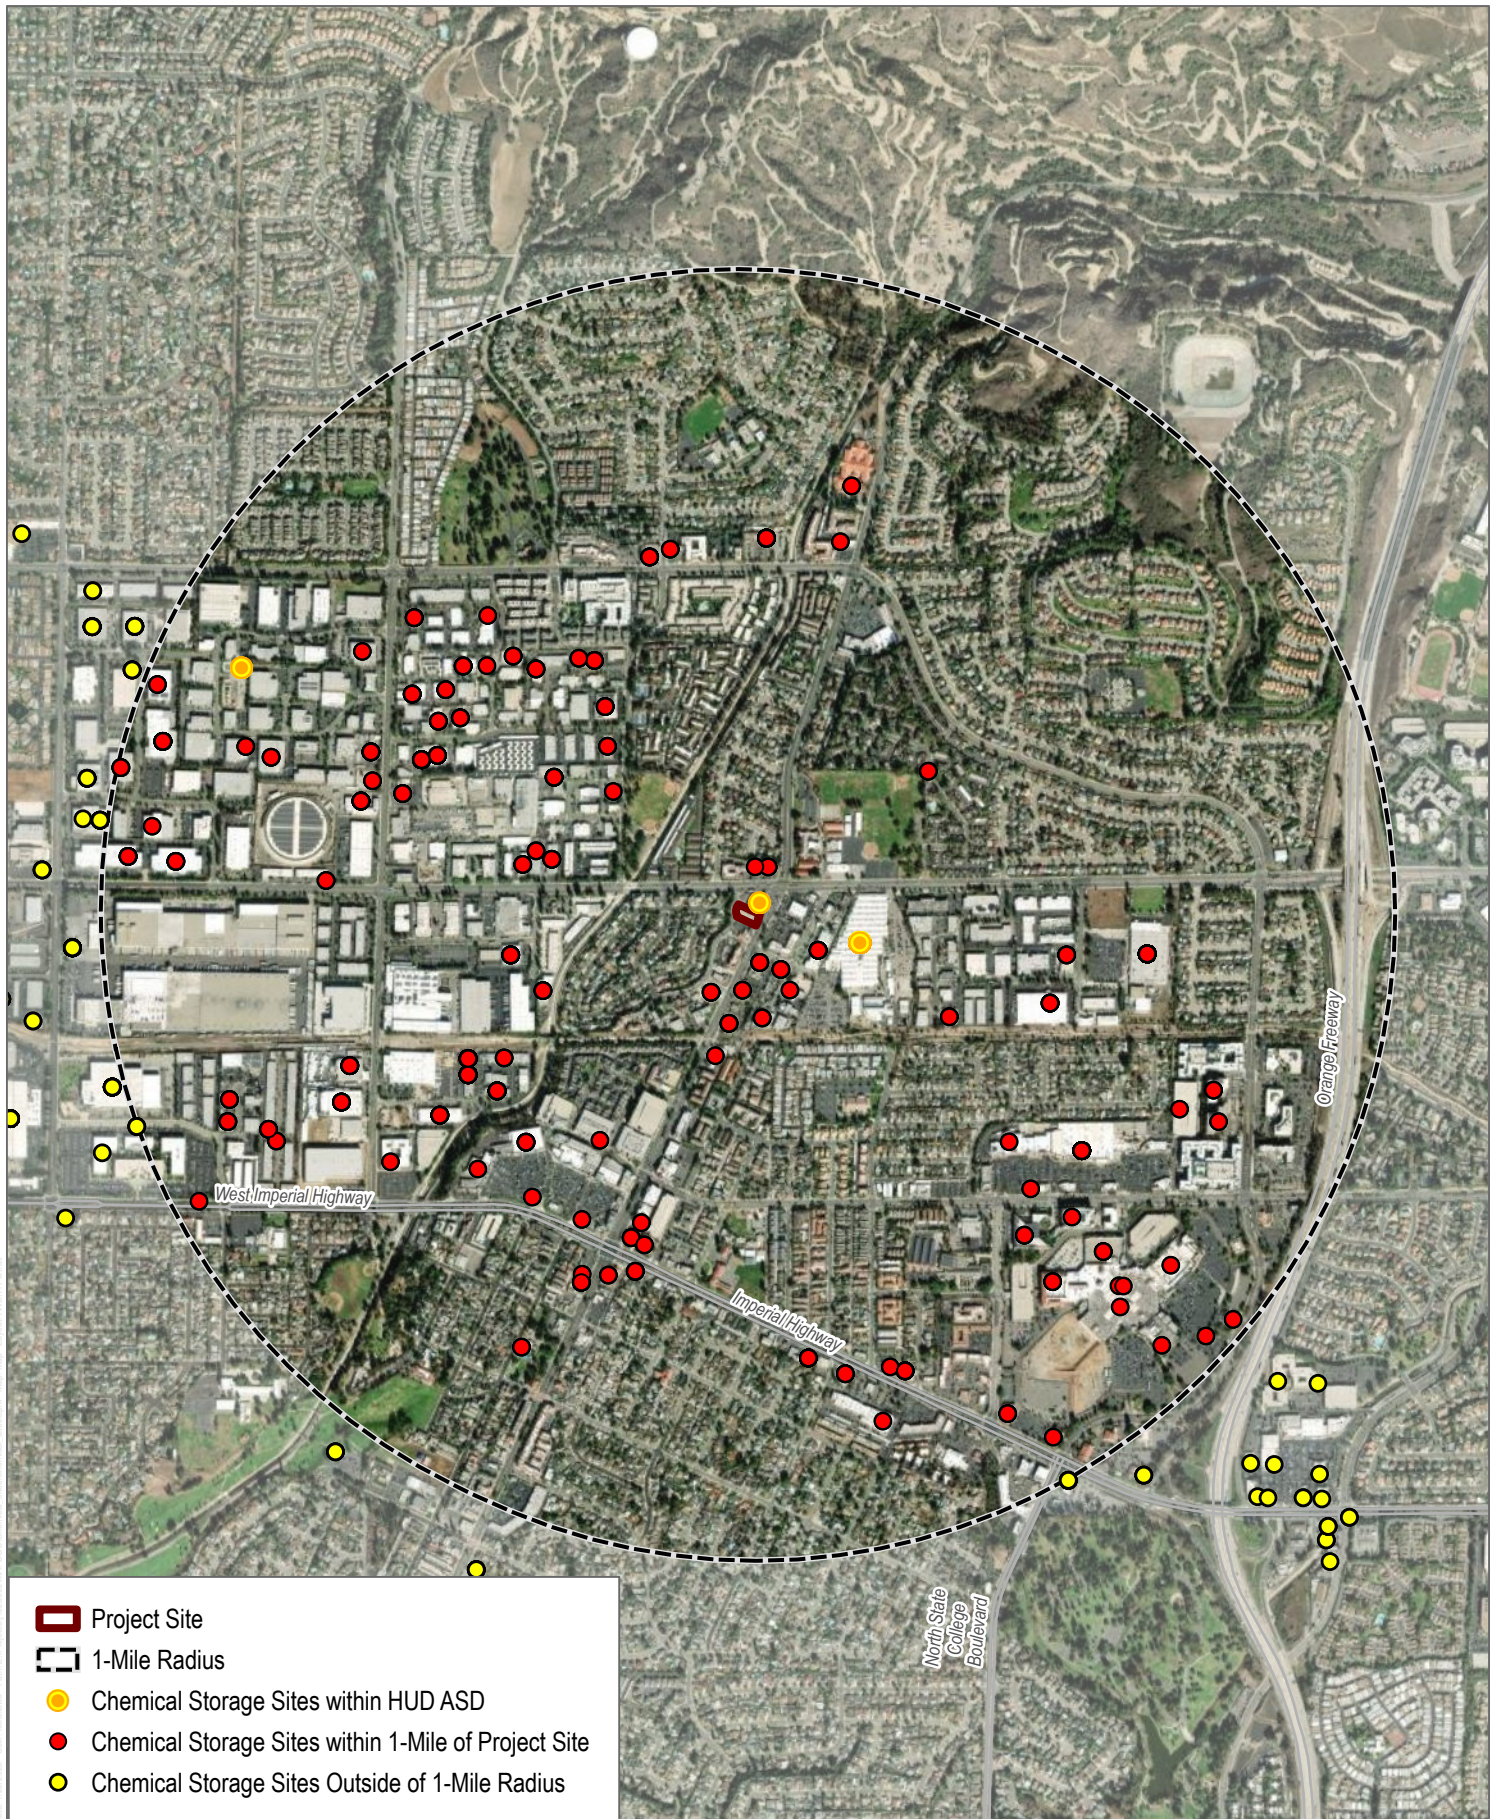

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate Federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

**Subject: Cultural Resources Constraints Analysis for the Jamboree Brea Permanent Supportive Housing Project, City of Brea, Orange County, California**

Dear Sue Harder,

This letter summarizes the known cultural resources constraints for the Jamboree Brea Permanent Supportive Housing Project (Project), located in the City of Brea, Orange County, California (Appendix A: Figure 1). Efforts include a review of information housed at the South Central Coastal Information Center (SCCIC) for the Project area of potential effects (APE) and surrounding one-mile radius, a review of historic aerial imagery and historic topographic maps, and a review of the geomorphological context of the Project APE. The below discussion includes a complete summary of these efforts, as well as the constraints relating to the presence of cultural resources and recommended next steps for the Project to meet best practice standards.

## Project Location and Description

The Project APE is within Section 11 of Township 3S and Range 10W on the *La Habra*, California U.S Geological Survey (USGS) 7.5-minute Series Quadrangle Map (Appendix A: Figure 1). The Project APE is located at 323 North Brea Boulevard, in the City of Brea, Orange County, California. The Project APE is approximately 0.437-acres, encompasses Assessor Parcel Number (APN) 269-301-02, and is bounded by Madrona Avenue to the west, a car wash and automotive repair facility to the north, a small shopping center to the south, and North Brea Boulevard to the east (Appendix A: Figure 2).

The proposed Project would entail the construction and operation of an affordable and permanent supportive housing (PSH) multifamily housing community containing a total of 39 residential units (38 one-bedroom PSH units and one, two-bedroom manager's unit). The Project would serve 38 individuals experiencing homelessness with incomes at or below 30% of the Area Median Income. In-house comprehensive supportive services would be provided to address various resident needs, such as mental health issues, substance abuse, and employment.

The new building would be three stories tall along the Madrona Avenue and North Brea Boulevard façades and would step back to four stories. Leasing, management, and service offices would be provided on the first floor, as well as a 22-stall parking garage with ingress and egress from Madrona Avenue. A pedestrian and bike entrance would be provided in the east portion of the Project site, and a vehicular and bike entrance would be provided

through the garage entry west of the site. Residential units would be provided on the second through fourth floors. Shared on-site amenities would include a community room and podium open space area on the second floor, and laundry rooms on the third and fourth floors.

## Regulatory Framework

### Federal

#### Title 36 Code of Federal Regulations, Part 800, and Section 106 of the NHPA

The NHPA established the National Register of Historic Places (NRHP) and the President's Advisory Council on Historic Preservation (ACHP), and provided that states may establish State Historic Preservation Officers (SHPOs) to carry out some functions of the NHPA. Most significantly for federal agencies responsible for managing cultural resources, Section 106 of the NHPA directs the following:

The head of any Federal agency having direct or indirect jurisdiction over a proposed Federal or federally assisted undertaking in any State and the head of any Federal department or independent agency having authority to license any undertaking shall, prior to the approval of the expenditure of any Federal funds on the undertaking or prior to the issuance of any license, as the case may be, take into account the effect of the undertaking on any district, site, building, structure, or object that is included in or eligible for inclusion in the NRHP.

Section 106 also affords the ACHP a reasonable opportunity to comment on the undertaking (16 USC 470f).

Title 36 of the Code of Federal Regulations (CFR), Part 800, implements Section 106 of the NHPA. It defines the steps necessary to identify historic properties (those cultural resources listed in or eligible for listing in the NRHP), including the following: consult with federally recognized Native American tribes to identify resources with important cultural values; determine whether or not they may be adversely affected by a proposed undertaking; and outline the process for eliminating, reducing, or mitigating the adverse effects.

The content of 36 CFR 60.4 defines criteria for determining eligibility for listing in the NRHP. The significance of cultural resources identified during an inventory must be formally evaluated for historical significance in consultation with the California SHPO to determine if the resources are eligible for inclusion in the NRHP. Cultural resources may be considered eligible for listing if they possess integrity of location, design, setting, materials, workmanship, feeling, and association. The criteria for determining eligibility are essentially the same in content and order as those outlined under the CEQA, but the criteria under NHPA are labeled A through D (rather than 1-4 under CEQA).

Regarding criteria A through D of Section 106, the quality of significance in American history, architecture, archaeology, engineering, and culture is present in districts, cultural resources, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and that, according to 36 CFR 60.4:

- A. Are associated with events that have made a significant contribution to the broad patterns of our history;
- or

- B. Are associated with the lives of persons significant in our past; or
- C. Embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. Have yielded or may be likely to yield, information important in prehistory or history.

The current evaluation of prehistoric cultural resources was performed with the intent of assessing historical significance under criterion D. The ability of an archaeological site to yield important information to history or prehistory is based upon the site's ability to address specific research themes.

The ACHP provides methodological and conceptual guidance for identifying historic properties. In 36 CFR 800.4, the steps necessary for identifying historic properties include:

- Determine and document the area of potential effect (APE) (36 CFR 800.16(d));
- Review existing information on historic properties within the APE, including preliminary data;
- Confer with consulting parties to obtain additional information on historic properties or concerns about effects to these;
- Consult with Native American tribes (36 CFR 800.3(f)) to obtain knowledge on resources that are identified with places which they attach cultural or religious significance;
- Appropriate fieldwork (including phased identification and evaluation); and
- Apply NRHP criteria to determine a resource eligibility for NRHP listing.

Fulfilling these steps is generally thought to constitute a reasonable effort to identify historic properties within the APE for an undertaking. The obligations of a federal agency must also assess whether an undertaking will have an adverse effect on cultural resources. An undertaking will have an adverse effect when (36 CFR Part 800.5(1)):

an undertaking may alter, directly or indirectly, any of the characteristics of a historic property that qualify the property for inclusion in the National Register in a manner that would diminish the integrity of the property's location, design, setting, materials, workmanship, feeling, or association. Consideration shall be given to all qualifying characteristics of a historic property, including those that may have been identified subsequent to the original evaluation of the property's eligibility for the National Register. Adverse effects may include reasonably foreseeable effects caused by the undertaking that may occur later in time, be farther removed in distance or be cumulative.

The process of determining whether an undertaking may have an adverse effect requires the federal agency to confer with consulting parties in order to appropriately consider all relevant stakeholder concerns and values. Consultation regarding the treatment of a historic property may result in a Programmatic Agreement and/or Memorandum of Agreement between consulting parties that typically include the lead federal agency, SHPO, and Native American tribes if they agree to be signatories to these documents. Treatment documents—whether resource-specific or generalized—provide guidance for resolving potential or realized adverse effects to known historic properties or to those that may be discovered during implementation of the undertaking. In all cases, avoidance of adverse effects to historic properties is the preferred treatment measure, and it is generally the burden of the federal agency to demonstrate why avoidance may not be feasible. Avoidance of adverse effects may not be

feasible if it would compromise the objectives of an undertaking that can be reasonably said to have public benefit. Other non-archaeological considerations about the benefit of an undertaking may also apply, resulting in the determination that avoidance is not feasible. In general, avoidance of adverse effects is most difficult when a permitted undertaking is being implemented, such as identification of an NRHP-eligible archaeological resource during earthmoving.

## Records Search

Dudek archaeologist Brenda Rogers conducted a records search of the California Historical Resources Information System (CHRIS) on October 24, 2024, at the SCCIC located on the campus of the California State University, Fullerton in Fullerton, California. The records search encompassed the Project APE and a one-mile search radius. The purpose of the records search is to identify any previously recorded cultural resources that are located in or adjacent to the Project APE and to identify previous studies in the Project vicinity. In addition to a review of previously prepared site records and reports, the records search also included a review of historical maps of the Project APE, ethnographies, the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), the California Historic Property Data File, and the lists of California State Historical Landmarks, California Points of Historical Interest, and Archaeological Determinations of Eligibility. See Appendix B for the complete SCCIC records search results and associated documentation.

## Previously Conducted Cultural Resources Studies

The CHRIS records search indicates that 33 previous cultural resources technical studies have been conducted within one-mile of the Project APE between 1974 and 2012 (Table 1). None of the previous studies intersect the Project APE.

### Previously Recorded Cultural Resources

The CHRIS records search indicates that three previously recorded cultural resources are located within one-mile of the Project APE, none of which intersect the Project APE (Table 2). All of the three resources within the one-mile radius are historic-era built environment resources. One historic-era built environment resource is listed on the NRHP (P-30-156178), one has been recommended as not eligible for listing on the NRHP (P-30-177012), and one resources has not been evaluated (P-30-150063). See Appendix B for the complete SCCIC records search results, documentation, and California Department of Parks and Recreation (DPR) cultural resources site records

Table 2. Previously Recorded Cultural Resources within One-Mile of Project APE

Primary Number	Trinomial	Age	Resource Type	Eligibility for NRHP
<b>Outside Project APE</b>				
P-30-150063	---	Historic	Structure; Laurel Elementary School	Not Evaluated
P-30-156178	---	Historic	Structure; Brea City Hall and Park	Listed
P-30-177012	---	Historic	District; Brea-Olinda Oil Field	Recommended not eligible

### Historic Aerial Imagery and Topographic Map Review

In addition to the SCCIC records search, Dudek conducted an online review of historic aerial photographs (historic aerials) and historic topographic maps (historic topos) to better understand the development of the Project APE over time. Historic aerials of the Project APE are available from 1952 to 2022. The first available historic aerial from 1952 displays a structure off of North Brea Boulevard, within the southern portion of the Project APE. The structure covers over 50 percent of the Project APE surface area. The 1952 aerial also displays trees along the western

boundary of the Project APE. North Brea Boulevard is present as a formal road and Madrona Avenue appears to be an informal road. The parcel north of the Project APE appears to be a parking lot and the parcel south of the Project APE is developed, including a structure directly south of the Project APE where a parking lot is currently located. By 1972, Madrona Avenue is a formal road, there is residential development west of Madrona Avenue, and there are no apparent changes within the Project APE. By 1980, the parcel north of the Project APE was developed and the structure directly south of the Project APE is no longer present. There are no apparent changes within the Project APE until 2003, at which time the structure within the Project APE is no longer present and the Project APE is a vacant lot. There are no significant changes within the Project APE as shown in the historic aerials after 2003 through the last available in 2022 (NETR 2024).

Historic topos of the Project APE are available from 1896 to 2022. The 1896 historic topo depicts the Project APE and surrounding area as undeveloped. There is an unnamed road, trending north to south, located approximately 100 feet west of the Project APE, and there is a waterway within Brea Canyon, also trending north to south, located approximately 0.20 miles west of the Project APE. No changes are depicted to the Project APE and surrounding area until 1935. The 1935 historic topo depicts the location of the City of Brea. The roads currently known as North Brea Boulevard and Madrona Avenue are present, however North Brea Boulevard is identified as Spadra Road. There are structures along North Brea Boulevard, including two structures within the APE. The 1961 historic topo no longer depicts structures within the APE and Madrona Avenue is also no longer depicted. The 1965 historic topo depicts the current road layout that surrounds the Project APE; however, no structures are depicted on the roads surrounding the Project APE. There are no observable changes to the APE and surrounding areas as depicted in the historic topos after 1965 through the last available in 2022 (NETR 2024).

Overall, the review of historic aerial imagery and historic topo maps indicate the Project APE has been subject to disturbances associated with development as early as 1935 and development covering over 50 percent of the Project APE as early as 1952.

## Review of Geomorphological Context

According to the U.S. Department of Agriculture Natural Resources Conservation Services (USDA 2024a), the Project APE consists of a Myford sandy loam, with slopes ranging from 2% to 15%. This soil type is characterized as deep, moderately well drain soils formed on terraces and is found in areas with elevations less than 1,500 feet above mean sea level (amsl) (USDA 2024b).

A review of the USGS mineral resources (USGS 2024) online spatial data for geology indicates that the Project APE is underlain by Quaternary alluvium and marine deposits from the Pleistocene to Holocene epochs. Late Pleistocene-era alluvial formations do have the potential to support the presence of buried archaeological resources. These soils are associated with the period of prehistoric human use, as well as represent ongoing processes of development that have potential to preserve cultural material in context, depending on area-specific topographical setting.

## Recommendations

Based on background research, though the Project APE is currently undeveloped, disturbances associated with development have taken place within the Project APE as early as 1935 and by 1952 there was a structure covering over 50 percent of the Project APE. No archaeological resources have been identified within or adjacent to the

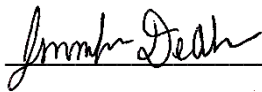

Project APE through the CHRIS database. However, results of the records search also indicate that the Project APE has not been subject to any previous archaeological investigations that would have included a records search or pedestrian survey prior to development. Even though the Project APE has not been previously studied, analysis of historic aerials and topos, and the geomorphological context indicate there is a low potential for encountering intact subsurface archaeological deposits within the Project APE during Project implementation.

The following recommendations are provided to meet National Environmental Policy Act (NEPA) and NHPA compliance and best practice standards, should the Project move forward at this location:

In the event that archaeological resources (sites, features, and artifacts) are exposed during construction activities involving ground disturbance for the proposed Project, all construction work occurring within 50 feet of the find shall immediately stop until a qualified specialist, meeting the Secretary of the Interior's Professional Qualification Standards, can evaluate the significance of the find and determine whether additional study is warranted. This avoidance buffer may be adjusted following inspection of this area by that qualified specialist. Prehistoric archaeological deposits may be indicated by the presence of discolored or dark soil, fire-affected material, concentrations of fragmented or whole shell, burned or complete bone, non-local lithic materials, or characteristics observed to be atypical of the surrounding area. Common prehistoric artifacts may include modified or battered lithic materials; lithic or bone tools that appeared to have been used for chopping, drilling, or grinding; projectile points; fired clay ceramics or non-functional items; and other items. Historic-age deposits are often indicated by the presence of glass bottles and shards, ceramic material, building or domestic refuse, ferrous metal, or old features such as concrete foundations or privies. Depending upon the significance of the find under the NHPA, the archaeologist may simply record the find and allow work to continue. Feasible options for avoidance must also be considered. If the discovery proves significant under the NHPA, additional work, such as preparation of an archaeological treatment plan, testing, or data recovery may be warranted.

Should you have any questions relating to this report and its findings please contact Jennifer De Alba at (805) 308-8535 or [jdealba@dudek.com](mailto:jdealba@dudek.com).

Sincerely,

---

December 12, 2024

Julianne Polanco  
State Historic Preservation Officer  
California Office of Historic Preservation  
1725 23<sup>rd</sup> Street, Suite 100  
Sacramento, CA 95816

Dear Ms. Polanco:

**Re:** Request for Concurrence for the Jamboree Brea Permanent Supportive Housing Project, Brea, Orange County, California

In accordance with Section 106 of the National Historic Preservation Act (NHPA) of 1966 as amended (16 U.S.C 470f), and as required by the U.S. Department of Housing and Urban Development (HUD), we are requesting your review and comments on the determination of no effect that Project implementation would have on historic properties within the Project Area of Potential Effects (APE) for the Jamboree Brea Permanent Supportive Housing Project (Project).

Jamboree Brea Permanent Supportive Housing Project  
323 North Brea Boulevard (Assessor's Parcel Number [APN] 296-301-02)  
Brea, CA 92821

**Undertaking:** The Project is located on a 0.437-acre parcel (APN 296-301-02) at 323 North Brea Boulevard in the City of Brea, Orange County, California. The Project falls within Section 11 of Township 3S and Range 10W of the *La Habra, California* U.S Geological Survey 7.5-minute Series Quadrangle Map. The Project would entail the construction and operation of an affordable and permanent supportive housing (PSH) community containing a total of 39 residential units (38 one-bedroom PSH units and one, two-bedroom manager's unit). The Project would serve 38 individuals experiencing homelessness with incomes at or below 30% of the Area Median Income. In-house comprehensive supportive services would be provided to address various resident needs, such as mental health issues, substance abuse, and employment.

The new building would be three stories tall along the Madrona Avenue and North Brea Boulevard façades and would step back to four stories. Leasing, management, and service offices would be provided on the first floor, as well as a 22-stall parking garage with ingress and egress from Madrona Avenue. A pedestrian and bike entrance would be provided in the east portion of the Project site, and a vehicular and bike entrance would be provided through the garage entry west of the site. Residential units would be provided on the second through fourth floors. Shared on-site amenities would include a community room and podium open space area on the second floor, and laundry rooms on the third and fourth floors.

**Area of Potential effects:** The horizontal limits of the APE are consistent with the Project boundary which is 0.437-acres and encompasses APN 296-301-02. Ground disturbance would encompass the entire 0.437-acre APE. The vertical above ground extent of the APE is anticipated to be three to four stories, which is the height of the PSH community residential building proposed for construction

1501 E. ST. ANDREW PLACE, 1ST FLOOR  
SANTA ANA, CA 92705  
PHONE: 714.480.2991  
FAX: 714.480.2978

on the Project site. The vertical underground extent of the APE, as represented by the maximum depth of excavation, is currently unknown but ground disturbance is anticipated to include grading, foundation work, and trenching for utilities.

**Historic Property Identification Effort:** DUDEK conducted a records search at the California Historic Resources Information System (CHRIS) South Central Coastal Information Center (SCCIC) on October 24, 2024. The records search indicates that three previously recorded cultural resources are located within one mile of the Project APE, none of which intersect the APE. All three resources are historic-era built environment resources. A review of historic aerial imagery (historic aeriels) and historic topographic maps indicates the APE has been subject to past disturbances associated with the development and demolition of several structures over the past century. Currently, the APE is vacant and undeveloped.

Based on background research indicating past disturbances within the Project APE, and in consideration of the lack of prehistoric and historic-era archaeological resources within one mile of the APE, DUDEK concludes that there is a low potential for encountering intact subsurface archaeological deposits within the APE during Project implementation.

**Description of Findings:** We did not identify any cultural resources, including historic properties, within the Project APE.

**Determination of Effect:** We have determined that the undertaking would have no effect on historic properties (i.e., no historic properties affected). Our investigation did not identify any historic properties or other cultural resources within the Project APE.

Your review and comments on our determination of no historic properties affected is requested. Please provide us with your response on or before 30 days of receipt of this letter.

To assist in your review, included in this packet is the cultural resources constraints analysis (with confidential records search results) prepared by Dudek for Project (Attachment A), as well as a Project Location Map (Attachment B), and a project APE Map (Attachment C). Should you need further information, please contact me via email at [suzanne.harder@occr.ocgov.com](mailto:suzanne.harder@occr.ocgov.com).

Sincerely,

Suzanne Harder, Community Development Compliance and Environmental Coordinator  
OC Housing & Community Development

Attachment A – Cultural Resources Constraints Analysis for the Jamboree Brea Permanent Supportive Housing Project, City of Brea, Orange County, California

Attachment B – Project Location Map

Attachment C – Project APE Map

**Description of Undertaking:**

Address: 323 North Brea Boulevard  
Brea, CA 92821  
Census Tract: 0015  
APN: 296-301-02

**Agency Official Determination:**

Based on our review, it is our determination that no historic properties or archaeological resources will be affected by this Project. We base these findings on:

- SCCIC records search indicating that no previously recorded cultural resources are within the Project APE
- Background research indicating past disturbances within the Project APE
- Aerial imagery indicating the Project APE is currently vacant and undeveloped
- The lack of previously recorded archaeological resources within one mile of the Project APE

**Project Description:**

The proposed Project would entail the construction and operation of an affordable and PSH community containing a total of 39 residential units (38 one-bedroom PSH units and one, two-bedroom manager's unit). The Project would serve 38 individuals experiencing homelessness with incomes at or below 30% of the Area Median Income. In-house comprehensive supportive services would be provided to address various resident needs, such as mental health issues, substance abuse, and employment.

The new building would be three stories tall along the Madrona Avenue and North Brea Boulevard façades and would step back to four stories. Leasing, management, and service offices would be provided on the first floor, as well as a 22-stall parking garage with ingress and egress from Madrona Avenue. A pedestrian and bike entrance would be provided in the east portion of the Project site, and a vehicular and bike entrance would be provided through the garage entry west of the site. Residential units would be provided on the second through fourth floors. Shared on-site amenities would include a community room and podium open space area on the second floor, and laundry rooms on the third and fourth floors.

**Site Information:**

- **Zoning Designation:** Mixed-Use I
- **General Plan Land Use Designation:** Mixed Use I
- **Existing Use:** Vacant land
- **Prior Use(s)/Development(s):** Commercial

**Existing Conditions and Trends:** The Project APE is a vacant parcel located between North Brea Boulevard and Madrona Avenue in the City of Brea, California. Adjacent land uses consist of a mixed residential and commercial.

## MEMORANDUM

---

**To:** Catherine Wade, Dudek; Kristin Arakawa, Dudek  
**From:** Nick Segovia, Dudek  
**Subject:** Noise Technical Memorandum – Jamboree Brea Permanent Supportive Housing Project  
**Date:** 11/5/2024  
**cc:** Jim Cowan, Dudek  
**Attachment(s):** Figure 1, Project Location  
Figure 2, Noise Model Receiver Locations  
Attachment A, Traffic Noise Model Input/Output Data  
Attachment B, Barrier Insertion Loss and Composite Transmission Loss/Sound Transmission Class Calculations

---

This technical noise memo summarizes the results of the noise analysis conducted for on-site uses of the Jamboree Brea Permanent Supportive Housing Project (Project) in Brea, California (see Figure 1).

## 1 Background

### 1.1 Project Description

The Project site is comprised of a 0.437-acre vacant parcel located at 323 North Brea Boulevard, Brea, CA 92821 (APN 296-301-02). The site is located in an area zoned for mixed-use development, which supports the construction of a multifamily residential building with an allowable residential density of 12.1 to 50 dwelling units per acre (DU/acre). Adjacent land uses consist of a car wash and automotive repair facility to the north, North Brea Boulevard and the Founders Plaza Shopping Mall to the east, a smaller shopping center containing medical facilities and a restaurant to the south, and Madrona Avenue and single-family housing to the west.

The Project would entail the construction and operation of an affordable and permanent supportive housing (PSH) multifamily housing community containing a total of 39 residential units (38 one-bedroom PSH units and 1 two-bedroom manager's unit). The Project would serve 38 individuals experiencing homelessness with incomes at or below 30% of the Area Median Income. In-house comprehensive supportive services would be provided to address various resident needs, such as mental health issues, substance abuse, and employment.

The new building would be three stories tall along the Madrona Avenue and North Brea Boulevard façades and would step back to four stories. Leasing, management, and service offices would be provided on the first floor, as well as a 22-stall parking garage with ingress and egress from Madrona Avenue. A pedestrian and bike entrance would be provided in the east portion of the Project site, and a vehicular and bike entrance would be provided through the garage entry west of the site. Residential units would be provided

on the second through fourth floors. Shared on-site amenities would include a community room and podium open space area on the second floor, and laundry rooms on the third and fourth floors. The Applicant will be requesting a Density Bonus pursuant to Government Code Section 65915 et seq., which allows concessions from zoning regulations as a development incentive, to allow a residential density of 89.2 DU/acre.

## 1.2 Noise Fundamentals and Terminology

Vibrations, traveling as waves through air from a source, exert a force perceived by the human ear as sound. Sound pressure level (referred to as sound level) is measured on a logarithmic scale in decibels (dB) that represent the fluctuation of air pressure above and below atmospheric pressure. Frequency, or pitch, is a physical characteristic of sound and is expressed in units of cycles per second or hertz (Hz). The normal frequency range of hearing for most people extends from about 20 to 20,000 Hz. The human ear is more sensitive to middle and high frequencies, especially when the noise levels are quieter. As noise levels get louder, the human ear starts to hear the frequency spectrum more evenly. To accommodate for this phenomenon, a weighting system to evaluate how loud a noise level is to a human was developed. The frequency weighting called “A” weighting is typically used for quieter noise levels, which de-emphasizes the low-frequency components of the sound in a manner similar to the response of a human ear. This A-weighted sound level is called the “noise level” and is referenced in units of dBA.

Because sound is measured on a logarithmic scale, a doubling of sound energy results in a 3 dBA increase in the noise level. Changes in a community noise level of less than 3 dB are not typically noticed by the human ear (Caltrans 2013). Changes from 3 to 5 dB may be noticed by some individuals who are extremely sensitive to changes in noise. A 5 dB increase is readily noticeable. The human ear perceives a 10 dB increase in sound level as a doubling of the sound level (i.e., 65 dBA sounds twice as loud as 55 dBA to a human ear).

An individual’s noise exposure occurs over a period of time; however, noise level is a measure of noise at a given instant in time. The equivalent continuous sound level ( $L_{eq}$ ), also referred to as the average sound level, is a single number representing the fluctuating sound level in A-weighted decibels (dBA) over a specified period of time. It is a sound-energy average of the fluctuating level and is equal to a constant unchanging sound of that dB level. Community noise sources vary continuously, being the product of many noise sources at various distances, all of which constitute a relatively stable background or ambient noise environment.

Noise levels are generally higher during the daytime and early evening when traffic (including airplanes), commercial, and industrial activity is the greatest. However, noise sources experienced during nighttime hours when background levels are generally lower can be potentially more conspicuous and irritating to the receiver. In order to evaluate noise in a way that considers periodic fluctuations experienced throughout the day and night, a concept termed “community noise equivalent level” (CNEL) was developed. The CNEL scale represents a time-weighted 24-hour average noise level based on the A-weighted sound level. CNEL accounts for the increased noise sensitivity during the evening hours (7 p.m. to 10 p.m.) and nighttime hours (10 p.m. to 7 a.m.) by adding 5 dB to the average sound levels occurring during the evening hours and 10 dB to the sound levels occurring during nighttime hours. Additional noise definitions are provided below.

**Ambient Noise Level.** The composite of noise from all sources near and far. The normal or existing level of environmental noise at a given location.

**A-Weighted Sound Level (dBA).** The sound pressure level in decibels as measured on a sound level meter using the A-weighted filter network. The A-weighting filter deemphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with community responses to noise.

**Community Noise Equivalent Level (CNEL).** CNEL is the A-weighted equivalent continuous sound exposure level for a 24-hour period with a 10 dB adjustment added to sound levels occurring during the nighttime hours (10 p.m.–7 a.m.) and 5 dB added to the sound during the evening hours (7 p.m.–10 p.m.).

**Day Night Average Sound Level (DNL or  $L_{dn}$ ).** Similar to the CNEL noise metric, except that no penalty is added during the evening hours (7 p.m.–10 p.m.). Typically, the CNEL and  $L_{dn}$  noise metrics vary by approximately 1 decibel or less and are often considered to be functionally equivalent.

**Decibel (dB).** The decibel is a unit for measuring sound pressure level and is equal to 10 times the logarithm to the base 10 of the ratio of the measured sound pressure squared to a reference pressure, which is 20 micropascals.

## 2 Noise Analysis Methodology

### 2.1 Applicable Noise Standards

Because the proposed Project may receive funding from the U.S. Department of Housing and Urban Development (HUD), the noise standards specified by HUD were used for this analysis. HUD's noise standards may be found in 24 CFR Part 51, Subpart B (CFR 2013). Exterior uses with a day night average sound level (DNL) of 65 dBA or less are considered acceptable. Sites at which the environmental or community noise exposure exceeds 65 decibels DNL are considered noise-impacted areas. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required by HUD environmental criteria and standards contained in Subpart B (Noise Abatement and Control) of 24 CFR Part 51.

The "Normally Unacceptable" noise zone includes community noise levels from above 65 decibels to 75 decibels DNL. Approvals in this noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

The interior noise standard is 45 dBA DNL.

### 2.2 Traffic Noise Modeling

The primary noise source in the Project vicinity is motor vehicle traffic. The northern and eastern façades of the proposed residential units would face Lambert Road to the north and Brea Boulevard to the east. While the proposed open space/outdoor area receives some exposure to both Lambert Road to the north and Brea Boulevard to the east, the open space is largely shielded by the proposed residential building's exterior façades. Additionally, the I-57 freeway is approximately 5,000 feet away and is therefore not

considered in the traffic noise analysis. The nearest airport, Fullerton Municipal Airport, is located approximately 6 miles away. Based upon the Airport Environs Land Use Plan for Fullerton Municipal Airport (ALUC 2019), the Project site is located approximately 5.3 miles east of the airport’s 60 dB CNEL noise contour. Thus, noise from the airport would have a negligible contribution to the on-site noise environment.

A noise analysis of traffic noise from Lambert Road and Brea Boulevard carried out using HUD’s DNL Calculator<sup>1</sup> indicated that worst-case exterior building façade noise levels would be higher than the “acceptable” HUD standard of 65 dBA DNL.

### 3 Noise Analysis Results

The results of the traffic noise analysis for the modeled on-site receivers (shown in Figure 2) are summarized in Table 1. The modeled input and output data are provided in Attachment A. As shown in Table 1, the highest noise levels would occur at Receivers M3 and M4, which is representative of the exterior façades of the habitable rooms facing north/northeast and east and closest to both Lambert Road and Brea Boulevard (the major sources of traffic noise in the Project area). Exterior traffic noise levels at Receivers M1 (facing north and closest to Lambert Road) and M2 (shielded by building façades to Lambert Road and Brea Boulevard traffic noise exposure) would be lower but would still exceed the HUD “acceptable” standard of 65 dBA DNL. Thus, the exposure from traffic noise along the northern, northeastern, and western building façades and the open space/outdoor area would exceed the HUD exterior noise standard of 65 dBA DNL by up to 7 dB, putting these receivers in the “normally unacceptable” noise range.

Table 1 – Traffic Noise Level Results Summary	
Receiver #	Noise Level (DNL (dBA))
M1 – northern exposure	<b>67</b>
M2 – southern and western exposure	<b>66</b>
M3 - eastern exposure	<b>72</b>
M4 – northeastern exposure	<b>72</b>

Source: Attachment A.

Note: **Bolded** numbers indicate that the noise levels exceed the HUD noise standard of 65 dBA DNL.

Because M2 (representative of the proposed open space/outdoor area) is not directly exposed to traffic noise from Lambert Road and Brea Boulevard due to the residential building’s southern-facing and western-facing exterior façades, the expected barrier attenuation from the residential building was estimated using available information of noise source-to-receiver distances, noise source height, receiver height, and building height. Using formulas from the Federal Transit Administration’s (FTA) Transit Noise & Vibration Impact Assessment Manual (2018), the insertion loss provided by the proposed residential building (acting as the barrier) was estimated to be approximately 15 dBA. As a result, traffic noise exposure at receiver M2 would be attenuated to 51 dBA DNL, and would thus be below the HUD exterior noise standard of 65 dBA DNL. Calculations derived from the FTA-based formulas can be found in Attachment B.

<sup>1</sup> <https://www.hudexchange.info/programs/environmental-review/dnl-calculator/>.

As detailed in Section 2.1, 24 CFR Part 51, Subpart B states that sites at which environmental or community noise exposure exceeds the day night average sound level (DNL) of 65 dBA are considered to be noise-impacted. For new construction proposed in high noise areas, grantees shall incorporate noise attenuation features to the extent required. Approvals in the “normally unacceptable” noise zone require a minimum of 5 dB additional sound attenuation for buildings having noise-sensitive uses if the day-night average sound level is greater than 65 dBA but does not exceed 70 dBA, or a minimum of 10 decibels of additional sound attenuation if the day-night average sound level is greater than 70 dBA but does not exceed 75 dBA.

Typical new construction of multi-family homes with windows closed provides a minimum of 25 dB exterior to interior noise reduction. All residential units will be equipped with a forced air heating ventilation air conditioning (HVAC) unit that allows for a “windows closed” condition (i.e., windows do not need to be left open for ventilation).

To derive the anticipated noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. These calculations are detailed in Attachment B.

Table 2 provides the anticipated noise reduction needed at each representative receiver to reach compliant interior noise levels. With implementation of this requirement, the proposed Project would not exceed the HUD interior noise standard of 45 dBA DNL and would be within the “acceptable” noise range for interior noise.

Table 2 – Interior Noise Levels (DNL (dBA))						
Receivers / Location	Maximum Noise Level at Façade <sup>1</sup>	Required Interior Noise Reduction <sup>2</sup>	Minimum Anticipated Interior Noise Reduction <sup>3</sup>	Upgraded Windows /Doors? <sup>4</sup>	Interior Noise Level <sup>5</sup>	Exceedance of Interior Noise Standard?
M1 – northern exposure	67	22	33	No	34	No
M2 – southern and western exposure	66	21	33	No	33	No
M3 - eastern exposure	72	27	33	No	39	No
M4 – northeastern exposure	72	27	33	No	39	No

1 - Estimated exterior noise level at the building façade based upon Table 1.

2 - Noise reduction required to satisfy the interior noise standards.

3 - Minimum interior noise reduction with typical new construction windows and doors closed.

4 - Does the required interior noise reduction trigger upgraded windows with an STC greater than 25 or walls/doors with an STC rating greater than 35?

5 - Estimated noise level based upon minimum anticipated noise reduction.

## Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the [Day/Night Noise Level Calculator Electronic Assessment Tool Overview \(/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/\)](#).

### Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

## Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative:** Cancel the project at this location
- **Other Reasonable Alternatives:** Choose an alternate site
- **Mitigation**
  - Contact your Field or Regional Environmental Officer (</programs/environmental-review/hud-environmental-staff-contacts/>)
  - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
  - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
  - Incorporate natural or man-made barriers. See *The Noise Guidebook* (</resource/313/hud-noise-guidebook/>)
  - Construct noise barrier. See the **Barrier Performance Module** (</programs/environmental-review/bpm-calculator/>)

## Day/Night Noise Level (DNL) Calculator

The Day/Night Noise Level Calculator is an electronic assessment tool that calculates the Day/Night Noise Level (DNL) from roadway and railway traffic. For more information on using the DNL calculator, view the [Day/Night Noise Level Calculator Electronic Assessment Tool Overview \(/programs/environmental-review/daynight-noise-level-electronic-assessment-tool/\)](#).

### Guidelines

- To display the Road and/or Rail DNL calculator(s), click on the "Add Road Source" and/or "Add Rail Source" button(s) below.
- All Road and Rail input values must be positive non-decimal numbers.
- All Road and/or Rail DNL value(s) must be calculated separately before calculating the Site DNL.
- All checkboxes that apply must be checked for vehicles and trains in the tables' headers.
- **Note #1:** Tooltips, containing field specific information, have been added in this tool and may be accessed by hovering over all the respective data fields (site identification, roadway and railway assessment, DNL calculation results, roadway and railway input variables) with the mouse.
- **Note #2:** DNL Calculator assumes roadway data is always entered.

## Mitigation Options

If your site DNL is in Excess of 65 decibels, your options are:

- **No Action Alternative:** Cancel the project at this location
- **Other Reasonable Alternatives:** Choose an alternate site
- **Mitigation**
  - Contact your Field or Regional Environmental Officer (</programs/environmental-review/hud-environmental-staff-contacts/>)
  - Increase mitigation in the building walls (only effective if no outdoor, noise sensitive areas)
  - Reconfigure the site plan to increase the distance between the noise source and noise-sensitive uses
  - Incorporate natural or man-made barriers. See *The Noise Guidebook* (</resource/313/hud-noise-guidebook/>)
  - Construct noise barrier. See the **Barrier Performance Module** (</programs/environmental-review/bpm-calculator/>)

## Tools and Guidance

Day/Night Noise Level Assessment Tool User Guide (</resource/3822/day-night-noise-level-assessment-tool-user-guide/>)

## Barrier Insertion Loss and Composite Transmission Loss/ Sound Transmission Class Calculations

Source <sub>elev</sub>	5.0	A <sub>horiz</sub>	220.0	A	224.0
Receiver <sub>elev</sub>	5.0	B <sub>horiz</sub>	32.0	B	52.8
C	252.0	C <sub>horiz</sub>	252.0		
P	24.77				
Barrier <sub>elev</sub>	47				
<b>Abarr</b>	<b>15.0</b>				

The above calculations, referring to inputs from the figure at right, helps a user estimate what barrier attenuation (Abarr) to expect (i.e., up to 15 per formula to right) based upon source height (above grade), barrier height, and receiver height, and the horizontal distances between the source and receiver to the barrier. The FTA-based formula in the worksheets use these path length (P) and Abarr values to determine the barrier's insertion loss.

For all other barriers, and for protrusion of terrain above the line of sight:	$A_{barrier} = \min \left\{ 15 \text{ or } \left[ 20 \times \log \left( \frac{2.51\sqrt{P}}{\tanh[4.46\sqrt{P}]} \right) + 5 \right] \right\}$
Barrier Insertion Loss	$IL_{barrier} = \max \left\{ 0 \text{ or } \left[ A_{barrier} - 10(G_{NB} - G_B) \log \left( \frac{D}{50} \right) \right] \right\}$
<p>D = <u>closest</u> distance between the receiver and the source, in feet                  P = path length difference, in feet (see figure below)                  G<sub>NB</sub> = Ground factor G computed <i>without barrier</i> (see Figure 6-5)                  G<sub>B</sub> = Ground factor G computed <i>with barrier</i> (see Figure 6-5)</p> <p>† The term "tanh(variable)" stands for hyperbolic tangent, available on many scientific calculators. If "tanh" is not available, then compute E = exp(variable), and set tanh(variable) = (E - 1/E) / (E + 1/E), where exp(variable) is the "exponential" function, also written as e<sup>x</sup> on calculator keypads.</p>	

11/26/21, MCS:  
 the calculations herein assume the "In General" calculation of Heff per Figure 6-5, which then allows a calculation of "G" with and without barrier.

Sources: Transit Noise & Vibration Impact Assessment (FTA 2018)

**Calculation of Composite TL/STC**

The defining equation for TL is:  
 $TL = 10 \times \log(1/\tau)$ , where  $\tau$  is the transmission coefficient, assuming a homogeneous partition.  
 To calculate the composite TL, you must first calculate the composite transmission coefficient, based on the  $\tau$  value of the specific partition component and its surface area (S). So,  
 $\tau_{comp} = \frac{\text{the sum of the individual components}}{\text{the surface area of the full partition (including all components)}}$   
 $\tau_{comp} = \frac{(\tau_1 S_1 + \tau_2 S_2 + \dots + \tau_n S_n)}{S}$   
 To determine the  $\tau$  value for each component, do the inverse of the TL calculation; so:  
 $\tau = 10^{-(TL/10)}$ , then calculate the  $\tau_{comp}$  and use it in the original TL equation above. Although it's not appropriate for laboratory studies, it's fine to say that the mid-frequency (500 to 1,000 Hz) TL is the same as the STC for HUD-types of studies.  
 Here's an example:  
 Say you have a main wall with an STC rating of 40 and a window having an STC rating of 25 in the wall. The overall wall surface area is 140 square feet and the window's surface area is 12 square feet.  
 $\tau_{wall} = 10^{-(40/10)}$  and  $\tau_{window} = 10^{-(25/10)}$ , and  $\tau_{comp} = \frac{(140-12) \times 10^{-4} + 12 \times 10^{-2.5}}{140} = 0.00036$ , so:  
 $TL/STC_{comp} = 10 \times \log(1/0.00036) = 34$

National Risk Index**

# National Risk Index

December 09, 2024

## Orange County, California

### Summary

Risk Index is **Very High**

Expected Annual Loss is **Very High**

Social Vulnerability is **Relatively Moderate**

Community Resilience is **Very Low**

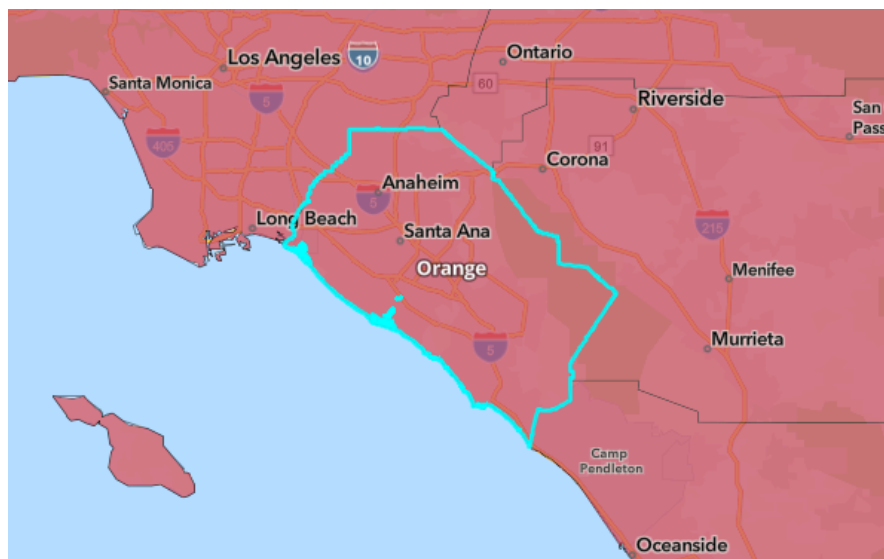

While reviewing this report, keep in mind that low risk is driven by lower loss due to natural hazards, lower social vulnerability, and higher community resilience.

For more information about the National Risk Index, its data, and how to interpret the information it provides, please review the **About the National Risk Index** and **How to Take Action** sections at the end of this report. Or, visit the National Risk Index website at [hazards.fema.gov/nri/learn-more](https://hazards.fema.gov/nri/learn-more) to access supporting documentation and links.

### Risk Index

The Risk Index rating is **Very High** for **Orange County, CA** when compared to the rest of the U.S.

100% of U.S. counties have a lower Risk Index  
91% of counties in California have a lower Risk Index

**Risk Index Legend**

- Very High
- Relatively High
- Relatively Moderate
- Relatively Low
- Very Low
- No Rating
- Not Applicable
- Insufficient Data

## Hazard Type Risk Index

Hazard type Risk Index scores are calculated using data for only a single hazard type, and reflect a community's Expected Annual Loss value, community risk factors, and the adjustment factor used to calculate the risk value.

Hazard Type	Risk Index Rating	Risk Index Score	National Percentile
<b>Avalanche</b>	Not Applicable	--	
<b>Coastal Flooding</b>	Very Low	44.7	
<b>Cold Wave</b>	No Rating	0	
<b>Drought</b>	Relatively Low	61.3	
<b>Earthquake</b>	Very High	99.9	
<b>Hail</b>	Very Low	29	
<b>Heat Wave</b>	Relatively Moderate	89.1	
<b>Hurricane</b>	Not Applicable	--	
<b>Ice Storm</b>	Not Applicable	--	
<b>Landslide</b>	Relatively Moderate	94.5	
<b>Lightning</b>	Relatively Low	67.2	
<b>Riverine Flooding</b>	Relatively High	96	
<b>Strong Wind</b>	Relatively Low	36.7	
<b>Tornado</b>	Relatively Moderate	87.4	
<b>Tsunami</b>	Relatively Low	56.8	
<b>Volcanic Activity</b>	Not Applicable	--	
<b>Wildfire</b>	Relatively High	99.8	
<b>Winter Weather</b>	Very Low	2	

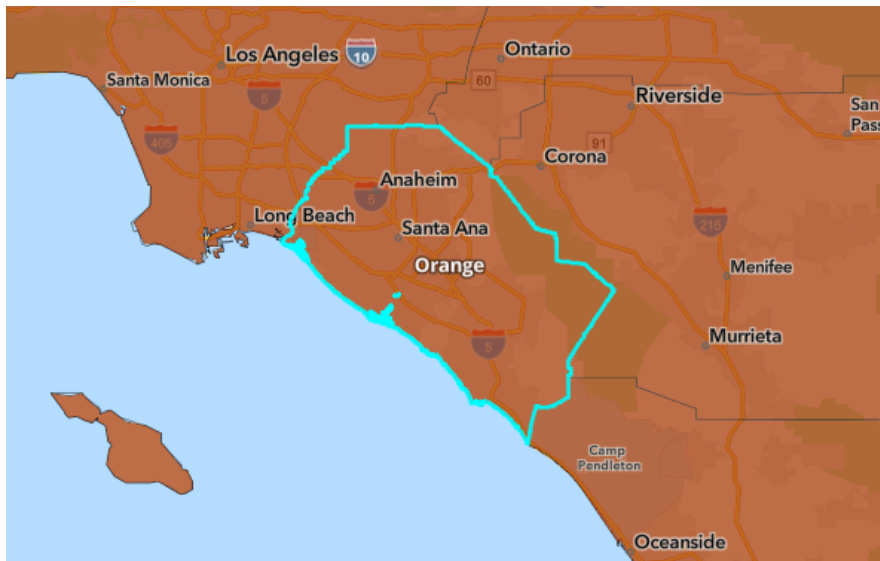

## Risk Factor Breakdown

Hazard Type	EAL Value	Social Vulnerability	Community Resilience	CRF	Risk Value	Risk Index Score
<b>Earthquake</b>	\$926,116,576	Relatively Moderate	Very Low	1.26	\$1,183,370,693	99.9

# Expected Annual Loss

In **Orange County, CA**, expected loss each year due to natural hazards is **Very High** when compared to the rest of the U.S.

Score **99.81**

**100%** of U.S. counties have a lower Expected Annual Loss

**91%** of counties in California have a lower Expected Annual Loss

### Expected Annual Loss Legend

## Expected Annual Loss for Hazard Types

Expected Annual Loss scores for hazard types are calculated using data for only a single hazard type, and reflect a community's relative expected annual loss for only that hazard type.

**14 of 18** hazard types contribute to the expected annual loss for **Orange County, CA**.

Hazard Type	Expected Annual Loss Rating	EAL Value	Score
<b>Earthquake</b>	Very High	\$926,116,576	99.9
<b>Wildfire</b>	Relatively High	\$49,545,003	99.8

Hazard Type	Expected Annual Loss Rating	EAL Value	Score
<b>Riverine Flooding</b>	Relatively High	\$7,228,030	95.6
<b>Tornado</b>	Relatively Moderate	\$4,799,429	86.8
<b>Heat Wave</b>	Relatively Moderate	\$795,214	88.2
<b>Landslide</b>	Relatively High	\$257,345	95.1
<b>Strong Wind</b>	Relatively Low	\$201,184	37.3
<b>Lightning</b>	Relatively Moderate	\$147,219	65.9
<b>Coastal Flooding</b>	Relatively Low	\$72,431	47.9
<b>Drought</b>	Relatively Low	\$70,453	63.7
<b>Hail</b>	Very Low	\$31,814	29.7

## About the National Risk Index

The National Risk Index is a dataset and online tool to help illustrate the United States communities most at risk for 18 natural hazards: Avalanche, Coastal Flooding, Cold Wave, Drought, Earthquake, Hail, Heat Wave, Hurricane, Ice Storm, Landslide, Lightning, Riverine Flooding, Strong Wind, Tornado, Tsunami, Volcanic Activity, Wildfire, and Winter Weather.

The National Risk Index leverages available source data for Expected Annual Loss due to these 18 hazard types, Social Vulnerability, and Community Resilience to develop a baseline relative risk measurement for each United States county and Census tract. These measurements are calculated using average past conditions, but they cannot be used to predict future outcomes for a community. The National Risk Index is intended to fill gaps in available data and analyses to better inform federal, state, local, tribal, and territorial decision makers as they develop risk reduction strategies.

Explore the National Risk Index Map at [hazards.fema.gov/nri/map](https://hazards.fema.gov/nri/map).

Visit the National Risk Index website at [hazards.fema.gov/nri/learn-more](https://hazards.fema.gov/nri/learn-more) to access supporting documentation and links.

## Calculating the Risk Index

**Risk Index values** are calculated using an equation\* that combines values for Expected Annual Loss (EAL) due to natural hazards, with the Community Risk Factor (CRF), which is a function of Social Vulnerability and Community Resilience:

**Risk Index** = **Expected Annual Loss** × **Community Risk Factor**

where **Community Risk Factor** =  $f\left(\frac{\text{Social Vulnerability}}{\text{Community Resilience}}\right)$

\*County-level risk values are derived by summing the risk values of all census tracts within that county.

Risk is presented as a composite value and score for all 18 hazard types, as well as individual values and scores for each hazard type.

For more information, visit [hazards.fema.gov/nri/determining-risk](https://hazards.fema.gov/nri/determining-risk).

## Calculating Expected Annual Loss

**Expected Annual Loss values** are calculated using an equation\* that combines values for exposure, annualized frequency, and historic loss ratios for 18 hazard types:

**Expected Annual Loss** = **Exposure** × **Annualized Frequency** × **Historic Loss Ratio**

\*Excluding Avalanche, Drought, Earthquake, and Tornado, EAL values for each hazard are calculated at the Census block level and summed together to determine Census tract and county-level hazard type EAL values.

Expected Annual Loss is presented as a composite value and score for all 18 hazard types, as well as individual values and scores for each hazard type.

For more information, visit [hazards.fema.gov/nri/expected-annual-loss](https://hazards.fema.gov/nri/expected-annual-loss).

## Calculating Social Vulnerability

Social Vulnerability is measured using the Social Vulnerability Index (SVI) published by the Centers for Disease Control and Prevention (CDC).

For more information, visit [hazards.fema.gov/nri/social-vulnerability](https://hazards.fema.gov/nri/social-vulnerability).

## Calculating Community Resilience

Community Resilience is measured at the County level using the Baseline Resilience Indicators for Communities (HVRI BRIC) published by the University of South Carolina's Hazards and Vulnerability Research Institute (HVRI).

For more information, visit [hazards.fema.gov/nri/community-resilience](https://hazards.fema.gov/nri/community-resilience).

## Values, Scores, and Ratings

The National Risk Index provides three different types of results for Risk and each component used to derive Risk: EAL, Social Vulnerability, and Community Resilience:

**Values.** Values for Risk and EAL are in units of dollars, representing the community's average economic loss from natural hazards each year. For Social Vulnerability and Community Resilience, values are the index values for the community provided by the source data sets.

**Scores.** Scores represent the national percentile ranking of the community's component value compared to all other communities at the same level (county or Census tract).

**Ratings.** Ratings refer to the qualitative terms that describe the relative risk of an area within the same geographic level. These rating categories range from "Very Low" to "Very High". Ratings for Social Vulnerability and Community Resilience are based on quintiles of those components' scores, while Risk and EAL ratings are based on more advanced statistical calculations on values. As a result, there is no fixed range of scores or values that correspond to the rating categories.

## How to Take Action

There are many ways to reduce natural hazard risk through mitigation. Communities with high National Risk Index scores can take action to reduce risk by decreasing Expected Annual Loss due to natural hazards, decreasing Social Vulnerability, and increasing Community Resilience.

For information about how to take action and reduce your risk, visit [hazards.fema.gov/nri/take-action](https://hazards.fema.gov/nri/take-action).

## Disclaimer

The National Risk Index (the Risk Index or the Index) and its associated data are meant for planning purposes only. This tool was created for broad nationwide comparisons and is not a substitute for localized risk assessment analysis. Nationwide datasets used as inputs for the National Risk Index are, in many cases, not as accurate as available local data. Users with access to local data for each National Risk Index risk factor should consider substituting the Risk Index data with local data to recalculate a more accurate risk index. If you decide to download the National Risk Index data and substitute it with local data, you assume responsibility for the accuracy of the data and any resulting data index. Please visit the [Contact Us](#) page if you would like to discuss this process further.

The methodology used by the National Risk Index has been reviewed by subject matter experts in the fields of natural hazard risk research, risk analysis, mitigation planning, and emergency management. The processing methods used to create the National Risk Index have produced results similar to those from other natural hazard risk analyses conducted on a smaller scale. The breadth and combination of geographic information systems (GIS) and data processing techniques leveraged by the National Risk Index enable it to incorporate multiple hazard types and risk factors, manage its nationwide scope, and capture what might have been missed using other methods.

The National Risk Index does not consider the intricate economic and physical interdependencies that exist across geographic regions. Keep in mind that hazard impacts in surrounding counties or Census tracts can cause indirect losses in your community regardless of your community's risk profile.

Nationwide data available for some risk factors are rudimentary at this time. The risk profiles for the vast majority of hazard types are based on historical frequency and loss data. They represent risk and expected annual loss based on average past conditions, not future predictions; therefore, they may not fully consider the potential impacts of recent changes to the environment, including anthropomorphic landscape changes, or climate change. The National Risk Index will be continuously updated as new data become available and improved methodologies are identified.

For comprehensive details about how the Risk Index can help you and its limitations, see the [National Risk Index Technical Documentation](#)

## Assumption of Risk

In view of the identified limitations of the National Risk Index associated data, by using the data, you acknowledge and agree that FEMA makes no representations or warranties about the accuracy, completeness, or fitness for any particular purpose of the data; that the data is provided "as is" without warranty of any kind; that you assume full responsibility for any consequences that may arise, including financial losses, legal disputes, or other

adverse outcomes; and that you release FEMA and the federal government from any liability that may arise to the extent allowable by law.

## Attribution, No Endorsement

Please attribute your use of the National Risk Index and its associated data to the Federal Emergency Management Agency.

However, you acknowledge and agree that nothing herein constitutes an endorsement of you or your work by FEMA or the federal government, and you shall not imply through use of the National Risk Index or its associated data or through providing attribution, that FEMA or the federal government endorses you.

# **PARTNER WORKSHEETS**

**ERR 1**

**Airport Hazards**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## **Airport Hazards (CEST and EA) – PARTNER**

<https://www.hudexchange.info/environmental-review/airport-hazards>

**1. To ensure compatible land use development, you must determine your site’s proximity to civil and military airports. Is your project within 15,000 feet of a military airport or 2,500 feet of a civilian airport?**

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within the applicable distances to a military or civilian airport.*

Yes → *Continue to Question 2.*

**2. Is your project located within a Runway Potential Zone/Clear Zone (RPZ/CZ) or Accident Potential Zone (APZ)?**

Yes, project is in an APZ → *Continue to Question 3.*

Yes, project is an RPZ/CZ → *Project cannot proceed at this location.*

No, project is not within an APZ or RPZ/CZ

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Continue to the Worksheet Summary below. Provide a map showing that the site is not within either zone.*

**3. Is the project in conformance with DOD guidelines for APZ?**

Yes, project is consistent with DOD guidelines without further action.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

No, the project cannot be brought into conformance with DOD guidelines and has not been approved. → *Project cannot proceed at this location.*

**If mitigation measures have been or will be taken, explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

Click here to enter text.

→ *Work with the RE/HUD to develop mitigation measures. Continue to the Worksheet Summary below. Provide any documentation supporting this determination.*

### **Worksheet Summary**

Based on the analysis prepared in the Environmental Assessment, the following features would not require implementation of mitigation measures. The project site is not located within 2,500 feet of a civilian airport or 15,000 feet of a military airport. The nearest civilian airport, Fullerton Municipal Airport, is located approximately 5.7 miles southwest of the project site. The nearest military airport is Los Alamitos Army Airfield, approximately 11.6 miles southwest of the project site. Therefore, the project is in compliance with airport hazards requirements.

See Attachment 1.

**ERR 2**

**Flood Insurance**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Flood Insurance (CEST and EA) – PARTNER

General requirements	Legislation	Regulation
Certain types of federal financial assistance may not be used in floodplains unless the community participates in National Flood Insurance Program and flood insurance is both obtained and maintained.	Flood Disaster Protection Act of 1973 as amended (42 USC 4001-4128)	24 CFR 50.4(b)(1) and 24 CFR 58.6(a) and (b); 24 CFR 55.5.
<b>Reference</b>		
<a href="https://www.hudexchange.info/environmental-review/flood-insurance">https://www.hudexchange.info/environmental-review/flood-insurance</a>		

**1. Does this project involve mortgage insurance, refinance, acquisition, repairs, rehabilitation, or construction of a structure, mobile home, or insurable personal property?**

No. This project does not require flood insurance or is excepted from flood insurance.  
*Continue to the Worksheet Summary.*

Yes *Continue to Question 2.*

**2. Provide a FEMA/FIRM map showing the site.**

The Federal Emergency Management Agency (FEMA) designates floodplains. The [FEMA Map Service Center](#) provides this information in the form of FEMA Flood Insurance Rate Maps (FIRMs).

**Is the structure, part of the structure, or insurable property located in a FEMA-designated Special Flood Hazard Area?**

No *Continue to the Worksheet Summary.*

Yes *Continue to Question 3.*

**3. Is the community participating in the National Flood Insurance Program or has less than one year passed since FEMA notification of Special Flood Hazards?**

Yes, the community is participating in the National Flood Insurance Program. Flood insurance is required. Provide a copy of the flood insurance policy declaration or a paid receipt for the current annual flood insurance premium and a copy of the application for flood insurance.

*Continue to the Worksheet Summary.*

- Yes, less than one year has passed since FEMA notification of Special Flood Hazards.  
If less than one year has passed since notification of Special Flood Hazards, no flood Insurance is required.  
*Continue to the Worksheet Summary.*
  
- No. The community is not participating, or its participation has been suspended.  
Federal assistance may not be used at this location. Cancel the project at this location.

**Worksheet Summary**

Based on the analysis prepared in the Environmental Assessment, the following features would not require implementation of mitigation measures. According to the FEMA Flood Insurance Rate Map panel 06059C0042J, effective December 3, 2009, the project site is located within Zone X, an area of minimal flood hazard. Therefore, the project site is not located within a FEMA-designated SFHA.

See Attachment 3.

**ERR 3**

**Air Quality**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Air Quality (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/air-quality>

1. Does your project include new construction or conversion of land use facilitating the development of public, commercial, or industrial facilities OR five or more dwelling units?

Yes → Continue to Question 2.

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide any documents used to make your determination.

2. Is your project’s air quality management district or county in non-attainment or maintenance status for any criteria pollutants?

Follow the link below to determine compliance status of project county or air quality management district:

<http://www.epa.gov/oaqps001/greenbk/>

No, project’s county or air quality management district is in attainment status for all criteria pollutants

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.

Yes, project’s management district or county is in non-attainment or maintenance status for one or more criteria pollutants. → Continue to Question 3.

3. Determine the estimated emissions levels of your project for each of those criteria pollutants that are in non-attainment or maintenance status on your project area. Will your project exceed any of the *de minimis* or *threshold* emissions levels of non-attainment and maintenance level pollutants or exceed the screening levels established by the state or air quality management district?

No, the project will not exceed *de minimis* or threshold emissions levels or screening levels

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Explain how you determined that the project would not exceed *de minimis* or *threshold* emissions.

Yes, the project exceeds *de minimis* emissions levels or screening levels.

→ Continue to Question 4. Explain how you determined that the project would not exceed *de minimis* or threshold emissions in the Worksheet Summary.

- 4. For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

Click here to enter text.

### **Worksheet Summary**

The project site is in the South Coast Air Basin (SoCAB), which includes all of Orange County and the urbanized portions of Los Angeles, Riverside, and San Bernardino counties. under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SoCAB is designated as in nonattainment with the NAAQS for ozone (O<sub>3</sub>), fine particulate matter (PM<sub>2.5</sub>), and partial nonattainment for lead (Pb) (i.e., Orange County is in attainment but Los Angeles County within the SoCAB is in nonattainment). The SCAQMD is designated as a maintenance area for coarse particulate matter (PM<sub>10</sub>), carbon monoxide (CO), nitrogen dioxide (NO<sub>2</sub>), and sulfur dioxide (SO<sub>2</sub>).

Emissions from the construction and operational phases of the project were estimated using the California Emissions Estimator Model (CalEEMod) Version 2022.1.1.28. Results of the CalEEMod tool determined that annual construction and operational criteria pollutant emissions from the project would be below federal *de minimis* thresholds and would not exceed the SCAQMD's regional construction or operation emission thresholds. Therefore, the proposed project is in compliance with the Clean Air Act.

See Attachment 4.

**ERR 4**

**Coastal Zone Management Act**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Coastal Zone Management Act (CEST and EA) – PARTNER

<https://www.onecpd.info/environmental-review/coastal-zone-management>

Projects located in the following states must complete this form.

Alabama	Florida	Louisiana	Mississippi	Ohio	Texas
Alaska	Georgia	Maine	New Hampshire	Oregon	Virgin Islands
American Samona	Guam	Maryland	New Jersey	Pennsylvania	Virginia
California	Hawaii	Massachusetts	New York	Puerto Rico	Washington
Connecticut	Illinois	Michigan	North Carolina	Rhode Island	Wisconsin
Delaware	Indiana	Minnesota	Northern Mariana Islands	South Carolina	

**1. Is the project located in, or does it affect, a Coastal Zone as defined in your state Coastal Management Plan?**

Yes → Continue to Question 2.

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing that the site is not within a Coastal Zone.

**2. Does this project include activities that are subject to state review?**

Yes → Continue to Question 3.

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.

**3. Has this project been determined to be consistent with the State Coastal Management Program?**

Yes, with mitigation. → The RE/HUD must work with the State Coastal Management Program to develop mitigation measures to mitigate the impact or effect of the project.

Yes, without mitigation. → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination.

No → Project cannot proceed at this location.

**Worksheet Summary**

The project site is located approximately 17 miles inland in the City of Brea. Neither the project site nor any portion of the City is located within the coastal zone. As such, the project would not occur within or affect a coastal zone. Therefore, the proposed project is in compliance with the CZMA.

See Attachment 5.

## **ERR 5**

### **Contamination and Toxic Substances**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Contamination and Toxic Substances (Multifamily and Non-Residential Properties) – PARTNER

<https://www.hudexchange.info/programs/environmental-review/site-contamination>

**1. How was site contamination evaluated?<sup>1</sup> Select all that apply.**

- ASTM Phase I ESA
- ASTM Phase II ESA
- Remediation or clean-up plan
- ASTM Vapor Encroachment Screening
- None of the above

→ Provide documentation and reports and include an explanation of how site contamination was evaluated in the Worksheet Summary.

Continue to Question 2.

**2. Were any on-site or nearby toxic, hazardous, or radioactive substances found that could affect the health and safety of project occupants or conflict with the intended use of the property? (Were any recognized environmental conditions or RECs identified in a Phase I ESA and confirmed in a Phase II ESA?)**

- No → Explain below.

Click here to enter text.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

- Yes → Describe the findings, including any recognized environmental conditions (RECs), in Worksheet Summary below. Continue to Question 3.

**3. Can adverse environmental impacts be mitigated?**

---

<sup>1</sup> HUD regulations at 24 CFR § 58.5(i)(2)(ii) require that the environmental review for multifamily housing with five or more dwelling units or non-residential property include the evaluation of previous uses of the site or other evidence of contamination on or near the site. For acquisition and new construction of multifamily and nonresidential properties HUD strongly advises the review include an ASTM Phase I Environmental Site Assessment (ESA) to meet real estate transaction standards of due diligence and to help ensure compliance with HUD’s toxic policy at 24 CFR §58.5(i) and 24 CFR §50.3(i). Also note that some HUD programs require an ASTM Phase I ESA.

Adverse environmental impacts cannot feasibly be mitigated → HUD assistance may not be used for the project at this site. Project cannot proceed at this location.

Yes, adverse environmental impacts can be eliminated through mitigation.  
→ *Provide all mitigation requirements<sup>2</sup> and documents. Continue to Question 4.*

**4. Describe how compliance was achieved. Include any of the following that apply: State Voluntary Clean-up Program, a No Further Action letter, use of engineering controls<sup>3</sup>, or use of institutional controls<sup>4</sup>.**

The Phase II Subsurface Investigation Report completed by Partner Engineering and Science, Inc. (Partner) in August 2024 confirmed the release of VOCs to soil gas on the project site, which as the potential to negatively affect the health of future residents at the proposed development. To reduce soil gas impacts at the project site, Partner recommends implementing engineering controls to mitigate known soil gas impacts and prevent a vapor intrusion concern for residents.

**If a remediation plan or clean-up program was necessary, which standard does it follow?**

- Complete removal  
 Risk-based corrective action (RBCA)

→ *Continue to the Worksheet Summary.*

**Worksheet Summary**

A Phase I Environmental Site Assessment (ESA) was completed for the project by Barr & Clark, Inc. (Barr & Clark) in April 2024. While the Phase I ESA did not reveal evidence of any historical recognized environmental conditions (RECs) or controlled RECs in connection with the proposed project, a REC was identified related to the current and previous uses of the adjacent properties to the north and east of the project site. Environmental database reviews revealed that these previous neighboring land uses included listings for leaking USTs and dry-cleaning equipment utilizing hazardous solvents. Because these listings could represent a potential vapor encroachment condition, they are considered an REC.

A Phase II Subsurface Investigation Report was completed by Partner Engineering and Science, Inc. (Partner) in August 2024. to evaluate the potential impact of volatile organic compounds (VOCs) to soil gas as a consequence of a release or releases from adjacent properties. The Phase II found evidence of a release of VOCs to soil gas, which has the potential to negatively impact the health of residents at the proposed affordable housing development through vapor intrusion. The lateral and vertical extent of the

---

<sup>2</sup> Mitigation requirements include all clean-up actions required by applicable federal, state, tribal, or local law. Additionally, provide, as applicable, the long-term operations and maintenance plan, Remedial Action Work Plan, and other equivalent documents.

<sup>3</sup> Engineering controls are any physical mechanism used to contain or stabilize contamination or ensure the effectiveness of a remedial action. Engineering controls may include, without limitation, caps, covers, dikes, trenches, leachate collection systems, signs, fences, physical access controls, ground water monitoring systems and ground water containment systems including, without limitation, slurry walls and ground water pumping systems.

<sup>4</sup> Institutional controls are mechanisms used to limit human activities at or near a contaminated site, or to ensure the effectiveness of the remedial action over time, when contaminants remain at a site at levels above the applicable remediation standard which would allow for unrestricted use of the property. Institutional controls may include structure, land, and natural resource use restrictions, well restriction areas, classification exception areas, deed notices, and declarations of environmental restrictions.

soil gas impacts are unknown. Therefore, to reduce soil gas impacts at the project site, Partner recommends implementing engineering controls to mitigate known soil gas impacts and prevent a vapor intrusion concern for residents (MM-TOX-1).

See Attachments 6 and 7.

**ERR 6**

**Endangered Species Act**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Endangered Species Act (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/endangered-species>

### 1. Does the project involve any activities that have the potential to affect species or habitats?

No, the project will have No Effect due to the nature of the activities involved in the project.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.

No, the project will have No Effect based on a letter of understanding, memorandum of agreement, programmatic agreement, or checklist provided by local HUD office.

**Explain your determination:**

Click here to enter text.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.

Yes, the activities involved in the project have the potential to affect species and/or habitats. → Continue to Question 2.

### 2. Are federally listed species or designated critical habitats present in the action area?

Obtain a list of protected species from the Services. This information is available on the [FWS Website](#).

No, the project will have No Effect due to the absence of federally listed species and designated critical habitat.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation may include letters from the Services, species lists from the Services’ websites, surveys or other documents and analysis showing that there are no species in the action area.

Yes, there are federally listed species or designated critical habitats present in the action area. → Continue to Question 3.

**3. Recommend one of the following effects that the project will have on federally listed species or designated critical habitat:**

No Effect: Based on the specifics of both the project and any federally listed species in the action area, you have determined that the project will have absolutely no effect on listed species or critical habitat.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination. Documentation should include a species list and explanation of your conclusion, and may require maps, photographs, and surveys as appropriate.*

May Affect, Not Likely to Adversely Affect: Any effects that the project may have on federally listed species or critical habitats would be beneficial, discountable, or insignificant.

→ **Partner entities should not contact the Services directly.** *If the RE/HUD agrees with this recommendation, they will have to complete Informal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

Likely to Adversely Affect: The project may have negative effects on one or more listed species or critical habitat.

→ **Partner entities should not contact the Services directly.** *If the RE/HUD agrees with this recommendation, they will have to complete Formal Consultation. Provide the RE/HUD with a biological evaluation or equivalent document. They may request additional information, including surveys and professional analysis, to complete their consultation.*

**Worksheet Summary**

Due to the urban and commercial setting surrounding the project site, no federally listed special-status plant or wildlife species are expected to be present onsite. The USFWS offers consultation on threatened and endangered wildlife and plant species, as well as critical habitats, on a project-by-project basis. According to the USFWS Environmental Conservation Online System (ECOS) Information for Planning and Consultation (IPaC), seven special-status species have the potential to occur on the project site. However, as stated in the IPaC report, although the general habitat ranges of these seven species overlap with the project location, their critical habitat areas do not intersect with the project site.

Furthermore, according to the NEPAAssist Critical Habitat layer, which uses data compiled by the USFWS, the nearest designated critical habitat area (Coastal California gnatcatcher) is approximately one mile to the northeast of the project site (EPA, 2024c). Given the urbanized setting of the project site and that the project site currently does not have any onsite vegetation, it is unlikely that any special-status species would occur onsite due to a lack of suitable habitat. Migratory birds protected under the Migratory Bird Treaty Act (MBTA) are also unlikely to be present onsite due to a lack of suitable nesting sites. As such, the project would not result in potential substantial adverse effects to plant and wildlife species, or their habitats protected under the Endangered Species Act. Therefore, the proposed project is in compliance with the Endangered Species Act.

See Attachment 8.

## **ERR 7**

### **Explosive and Flammable Hazards**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

**Explosive and Flammable Hazards (CEST and EA) – PARTNER**

<https://www.hudexchange.info/environmental-review/explosive-and-flammable-facilities>

- 1. Does the proposed HUD-assisted project include a hazardous facility (a facility that mainly stores, handles or processes flammable or combustible chemicals such as bulk fuel storage facilities and refineries)?**

No

→ Continue to Question 2.

Yes

**Explain:**

Click here to enter text.

→ Continue to Question 5.

- 2. Does this project include any of the following activities: development, construction, rehabilitation that will increase residential densities, or conversion?**

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

Yes → Continue to Question 3.

- 3. Within 1 mile of the project site, are there any current *or planned* stationary aboveground storage containers:**

- Of more than 100-gallon capacity, containing common liquid industrial fuels OR
- Of any capacity, containing hazardous liquids or gases that are not common liquid industrial fuels?

No → If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide all documents used to make your determination.

Yes → Continue to Question 4.

- 4. Is the Separation Distance from the project acceptable based on standards in the Regulation?**

Please visit HUD’s website for information on calculating Acceptable Separation Distance.

Yes

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

*Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the “assessed tank.”*

No

→ *Continue to Question 6.*

*Provide map(s) showing the location of the project site relative to any tanks and your separation distance calculations. If the map identifies more than one tank, please identify the tank you have chosen as the “assessed tank.”*

**5. Is the hazardous facility located at an acceptable separation distance from residences and any other facility or area where people may congregate or be present?**

Please visit HUD’s website for information on calculating Acceptable Separation Distance.

Yes

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

*Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.*

No

→ *Continue to Question 6.*

*Provide map(s) showing the location of the project site relative to residences and any other facility or area where people congregate or are present and your separation distance calculations.*

**6. For the project to be brought into compliance with this section, all adverse impacts must be mitigated. Explain in detail the exact measures that must be implemented to make the Separation Distance acceptable, including the timeline for implementation. If negative effects cannot be mitigated, cancel the project at this location.**

Mitigation as follows will be implemented:

- Protective barriers or modified building design to provide protection from blast overpressure and thermal radiation from the hazardous AST(s) located at Econo Lube N’ Tune & Brake #33
- The protective features will be designed by a licensed professional civil or structural engineer in accordance with the HUD Barrier Design Guidance for HUD assisted Projects near Hazardous facilities
- Both buildings and outdoor areas of the project will be protected to withstand blast overpressure and thermal radiation as per 24 CFR 51.203
- The protective features will be reviewed and approved by the County and implemented as part of the project design

Protective barriers, building modifications, or a combination thereof (protective features) must be designed in accordance with the HUD Barrier Design Guidance for HUD Assisted Projects near Hazardous Facilities, Guidebook 6600.G. A licensed professional civil or structural engineer is required to design and oversee construction of the protective features.

## **Worksheet Summary**

A search of the California Environmental Protection Agency's (CalEPA) website for aboveground petroleum storage and chemical storage sites was conducted to identify aboveground flammable materials storage within a 1-mile radius of the project site (CalEPA 2024). A review of the database search results identified a total of 113 facilities within 1 mile of the project site that reported storing flammable chemicals on site, of which 75 sites contained hazardous chemicals listed in Appendix I of 24 CFR Part 51 Subpart C. Chemicals not listed in § 51.201 were considered non-hazardous. HUD's Acceptable Separation Distance (ASD) Assessment Tool was used to calculate the minimum separation distance between the project site and these eight CalEPA sites. When calculating the ASD, all ASTs were assumed to be unpressurized and not diked, and the maximum quantity stored was used to calculate the ASD.

Results of the analysis identified three properties storing hazardous materials located below HUD's minimum ASD. The properties include Crimson Pipeline Stewart Station, Kirkhill Inc., and Econo Lube N' Tune & Brake #33 (Econo LTB). The location of the ASTs, surrounding barriers, and layout of the proposed project were evaluated to determine if natural or manmade barriers are in place which could adequately mitigate impacts following U.S. Code of Federal Regulations (CFR) Title 24 Section 51.205 Subpart C, which states that application of the ASD can be eliminated or modified if a barrier is constructed surrounding the hazard, at the site of the project, or in between the potential hazard and the proposed project. There is not a clear view of the ASTs stored at Crimson Pipeline Stewart Station or Kirkhill Inc. from the proposed project site, as the ASTs are located inside of the commercial buildings rather than outside. However, a clear line of sight between exists between the Econo Lube N' Tune & Brake #33, located immediately north of the project site, and the proposed development. Therefore, to protect future residents of the project from impacts related to explosive and flammable hazards, the project shall include either a protective barrier or modified building design that provides protection from blast over pressure and thermal radiation anticipated from the flammable material AST(s) located on the northern adjoining property which were determined to be potential hazards to the proposed project, and to which the Acceptable Separation Distance could not be met (potential hazard). Mitigation would follow guidelines outlined in MM-HAZ-1.

See Attachment 9.

## **ERR 8**

### **Farmlands Protection**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Farmlands Protection (CEST and EA) - PARTNER

<https://www.hudexchange.info/environmental-review/farmlands-protection>

### 1. Does your project include any activities, including new construction, acquisition of undeveloped land or conversion, that could convert agricultural land to a non-agricultural use?

Yes → *Continue to Question 2.*

No

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

### 2. Does your project meet one of the following exemptions?

- Project on land already in or committed to urban development or used for water storage ([7 CFR 658.2\(a\)](#)). To check whether the project location is located in an urbanized area, use the following US Census Bureau application: [TIGERweb](#)
  - Construction limited to on-farm structures needed for farm operations
  - Construction is limited to new minor secondary (accessory) structures such as a garage or storage shed
- Yes → *Based on the response, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination*
- No → *Continue to Question 3.*

### 3. Does “important farmland,” including prime farmland, unique farmland, or farmland of statewide or local importance regulated under the Farmland Protection Policy Act, occur on the project site?

You may use the links below to determine important farmland occurs on the project site:

- Utilize USDA Natural Resources Conservation Service’s (NRCS) Web Soil Survey <http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>
- Check with your city or county’s planning department and ask them to document if the project is on land regulated by the FPPA (zoning important farmland as non-agricultural does not exempt it from FPPA requirements)
- Contact NRCS at the local USDA service center <http://offices.sc.egov.usda.gov/locator/app?agency=nrcs> or your NRCS state soil scientist [http://soils.usda.gov/contact/state\\_offices/](http://soils.usda.gov/contact/state_offices/) for assistance

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide any documents used to make your determination.*

Yes → *Continue to Question 4.*

**4. Consider alternatives to completing the project on important farmland and means of avoiding impacts to important farmland.**

- Complete form [AD-1006, "Farmland Conversion Impact Rating"](#) and contact the state soil scientist before sending it to the local NRCS District Conservationist.
- Work with NRCS to minimize the impact of the project on the protected farmland. When you have finished with your analysis, return a copy of form AD-1006 to the USDA-NRCS State Soil Scientist or his/her designee informing them of your determination.

**Work with the RE/HUD to determine how the project will proceed. Document the conclusion:**

Project will proceed with mitigation.

**Explain in detail the proposed measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

[Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

Project will proceed without mitigation.

**Explain why mitigation will not be made here:**

[Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide form AD-1006 and all other documents used to make your determination.*

**Worksheet Summary**

According to the California Department of Conservation (DOC) California Important Farmland Finder (DOC 2022), the project site and surrounding area is designated as "Urban and Built-up Land." The DOC defines Urban and Built-up Land as land that is "used for residential, industrial, commercial, construction, institutional, public administration, railroad and other transportation yards, cemeteries, airports, golf courses, sanitary landfills, sewage treatment, water control structures, and other developed purposes." As such, the project site does not contain farmland, and the conversion of farmland to a non-agricultural use would not occur. Therefore, the project is in compliance with the Farmland Protection Policy Act.

See Attachment 10.

**ERR 9**

**Floodplain Management**

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Floodplain Management (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/floodplain-management>

1. Does [24 CFR 55.12\(c\)](#) exempt this project from compliance with HUD’s floodplain management regulations in Part 55?

Yes

Provide the applicable citation at 24 CFR 55.12(c) here. If project is exempt under 55.12(c)(6) or (8), provide supporting documentation.

Click here to enter text.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Continue to the Worksheet Summary.

No → Continue to Question 2.

2. Provide a FEMA/FIRM map showing the site.

The Federal Emergency Management Agency (FEMA) designates floodplains. The [FEMA Map Service Center](#) provides this information in the form of FEMA Flood Insurance Rate Maps (FIRMs).

Does your project occur in a floodplain?

No → Continue to the Worksheet Summary below.

Yes

Select the applicable floodplain using the FEMA map or the best available information:

Floodway → Continue to Question 3, Floodways

Coastal High Hazard Area (V Zone) → Continue to Question 4, Coastal High Hazard Areas

500-year floodplain (B Zone or shaded X Zone) → Continue to Question 5, 500-year Floodplains

100-year floodplain (A Zone) → The 8-Step Process is required. Continue to Question 6, 8-Step Process

3. **Floodways**

Is this a functionally dependent use?

Yes

The 8-Step Process is required. Work with HUD or the RE to assist with the 8-Step Process.  
→ *Continue to Worksheet Summary.*

- No → *Federal assistance may not be used at this location unless an exception in 55.12(c) applies. You must either choose an alternate site or cancel the project.*

**4. Coastal High Hazard Area**

**Is this a critical action such as a hospital, nursing home, fire station, or police station?**

- Yes → *Critical actions are prohibited in coastal high hazard areas unless an exception in 55.12(c) applies. You must either choose an alternate site or cancel the project.*

- No

**Does this action include new construction that is not a functionally dependent use, existing construction (including improvements), or reconstruction following destruction caused by a disaster?**

- Yes, there is new construction of something that is not a functionally dependent use.  
New construction must be designed to FEMA standards for V Zones at 44 CFR 60.3(e) (24 CFR 55.1(c)(3)(i)).

→ *Continue to Question 6, 8-Step Process*

- No, this action concerns only existing construction.

Existing construction must have met FEMA elevation and construction standards for a coastal high hazard area or other standards applicable at the time of construction.

→ *Continue to Question 6, 8-Step Process*

**5. 500-year Floodplain**

**Is this a critical action?**

- No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Continue to the Worksheet Summary below.*

- Yes → *Continue to Question 6, 8-Step Process*

**6. 8-Step Process.**

**Is this 8-Step Process required? Select one of the following options:**

- 8-Step Process applies.

This project will require mitigation and may require elevating structure or structures. See the link to the HUD Exchange above for information on HUD's elevation requirements.

→ *Work with the RE/HUD to assist with the 8-Step Process. Continue to Worksheet Summary.*

- 5-Step Process is applicable per 55.12(a)(1-4).

**Provide the applicable citation at 24 CFR 55.12(a) here.**

Click here to enter text.

→ *Work with the RE/HUD to assist with the 5-Step Process. Continue to Worksheet Summary.*

- 8-Step Process is inapplicable per 55.12(b)(1-5).

**Provide the applicable citation at 24 CFR 55.12(b) here.**

Click here to enter text.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

**Worksheet Summary**

No HUD-approved Climate-Informed Science Approach maps are available for the project site; however, FEMA has mapped the 0.2% annual chance of flood (i.e., 500-year floodplain). For non-critical actions, where FEMA has defined the 0.2-percent-annual-chance floodplain, the FFRMS floodplain is the area that FEMA has designated as within the 0.2-percent-annual-chance floodplain. Therefore, this analysis uses the 0.2-Percent Annual Chance Floodplain Approach. As indicated on FEMA Flood Insurance Rate Map panel (06059C0042J), the project site is not located within the FEMA-designated 500-year floodplain. Based on the project location and designation as a non-critical action, the proposed project is not in the coastal or riverine FFRMS floodplain. Therefore, the project is in compliance with 24 CFR Part 55 and EO 11988.

See Attachment 3.

**ERR 10**

**Historic Preservation**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Historic Preservation (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/historic-preservation>

### Threshold

#### Is Section 106 review required for your project?

- No, because a Programmatic Agreement states that all activities included in this project are exempt. (See the [PA Database](#) to find applicable PAs.)

**Either provide the PA itself or a link to it here. Mark the applicable exemptions or include the text here:**

Click here to enter text.

→ *Continue to the Worksheet Summary.*

- No, because the project consists solely of activities included in a No Potential to Cause Effects memo or other determination [36 CFR 800.3(a)(1)].

**Either provide the memo itself or a link to it here. Explain and justify the other determination here:**

Click here to enter text.

→ *Continue to the Worksheet Summary.*

- Yes, because the project includes activities with potential to cause effects (direct or indirect). → *Continue to Step 1.*

#### **The Section 106 Process**

After determining the need to do a Section 106 review, HUD or the RE will initiate consultation with regulatory and other interested parties, identify and evaluate historic properties, assess effects of the project on properties listed on or eligible for the National Register of Historic Places, and resolve any adverse effects through project design modifications or mitigation.

Step 1: Initiate consultation

Step 2: Identify and evaluate historic properties

Step 3: Assess effects of the project on historic properties

Step 4: Resolve any adverse effects

Only RE or HUD staff may initiate the Section 106 consultation process. Partner entities may gather information, including from SHPO records, identify and evaluate historic properties, and make initial assessments of effects of the project on properties listed in or eligible for the National Register of Historic Place. Partners should then provide their RE or HUD with all of their analysis and documentation so that they may initiate consultation.

## Step 1 - Initiate Consultation

The following parties are entitled to participate in Section 106 reviews: Advisory Council on Historic Preservation; State Historic Preservation Officers (SHPOs); federally recognized Indian tribes/Tribal Historic Preservation Officers (THPOs); Native Hawaiian Organizations (NHOs); local governments; and project grantees. The general public and individuals and organizations with a demonstrated interest in a project may participate as consulting parties at the discretion of the RE or HUD official. Participation varies with the nature and scope of a project. Refer to HUD's website for guidance on consultation, including the required timeframes for response. Consultation should begin early to enable full consideration of preservation options.

Use the [When To Consult With Tribes checklist](#) within [Notice CPD-12-006: Process for Tribal Consultation](#) to determine if the RE or HUD should invite tribes to consult on a particular project. Use the [Tribal Directory Assessment Tool \(TDAT\)](#) to identify tribes that may have an interest in the area where the project is located. Note that only HUD or the RE may initiate consultation with Tribes. Partner entities may prepare a draft letter for the RE or HUD to use to initiate consultation with tribes, but may not send the letter themselves.

**List all organizations and individuals that you believe may have an interest in the project here:**  
State Historic Preservation Office (SHPO)

→ *Continue to Step 2.*

## Step 2 - Identify and Evaluate Historic Properties

**Provide a preliminary definition of the Area of Potential Effect (APE), either by entering the address(es) or providing a map depicting the APE.** Attach an additional page if necessary.

The Project APE is located at 323 North Brea Boulevard, in the City of Brea, Orange County, California 92821. The Project APE is approximately 0.437-acres and encompasses Assessor Parcel Number (APN) 269-301-02.

Gather information about known historic properties in the APE. Historic buildings, districts and archeological sites may have been identified in local, state, and national surveys and registers, local historic districts, municipal plans, town and county histories, and local history websites. If not already listed on the National Register of Historic Places, identified properties are then evaluated to see if they are eligible for the National Register. Refer to HUD's website for guidance on identifying and evaluating historic properties.

**In the space below, list historic properties identified and evaluated in the APE.**

Every historic property that may be affected by the project should be listed. For each historic property or district, include the National Register status, whether the SHPO has concurred with the finding, and whether information on the site is sensitive. Attach an additional page if necessary.

Provide the documentation (survey forms, Register nominations, concurrence(s) and/or objection(s), notes, and photos) that justify your National Register Status determination.

**Was a survey of historic buildings and/or archeological sites done as part of the project?**

If the APE contains previously unsurveyed buildings or structures over 50 years old, or there is a likely presence of previously unsurveyed archeological sites, a survey may be necessary. For Archeological surveys, refer to HP Fact Sheet #6, [Guidance on Archeological Investigations in HUD Projects](#).

Yes → Provide survey(s) and report(s) and continue to Step 3.

Additional notes:

[Click here to enter text.](#)

No → Continue to Step 3.

**Step 3 - Assess Effects of the Project on Historic Properties**

Only properties that are listed on or eligible for the National Register of Historic Places receive further consideration under Section 106. Assess the effect(s) of the project by applying the Criteria of Adverse Effect. ([36 CFR 800.5](#)) Consider direct and indirect effects as applicable as per HUD guidance.

**Choose one of the findings below to recommend to the RE or HUD.**

Please note: this is a recommendation only. It is **not** the official finding, which will be made by the RE or HUD, but only your suggestion as a Partner entity.

No Historic Properties Affected

**Document reason for finding:**

No historic properties present.

Historic properties present, but project will have no effect upon them.

No Adverse Effect

**Document reason for finding and provide any comments below.**

Comments may include recommendations for mitigation, monitoring, a plan for unanticipated discoveries, etc.

[Click here to enter text.](#)

Adverse Effect

**Document reason for finding:**

Copy and paste applicable Criteria into text box with summary and justification.

Criteria of Adverse Effect: [36 CFR 800.5](#)

[Click here to enter text.](#)

**Provide any comments below:**

Comments may include recommendations for avoidance, minimization, and/or mitigation.

Dudek prepared a Cultural Resources Inventory and Evaluation Report for the project in December 2024 to determine if the project would impact any historic properties pursuant to Section 106 of the NHPA. The preparation of the report included the development of an area of potential effects (APE), a records search of the California Historical Resources Information System (CHRIS), a review of historic aerial

imagery and historic topographic maps, and a review of the geomorphological context of the project APE. The findings of the report are summarized as follows.

#### Area of Potential Effects

The Project APE is located at 323 North Brea Boulevard (APN 269-301-02). The APE is currently undeveloped and encompasses approximately 0.437 acres.

#### Records Search

A confidential records search of the APE and a 1-mile buffer was conducted at the South-Central Coastal Information Center at California State University, Fullerton to identify historic properties located within the APE that might be affected by the proposed undertaking. The records search indicated that 33 previous cultural resources technical investigations were conducted within 1 mile of the APE and 3 previously identified cultural resources have been recorded within 1 mile of the APE. None of the previously identified cultural resources are located within or adjacent to the APE.

#### Determination

No historic properties were identified within or adjacent to the APE. Dudek's report recommends a finding of No Historic Properties Affected for the project under Section 106 of the NHPA. Implementation of **MM-CUL-1** and **MM-CUL-2** would avoid adverse impacts related to the inadvertent discovery of archaeological resources or human remains during construction consistent with NHPA Section 106 regulations.

#### Consultation

Based on a search of HUD's Tribal Directory Assessment Tool (TDAT), no federally recognized tribes that may have an interest in the area where the project is located were identified. The City sent a letter to the SHPO on December 9, 2024, requesting concurrence on the finding of No Historic Properties Affected. The SHPO did not respond within 30 days of receiving the City's request for a finding or determination. As a result, the City's consultation requirements with the SHPO are complete (see **Attachments 11, 12, and 13**).

*Remember to provide all documentation that justifies your National Register Status determination and recommendations along with this worksheet.*

**ERR 11**

**Noise**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Noise (EA Level Reviews) – PARTNER

<https://www.hudexchange.info/programs/environmental-review/noise-abatement-and-control>

### 1. What activities does your project involve? Check all that apply:

- New construction for residential use

NOTE: HUD assistance to new construction projects is generally prohibited if they are located in an Unacceptable zone, and HUD discourages assistance for new construction projects in Normally Unacceptable zones. See 24 CFR 51.101(a)(3) for further details.  
→ Continue to Question 2.

- Rehabilitation of an existing residential property

NOTE: For major or substantial rehabilitation in Normally Unacceptable zones, HUD encourages mitigation to reduce levels to acceptable compliance standards. For major rehabilitation in Unacceptable zones, HUD strongly encourages mitigation to reduce levels to acceptable compliance standards. See 24 CFR 51 Subpart B for further details.  
→ Continue to Question 2.

- None of the above

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.

### 2. Complete the Preliminary Screening to identify potential noise generators in the vicinity (1000’ from a major road, 3000’ from a railroad, or 15 miles from an airport).

Indicate the findings of the Preliminary Screening below:

- There are no noise generators found within the threshold distances above.

→ If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map showing the location of the project relative to any noise generators.

- Noise generators were found within the threshold distances.

→ Continue to Question 3.

### 3. Complete the Noise Assessment Guidelines to quantify the noise exposure. Indicate the findings of the Noise Assessment below:

Acceptable (65 decibels or less; the ceiling may be shifted to 70 decibels in circumstances described in §24 CFR 51.105(a))

**Indicate noise level here:** [Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide noise analysis, including noise level and data used to complete the analysis.*

Normally Unacceptable: (Above 65 decibels but not exceeding 75 decibels; the floor may be shifted to 70 decibels in circumstances described in 24 CFR 51.105(a))

**Indicate noise level here:** [Click here to enter text.](#)

If project is rehabilitation:

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

If project is new construction:

**Is the project in a largely undeveloped area<sup>1</sup>?**

No

Yes → ***The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i).***

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis.*

Unacceptable: (Above 75 decibels)

**Indicate noise level here:** [Click here to enter text.](#)

If project is rehabilitation:

*HUD strongly encourages conversion of noise-exposed sites to land uses compatible with high noise levels. Consider converting this property to a non-residential use compatible with high noise levels.*

→ *Continue to Question 4. Provide noise analysis, including noise level and data used to complete the analysis, and any other relevant information.*

If project is new construction:

***The project requires completion of an Environmental Impact Statement (EIS) pursuant to 51.104(b)(1)(i). Work with HUD or the RE to either complete an EIS or obtain a waiver signed by the appropriate authority.***

→ *Continue to Question 4.*

**4. HUD strongly encourages mitigation be used to eliminate adverse noise impacts. Work with the RE/HUD on the development of the mitigation measures that must be implemented to mitigate for the impact or effect, including the timeline for implementation.**

Mitigation as follows will be implemented:

---

<sup>1</sup> A largely undeveloped area means the area within 2 miles of the project site is less than 50 percent developed with urban uses and does not have water and sewer capacity to serve the project.

→ Provide drawings, specifications, and other materials as needed to describe the project's noise mitigation measures.

Continue to the Worksheet Summary.

No mitigation is necessary.

**Explain why mitigation will not be made here:**

A noise analysis of traffic noise from Lambert Road and Brea Boulevard carried out using HUD's DNL Calculator indicated that worst-case exterior building façade noise levels would be higher than the "acceptable" HUD standard of 65 A-weighted decibels (dBA) DNL. The analysis determined that the exposure from traffic noise along the northern, northeastern, and western building façades and the podium courtyard (southern and western façades) would range from 66 to 72 dBA DNL, exceeding HUD's exterior noise standard by up to 7 dBA. To derive the anticipated exterior-to-interior noise reduction at each representative receiver, the composite transmission loss (TL) per sound transmission class (STC) window rating was calculated using provided residential unit and window dimensions (feet), and assuming a standard, non-upgraded exterior wall STC rating of 35 and a standard, non-upgraded window STC rating of 25. Minimum interior noise reduction with typical new construction windows and doors closed was calculated for the project to be 33 dBA, resulting in interior noise levels ranging from 33 to 39 dBA, which are all below the HUD interior noise standard of 45 dBA. Therefore, the proposed project would be in compliance with 24 CFR Part 51, Subpart B

→ Continue to the Worksheet Summary.

**Worksheet Summary**

See Noise Technical Memorandum, Prepared by Dudek in November 2024 (Attachment 14).

**ERR 12**

**Sole Source Aquifers**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## **Sole Source Aquifers (CEST and EA) - PARTNER**

<https://www.hudexchange.info/environmental-review/sole-source-aquifers>

### **1. Is the project located on a sole source aquifer (SSA)<sup>1</sup>?**

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination, such as a map of your project or jurisdiction in relation to the nearest SSA.*

Yes → *Continue to Question 2.*

### **2. Does the project consist solely of acquisition, leasing, or rehabilitation of an existing building(s)?**

Yes → *The review is in compliance with this section. Continue to the Worksheet Summary below.*

No → *Continue to Question 3.*

### **3. Does your region have a memorandum of understanding (MOU) or other working agreement with EPA for HUD projects impacting a sole source aquifer?**

Contact your Field or Regional Environmental Officer or visit the HUD webpage at the link above to determine if an MOU or agreement exists in your area.

Yes → *Continue to Question 4.*

No → *Continue to Question 5.*

### **4. Does your MOU or working agreement exclude your project from further review?**

Yes → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide documentation used to make your determination and document where your project fits within the MOU or agreement.*

No → *Continue to Question 5.*

### **5. Will the proposed project contaminate the aquifer and create a significant hazard to public health?**

Consult with your Regional EPA Office. Your consultation request should include detailed information about your proposed project and its relationship to the aquifer and associated streamflow source area.

---

<sup>1</sup> A sole source aquifer is defined as an aquifer that supplies at least 50 percent of the drinking water consumed in the area overlying the aquifer. This includes streamflow source areas, which are upstream areas of losing streams that flow into the recharge area.

EPA will also want to know about water, storm water and waste water at the proposed project. Follow your MOU or working agreement or contact your Regional EPA office for specific information you may need to provide. EPA may request additional information if impacts to the aquifer are questionable after this information is submitted for review.

- No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide your correspondence with the EPA and all documents used to make your determination.*
- Yes → *The RE/HUD will work with EPA to develop mitigation measures. If mitigation measures are approved, attach correspondence with EPA and include the mitigation measures in your environmental review documents and project contracts. If EPA determines that the project continues to pose a significant risk to the aquifer, federal financial assistance must be denied. Continue to Question 6.*

### **Worksheet Summary**

The project site is not located within an area designated by the EPA as being supported by a sole source aquifer. The project site is located approximately 105 miles to the northwest of the nearest sole source aquifer, which is the Campo/Cottonwood Creek Aquifer in San Diego County. As such, the project site is not located in a region that depends solely on an aquifer for access to water or located within a sole source aquifer recharge area. Thus, no impact on sole source aquifers would occur. Therefore, the project is in compliance with the Safe Drinking Water Act of 1974, as amended.

See Attachment 15.

**ERR 13**

**Wetlands**

**U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Wetlands (CEST and EA) – Partner

<https://www.hudexchange.info/environmental-review/wetlands-protection>

**1. Does this project involve new construction as defined in Executive Order 11990, expansion of a building’s footprint, or ground disturbance?**

The term "new construction" includes draining, dredging, channelizing, filling, diking, impounding, and related activities and construction of any any structures or facilities.

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

Yes → *Continue to Question 2.*

**2. Will the new construction or other ground disturbance impact a wetland as defined in E.O. 11990?**

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below. Provide a map or any other relevant documentation to explain your determination.*

Yes → *Work with HUD or the RE to assist with the 8-Step Process.* *Continue to Question 3.*

**3. Does Section 55.12 state that the 8-Step Process is not required?**

No, the 8-Step Process applies.

This project will require mitigation and may require elevating structure or structures. See the link to the HUD Exchange above for information on HUD’s elevation requirements.

→ *Work with the RE/HUD to assist with the 8-Step Process. Continue to Worksheet Summary.*

5-Step Process is applicable per 55.12(a).

**Provide the applicable citation at 24 CFR 55.12(a) here.**

[Click here to enter text.](#)

→ *Work with the RE/HUD to assist with the 5-Step Process. This project may require mitigation or alternations. Continue to Worksheet Summary.*

8-Step Process is inapplicable per 55.12(b).

**Provide the applicable citation at 24 CFR 55.12(b) here.**

[Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

8-Step Process is inapplicable per 55.12(c).

**Provide the applicable citation at 24 CFR 55.12(c) here.**

[Click here to enter text.](#)

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to Worksheet Summary.*

### **Worksheet Summary**

No wetlands are located on or near the project site. The nearest wetland feature is the Brea Canyon Channel, a concrete-lined riverine feature approximately 0.18 miles west of the project site. As such, no impact to wetlands would occur. Therefore, the project is in compliance with Executive Order 11990.

See Attachment 16.

**ERR 14**

**Wild and Scenic Rivers**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Wild and Scenic Rivers (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/wild-and-scenic-rivers>

### 1. Is your project within proximity of a Wild and Scenic River, Study River, or Nationwide Rivers Inventory River?

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation used to make your determination.*

Yes → *Continue to Question 2.*

### 2. Could the project do *any* of the following?

- Have a direct and adverse effect within Wild and Scenic River Boundaries,
- Invade the area or unreasonably diminish the river outside Wild and Scenic River Boundaries, or
- Have an adverse effect on the natural, cultural, and/or recreational values of a NRI segment.

Consult with the appropriate federal/state/local/tribal Managing Agency(s), pursuant to Section 7 of the Act, to determine if the proposed project may have an adverse effect on a Wild & Scenic River or a Study River and, if so, to determine the appropriate avoidance or mitigation measures.

#### Select one:

The Managing Agency has concurred that the proposed project will not alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Provide documentation of the consultation (including the Managing Agency’s concurrence) and any other documentation used to make your determination.*

The Managing Agency was consulted and the proposed project may alter, directly, or indirectly, any of the characteristics that qualifies or potentially qualifies the river for inclusion in the NWSRS.

→ *The RE/HUD must work with the Managing Agency to identify mitigation measures to mitigate the impact or effect of the project on the river.*

## Worksheet Summary

The EPA's NEPAassist tool was used to determine the proximity of the project site to designated Wild and Scenic Rivers. The project site is not located near any NWSRS river, including designated Wild and Scenic Rivers, study rivers, and Nationwide Rivers Inventory (NRI) river segments. The nearest designated Wild and Scenic River is the Deep Creek Wild and Scenic River, approximately 50 miles to the northeast in the San Bernardino National Forest. As such, the project would not result in impacts on designated Wild and Scenic Rivers. Therefore, the project is in compliance with the Wild and Scenic Rivers Act of 1968.

See Attachment 17.

**ERR 15**

**Environmental Justice**

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT  
WASHINGTON, DC 20410-1000

This Worksheet was designed to be used by those “Partners” (including Public Housing Authorities, consultants, contractors, and nonprofits) who assist Responsible Entities and HUD in preparing environmental reviews, but legally cannot take full responsibilities for these reviews themselves. Responsible Entities and HUD should use the RE/HUD version of the Worksheet.

## Environmental Justice (CEST and EA) – PARTNER

<https://www.hudexchange.info/environmental-review/environmental-justice>

**HUD strongly encourages starting the Environmental Justice analysis only after all other laws and authorities, including Environmental Assessment factors if necessary, have been completed.**

**1. Were any adverse environmental impacts identified in any other compliance review portion of this project’s total environmental review?**

Yes → *Continue to Question 2.*

No → *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

**2. Were these adverse environmental impacts disproportionately high for low-income and/or minority communities?**

Yes

**Explain:**

Click here to enter text.

→ *The RE/HUD must work with the affected low-income or minority community to decide what mitigation actions, if any, will be taken. Provide any supporting documentation.*

No

**Explain:**

Adverse environmental impacts related to toxic and contaminated materials, explosive and flammable hazards, and noise were identified in the EA. With mitigation, all adverse impacts associated with the proposed development can be reduced to less than significant levels. As discussed in the EA, the project would not have any disproportionately high or adverse impacts to low-income or minority communities.

→ *If the RE/HUD agrees with this recommendation, the review is in compliance with this section. Continue to the Worksheet Summary below.*

### **Worksheet Summary**

The EPA’s EJScreen mapping and screening tool was used to evaluate environmental and demographic data for the project site and determine whether the project would have disproportionate adverse environmental impacts on future residents and/or the surrounding community. Environmental factors are measured using 11 environmental indicators (EI), and demographic factors are measured using seven demographic indicators (DI). An EJScreen report for the subject property was run using a 0.125-mile-

radius centered around the project site (study area). According to the demographic data obtained from EJScreen, which reflects American Community Survey statistics collected by the U.S. Census Bureau from 2018 through 2022, the total population within this study area is 94. Approximately 56% of the study area's population belongs to a minority, with 33% identifying as Hispanic, 14% as Asian, and 1% identifying as two or more races. The remaining 44% of the population is White. Results from the EJScreen assessment indicate that 23% of the study area population is low-income. Based on the factors evaluated by the EJScreen tool, the proposed project is not expected to pose any aggregate environmental justice issues based on the factors evaluated by the EJScreen tool.

As discussed throughout this EA, any adverse effects related to various environmental topic areas would be mitigated and reduced to less than significant levels. Thus, the proposed project, which is an infill site surrounded by multi-family and commercial uses, would not introduce new uses that could result in disproportionately high and adverse human health or environmental effects on existing minority and low-income populations in the project vicinity, nor would the project induce population growth in an area subject to health risks due to poor environmental conditions.

See Attachment 18.
